

2009 First IEEE International Workshop on Information Forensics and Security

(WIFS'422;)

**London, United Kingdom
6-9 December 2009**

**IEEE Catalog Number: CFP09WIF-PRT
ISBN: 978-1-4244-5279-8**

Watermarking and Perceptual Models

- 1 **Secure and HVS-Adaptive Exhibition Spread Transform Dither Modulation Watermarking for Digital Cinema**
(Rony Darazi, Pilar Callau, Benoît Macq)
- 6 **A Hierarchical Spatially Adaptive Image Model for Perceptual Mask Design and Multiplicative Watermark Detection**
(Antonis Mairgiotis, Nikolaos Galatsanos)
- 11 **QIM-DM Watermarking Optimization Based on Inter-Frequency Contrast Masking in the DCT Domain**
(Federica Battisti, Marco Carli, Alessandro Neri)
-

Forensics

- 16 **A System for Forensic Analysis of Large Image Sets**
(Steven J. Simske, Margaret Sturgill, Paul Everest, George Guillory)
- 21 **On Resampling Detection in Re-Compressed Images**
(Matthias Kirchner, Thomas Gloe)
- 26 **Forensic Characterization of RF Devices**
(Aravind K. Mikkilineni, Deen King-Smith, Saul B. Gelfand, Edward J. Delp)
- 31 **Retention of Micro-Fragments in Cluster Slack — A First Model**
(Johan Garcia, Thijs Holleboom)

Traitor Tracing

- 36 **A Note on the Equivalence of the Traceability Properties of Reed-Solomon Codes for Certain Coalition Sizes**
(Jose Moreira, Marcel Fernandez, Miguel Soriano)
- 41 **Tardos Fingerprinting Codes in the Combined Digit Model**
(Boris Škorić, Stefan Katzenbeisser, Hans Georg Schaathun, Mehmet U. Celik)
- 46 **Blind Decoder for Binary Probabilistic Traitor Tracing Codes**
(Luis Pérez-Freire, Teddy Furon)
- 51 **Capacity-Achieving Fingerprint Decoding**
(Yen-Wei Huang, Pierre Moulin)
- 56 **Worst Case Attacks Against Binary Probabilistic Traitor Tracing Codes**
(Teddy Furon, Luis Pérez-Freire)

Biometry

- 61 **Heart Sounds Quality Analysis for Automatic Cardiac Biometry Applications**
(Francesco Beritelli, Andrea Spadaccini)
- 66 **Accuracy Improvement with High Convenience in Biometric Identification Using
Multihypothesis Sequential Probability Ratio Test**
(Takao Murakami, Kenta Takahashi)
- 71 **Leveraging Reliable Bits: ECC Design Considerations for Practical Secure Biometric
Systems**
(Yige Wang, Shantanu Rane, Anthony Vetro)
- 76 **Fast Identification Algorithms for Forensic Applications**
(Fokko Beekhof, Sviatoslav Voloshynovskiy, Oleksiy Koval, Taras Holotyak)
- 81 **On the Security of Non-Invertible Fingerprint Template Transforms**
(Abhishek Nagar, Anil K. Jain)
- 86 **Privacy Enhancement of Common Randomness Based Authentication: Key Rate
Maximized Case**
(Sviatoslav Voloshynovskiy, Oleksiy Koval, Taras Holotyak, Fokko Beekhof)

Privacy and Anonymity

- 91 **Efficient Privacy-Preserving Classification of ECG Signals**
(Mauro Barni, Pierluigi Failla, Riccardo Lazzeretti, Annika Paus, Ahmad-Reza Sadeghi, Thomas Schneider, Vladimir Kolesnikov)
- 96 **Privacy-Preserving User Clustering in a Social Network**
(Zekeriya Erkin, Thijs Veugen, Tomas Toft, Reginald L. Lagendijk)
- 101 **Extracting Social Networks from Seized Smartphones and Web Data**
(Fabio Dellutri, Luigi Laura, Vittorio Ottaviani, Giuseppe F. Italiano)
- 106 **Efficient Implementation of Anonymous Credentials on Java Card Smart Cards**
(Michaël Sterckx, Benedikt Gierlichs, Bart Preneel, Ingrid Verbauwhede)
-

Content Fingerprinting

- 111 **Modeling Content Fingerprints Using Markov Random Fields**
(Avinash L. Varna, Min Wu)
- 116 **Modeling and Analysis of Ordinal Ranking in Content Fingerprinting**
(Wei-Hong Chuang, Avinash L. Varna, Min Wu)
- 121 **Towards Automated Image Hashing Based on the Fast Johnson-Lindenstrauss Transform (FJLT)**
(Mehrdad Fatourechi, Xudong Lv, Z. Jane Wang, Rabab K. Ward)
- 126 **Security of Robust Audio Hashes**
(Stefan Thiemert, Stefan Nürnberger, Martin Steinebach, Sascha Zmudzinski)

Watermarking, Steganography and Information Hiding

- 131 **Wet ZZW Construction for Steganography**
(Tomáš Filler, Jessica Fridrich)
- 136 **Using Forms for Information Hiding and Coding in Electrophotographic Documents**
(Maria V. Ortiz Segovia, George T.-C. Chiu, Jan P. Allebach)
- 141 **Secure Semi-Fragile Watermarking for Image Authentication**
(Chuhong Fei, Raymond Kwong, Deepa Kundur)
- 146 **An Extended Analysis of Discrete Fourier Transform — Rational Dither Modulation for Non-White Hosts**
(Michele Scagliola, Fernando Pérez-González, Pietro Guccione)
- 151 **Printer-Scanner Identification via Analysis of Structured Security Deterrents**
(Matthew D. Gaubatz, Steven J. Simske)
-

Device Identification

- 156 **Camera Response Function Signature for Digital Forensics — Part I: Theory and Data Selection**
(Tian-Tsong Ng, Mao-Pei Tsui)
- 161 **Camera Response Function Signature for Digital Forensics — Part II: Signature Extraction**
(Tian-Tsong Ng)
- 166 **Source Scanner Identification for Scanned Documents**
(Nitin Khanna, Edward J. Delp)
- 171 **Source Cell Phone Camera Identification Based on Singular Value Decomposition**
(Gökhan Gül, İsmail Avcıbaşı)

Cryptography and Protocols

- 176 **Processing in the Encrypted Domain Using a Composite Signal Representation: Pros and Cons**
(Tiziano Bianchi, Thijs Veugen, Alessandro Piva, Mauro Barni)
- 181 **Bitstalker: Accurately and Efficiently Monitoring BitTorrent Traffic**
(Kevin Bauer, Damon McCoy, Dirk Grunwald, Douglas Sicker)
- 186 **RFID Key Establishment Against Active Adversaries**
(J. Bringer, H. Chabanne, G. Cohen, B. Kindarji)
- 191 **Practical DPA Attacks on MDPL**
(Elke De Mulder, Benedikt Gierlichs, Bart Preneel, Ingrid Verbauwhede)
