

2009 Symposia and Workshops on Ubiquitous, Autonomic and Trusted Computing

(UIC-ATC 2009)

**Brisbane, Australia
7 – 9 July 2009**

**IEEE Catalog Number: CFP0975H-PRT
ISBN: 978-1-4244-4902-6**

Symposia and Workshops on Ubiquitous, Autonomic and Trusted Computing

UIC-ATC 2009

Table of Contents

Conference Information

International Symposium on UbiCom Frontiers - Innovative Research, Systems and Technologies (Ufirst 2009)

Wireless and Sensor Networks

An Efficient Mechanism for Mobile Target Tracking in Grid-Based Wireless Sensor Networks	1
<i>Ying-Hong Wang, Kuo-Feng Huang, and Ting-Wei Chang</i>	
Space Time Codes to Achieve Generalized Optimal Diversity for Higher Rate Wireless Networking	7
<i>Jia Hou</i>	
Biologically Inspired Ant-Based Routing in Mobile Ad hoc Networks (MANET): A Survey	12
<i>Shivanajay Marwaha, Jadwiga Indulska, and Marius Portmann</i>	
A Routing Algorithm Based on Mobile Agent for Mine Monitoring	16
<i>Qianping Wang, Yan Zhao, Yu'e Su, Hongmei Liao, and Ke Wang</i>	

Trusted Computing I

RFID-Based, Anonymous Authentication Scheme	22
<i>Hung-Yu Chien, Chieh-Shian Tu, and Tzong-Chen Wu</i>	
Trust in Distributed Small Sized Data Centers	28
<i>Nicolai Kuntze and Carsten Rudolph</i>	
An Analysis of Trust Transitivity Taking Base Rate into Account	34
<i>Touhid Bhuiyan, Audun Jøsang, and Yue Xu</i>	
Improving Prediction Accuracy Using Entropy Weighting in Collaborative Filtering	40
<i>Hyeong-Joon Kwon, Tae-Hoon Lee, Jung-Hyun Kim, and Kwang-Seok Hong</i>	

Trusted Computing II

Trust Management in Swarm-Based Autonomic Computing Systems	46
<i>Wendy M. Maiden, Jereme N. Haack, Glenn A. Fink, David McKinnon, and Errin W. Fulp</i>	
50 Years of Isolation	54
<i>Nuwan A. Goonasekera, William J. Caelli, and Tony Sahama</i>	
Deriving a Good Trade-off Between System Availability and Time Redundancy	61
<i>Nils Müllner, Abhishek Dhama, and Oliver Theel</i>	
Multidimensional Monitoring of Computer Systems	68
<i>Marcin Król and Janusz Sosnowski</i>	

Ubiquitous Computing and Applications I

MoWeT: A Configurable Framework to Support Ubiquitous Location-Aware Applications	75
<i>Ugo Barchetti, Alberto Bucciero, Tania A. De Benedittis, Francesca Macchia, Luca Mainetti, and Antonio Tamborino</i>	
Ubiquitous Computing and Time Dimension	83
<i>Mauro Marcelo Mattos</i>	
An Open Framework for Distributed Context Management in Ubiquitous Environment	88
<i>Jun-Hong Lu, Chiung-Ying Wang, and Ren-Hung Hwang</i>	
Context and Adaptivity in Context-Aware Pervasive Computing Environments	94
<i>Ahmet Soylu, Patrick De Causmaecker, and Piet Desmet</i>	

Ubiquitous Computing and Applications II

A Situated Display for Local Community Participation: The Design and Use of Nnub	102
<i>Fiona Redhead, Andrew Dekker, and Margot Brereton</i>	
Adaptive Interface for Collaborative Environments: AICE	108
<i>Youssef Roummieh and Parisa Ghodous</i>	
Human Activity Recognizer for Mobile Devices with Multiple Sensors	114
<i>Kenta Cho, Naoki Iketani, Hisao Setoguchi, and Masanori Hattori</i>	
An Event-driven Context Model in Elderly Health Monitoring	120
<i>Yuanyuan Cao, Linmi Tao, and Guangyou Xu</i>	

Smart Environments and Autonomous Systems

Agenda Driven Home Automation - Towards High Level Context Aware Systems	125
<i>Fano Ramparany, Yazid Benazzouz, and Marta Bel Martin</i>	
User Location Estimation Based on Stereo Audio-Vision	131
<i>Sang-Hyeon Jin, Dong-Ju Kim, Chee-Hyun Park, and Kwang-Seok Hong</i>	

An Automatic Algorithm of Dangerous Construction Warning System	137
<i>Che-Jen Chen, Lee-Kuo Lin, and Wei-Sheng Wu</i>	
Using the iDTV for Managing Services in the Ubiquitous Computing Environment	143
<i>Orlewilson B. Maia, Nairon S. Viana, and Vicente F. de Lucena Júnior</i>	
Exploiting Semantics for Indoor Navigation and User-Tracking	149
<i>Emmanouil Nikoloudakis, Manolis Kritsotakis, Antonis Bikakis, Theodore Patkos, Grigoris Antoniou, and Dimitris Plexousakis</i>	
International Symposium on Cyber-Physical Intelligence (CPI 2009)	
Service Oriented Architecture, Ubiquitous Technologies and Services	
Context-awareness Handoff Planning in Ubiquitous Network	155
<i>Hsiao-Yun Huang, Chiung-Ying Wang, and Ren-Hung Hwang</i>	
A Grid-Based Distributed Computing Environment for Automatic Concept Extraction and Content Supporting Service	161
<i>Chih-Ming Wang, Ming-Chao Chiang, and Chu-Sing Yang</i>	
Correspondence Analysis to Screening the Implementation of One Village One Product Programs in Taiwan	167
<i>Hua-Kai Chiou, Gia-Shie Liu, Yen-Wen Wang, and Tse-Jung Chen</i>	
Multiple Objective Compromise Optimization Method to Analyze the Strategies of Nanotechnology in Taiwan	172
<i>Hua-Kai Chiou, Gia-Shie Liu, Gwo-Hshiung Tzeng, and Chien-Pin Wang</i>	
Limiting Sybil Attacks on Bayesian Trust Models in Open SOA Environments	178
<i>Sebastian Ries and Erwin Aitenbichler</i>	
Multimedia Technologies and Smart Objects	
Toward an OSGi-Based Infrastructure for Smart Home Applications	184
<i>Szu-Chi Wang, Kai-Peng Chen, Tung-Yen Lu, and Chi-Yi Lin</i>	
Bird Species Recognition by Wavelet Transformation of a Section of Birdsong	189
<i>Chih-Hsun Chou and Pang-Hsin Liu</i>	
Fast Intra/Inter Mode Decision for H.264/AVC Using the Spatial-Temporal Prediction Scheme	194
<i>Cheng-Chang Lien, Chih-Chang Chen, and Yang-Kai Chang</i>	
Urban Search and Rescue Robots in Test Arenas: Scaled Modeling of Disasters to Test Intelligent Robot Prototyping	200
<i>Andrew Chiou and Carol Wynn</i>	
Augmented Isometric Board Games: Linking the Physical Playing Field with Intelligent Non-Player Feedback	206
<i>Andrew Chiou</i>	

Wireless Sensor Networks, Ad-Hoc Networks and RFID

A TCP Performance Improved mechanism for Wireless Network	212
<i>Ling Xiao, Zhitang Li, and Na Zhao</i>	
An Adaptive Anti-Collision Algorithm towards Efficient RFID Tag Identification	217
<i>Bo-Yu Chen, Ching-Hsien Hsu, and Kuan-Ching Li</i>	
An Accelerometer Based Approach for Indoor Localization	223
<i>Ching-Hsien Hsu and Chia-Hao Yu</i>	
ConPlan: A Context-Aware Ad-hoc Meeting Plan Program	228
<i>Ling Feng</i>	
Energy-Efficient Structuralized Clustering for Sensor-Based Cyber Physical Systems	234
<i>Jierui Cao and Huan Li</i>	

The First International Workshop on Wireless & Mobile Networks (WiMo 2009)

Session 1

The Clustering Algorithm for Enhancing Network Lifetime in Wireless Sensor Networks	240
<i>Wibhada Naruephiphat and Chalernpol Charnsripinyo</i>	
On the Use of Anisotropic Mesh Technique (AMT) in Transverse Wave Approach (TWA) for the EM Analysis of Microwave Circuits in Wireless Applications	246
<i>Mohamed Ayari, Taoufik Aguil, Helmi Temimi, and Henri Baudrand</i>	
Using HMAC for Error Correction over a Wireless Channel	252
<i>Natasa Živić, Obaidur Ur Rehman, and Christoph Ruland</i>	
Routing Algorithm for Balancing Network Lifetime and Reliable Packet Delivery in Mobile Ad hoc Networks	257
<i>Wibhada Naruephiphat and Chalernpol Charnsripinyo</i>	
Recurrent Grid Based Voting Approach for Location Estimation in Wireless Sensor Networks	263
<i>Amit Gupta, Shashikala Tapaswi, and Vinod Jain</i>	

Session 2

Optimizing Wireless Channels through a Push-Based System	268
<i>Ahmad S. Al-Mogren</i>	
Effective Top-down Clustering Algorithms for Location Database Systems	273
<i>Kwang-Jo Lee, Jin-Woo Song, and Sung-Bong Yang</i>	
Comparison of Service Management Architectures in MANETs	280
<i>Károly Farkas</i>	

Wireless Sensor Networks Performance Measurements and Monitoring	286
<i>Yaqoob J. AL-Raeisi and Nazar Elfadil</i>	

The 2009 International Workshop on Ubiquitous Service Systems and Technologies (USST 2009)

Session 1

QR Code Data Type Encoding for Ubiquitous Information Transfer Across Different Platforms	292
<i>Yo-Ping Huang, Yueh-Tsun Chang, and Frode Eika Sandnes</i>	
Toward a NFC Phone-Driven Context Awareness Smart Environment	298
<i>Yue-Shan Chang, Yung-Shuan Hung, Ching-Lung Chang, and Tong-Ying Juang</i>	
Human Activity Inference for Ubiquitous RFID-Based Applications	304
<i>Jingwen Xiong, Boon-Chong Seet, and Judith Symonds</i>	
Embedded Semantics Empowering Context-Aware Pervasive Computing Environments	310
<i>Ahmet Soylu and Patrick De Causmaecker</i>	
RSP: A Remote OSGi Service Sharing Scheme	318
<i>Eunhoe Kim, Kihyun Yun, and Jaeyoung Choi</i>	

Session 2

A Level-Based Energy Efficiency Clustering Approach for Wireless Sensor Networks	324
<i>Hung-Chi Chu, Ying-Hsiang Liao, Lin-Huang Chang, and Fang-Lin Chao</i>	
Mobility Management of VoIP Services Using SCTP Handoff Mechanism	330
<i>Lin-Huang Chang, Po-Hsun Huang, Hung-Chi Chu, and Huai-Hsinh Tsai</i>	
The Steady Clustering Scheme for Heterogeneous Wireless Sensor Networks	336
<i>Jiun-Jian Liaw, Chen-Yi Dai, and Yi-Jie Wang</i>	
An Image Copyright Protection Scheme with Tamper Detection Capability	342
<i>Shang-Lin Hsieh, Chung-Ping Yeh, and I-Ju Tsai</i>	

The International Workshop on Pervasive Media (PerMedia 2009)

RFID-Based Personalized Behavior Modeling	350
<i>Hui-Huang Hsu, Zixue Cheng, Timothy K. Shih, and Chien-Chen Chen</i>	
Ranking Method for Optimizing Precision/Recall of Content-Based Image Retrieval	356
<i>Jun Zhang and Lei Ye</i>	
Digital Watermarking Method Based on Image Size Invariant Visual Cryptographic Scheme	362
<i>Shu-Fen Tu and Ching-Sheng Hsu</i>	

CADBA: A Context-aware Architecture Based on Context Database for Mobile Computing	367
<i>Been-Chian Chien, Hsin-Chan Tsai, and Yuen-Kuei Hsueh</i>	
Human Motion Analysis	373
<i>Joseph C. Tsai, Tzu-Lin Wong, Hsing-Ying Zhong, Shih-Ming Chang, and Timothy K. Shih</i>	
A User Location-Aware Music Playing System	377
<i>Youhei Katori, Jianhua Ma, Tomomi Kawashima, Runhe Huang, Bernady O. Apduhan, and Qun Jin</i>	

2009 International Symposium on Intelligence, Context-Awareness and Autonomy in Wireless Networks (ICA 2009)

Cooperative Routing for Wireless Networks with Multiple Shared Channels	383
<i>Xiaoqin Chen, Dhammika Jayalath, and Leif Hanlen</i>	
Node Localisation in Mobile Ad Hoc Networks Using Double Time Difference of Arrival	389
<i>HuiYao Zhang, Garry Einicke, Marek Bialkowski, and John Homer</i>	
Distributed WSN Data Stream Mining Based on Fuzzy Clustering	395
<i>Hakilo Sabit, Adnan Al-Anbuky, and Hamid Gholam-Hosseini</i>	
Adaptive Determination of Data Granularity for QoS-Constraint Data Gathering in Wireless Sensor Networks	401
<i>Jun-Zhao Sun</i>	
Challenges and Evaluation of the State of the Art Routing Protocols for Wireless Mesh Networks	406
<i>Shivanajay Marwaha, Jadwiga Indulska, and Marius Portmann</i>	

International Workshop on Cyber Physical and Social Computing (CPSC 2009)

Cyber Intelligence and Safety

In silico Consciousness: The Goal of Ambient Intelligent Computing	411
<i>V.K. Murthy and E.V. Krishnamurthy</i>	
A Novel Relay Encryption Scheme for Mobile Ad hoc Networks	417
<i>Duan Hu, Furong Wang, Chen Huang, and Chunming Rong</i>	
Underwater Vehicle Noise Source Recognition Using Structure Dynamic Adjustable SVM	423
<i>Zhihua Gao, Kerong Ben, and Lilin Cui</i>	

Social Computing and Networking

Expression and Analysis of Emotions: Survey and Experiment	428
<i>Changrong Yu, Jiehan Zhou, and Jukka Riekk</i>	
Social Behavior Association and Influence in Social Networks	434
<i>Bin Xie, Anup Kumar, Padmanabhan Ramaswamy, Laurence T. Yang, and Sanjuli Agrawal</i>	

Hidden Community Mining under the RST/POSL Framework	440
<i>Hong Feng Lai</i>	

Trust Management in Three Generations of Web-Based Social Networks	446
<i>Guanfeng Liu, Yan Wang, and Lei Li</i>	

Cyber Physical Systems

Measurement and Feedback Scheme for CAC in Cellular Networks	452
<i>Hao Wang, Zhe Guo, Jialun Huang, and Lai Tu</i>	

Joint Optimal Congestion Control and Channel Assignment for Multi-Radio Multi-Channel Wireless Networks in Cyber-Physical Systems	456
<i>Kewei Li, Qingwei Liu, Furong Wang, and Xu Xie</i>	

Computational and Network System

Mobile Network Optimization Using Fuzzy Case-Based Reasoning for GSM	461
<i>Zeng Ma, Jun Hu, Shi Zhao, and Jialun Huang</i>	

A Distributed IPS Model Based on Neighbor Distance	465
<i>Jian Zhang, Wanhua Cao, Huan Zhang, Li Feng, and Duan Hu</i>	

On-line Fault Diagnosis Model of the Hydropower Units Based on MAS	470
<i>Liao Jiaping, Fu Bo, and Chen Yu</i>	

Synchronized Multi-Channel Cognitive MAC Protocol with Efficient Solutions for Second Spectrum Access	477
<i>Sarah Eljack, Benxiong Huang, Lai Tu, and Peng Zhang</i>	

International Workshop on Cybercrime and Trustworthy Computing (CTC 2009)

Profiling

A Preliminary Profiling of Internet Money Mules: An Australian Perspective	482
<i>Manuel Aston, Stephen McCombie, Ben Reardon, and Paul Watters</i>	

Using Differencing to Increase Distinctiveness for Phishing Website Clustering	488
<i>Robert Layton, Simon Brown, and Paul Watters</i>	

Detecting Phishing Emails Using Hybrid Features	493
<i>Liping Ma, Bahadorrezda Ofoghi, Paul Watters, and Simon Brown</i>	

Spam and Social Effects	498
<i>Man Qi, Denis Edgar-Nevill, and Reza Mousoli</i>	

Technical Countermeasures

A Trust Enhanced Email Application Using Trusted Computing	502
<i>Julian Jang, Surya Nepal, and John Zic</i>	

Understanding the Construction Mechanism of Botnets	508
<i>Xuefeng Li, Haixin Duan, Wu Liu, and Jianping Wu</i>	

IPGroupRep: A Novel Reputation Based System for Anti-Spam	513
<i>Hong Zhang, Haixin Duan, Wu Liu, and Jianping Wu</i>	

H6Proxy: ICMPv6 Weakness Analysis and Implementation of IPv6 Attacking Test Proxy	519
<i>Liu Wu, Duan Hai-xin, Lin Tao, Li Xing, and Wu Jian-ping</i>	

Scams and Crime

The Case for a Consistent Cyberscam Classification Framework (CCCF)	525
<i>Amber Stabek, Simon Brown, and Paul Watters</i>	
Data Loss in the British Government: A Bounty of Credentials for Organised Crime	531
<i>Paul Watters</i>	

International Symposium on Multidiscipline-inspired Autonomous Networks and Systems (MANS 2009)

Multidisciplinary Models for Autonomous Networks and Systems

4-MASCLE - Improved Coverage Aware Clustering with Self Healing Abilities	537
<i>Jakob Salzmann, Ralf Behnke, Martin Gag, and Dirk Timmermann</i>	
Frontier Research on Pervasive Emotion Computing	544
<i>Jiehan Zhou, Changrong Yu, and Jukka Riekk</i>	
A Random Group Mobility Model for Mobile Networks	551
<i>Lai Tu, Fan Zhang, Furong Wang, and Xinmei Wang</i>	

Interdisciplinary and Integrated System Design and Implementation

Comparing and Evaluating Collection Strategies in Trust-Based Reputation Systems in Distributed Environments	557
<i>Bo Zong, Feng Xu, Jing Pan, and Jian Lv</i>	
An Improved DSSS-Based Flow Marking Technique for Anonymous Communication Traceback	563
<i>Lu Zhang, Junzhou Luo, and Ming Yang</i>	
Enhancing Cooperative Behavior for Online Reputation Systems by Group Selection	568
<i>Yizhi Ren, Mingchu Li, Yongrui Cui, Cheng Guo, and Kouichi Sakurai</i>	

Novel Interdisciplinary System Design

Decentralized Task Allocation in an Organic Real-Time Middleware - An Auction-Based Approach	574
<i>Manuel Nickschas and Uwe Brinkschulte</i>	
The Optimal Choice by Resource Consumers in Grid Market	580
<i>Laiping Zhao, Mingchu Li, Weifeng Sun, Kouichi Sakurai, and Yizhi Ren</i>	
Secure Information Flow by Model Checking Pushdown System	586
<i>Cong Sun, Liyong Tang, and Zhong Chen</i>
