

2009 Second International Conference on Dependability

(DEPEND 2009)

**Athens, Greece
18 – 23 June 2009**

**IEEE Catalog Number: CFP0998G-PRT
ISBN: 978-1-4244-4305-5**

2009 Second International Conference on Dependability **DEPEND 2009**

Table of Contents

Preface

Committee

Reviewers

DEPEND 1: Dependability and Security I

A Dependable Threshold Broadcast Encryption System for Key Distribution in Mobile Ad Hoc Network	1
<i>Piyi Yang, Zhenfu Cao, and Xiaolei Dong</i>	
Current and Emerging Security, Trust, Dependability and Privacy Challenges in Mobile Telecommunications	7
<i>Reijo M. Savola</i>	
The Design and Analysis of IN Disaster Tolerant System Based on Birth-Death Process	13
<i>Hong-man Wang, Fang-chun Yang, and Gu-yue Han</i>	
TMAC: Taint-Based Memory Protection via Access Control	19
<i>Lei Wang, Chen Fang, Bing Mao, and Li Xie</i>	

DEPEND 2: Dependability and Security II

An Algorithm Based Fault Tolerant Scheme for Elliptic Curve Public-Key Cryptography	28
<i>Chang N. Zhang and Xiao Wei Liu</i>	
A Secure and Survivable Architecture for SCADA Systems	34
<i>I. Nai Fovino, A. Carcano, and M. Masera</i>	
Quantitative Assessment for Organisational Security & Dependability	40
<i>Yudistira Asnar, Massimo Felici, Fabio Massacci, Alessandra Tedeschi, and Artsiom Yautsiukhin</i>	

Planning Dependability of Virtualised Networks	46
<i>Marco D. Aime, Paolo Carlo Pomi, and Marco Vallini</i>	

DEPEND 3: Dependability and Security III

AFPL2, an Abstract Language for Firewall ACLs with NAT Support	52
<i>S. Pozo, A. J. Varela-Vaca, and R. M. Gasca</i>	
Securing Web Servers Using Self Cleansing Intrusion Tolerance (SCIT)	60
<i>Anantha K. Bangalore and Arun K. Sood</i>	
Towards a Policy-Driven Framework for Managing Service Dependability	66
<i>Jorge Bernal Bernabé, Juan M. Marín Pérez, Daniel J. Martínez Manzano, Manuel Gil Pérez, and Antonio F. Gómez Skarmeta</i>	
An Appraisal to Assess the Security of Database Configurations	73
<i>Afonso Araújo Neto, Marco Vieira, and Henrique Madeira</i>	

DEPEND 4: Dependability Facets I

Formalizing Safety Requirements Using Controlling Automata	81
<i>Zhe Chen and Gilles Motet</i>	
Lock-Free Synchronization of Data Flow between Time-Triggered and Event-Triggered Activities in a Dependable Real-Time System	87
<i>Josef Templ, Johannes Pletzer, and Wolfgang Pree</i>	
An Investigation of Fault Tolerance Behavior of 32-Bit DLX Processor	93
<i>Pooria M. Yaghini, Hamid R. Zarandi, Ashkan Eghbal, Akbar Jafarzadeh, and Saeedeh Eskandari</i>	
Gaining Assurance in a Voter-Verifiable Voting System	99
<i>Eugenio Alberdi, Lorenzo Strigini, Kieran Leach, Peter Ryan, Philippe Palanque, and Marco Winckler</i>	

DEPEND 5: Dependability Facets II

A Logging Approach for Effective Dependability Evaluation of Complex Systems	105
<i>M. Cinque, D. Cotroneo, and A. Pecchia</i>	
Development of Applications Based on Security Patterns	111
<i>Daniel Serrano, José F. Ruíz, Antonio Muñoz, Antonio Maña, Alvaro Armenteros, and Beatriz Gallego-Nicaso Crespo</i>	
Hands on Dependability Economics	117
<i>Theodosios Tsiakis and Panagiotis Katsaros</i>	
Extending Test-Driven Development for Robust Web Services	122
<i>Nuno Laranjeiro and Marco Vieira</i>	

DEPEND 6: Dependability, Adaptability, and New Technologies

Dynamically Configurable Membership Support for Dependable Applications in Mobile Ad Hoc Networks	128
<i>Juan Carlos García Ortiz, Stefan Beyer, and Pablo Galdámez</i>	
Almost Triggerless Writeset Extraction in Multiversioned Databases	136
<i>Raúl Salinas-Montegudo and Francesc D. Muñoz-Escoí</i>	
Diagnosis Service for Software Component and Its Application to a Heterogeneous Sensor Data Management System	143
<i>Thi-Quynh Bui, Oum-El-Kheir Aktouf, Michel Dang, Levent Gürgen, and Claudia Roncancio</i>	
Decision Support Console for System Administration Based on an Expert System Approach	150
<i>Francisco José de la Torre, Laura García Muñoz, Roberto González Barahona, Maite Avelino Carmona, and Manuel Gil Pérez</i>	
Managing the Impact of On-chip Temperature on the Lifetime Reliability of Reliably Overclocked Systems	156
<i>Viswanathan Subramanian, Prem Kumar Ramesh, and Arun K. Somani</i>	

Work in Progress

Modelling and Evaluation of a Game-Theory Approach for Airborne Conflict Resolution in Omnet++	162
<i>Paolo Masci and Alessandra Tedeschi</i>	
Statistical Model Checking for Steady State Dependability Verification	166
<i>Diana El Rabih and Nihal Pekergin</i>	

Author Index
