

# **2009 IEEE/LEOS International Conference on Optical MEMS and Nanophotonics**

**(OPT MEMS 2009)**

**Clearwater, Florida, USA  
17 – 20 August 2009**

**IEEE Catalog Number: CFP09MOE-PRT  
ISBN: 978-1-4244-2381-1**

# Table of Contents

**Monday, 17 August 2009**

MA	<b>Imaging I</b>	
MA1	Neural Imaging with MEMS Microscopes	N/A
MA2	Dental Optical Coherence Tomography Employing Miniaturized MEMS-based Imaging Probe	1
MA3	Dual-Axes Confocal Microscopy for Clinical Skin Imaging	3
MB	<b>Electric and Magnetic Forces</b>	
MB1	From O-MEMS to nO-MEMS	N/A
MB2	Tunable Micro Liquid Droplets Using Dielectric Force	5
MB3	Inter-Nanomagnet Force Actuated Deformable Diffractive Optics	7
MB4	Magnetic Actuation Type Low Cost Polymer MEMS Mirror Fabricated by Photolithography and Wet Etching Processes	9
MB5	Wireless Driving of Micromirror Using Electromagnetic Induction	11
MC	<b>Nanoscale Measurements and Sensing</b>	
MC1	High Throughput Nanomechanical Measurements on Proteins DNA and RNA with a T-shaped Cantilever	13
MC2	Plasmonic Nanoprobe Integrated with Near-field Scanning Microscope	15
MC3	A Study on the Spectral Characteristics of Au Nanoantennas	17
MC4	Monolithic Silicon Photonic Crystal Slab Fiber Tip Sensor	19
MC5	Multiple Slot Waveguides for Enhanced Biochemical Sensing	21
MD	<b>Fluidic and Thermal</b>	
MD1	TBD	N/A
MD2	Sensing of Thermal History using Thermoluminescent Microparticles	23
MD3	Concentration Measurement for Sub- $\mu$ Liter Solution Using a Cantilever Sensor with an On-Tip Integrated Micro Spherical Reflecting Mirror	25

MD4	Large MEMS-Based Programmable Slit Mask For Multi-Object Spectroscopy	27
MD5	Development of Micro Optical Viscosity Sensor with Focus Control System for In-Process Monitoring	29

## Tuesday, 18 August 2009

TuA	<b>Optoelectronics and Nanowires</b>	
TuA1	Nanowire Optoelectronics	N/A
TuA2	Enhanced Electro-Optic Effects in Suspended Rib Waveguides	31
TuA3	Optomechanical Interactions between Nanophotonic Wires on a Silicon-on-Insulator-Chip	33
TuA4	Stroboscopic Imaging of Oscillating Nanowires	35
TuB	<b>Projection</b>	
TuB1	Optical MEMS Display	N/A
TuB2	Microscanner Using Self Aligned Vertical Comb Drives in a Switched Electrode Configuration for Large Static Rotation	37
TuB3	Adaptive Silicone-Membrane Lenses: Planar vs. Shaped Membrane	39
TuB4	Development of Electrostatically Driven Micromirror Arrays for Daylight Guiding on Large Areas	41
TuB5	2D Scanning MEMS Stage Integrated with Microlens Arrays for High-Resolution Beam Steering	43
TuB6	Sub-nm Order Fluctuation Control of Narrowed Pitch 2K-GxL™ Device for High Contrast	45
TuC	<b>Precision and Medical</b>	
TuC1	Towards the Realization of the First European MEMS Atomic Clock	47
TuC2	MEMS Tunable Michelson Interferometer with Robust Beam Splitting Architecture	49
TuC3	Spherical Silicon Micro-Mirrors Bent by Anodic Bonding	51
TuC4	An Electrothermally Actuated Bi-Axis Scanning Micromirror for Medical Imaging	53
TuC5	Maximization of Constant Velocity Scan Range of Electrothermally-Actuated Micromirror by Pulse Width Modulated Drive	55
TuD	<b>Imaging II</b>	

TuD1	Biologically Inspired Optical Structures for Wide Field-of-View Imaging and Wide Angle Illumination	57
TuD2	Lensfree On-Chip Imaging for Telemedicine Applications	59
TuD3	Optical MEMS Filter for Gas Spectroscopy	61

### **Wednesday, 19 August 2009**

#### **WA Adaptive Optics and Space**

WA1	Microshutter Array for the James Webb Space Telescope	N/A
WA2	MOEMS-Based Programmable Diffraction Gratings for Future Astronomical Instruments	63
WA3	Reliability-based Characterization of Single Crystalline Silicon Micromirrors for Space Applications	65
WA4	High-Fill-Factor, Tip-Tilt-Piston Micromirror Array with Hidden Bimorph Actuators and Surface Mounting Capability	67
WA5	A Tunable Microlens with 0.9 mm Scan Range and Small Lateral Shift	69

#### **WB Submicrometer and Three Dimensional**

WB1	Nanoimaging: Plasmonics and Beyond the Plasmonics	71
WB2	Silica Microdisk Coupled Resonator Optical Waveguide	73
WB3	Liquid Immersion Angled Exposure for 3D Photolithography	75
WB4	A CMOS Compatible Low Temperature Process for Photonic Crystal MEMS Scanner	77
WB5	Atomic Layer Deposition of Optical Coatings Inside Microchannels	79
WB6	Direct Visualization of Light Propagation Inside a Planar Artificial Compound Eye using a Rhodamine 6G Doped Photosensitive Polymer Resin	81

#### **WC Nanofabrication, Assembly and Alignment**

WC1	Optoelectronic Tweezers Integrating with Lensless Imaging for Wide Field Interactive Optical Manipulation	83
WC2	Nano-Stamping of Quantum Dot Based Inorganic Light Emitting Devices	85
WC3	High Vertical Resolution 3D Nanoimprint Technology for Nanophotonic Applications	87
WC4	Quantum Dot Photodiodes Fabricated by Electrostatic Layer-by-layer Self-Assembly	89

WC5	Enhanced Trapping and Rotation of Sub-micron Particles and Cells Through Nanostructures	91
WC6	Plasmonic Nanoarrays made in Porous Alumina Template	93
WP	<b>Poster Session</b>	
WP1	Spectroscopic Studies in Protein Films with Highly Sensitive Single-Mode Guided-Wave Platforms	95
WP2	A Novel White-Light Scanning Interferometer for Absolute Nano-Scale Gap Thickness Measurement	97
WP3	Introducing Triangular Lattices to Dynamic Photonic Crystal Structures for Optical Storage and Processing	99
WP4	High System Performances with Plasmonic Waveguides and Functional Devices	101
WP5	Simulation of Coupling Between Parallel SOI Nanowaveguides and its Dependence on Temperature	103
WP6	Sensitivity Dependence on the High Index Coating Thickness of the Biosensor using a Guided Mode Resonant Filter	105
WP7	A Nano-Ring Resonator Based on 2-D Hexagonal-Lattice Photonic Crystals	107
WP8	Design, Fabrication and Characterization of Monolithically Integrated Vertical-Cavity Surface-Emitting Laser(VCSEL)and Resonance Enhanced Photodetector for Biomedical	109
WP9	Two Dimensional Photonic Crystal Switches	111
WP10	Micromachined Reflective X-ray Concentrator For Microanalysis	113
WP11	CMOS-MEMS Based Optical Phase Shifter Array with High Fill Factor	115
WP12	Fabrication of Arrayed Waveguide Grating by the Casting Method using a Micro-die	117
WP13	Development of a Micro Displacement Sensor with Monolithic-Integrated Two-Dimensionally Distributed Photodiodes	119
WP14	Thin Film pH-Sensitive Hydrogel Based Chemiresponsive Surface Plasmon Resonance Device	121
WP15	Optical Image Analysis of the Novel Ultra-Lightweight and High-Resolution MEMS X-ray Optics	123
WP16	Air Friction Loss of Comb Drive Resonant Micro Mirrors for Laser Scanning Display	125
WP17	Optical Characterization Technique for MEMS Comb-Drive Resonators	127

WP18	Tunable MEMS-based Optical Linear (1D) Diffusers for Dynamic Laser Beam Shaping and Homogenizing	129
WP19	Large-Aperture, Rapid Scanning MEMS Micromirrors for Free-Space Optical Communications	131
WP20	Manufacturability Analysis of Assembled FT Microspectrometer	133
WP21	Design and Fabrication of 2-DOF Silicon Micromirror with Sloped Electrodes	135
WP22	A MEMS Scanner with Four Orthogonally Arranged Rotators Actuated by Electromagnetic Force	137
WP23	Comb- Actuated Resonant Torsional Scanner for Microdisplays	139
WP24	Variable-Focus SU-8 Membrane Mirror with Enhanced Stroke using Feedback Control	141

## Thursday, 20 August 2009

### ThA **Subwavelength Binary Photonic Structures**

ThA1	Multifunctional Optofluidic Microscope	143
ThA2	Color-Changing Photonic Crystal Based on Liquid Infiltration and Exfiltration	144
ThA3	Demonstration of a Monolithic Dielectric Microstructured Surface with a Reflectivity of	146
ThA4	Large-Scale Application of Binary Subwavelength Structures	148
ThA5	RGB Color Filter Comprising Aluminum Film with Surface Plasmon Enhanced Transmission through Sub-Wavelength Hole-Arrays	150

### ThB **Optical Communications**

ThB1	Low Power 3D MEMS Optical Switches	152
ThB2	A Mixed-signal Analysis Tool for MOEMS based on Circuit Simulator	154
ThB3	All Optically Driven MEMS Deformable Mirrors via Direct Cascading with GaAs/GaP Wafer Bonded PIN Photodetectors	156
ThB4	Electrically Separated Two-Axis MEMS Mirror Array Module for Wavelength Selective Switches	158
