Reviewers

HiBi 2009

Mesoscale Modeling of the Bacillus Thuringiensis Sporulation Network Based on Stochastic Kinetics and Its Application for in Silico Scale-Down	3
<i>Andrés González, Harold Castro, Mario Villamizar, Nicolás Cuervo, Gabriel Lozano, Silvia Restrepo, and Sergio Orduz</i>	
Real-Time Clustering of Datasets with Hardware Embedded Neuromorphic Neural Networks	13
<i>Lászlo Bakò</i>	
k-PathA: k-shortest Path Algorithm	23
<i>Alexander Ullrich and Christian V. Forst</i>	
DiVinE 2.0: High-Performance Model Checking	31
<i>Jiri Barnat, Lubos Brim, and Petr Rockai</i>	
Stochastic Simulations on a Grid Framework for Parameter Sweep Applications in Biological Models	33
<i>Ettore Mosca, Paolo Cazzaniga, Ivan Merelli, Dario Pescini, Giancarlo Mauri, and Luciano Milanesi</i>	
Cellular Level Agent Based Modelling on the Graphics Processing Unit	43
<i>Paul Richmond, Simon Coakley, and Daniela Romano</i>	

An Efficient GPU Implementation for Large Scale Individual-Based Simulation of Collective Behavior	51
<i>Ugo Erra, Bernardino Frola, Vittorio Scarano, and Iain Couzin</i>	
The Search for Gene-Gene Interactions in Colorectal Cancer: Using HPC to Overcome Computational Barriers	59
<i>Florian Scharinger, Fiona Reid, Paul Graham, Arthur Trew, Albert Tenesa, Susan Farrington, Harry Campbell, and Malcolm G Dunlop</i>	
Simulation of P Systems with Active Membranes on CUDA	61
<i>José María Cecilia Canales, José Manuel García Carrasco, Ginés David Guerrero Hernández, Miguel Ángel Martínez del Amor, Ignacio Pérez Hurtado de Mendoza, and Mario de Jesús Pérez-Jiménez</i>	
Performance Issues in Evaluating Models and Designing Simulation Algorithms	71
<i>Roland Ewald, Jan Himmelspach, Matthias Jeschke, Stefan Leye, and Adelinde M. Uhrmacher</i>	
Computational Analysis of Large-Scale Multi-affine ODE Models	81
<i>Lubos Brim, Jiri Barnat, Ivana Cerna, Sven Drazan, Jana Fabrikova, and David Safranek</i>	
Experimental Analysis of Optimistic Synchronization Algorithms for Parallel Simulation of Reaction-Diffusion Systems	91
<i>Bing Wang, Yiping Yao, Yuliang Zhao, Bonan Hou, and Shaoliang Peng</i>	
The JAMES II Framework for Modeling and Simulation	101
<i>Jan Himmelspach and Adelinde M. Uhrmacher</i>	
Deployment of a Regularized Feature Selection Framework on an Overlay Desktop Grid	103
<i>Annalisa Barla and Marco Ferrante</i>	
A Parallel Plasma Membrane Simulation	105
<i>P.M. Burrage, K. Burrage, K. Kurowski, M. Lorenc, D.V. Nicolau Jr, M. Swain, and M.A. Ragan</i>	
On the Performances in Simulation of Parallel Databases: An Overview on the Most Recent Techniques for Query Optimization	113
<i>A.B.M. Rubaiyat Islam Sadat and Paola Lecca</i>	
Fast Adaptive Uniformization of the Chemical Master Equation	118
<i>Frederic Didier, Thomas A. Henzinger, Maria Mateescu, and Verena Wolf</i>
