

2009 Third International Conference on Secure Software Integration and Reliability Improvement

(SSIRI 2009)

**Shanghai, China
8 – 10 July 2009**

**IEEE Catalog Number: CFP09SIR-PRT
ISBN: 978-1-4244-4729-9**

2009 Third IEEE International Conference on Secure Software Integration and Reliability Improvement **SSIRI 2009**

Table of Contents

Message from General Chairs
Message from Program Chairs
Organizing Committee
Program Committee

Keynote: Probabilistic Programming With Coordination and Compensation	1
Professor Ji-Feng He	
Keynote: Security Engineering: Developments and Directions	2
Professor Bhavani Thuraisingham	
Keynote: Automatic Test Data Generation : Who, When and Where ?	4
Dr. Jeff Offutt	
Keynote: Reliability for Software-Based Systems	5
Dr. Frances Paulisch	
Keynote: Complexity - Interoperability - Deployment of Software": Are We on the Right Way of Progress in the Software Industry?	6
Rudolf Siebenhofer	
Session 1A: Compositionality	
Automated Web Service Composition System on Enterprise Service Bus	9
Xinhuai Tang, Sizhe Sun, Xiaozhou Yuan, and Delai Chen	
Architectural Availability Analysis of Software Decomposition for Local Recovery	14
Hichem Boudali, Hasan Sözer, and Mariëlle Stoelinga	
Recursive Decomposition of Progress Graphs	23
David A. Cape, Bruce M. McMillin, Benjamin W. Passer, and Mayur Thakur	

Session 1B: Runtime Systems

CacheBit: A Multisource-Multitarget Cache Instrumentation Tool	35
Chao Xu, Jinghui Gu, Ling Lin, Alei Liang, and Haibing Guan	
FiLM: A Runtime Monitoring Tool for Distributed Systems	40
Fuyuan Zhang, Zhengwei Qi, Haibing Guan, Xuezheng Liu, Mao Yang, and Zheng Zhang	
Scheduling and Controlling Semantics for Distributed Resource Based Computing Engines	47
Pradeep Varma and Vijay K. Naik	

Session 1C: Vulnerability Detection and Defense

A Trust-Based Detecting Mechanism against Profile Injection Attacks in Recommender Systems	59
Qiang Zhang, Yuan Luo, Chuliang Weng, and Minglu Li	
Detection of Multiple-Duty-Related Security Leakage in Access Control Policies	65
JeeHyun Hwang, Tao Xie, and Vincent C. Hu	
A Game Theoretic Approach to Decision and Analysis in Strategies of Attack and Defense	75
Jin-Cheng Lin, Jan-Min Chen, Chou-Chuan Chen, and Yu-Shu Chien	

Session 2A: Aspect-Oriented Programming

Verifying Aspect-Oriented Programs Using Open Temporal Logic	85
Jia Lv, Jing Ying, Minghui Wu, Tao Jiang, and Fanwei Zhu	
Anchored Text for Software Weaving and Merging	93
Pradeep Varma	
A Classification of Aspect Composition Problems	101
Kun Tian, Kendra Cooper, Kang Zhang, and Huiqun Yu	

Session 2B: Verification

Visualizing Multiple Program Executions to Assist Behavior Verification	113
Chunying Zhao, Kang Zhang, Jie Hao, and W. Eric Wong	
On the Verification of Strong Atomicity in Programs Using STM	123
Yong Li, Yu Zhang, Yiyun Chen, and Ming Fu	
State Space Reduction for Verifying Noninterference	132
Conghua Zhou, Li Chen, Shiguang Ju, and Zhifeng Liu	

Session 2C: Security Requirements

An Analysis for Understanding Software Security Requirement Methodologies	141
Jing Du, Ye Yang, and Qing Wang	
A DSL Framework for Policy-Based Security of Distributed Systems	150
Hédi Hamdi and Mohamed Mosbah	

Environmental Metrics for Software Security Based on a Vulnerability Ontology	159
Ju An Wang, Minzhe Guo, Hao Wang, Min Xia, and Linfeng Zhou	

Session 3A: Testing

Performance Testing of Mobile Applications at the Unit Test Level	171
Heejin Kim, Byoungju Choi, and W. Eric Wong	
Analyzing Relation between Software Architecture Testing Criteria on Test Sequences	181
Lijun Lun and Xuemei Ding	
Six-Sigma Based Performance Verification in Early Development of Automatic Test Equipment	187
Madhu Kilari, Qiyu Huang, and Tongdan Jin	
A Graph-Model-Based Testing Method Compared with the Classification Tree Method for Test Case Generation	193
Fevzi Belli, Axel Hollmann, and Markus Kleinselbeck	

Session 3B: Modeling, Analysis, and Forensics

A New Method to Model and Analyze the WS-BPEL Process under the Dead-Path-Elimination Semantics	203
Chunxiang Xu, Hanpin Wang, Wanling Qu, Meixia Zhu, and Yu Huang	
Software Reliability Prediction and Analysis Using Queueing Models with Multiple Change-Points	212
Chin-Yu Huang, Tsui-Ying Hung, and Chao-Jung Hsu	
ReconBin: Reconstructing Binary File from Execution for Software Analysis	222
Lingyun Ying, Purui Su, Dengguo Feng, Xianggen Wang, Yi Yang, and Yu Liu	
A Comparative Study of Forensic Science and Computer Forensics	230
Ryan Hankins, Tetsutaroh Uehara, and Jigang Liu	

Session 3C: Security

Provable Secure AKA Scheme with Reliable Key Delegation in UMTS	243
Yu-Lun Huang, C. Y. Shen, Shihpyng Shieh, Hung-Jui Wang, and Cheng-Chun Lin	
An Efficient and Secure Multi-secret Image Sharing Scheme with General Access Structure	253
Ching-Fan Lee and Justie Su-Tzu Juan	
Efficient Multi-secret Sharing Scheme Using Room Square	260
Ming-Jheng Li, Ying-Hsuan Chang, and Justie Su-Tzu Juan	

Session 4A: Short Papers I

Checking Service Instance Protection for AMF Configurations	269
Pejman Salehi, Ferhat Khendek, Maria Toeroe, Abdelwahab Hamou-Lhadj, and Abdelouahed Gherbi	
Security Variability Design and Analysis in an Aspect Oriented Software Architecture	275
Lirong Dai	
Test-Data Generation for Web Services Based on Contract Mutation	281
Ying Jiang, Ying-Na Li, Shan-Shan Hou, and Lu Zhang	

Session 4B: Fast Abstracts

A Turing Machine-Based Model for Computer Forensic Reconstruction	289
Ryan Hankins, Tetsutaro Uehara, and Jigang Liu	
Implementation of the Privacy Protection in Video Surveillance System	291
Hae-Min Moon and Sung Bum Pan	
An Approach to Improving Reliability for Distributed Video-Based Monitoring Systems	293
Michael Jiang, Yaping Liu, and Xinzheng Gu	

Session 4C: Student Doctoral Program I

Research and Evaluation on Modularity Modeling in Community Detecting of Complex Network Based on Information Entropy	297
Xiaolong Deng, Bai Wang, Bin Wu, and Shengqi Yang	
Semantic ACP2P Information Retrieval Method	303
Haibo Yu, Tsunenori Mine, and Makoto Amamiya	
A Fast and Flexible Platform for Fault Injection and Evaluation in Verilog-Based Simulations	309
David Kammler, Junqing Guan, Gerd Ascheid, Rainer Leupers, and Heinrich Meyr	

Session 5A: Panel

Panel Description: Evolving Software Models for Global Organizations	317
Rajesh Subramanyan	
Position Statement: Evolving Software Models for Global Organizations	318
Mao Boying	
Position Statement: Evolving Software Models for Global Organizations	320
Uttiya Basu	

Session 5B: T4CIA Workshop I

Message from T4CIA Workshop Co-chairs	323
Jun Pang and Bao Tang	
Systematic Cooperation between Industry and Universities –The Experience from Siemens IT Solutions and Services	324
Rudolf Siebenhofer	

Improving Test Quality by a Test Type Analysis Based Method	325
Qin Liu, Wenqiang Zheng, and JunFei Ma	

A Safe Approach to Shrink Email Sample Set while Keeping Balance between Spam and Normal	329
Lili Diao and Hao Wang	

Session 5C: Short Papers II

Adaptation Strategies for Performance Failure Avoidance	337
Hong Sun, Vincenzo De Florio, Ning Gui, Raf Hens, Bert Vankeirsbilck, Bart Dhoedt, and Chris Blondia	

Java Card Performance Optimization of Secure Transaction Atomicity Based on Increasing the Class Field Locality	342
Johannes Loinig, Christian Steger, Reinhold Weiss, and Ernst Haselsteiner	

Generating Test Cases for Timed Systems from Controlled Natural Language Specifications	348
Matthias Schnelte	

Session 6A: SSIRI 2010 Planning Meeting

Session 6B: T4CIA Workshop II

Automatic Test Data Generation for C Programs	359
Prasad Bokil, Priyanka Darke, Ulka Shrotri, and R. Venkatesh	
Reliability Prediction of Web Service Composition Based on DTMC	369
Yingxin Ren, Qing Gu, Jingxian Qi, and Daoxu Chen	

Panel: Increase Industry and Academy Cooperation in Testing Technologies and Tools for Critical Industry Applications	376
Bao Tang	

Session 6C: MVV Workshop

Temporal Specification and Deductive Verification of a Distributed Component Model and Its Environment	379
Alessandro Basso, Alexander Bolotov, and Vladimir Getov	

Communication Sequence Graphs for Mutation-Oriented Integration Testing	387
Fevzi Belli, Axel Hollmann, and Sascha Padberg	
Directed Acyclic Graph Modeling of Security Policies for Firewall Testing	393
Tugkan Tuglular, Özgür Kaya, Can Arda Müftüoğlu, and Fevzi Belli	

Session 7A: Short Papers III

A New Method to Generate Attack Graphs	401
Anming Xie, Guodong Chen, Yonggang Wang, Zhong Chen, and Jianbin Hu	
A Comparative Study of Access Control Languages	407
Sathish Pinagapani, Dianxiang Xu, and Jun Kong	

JPEG 2000 and Digital Watermarking Technique Using in Medical Image	413
Sung-Jin Lim, Hae-Min Moon, Seung-Hoon Chae, Yongwha Chung, and Sung Bum Pan	
A Developed Dynamic Environment Fault Injection Tool for Component Security Testing	417
Binbin Qu, Yin Huang, Xiaodong Xie, and Yansheng Lu	

Session 7B: Student Doctoral Program II

Multidimensional Approach to Quality Analysis of IPSec and HTTPS Applications	425
Marcin Barylski and Henryk Krawczyk	
Software Stability Model (SSM) for Building Reliable Real Time Computing Systems	431
Naganathan E.R and Eugene X.P	
Extending Model Driven Architecture with Software Security Assessment	436
Xucheng Tang and Beijun Shen	

Session 7C: Fast Abstracts II

Path-Based Approach to Integration Testing	445
Jueliang Hu, Zuohua Ding, and Geguang Pu	
Simplifying Parametrization of Bayesian Networks in Prediction of System Quality	447
Aida Omerovic and Ketil Stølen	
Reliability Computing for Service Composition	449
Zuohua Ding and Mingyue Jiang	
Improvement of QoS in Process Centric Software Development Using ANP	451
A. Srividya, K. Krishna Mohan, and A.K. Verma
