

ELECTRICAL CONTACTS—2009

Proceedings of

THE FIFTY-FIFTH IEEE HOLM CONFERENCE ON ELECTRICAL CONTACTS

Sponsored by the
Components, Packaging, and Manufacturing Technology Society
of the Institute of Electrical and Electronics Engineers, Inc.

TABLE OF CONTENTS

Foreword

Morton Antler Lecture

Erle Shobert Prize Paper

Arc Fault/Safety

Chair: H. Czajkowski

Co-Chair: G. Witter

- 1.1 Application Feasibility of Detecting Glowing Contacts Using Acoustic Sensing Technology 1**
Xin Zhou, Eaton Corporation, U.S.A.
Jerome Hastings, Eaton Corporation, U.S.A.
Thomas J. Schoepf, Eaton Corporation, U.S.A.
- 1.2 A Method for Residential Series Arc Fault Detection and Identification 7**
Dongwei Li, Xi'an Jiaotong University, China
Zhengxiang Song, Xi'an Jiaotong University, China
Jianhua Wang, Xi'an Jiaotong University, China
Yingsan Geng, Xi'an Jiaotong University, China
Huilin Chen, Xi'an Jiaotong University, China
Li Yu, Xi'an Jiaotong University, China
Bo Liu, Xi'an Jiaotong University, China
- 1.3 Artificial Low Current Arc Fault for Pattern Recognition in Low Voltage Switchgear 14**
Peter Müller, Institute of Power Transmission and High Voltage Technology (IEH), Germany
Stefan Tenbohlen, Institute of Power Transmission and High Voltage Technology (IEH), Germany
Reinhard Maier, Siemens AG, Germany
Michael Anheuser, Siemens AG, Germany
- 1.4 Electrical Arc Characterization For Ac-Arc Fault Applications..... 21**
E. Carvou, Université de Rennes 1, France
N. Ben Jemaa, Université de Rennes 1, France
S. Tian, Schneider Electric, France
Z. Belhaja, Schneider Electric, France
B. Jusselin, Schneider Electric, France

Fundamentals

Chair: M. Braunovic

Co-Chair: R. Martens

- 2.1 A Simplified Model of Multiscale Electrical Contact Resistance and Comparison to Existing Closed Form Models 27**
Robert L. Jackson, Auburn University, United States
Robert D. Malucci, RD Malucci Consulting, United States
Santosh Angadi, Auburn University, United States
J. Robert Polchow, Auburn University, United States

2.2	A Numerical Method to Predict the Stick/Slip Zone of Contacting, Nonconforming, Layered Rough Surfaces Subjected to Shear Traction	35
	Leidner M., Tyco Electronics AMP GmbH, Germany	
	Schmidt H., Tyco Electronics AMP GmbH, Germany	
	Myers M., Tyco Electronics, United States	
2.3	Mechanical and Electrical Characteristics of the Electromagnetic Relay under Vibration and Shock Environment	41
	Wanbin Ren, Harbin Inst. of Tech., China	
	Huimin Liang, Harbin Inst. of Tech., China	
	Yinghua Chen, Harbin Inst. of Tech., China	
	Li Cui, Guilin Aerospace Electronics Ltd., China	
	Lizhong Wang, Guilin Aerospace Electronics Ltd., China	
	Yunzhi Kang, Harbin Inst. of Tech., China	
2.4	A Semi-Analytical Model of Contact Resistance from Sinusoidal Asperity or Wavy Surface Contact.....	48
	Robert L. Jackson, Auburn University, United States	

Arc Interruption I

Chair: X. Zhou

Co-Chair: Z.K. Chen

3.1	Switching Contact Bounce Reduction	56
	Bogdan O. Ciocirlan, Tyco Electronics Corporation, United States	
	Hank Herrmann, Tyco Electronics Corporation, United States	
3.2	A Simple Arc Model for the Simulation of the Clearing Time of Drawn Arcs with a Commercial Electronics Simulation Tool	65
	Peter Zeller, University of Applied Sciences Upper Austria, Austria	
3.3	Melting and Discharge Phenomena of Breaking Ag Contacts Using a Precisely Controlled Piezoelectric Actuator	73
	Noboru Wakatsuki, Ishinomaki Senshu University, Japan	
	Nobuo Takatsu, Ishinomaki Senshu University, Japan	
	Toshiteru Maeda, Ishinomaki Senshu University, Japan	
	Takayuki Kudo, Ishinomaki Senshu University, Japan	

Sliding Contacts

Chair: K. Sawa

Co-Chair: S. Cole

4.1	Liquid Additives to Improve Conductivity in Electric Contacts	78
	W. A. Lynch, Raven LLC, United States	
	N.A. Sondergaard, NSWCCD, United States	
4.2	Analysis of Peculiar Brush V-I Characteristics with Steel Ring by Improved Holm's psi-curlly theta Theory in Electric Contact	87
	Makoto Takanezawa, Nippon Institute of Technology, Japan	
	Noboru Morita, Nippon Institute of Technology, Japan	
	Takahiro Ueno, Nippon Institute of Technology, Japan	
	Toru Otaka, TOSHIBA Corporation, Japan	
	Daisuke Hiramatsu, TOSHIBA Corporation, Japan	

- 4.3 **Electromechanics of a Collection of Current Carrying Cantilevered Fibers Sliding against a Plane Moving Surface in a Three Dimensional Magnetic Field..... 94**
 G. S. Erwin, NSWCCD, United States
 N. A. Sondergaard, NSWCCD, United States
- 4.4 **Initial Experimental Studies of Metal Fiber Brushes in a Magnetic Field 103**
 W. A. Lynch, Raven LLC, United States
 M. J. Roberts, NSWCCD, United States
 R. P. Reitz, NSWCCD, United States
 N. A. Sondergaard, NSWCCD, United States

Connector Design/Modeling

Chair: B. Malucci

Co-Chair: G. Flowers

- 5.1 **3-D Simulation of Open-Barrel Crimping Process: Study of the Effect of Serrations 112**
 Dmitry V. Zhmurkin, Tyco Electronics, USA
- 5.2 **Use of Modeling Techniques to Optimize the Electrical Performance of a Novel RF Connector Design..... 119**
 Sean P. McCarthy, Tyco Electronics Corporations, USA
- 5.3 **Coupled Thermal Electrical Finite Element Analysis of Power Contacts Used in High Speed Differential Connectors..... 124**
 Trent K. Do, Amphenol-TCS, United States
 Tom Cohen, Amphenol TCS, United States

Fretting

Chair: J. McBride

Co-Chair: E. Smith

- 6.1 **Modeling and Analysis of a Connector System for the Prediction of Vibration-induced Fretting Degradation..... 129**
 Chen Chen, Auburn University, United States
 George T. Flowers, Auburn University, United States
 Michael Bozack, Auburn University, United States
 Jeffrey Suhling, Auburn University, United States
- 6.2 **Micro Motion Characteristics of Carbon Pastes on Rigid Circuit Boards 136**
 Jin Chun Gao, Beijing University of Posts & Telecommunications, China
 Liang Jun Xu, Beijing University of Posts & Telecommunications, China
 Xiao Xiang Yu, Beijing University of Posts & Telecommunications, China
 Guoping Luo, Nokia Corporation, Finland
- 6.3 **Computational Modeling for Fretting Simulation 141**
 Yasuyuki Ishimaru, FITEC Corporation, Japan
 Keiji Mashimo, The Furukawa Electric co., ltd., Japan
 Kyota Susai, The Furukawa Electric co., ltd., Japan
 Fu Yingchao, TongJi University, China
 Wang Anlin, TongJi University, China

6.4	Fretting Analysis of Connector Terminals	147
	Keiji Mashimo, The Furukawa Electric co., ltd., Japan	
	Kyota Susai, The Furukawa Electric co., ltd., Japan	
	Yasuyuki Ishimaru, FITEC Corporation, Japan	

Materials/Surface Finishing I

Chair: R. Timsit

Co-Chair: R. Martens

7.1	Study of Thin Underlayers to Hinder Contact Resistance Increase Due to Intermetallic Compound Formation	153
	S. Noël, Supeléc, France	
	D. Alamarguy, Supeléc, France	
	S. Correia, Supeléc, France	
	P. Gendre, PEM, France	
7.2	Deformation of Crystal Structure and Distribution of Mechanical Stress in Tin-Plated Layer under Contact Loading	160
	Terutaka Tamai, Mie University, Japan	
	Shigeru Sawada, Mie University, Japan	
	Yasuhiro Hattori, AutoNetworks Technology, Ltd., Japan	
7.3	Nanoindentation Mapping of Physical Properties	166
	Christian Holzapfel, Schleifring und Apparatebau GmbH, Germany	
7.4	Growth Law of the Oxide Film Formed on the Tin Plated Contact Surface and Its Contact Resistance Characteristic	174
	Yuuya Nabeta, Mie University, Japan	
	Yasushi Saitoh, Mie University, Japan	
	Shigeru Sawada, Mie University, Japan	
	Yasuhiro Hattori, AutoNetworks Technologies, Ltd., Japan	
	Terutaka Tamai, Mie University, Japan	

Materials/Arc Interruption

Chair: C. Leung

Co-Chair: H. Czajkowski

8.1	Comparison in Performance for Silver-Tin-Indium Oxide Materials Made by Internal Oxidation and Powder Metallurgy	180
	Z.K. Chen, Chugai USA, LLC, United States	
	G.J. Witter, Chugai USA, LLC, United States	
8.2	Performance of Different Silver/Tin Oxide Contact Materials for Applications in Low Voltage Circuit Breakers	187
	Jutta Röhberg, AMI DODUCO GmbH, Germany	
	Thomas Honig, AMI DODUCO GmbH, Germany	
	Norbert Witulski, AMI DODUCO GmbH, Germany	
	Michael Finkbeiner, AMI DODUCO GmbH, Germany	
	Volker Behrens, AMI DODUCO GmbH, Germany	

8.3	Improvement of Percussion Welding Characteristics of CuCr25 Contact Material by Decreasing Tensile Strength	195
	Li Yu, State Key Laboratory of Electrical Insulation and Power Equipment, China	
	Yingsan Geng, State Key Laboratory of Electrical Insulation and Power Equipment, China	
	Qian Li, State Key Laboratory of Electrical Insulation and Power Equipment, China	
	Jianhua Wang, State Key Laboratory of Electrical Insulation and Power Equipment, China	
	Zhiyuan Liu, State Key Laboratory of Electrical Insulation and Power Equipment, China	
	Dongwei Li, State Key Laboratory of Electrical Insulation and Power Equipment, China	
	Wenbin Wang, Shaan'Xi Sirui Industries Co.,LTD, China	
	Xiaojun Wang, Shaan'Xi Sirui Industries Co.,LTD, China	
8.4	Temperature Rise Behavior of Ag/SnO₂ Contact Materials for Contactor Applications.....	200
	Timo Mützel, Umicore AG & Co. KG, Germany	
	Peter Braumann, Umicore AG & Co. KG, Germany	
	Ralf Niederreuther, Umicore AG & Co. KG, Germany	
 Connector Reliability		
Chair: G. Flowers		
Co-Chair: D. Gagnon		
9.1	The Impact of Spot Size and Location on Current Density	206
	Robert D. Malucci, RD Malucci Consulting, United States	
9.2	Spring Stiffness Investigations for Long Lifetime Connectors	212
	H. Essone-Obame, University of Rennes1, France	
	L. Cretinon, EDF R&D, France	
	R. El Abdi, University of Rennes1, France	
	N. Ben jemâa, University of Rennes1, France	
	E. Carvou, University of Rennes1, France	
9.3	Investigation of Dust Test and Modeling of Dusts Ingression.....	218
	Dong Wang, Beijing University of Post Telecommunications, China	
	Liang Jun Xu, Beijing University of Post Telecommunications, China	
	Na Lu, Beijing University of Post and Telecommunications, China	
9.4	Reliability of Press Fit Contacts and Adjoining SMD Components on Printed Circuit Boards	223
	Karl Ring, Fraunhofer Institute for Reliability and Microintegration, Germany	
	Thomas Schreier-Alt, Fraunhofer Institute for Reliability and Microintegration, Germany	
9.5	Estimation of Remaining Lifetime of Power Connections Using Infrared Thermography	232
	M. Braunovic, MB Interface, Canada	
	V.V. Izmailov, Tver State University of Technology, Russia	
	A.E. Naumov, Tver State University of Technology, Russia	
	M.V. Novoselova, Tver State University of Technology, Russia	

Arc Interruption II

Chair: P. Slade

Co-Chair: T. Schoepf

- 10.1 Modelling of the Interruption Process in SF₆ High Voltage Circuit Breaker and Preliminary Study of the Arc Characteristics for Different Gases..... 237**
Jian Zhang, Xi'an Jiaotong University, China
Shenli Jia, Xi'an Jiaotong University, China
Xingwen Li, Xi'an Jiaotong University, China
Pengwei Liu, Xi'an Jiaotong University, China
Zongquin Shi, Xi'an Jiaotong University, China
Lijun Wang, Xi'an Jiaotong University, China
- 10.2 Research on Contact Force Pairing of MCCB with Double Repulsive Contact Structure 243**
Liang Ji, Xi'an Jiaotong University, China
Degui Chen, Xi'an Jiaotong University, China
Yingyi Liu, Xi'an Jiaotong University, China
Weixiong Tong, Xi'an Jiaotong University, China
- 10.3 Rotational Drive of Break Arcs Using a Permanent Magnet Embedded in an Electrical Contact 250**
Junya Sekikawa, Shizuoka University, Japan
Takayoshi Kubono, Shizuoka University, Japan
- 10.4 Experimental Study on Arcing Process and Contact Erosion under Transverse Magnetic Field..... 255**
Guofu Zhai, Harbin Inst. of Tech., China
Xue Zhou, Harbin Inst. of Tech., China
Xiaodong Zhao, Harbin Inst. of Tech., China
Chengyan Liu, Guilin Aerospace Electronics Ltd., China
Fubiao Luo, Guilin Aerospace Electronics Ltd., China

Arc Interruption III

Chair: J. Witter

Co-Chair: B. Balme

- 11.1 An Experimental Study on Influences of Silicon-Type and Non-Silicone-Type Polymeric Cured Materials on Contact Resistance Characteristics of Relay Contacts..... 260**
Makoto Hasegawa, Chitose Institute of Science & Technology, Japan
Yoshiyuki Kohno, Kaneka Corporation, Japan
Hiroshi Ando, Kaneka Corporation, Japan
- 11.2 Optical Investigations of High-Current Vacuum Arc Behavior on Spiral-Shaped and Cup-Shaped RMF-Contacts..... 267**
Christian Wolf, University of Technology Braunschweig, Germany
Michael Kurrat, University of Technology Braunschweig, Germany
Manfred Lindmayer, University of Technology Braunschweig, Germany
Ernst-Dieter Wilkening, University of Technology Braunschweig, Germany
Dietmar Gentsch, ABB AG, Germany

- 11.3 Effect of Different Venting Conditions on the Interruption Performance of Arc Chamber..... 273**
 Ruicheng Dai, Xi'an Jiaotong University, China
 Degui Chen, Xi'an Jiaotong University, China
 Xingwen Li, Xi'an Jiaotong University, China
 Haitao Sun, Schneider Electric China Investment Co. Ltd, China
 Ensheng Xie, Schneider Electric China Investment Co. Ltd, China

MEMS

Chair: T. Schoepf
 Co-Chair: B. Malucci

- 12.1 Gold Coated Multi-Walled Carbon Nanotube Surfaces As Low Force Electrical Contacts for MEMS Devices: Part 1 278**
 J.W. McBride, University of Southampton, United Kingdom
 E.M. Yunus, University of Southampton, United Kingdom
 S.M. Spearing, University of Southampton, United Kingdom
- 12.2 An Original Apparatus for Endurance Testing of MEMS Electrical Contact Materials..... 285**
 Maxime Vincent, Schneider Electric Industries, France
 Laurent Chiesi, Schneider Electric Industries, France
 Patrick Rousset, Schneider Electric Industries, France
 Christophe Lapiere, Schneider Electric Industries, France
 Christophe Poulain, CEA-Léti, Minatec, France
 Laurent Carbone, Schneider Electric Industries, France
 Frédéric Houze, Laboratoire de Génie Electrique de Paris, France
 Jérôme Delamare, Grenoble Electrical Engineering Lab, France
- 12.3 Experimental Validation of a 2-D Constriction Resistance Model at the Microscale..... 290**
 Lise Bilhaut, CEA-LETI MINATEC, France
 Christophe Poulain, CEA-LETI MINATEC, France
 Romain Anciant, CEA-LETI MINATEC, France
 Laurent Duraffourg, CEA-LETI MINATEC , France
- 12.4 Improved Micro-Contact Resistance Model that Considers Material Deformation, Electron Transport and Thin Film Characteristics 295**
 Ronald A. Coutu, Jr., Air Force Institute of Technology, United States
 John W. McBride, University of Southampton, United Kingdom
 LaVern A. Starman, Air Force Institute of Technology, United States
- 12.5 Contact Resistance in Flat Thin Films 300**
 M. B. Read, Massachusetts Institute of Technology, United States
 J. H. Lang, Massachusetts Institute of Technology, United States
 A. H. Slocum, Massachusetts Institute of Technology, United States
 R. Martens, FormFactor Inc., United States

Materials/Surface Finish II

Chair: J. Zhang
 Co-Chair: B. Rickett

- 13.1 The Performance Implications of Silver As a Contact Finish in Traditionally Gold Finished Contact Applications..... 307**
 Marjorie Myers, Tyco Electronics, USA

13.2	Three-Dimensional Structural Study of Tin Plated Fretting Contacts 316 Tetsuya Ito, AutoNetworks Technologies, Ltd., Japan Yoshiyuki Nomura, AutoNetworks Technologies, Ltd., Japan Yasuhiro Hattori, AutoNetworks Technologies, Ltd., Japan
13.3	Investigation on Mechanism of Creep Corrosion of Immersion Silver Finished Printed Circuit Board by Clay Tests 321 Yilin Zhou, Beijing University of Posts and Telecommunications, China Michael Pecht, University of Maryland, College Park, United States
13.4	Electrical Resistance of Connectors with Different Contact Finishes under Low Level Conditions..... 331 J. Song, University of Applied Sciences, Germany H. Schmidt, Tyco Electronics AMP GmbH, Germany
Author Index	follows page 338
