

2009 IEEE 15th Pacific Rim International Symposium on Dependable Computing

(PRDC 2009)

**Shanghai, China
16 – 18 November 2009**

**IEEE Catalog Number: CFP09245-PRT
ISBN: 978-1-4244-5485-3**

TABLE OF CONTENTS

TESTING ALGORITHM, ANALYSIS AND THEORY

Reliability Analysis of Single Bus Communication with Real-Time Requirements	1
<i>Maurice Sebastian, Rolf Ernst</i>	
A Test Vector Compression/Decompression Scheme Based on Logic Operation between Adjacent Bits (LOBAB) Coding	9
<i>Huaguo Liang, Wenfa Zhan, Qiang Luo, Cuiyun Jiang</i>	
Variation-Aware Scheduling for Chip Multiprocessors with Thread Level Redundancy	15
<i>Jianbo Dong, Lei Zhang, Yinhe Han, Guihai Yan, Xiaowei Li</i>	
Quantitative Analysis of Long-Latency Failures in System Software	21
<i>Keun Soo Yim, Zbigniew T. Kalbarczyk, Ravishankar K. Iyer</i>	
A Synthesis Software Reliability Model	29
<i>Xiaoying Hu, Shiyi Xu</i>	
Using the NuSMV Model Checker for Test Generation from Statecharts	35
<i>Masaya Kadono, Tatsuhiko Tsuchiya, Tohru Kikuno</i>	
A Novel Generation Algorithm of Pair-Wise Testing Cases	41
<i>Jianhua Gao, Yuefeng Hu</i>	
Impact of Hazards on Pattern Selection for Small Delay Defects	47
<i>Jie Wang, Huawei Li, Yinghua Min, Xiaowei Li, Huaguo Liang</i>	
Fault Injection Scheme for Embedded Systems at Machine Code Level and Verification	53
<i>Ang Jin, Jian-Hui Jiang</i>	
Small Delay Fault Simulation for Sequential Circuits	61
<i>Li Liu, Jishun Kuang, Huawei Li</i>	
Built-In Self-Repair Techniques for Heterogeneous Memory Cores	67
<i>Zhen-Yu Wang, Yi-Ming Tsai, Shyue-Kung Lu</i>	
Flip-Flop Selection for Transition Test Pattern Reduction Using Partial Enhanced Scan	73
<i>Songwei Pei, Huawei Li, Xiaowei Li</i>	
A GA-Based Method for High-Quality X-Filling to Reduce Launch Switching Activity in At-speed Scan Testing	79
<i>Yuta Yamato, Xiaoqing Wen, Kohei Miyase, Hiroshi Furukawa, Seiji Kajihara</i>	
On the Computational Complexity of Parameter Estimation in Adaptive Testing Strategies	85
<i>Feng Ye, Chang Liu, Hai Hu, Chang-Hai Jiang, Kai-Yuan Cai</i>	
A New Approach to Automated Redundancy Reduction for Test Sequences	91
<i>Huaikou Miao, Pan Liu, Jia Mei, Hongwei Zeng</i>	
Prioritized Test Generation Strategy for Pair-Wise Testing	97
<i>Jianhua Gao, Jie Zhu</i>	
Test Case Reuse Based on Ontology	101
<i>Lizhi Cai, Weiqin Tong, Zhenyu Liu, Juan Zhang</i>	
Evaluating the Use of Reference Run Models in Fault Injection Analysis	107
<i>Matthew Leeke, Arshad Jhumka</i>	

DEPENDABLE NETWORKS

Quantitative Intrusion Intensity Assessment Using Important Feature Selection and Proximity Metrics	111
<i>Sang Min Lee, Dong Seong Kim, Younghyun Yoon, Jong Sou Park</i>	
Low-overhead Architectures for Security Tag	119
<i>R. Shioya, D. Kim, K. Horio, M. Goshima, S. Sakai</i>	
A Trust-Based Benchmark for DBMS Configurations	127
<i>Afonso Araujo Neto, Marco Vieira</i>	
Performance and Reliability of a Revocation Method Utilizing Encrypted Backup Data	135
<i>Kazuki Takayama, Haruo Yokota</i>	
Parallel Training Strategy Based on Support Vector Regression Machine	143
<i>Yong-Mei Lei, Yu Yan, Shao-Jun Chen</i>	

A Lightweight Network Intrusion Detection Model Based on Feature Selection	149
<i>Hong Dai , Haibo Li</i>	
String-wise Information Flow Tracking Against Script Injection Attacks	153
<i>K. Li, R. Shioya, M. Goshima, S. Sakai</i>	
Representing X-Code Using Latin Squares	161
<i>Gang Wang, Sheng Lin, Xiaoguang Liu, Jing Liu</i>	
Entropy Based Method for Network Anomaly Detection	167
<i>Quan Qian , Hong-Yi Che , Rui Zhang</i>	

DEPENDABLE SYSTEMS, HARDWARE AND SOFTWARE

Chip-Level Redundancy in Distributed Shared-Memory Multiprocessors	170
<i>Brian T. Gold, Babak Falsafi, James C. Hoe</i>	
A Reliable Non-volatile Memory System: Exploiting File-System Characteristics	177
<i>Chin-Hsien Wu, Wen-Yen Chang, Zen-Wei Hong</i>	
Making Overlay Networks More Robust to Massive Failures	183
<i>Hakem Beitollahi, Geert Deconinck</i>	
Improving Data Transmission for Collaborative Work Using Forwarding Nodes in Mobile Ad Hoc Environments	191
<i>Wei-Tong Wang, Kuo-Feng Ssu, Cheng-Chieh Chien, Yu-Yuan Lin</i>	
An Attack Injection Approach to Evaluate the Robustness of Ad Hoc Networks	197
<i>David De Andrés, Jesús Frigonal, Juan-Carlos Ruiz, Pedro Gil</i>	
Trustworthy Evaluation of a Safe Driver Machine Interface through Software-Implemented Fault Injection	203
<i>Andrea Ceccarelli, Andrea Bondavalli, Danilo Iovino</i>	
A Regular Expression Matching Algorithm Using Transition Merging	211
<i>Jiekun Zhang, Dafang Zhang, Kun Huang</i>	
A Novel Process Migration Method for MPI Applications	216
<i>Tiantian Liu, Zhong Ma, Zhonghong Ou</i>	
Dependability Evaluation for Internet-Based Remote Sysmtems	221
<i>Masato Kitakami, Akihiro Katada, Kazuteru Namba, Hideo Ito</i>	

DESIGN FOR DEPENDABILITY

Holography: A Hardware Virtualization Tool for Malware Analysis	225
<i>Shih-Yao Dai, Yarochkin Fyodor, Jain-Shing Wu, Chih-Hung Lin, Yennun Huang, Sy-Yen Kuo</i>	
Delayed Processing Technique in Critical Sections for Real-Time Linux	231
<i>Maobing Dai, Yutaka Ishikawa</i>	
A New Multiple-Round DOR Routing for 2D Network-on-Chip Meshes	238
<i>Binzhang Fu, Yinhe Han, Huawei Li, Xiaowei Li</i>	

FAULT-TOLERANCE AND SECURITY QUALIFICATION

Dependability Benchmarking Using Software Faults: How to Create Practical and Representative Faultloads	244
<i>Pedro Costa, João Gabriel Silva, Henrique Madeira</i>	
Zapmem: A Framework for Testing the Effect of Memory Corruption Errors on Operating System Kernel Reliability	250
<i>Roberto Jung Drebes, Takashi Nanya</i>	
Comparing the Effectiveness of Penetration Testing and Static Code Analysis on the Detection of SQL Injection Vulnerabilities in Web Services	256
<i>Nuno Manuel Dos Santos Antunes, Marco Paulo Amorim Vieira</i>	
D²STM: Dependable Distributed Software Transactional Memory	262
<i>Maria Isabel Catarino Couceiro, Paolo Romano, Nuno Miguel Rei De Carvalho, Luís Eduardo Teixeira Rodrigues</i>	
Quantitative RAS Comparison of Sun CMT/Solaris and X86/Linux Servers	269
<i>Dong Tang, William Bryson</i>	
Efficient Fault-Tolerant Backbone Construction in Tmote Sky Sensor Networks	274
<i>Yu-Yuan Lin, Kuo-Feng Ssu</i>	

Quiescent Leader Election in Crash-Recovery Systems	280
<i>Mikel Larrea, Cristian Martin</i>	
Fault-Tolerant Event Detection Using Two Thresholds in Wireless Sensor Networks	286
<i>Sung-Jib Yim, Yoon-Hwa Choi</i>	
Quantifying Criticality of Dependability-Related IT Organization Processes in CobiT	291
<i>Tobias Goldschmidt, Andreas Dittrich, Miroslaw Malek</i>	

MODELING, ANALYSIS AND THEORY

Online Computing and Predicting Architectural Vulnerability Factor of Microprocessor Structures	297
<i>Songjun Pan, Yu Hu, Xiaowei Li</i>	
Enhancing the Success Rate of Primary Version While Guaranteeing Fault-Tolerant Capability for Real-Time Systems	303
<i>Wanfu Ding, Rui Feng Guo</i>	
An Early-Stopping Protocol for Computing Aggregate Functions in Sensor Networks	309
<i>Antonio Fernandez Anta, Miguel A. Mosteiro, Christopher Thraves</i>	
Availability Modeling and Analysis of a Virtualized System	317
<i>Dong Seong Kim, Fumio Machida, Kishor S. Trivedi</i>	
The Instruction Scheduling for Soft Errors Based on Data Flow Analysis	324
<i>Jianjun Xu, Qingping Tan, Rui Shen</i>	
Evaluating the Impact of Irrecoverable Read Errors on Disk Array Reliability	331
<i>Jehan-Francois Paris, Ahmed Amer, Darrell D. E. Long, Thomas J. E. Schwarz</i>	
A Measurement System to Improve E-Business Capability of Human Resources in an Organizational Computing Environment	337
<i>Chui Young Yoon, Keon Myung Lee, Joong Nam Jeon, In Sung Lee</i>	
Author Index
