

2009 XXIII Brazilian Symposium on Software Engineering

(SBES 2009)

**Fortaleza, Brazil
5-9 October 2009**

**IEEE Catalog Number: CFP0991H-PRT
ISBN: 978-1-4244-5024-4**

2009 XXIII Brazilian Symposium on Software Engineering

SBES 2009

Table of Contents

Foreword

Program Committee

Reviewers

Invited Talk: Processos de Software: Porque e Como

Implantar

**Invited Talk: Rainbow: Engineering Support for Self-Healing
Systems**

**Invited Talk: Attacking Information Overload in Software
Development**

Software Reuse and Product Lines

Variability Management in Aspect-Oriented Architecture Description Languages: An Integrated Approach	1
<i>Eiji Adachi, Thais Batista, Uirá Kulesza, Ana Luisa Medeiros, Christina Chavez, and Alessandro Garcia</i>	
Automating the Product Derivation Process of Multi-agent Systems Product Lines	12
<i>Elder Cirilo, Ingrid Nunes, Uirá Kulesza, and Carlos Lucena</i>	
Assessing Intra-application Exception Handling Reuse with Aspects	22
<i>Júlio César Taveira, Cristiane Queiroz, Rômulo Lima, Juliana Saraiva, Sérgio Soares, Hitalo Oliveira, Nathalia Temudo, Amanda Araújo, and Jefferson Amorim</i>	

Experimental Software Engineering

Knowledge Repository Structure of an Experimental Software Engineering Environment	32
<i>Vitor Pires Lopes and Guilherme Horta Travassos</i>	
Exception Flows Made Explicit: An Exploratory Study	43
<i>Nélio Cacho, Francisco Dantas, Alessandro Garcia, and Fernando Castor</i>	
Mining Software Change History in an Industrial Environment	54
<i>Methanias Colaço Júnior, Manoel Mendonça, and Francisco Rodrigues</i>	

Software Metrics and Measurement

Reference Values for Object-Oriented Software Metrics	62
<i>Kecia A. M. Ferreira, Mariza A. S. Bigonha, Roberto S. Bigonha, Heitor C. Almeida, and Luiz F. O. Mendes</i>	
Metrics for Evaluation of Aspect-Oriented Middleware	73
<i>Tássia A. V. Freitas, Thais V. Batista, Flávia C. Delicato, and Paulo F. Pires</i>	
Applying and Evaluating Concern-Sensitive Design Heuristics	83
<i>Eduardo Figueiredo, Claudio Sant'Anna, Alessandro Garcia, and Carlos Lucena</i>	

Model Driven Software Development

Towards a UML Profile for Model-Driven Object-Relational Mapping	94
<i>Alexandre Torres, Renata Galante, and Marcelo Soares Pimenta</i>	
An Integrated Approach for Model Driven Process Modeling and Enactment	104
<i>Rita Suzana Pitangueira Maciel, Bruno Carreiro da Silva, Ana Patrícia Fontes Magalhães, and Nelson Souto Rosa</i>	
A Framework for Modeling, Building and Maintaining Enterprise Information Systems Software	115
<i>Alexandre Cláudio de Almeida, Glauber Boff, and Juliano Lopes de Oliveira</i>	

Social Aspects of Software Engineering

An Experimental Research on the Relationships between Preferences for Technical Activities and Behavioural Profile in Software Development	126
<i>Fabio Q. B. da Silva and Ana Cristina F. César</i>	
Habibilities and Behavioural Profiles of SQA Professionals Related to Process Maturity Levels	136
<i>Aliny F. Meira and Fabio Q. B. da Silva</i>	
Developing Motivational Programs for Software Engineers through an Experimental Method	145
<i>A. César França and Fabio Q. da Silva</i>	

Methods and Tools for Software Engineering

On the Selection of Concurrency Control Policies for Configuration Management	155
<i>João Gustavo Prudêncio, Leonardo Murta, and Cláudia Werner</i>	
Using TransFlow to Analyze Open Source Developers' Evolution	165
<i>Jean M. R. Costa, Francisco W. Santana, and Cleidson R. B. Souza</i>	
Software Artifact Metamodel	176
<i>Marcos Silva, Toacy Oliveira, and Ricardo Bastos</i>	

Requirements Engineering

Quality Improvement for Use Case Model	187
<i>Ricardo Ramos, Jaelson Castro, João Araújo, Ana Moreira, Fernanda Alencar, and Rosângela Penteado</i>	
Integrating Problem Frames with Aspects	196
<i>Gustavo Marques, João Araújo, and Maria Lencastre</i>	
A New Approach to the Software Release Planning	207
<i>Felipe Colares, Jerffeson Souza, Rafael Carmo, Clarindo Pádua, and Geraldo R. Mateus</i>	

Software Verification, Validation, Testing, and Formal Models

Applying Code Coverage Approach to an Infinite Failure Software Reliability Model	216
<i>Adalberto Nobiato Crespo, Alberto Pasquini, Mario Jino, and José Carlos Maldonado</i>	
Improving a Web Usability Inspection Technique Using Qualitative and Quantitative Data from an Observational Study	227
<i>Tayana Conte, Verônica Vaz, Jobson Massolar, Emilia Mendes, and Guilherme Horta Travassos</i>	
Fuzzy Continuous Resource Allocation Mechanisms in Workflow Management Systems	236
<i>Joslaine Cristina Jeske, Stéphane Julia, and Robert Valette</i>
