

2009 IEEE Symposium on Computational Intelligence and Games

(CIG 2009)

**Milano, Italy
7 – 10 September 2009**

**IEEE Catalog Number: CFP09CIG-PRT
ISBN: 978-1-4244-4814-2**

Table of Contents

pag. 1-8	Anders Drachen, Alessandro Canossa and Georgios Yannakakis. Player Modeling using Self-Organization in Tomb Raider: Underworld
pag. 9-16	Colin Ward and Peter Cowling. Monte Carlo Search Applied to Card Selection in Magic: The Gathering
pag. 17-24	Philip Hingston. Iterated Prisoner's Dilemma for Species
pag. 25-31	Garrison Greenwood. Deceptive Strategies for the Evolutionary Minority Game
pag. 32-37	Simon Lucas. Temporal Difference Learning with Interpolated Table Value Functions
pag. 38-45	Leo Galway, Darryl Charles and Michaela Black. Improving Temporal Difference Game Agent Control Using a Dynamic Exploration Rate During Control Learning
pag. 46-52	Johan Hagelbaeck and Stefan J. Johansson. Measuring player experience on runtime dynamic difficulty scaling in an RTS game
pag. 53-60	Peter Burrow and Simon Lucas. Evolution versus Temporal Difference Learning for playing Ms. Pac-Man
pag. 61-68	Luis Peña, Sascha Ossowski and José-María Peña. vBattle: A new Framework to Simulate Medium-Scale Battles in Individual-per-Individual Basis
pag. 69-74	Daniel Cuadrado and Yago Saez. Chuck Norris rocks!
pag. 75-79	Su-Hyung Jang, Jong-Won Yoon and Sung-Bae Cho. Optimal Strategy Selection of NPC on RTS Game using Speciated Evolutionary Algorithm
pag. 80-87	Edgar Galván-López and Michael O'Neill. On The Effects of Locality in a Permutation Problem: The Sudoku Puzzle
pag. 88-95	Klaus Jantke. Dramaturgical Design of the Narrative in Digital Games: AI Planning of Conflicts in Non-Linear Spaces of Time
pag. 96-103	Steven Tanimoto, Tyler Robison and Sandra Fan. A Game-Building Environment for Research in Collaborative Design

Table of Contents

pag. 104-111	Marcin Szubert, Wojciech Jaśkowski and Krzysztof Krawiec. Coevolutionary Temporal Difference Learning for Othello
pag. 112-116	Belal Al-Khateeb and Graham Kendall. Introducing a Round Robin Tournament into Blondie24
pag. 117-124	Jacek Mańdziuk and Krzysztof Mossakowski. Neural networks compete with expert human players in solving the Double Dummy Bridge Problem
pag. 125-131	Garrett Nicolai and Robert Hilderman. No-Limit Texas Hold'em Poker Agents Created with Evolutionary Neural Networks
pag. 132-139	Chris Pedersen, Julian Togelius and Georgios Yannakakis. Modeling Player Experience in Super Mario Bros
pag. 140-147	Ben Weber and Michael Mateas. A Data Mining Approach to Strategy Prediction
pag. 148-155	Luigi Cardamone, Daniele Loiacono and Pier Luca Lanzi. Learning Drivers for TORCS Through Imitation Using Supervised Methods
pag. 156-161	Julian Togelius, Sergey Karakovskiy, Jan Koutnik, and Juergen Schmidhuber. Super Mario Evolution
pag. 162-169	Lori DeLooze and Wesley Viner. Fuzzy Q-Learning in a Nondeterministic Environment: Developing an Intelligent Ms. Pac-Man Agent
pag. 170-177	Ben Cowley, Darryl Charles, Michaela Black and Ray Hickey. Analyzing Player Behavior in Pacman using Feature-driven Decision Theoretic Predictive Modeling
pag. 178-185	Maarten Schadd, Mark Winands and Jos Uiterwijk. ChanceProbCut: Forward Pruning in Chance Nodes
pag. 186-193	Nicola Basilico, Nicola Gatti and Thomas Rossi. Capturing Augmented Sensing Capabilities and Intrusion Delay in Patrolling-Intrusion Games
pag. 194-200	Michele Pace. How a Genetic Algorithm Learns to Play Traveler's Dilemma Choosing Dominated Strategies (non Nash equilibrium) to Achieve Greater Payoffs.
pag. 201-208	Wojciech Jaśkowski and Krzysztof Krawiec. Formal Analysis and Algorithms for Extracting Coordinate Systems of Games

CIG-2009

IEEE Symposium on Computational Intelligence & Games
September 7-10, 2009 Politecnico di Milano, Milano, Italy - www.ieee-cig.org

Table of Contents

pag. 209-216	Markus Kemmerling, Niels Ackermann, Nicola Beume, Mike Preuss, Sebastian Uellenbeck and Wolfgang Walz. Is Human-like and Well Playing Contradictory for Diplomacy Bots?
pag. 217-224	Raul Arrabales, Agapito Ledezma and Araceli Sanchis. Towards Conscious-like Behavior in Computer Game Characters
pag. 225-232	Manish Mehta and Andrea Corradini. Evaluation of a Domain Independent Approach to Natural Language Processing for Game-like User Interfaces
pag. 233-240	Riccardo Berta, Francesco Bellotti, Alessandro De Gloria and Ludovica Primavera. A task annotation model for SandBox Serious Games
pag. 241-248	Erin Hastings, Ratan Guha and Kenneth Stanley. Evolving Content in the Galactic Arms Race Video Game
pag. 249-255	David Robles and Simon Lucas. A Simple Tree Search Method for Playing Ms. Pac-Man
pag. 256-262	Enrique Onieva, David A. Pelta, Javier Alonso, Vicente Milanés and Joshué Pérez. A Modular Parametric Architecture for the TORCS Racing Engine
pag. 263-270	Diego Perez, Gustavo Recio, Yago Saez and Pedro Isasi. Evolving a Fuzzy Controller for a Car Racing Competition
pag. 271-278	Jorge Muñoz, German Gutierrez and Araceli Sanchis. Controller for TORCS created by imitation.
pag. 279-286	Marc Ebner and Thorsten Tiede. Evolving Driving Controllers Using Genetic Programming

CIG-2009

IEEE Symposium on Computational Intelligence & Games
 September 7-10, 2009 Politecnico di Milano, Milano, Italy - www.ieee-cig.org

Table of Contents

pag. 287-293	Matt Parker and Bobby D. Bryant. Backpropagation without Human Supervision for Visual Control in Quake II
pag. 294-301	Niels van Hoorn, Julian Togelius and Juergen Schmidhuber. Hierarchical Controller Learning in a First-Person Shooter
pag. 302-309	Joost Westra and Frank Dignum. Evolutionary Neural Networks for NPC's in Quake III
pag. 310-316	Luca Galli, Daniele Loiacono and Pier Luca Lanzi. Learning a Context-Aware Weapon-Switching Policy in Unreal Tournament
pag. 317-324	Martin V. Butz and Thies D. Lönneker. Optimized Sensory-motor Couplings plus Strategy Extensions for the TORCS Car Racing Challenge
pag. 325-332	Jacob Schrum and Risto Miikkulainen. Evolving Multi-modal Behavior in NPCs
pag. 333-340	Tommy Thompson and John Levine. Realtime Execution of Automated Plans using Evolutionary Robotics
pag. 341-348	Phillipa Avery, Sushil Louis and Benjamin Avery. Evolving Coordinated Spatial Tactics for Autonomous Agents using Influence Maps
pag. 349-354	Haiqing Wang, Omar Malik and Alexander Nareyek. Multi-Unit Tactical Pathplanning
pag. 355-362	Attala Malik and Joerg Denzinger. Improving Testing of Multi-Unit Computer Players for Unwanted Behavior using Coordination Macros
pag. 363-370	Tommy Thompson, Fraser Milne, Alastair Andrew and John Levine. Improving Control Through Subsumption in the EvoTanks Domain
pag. 371-378	David Keaveney and Colm O'Riordan. Evolving Robust Strategies for an Abstract Real-Time Strategy Game
pag. 379-386	Roberto Mercado and Zvi Retchkiman. Modeling the Game of Arimaa with Linguistic Geometry
pag. 387-393	Amine Boumaza. On the evolution of artificial Tetris players
