Comprehensive Quality by Design in Pharmaceutical Development and Manufacture

Topical Conference at the 2009 AIChE Annual Meeting

Nashville, Tennessee, USA
8-13 November 2009

ISBN: 978-1-61567-924-9

TABLE OF CONTENTS

Progress in Implementation of Quality by Design - An FDA Perspective 1
Christine M.V. Moore

The Evolution of Quality by Design in Drug Substance Development 2
John Lepore

Drug Product Quality by Design: An Industrial Perspective 3
Mary T. Am Ende

Analysis of Electrical Properties of a Powder Blend and Their Effect On Flow Behavior - a QbD Approach 4
Fernando J. Muzzio

Modeling Batch Pharmaceutical Reactions by Factor Analysis of Spectral Data 5
Fredy Afif, Christos Georgakis

Incorporating "Process Efficiency" Attributes and Lean Thinking During API Product Development" 6
Ken Ryan, Vincent McCurdy, Roger Weaver, Garry O'Connor

The Development of the Design Space for Maraviroc API 7
Garry O'Connor, Ken Ryan

Linking Unit Operations During Design Space Development and Definition 8
Lynn Conley, Leonard Perry, John Pieracci, Matthew Westoby

Quality-by-Design (QbD): Process Trajectory Development for a Pharmaceutical Co-Precipitation Process Based On An Integrated Real-Time Process Monitoring Strategy 9
Huiquan Wu, Mansoor A. Khan

Synthesis and Steady-State Optimization of a Continuous Pharmaceutical Process 26
Dimitrios I. Gerogiorgis, Paul I. Baron

Design Space Continuum: From Drug Substance to Drug Product 28
T. Kourti

Implementing Risk- and Knowledge Management Tools Into Product- and Process Development According to Quality by Design 29
Brigitte Guebitz, Johannes Fritz, Hubert Schnedl, Siegfried Adam, Stefan Radl, Johannes Khinast

Application of QbD Principles to Analytical Methods 30
Kimber Rundlett

The Development of Methods to Link Design Space Models to Product Stability 31
Zhixin Zong, Peter L. Wildfong, Lee E. Kirsch, Aditya M. Kaushal, Eric J. Munson, Raj Suryanarayanan, Dewey H. Barich, Kalyana Pingali, Fernando J. Muzzio, Defne Kayrak-Talay, Salil D. Desai, Ira Shea Buckner

Establishing Appropriate Particle Size Specifications for Solid Oral Dosage Forms 34
Zhigang Sun

Using QbD Approaches to Enable Development of Real Time Release for a Continuous Drug Product Process 35
David C. A. Sharp

Multivariate Texture and Image Analysis for Solid Dosage Intermediate and Final Product Characterization and Downstream Performance Prediction 63
Salvador Garcia-Munoz, Alan Carmody

Modeling and Simulation in Support of Quality by Design 64
Chau-Chyun Chen

Model Based Fuel Cell Development 65
Sitaram Ramaswamy

Model Base Design in the Fast Moving Consumer Goods 66
Benjamin Weinstein

Design for Six Sigma in High Value Materials Development 67
George Liebermann

Experiences with Multivariate Quality Assurance in Dow 75
Leo H. Chiang

QbD for Biotherapeutics: Opportunities and Challenges -- An Industrial View Point 76
Stefanie Pluschkell

A Systems Approach for Design of Intensified Bio-Pharmaceutical Processes 77
Alicia Román Martínez, Rafiqul Gani, John M. Woodley

Upstream Process Characterization Utilizing Response Surface Experimental Design: Case Study for a GS-NS0 Monoclonal Antibody Production Process 78
Serena Fries Smith, Edith Senderak, Rachel Bareither, Melanie Tellers, Vanessa Parikh, T. Craig Seamans, Michel Chartrain

Characterization of Monoclonal Antibody Primary Recovery and Purification Steps: Towards Process Validation 79
Michael Iammarino, Nihal Tugcu, Joseph Nti-Gyabaah, Martin Chandler, David Roush

Improving the Batch Cycle in Bioreactors: From Media Makeup to Cleaning 80
Elaine Martin, Gary Montague

A Contemporary Perspective of Design Space Development and Maintenance 82
James C. Spavins

The FDA – Novartis CRADA: A Risk-Based and Systems Approach for Quality by Design (QbD) Implementation for An Approved Pharmaceutical Product 83
James Cheney, Mansoor A. Khan, Marc Goeller, Chris Balducci, Lorenz Liesum

QbD – Design Space Management / Maintenance 84
T. Kourti

A Strategy of Using Mechanistic Understanding for Continuous Quality Verification 85
San Kiang, Shih-Ying Chang

Role of Models for Implementation of Design Space: An FDA View 86
Sharmista Chatterjee

Role of Real-Time Monitoring Tools and Chemometrics for Development and Maintenance of Pharmaceutical Design Space 87
Huiquan Wu

Drug Substance Scale and Equipment Assessments Linking a Design Space to a Manufacturing Facility: Case Studies 88
Timothy J. Watson

The Role of Automatic Process Control In QbD 89
Richard D. Braatz

NIPTE-FDA Collaborative Case Study On Model-Based Design Space Development Across Scales and with Stability Considerations 90
Gintaras V. Reklaitis, Hamid Arastoopour, Robin Bogner, James K. Drennen III, Lee E. Kirsch, James Litster, Eric J. Munson, Fernando Muzzio, Raj Suryanarayanan, Stephen W. Hoag, Mansoor A. Khan

QbD and Statistics: What a Chemical Engineer Needs to Know 91
David Christopher

Model-Based Quality by Design Applied to An API Process 92
Justin L. Burt, James Bergum, Alan Braem, Antonio Ramirez, Lucius Rossano, Jose Tabora, Srinivas Tummala

Applications of Quality by Design Principles Utilizing Process Modeling and PAT in the Development of An API Process 93
Christopher L. Burcham, Joeseph R. Martinelli, Mark A. LaPack

Enhancing Process Understanding around Impurities Formation in API Intermediate Synthesis Via Kinetic Modeling & CFD 94
Samrat Mukherjee, Shailendra V. Bordawekar, Nandkishor K. Nere

An Integrated High-Throughput Experimentation and Semi-Empirical Modeling Approach to Building Process Knowledge in Pharmaceutical Process Development 95
Alexander J. Marchut, Jun Qiu, Olav K. Lyngberg, A. Erik Rubin

Numerical Simulation of Mixing and Drying of Pharmaceutical Particles in a Bubbling Fluidized Bed Reactor 96
Jungkee Jang, Cezar A. Rosa, Hamid Arastoopour

Design Space, Models and Model Uncertainty 97
Constantinos C. Pantelides, Nilay Shah, Claire S. Adjiman

Correlation of Material Properties and Process Parameters to Pharmaceutical Tablet Mechanical Characteristics Using a Quai-Continuum Model 98
Athanas A. Koynov, Alberto Cuitino

Flowchart Methodology Utilizing Validated Process Models as the Foundation for a Quality-by-Design (QbD)-Based Approach for Pharmaceutical Unit Operations: Example Case Studies 99
Lisa J. Graham, Daniel E. Dobry, Ronald A. Beyerinck

Model Based Approach to Determine Optimum Operating Conditions in High Shear Granulation 100
Defne Kayrak-Talay, James D. Litster, James K. Drennen III

Modeling Density and Temperature Distributions in Powder Die Compacts 101
Jerry R. Klinzing, Antonios Zavaliangos, John Cunningham, Tracey Mascaro, Denita Winstead

Film Coating End-Point Determination for Colored Immediate Release Tablets Using Multivariate Image Analysis 102
Salvador Garcia-Munoz, Daniel Gierer
The Effect of Tablet Shape On Film Coating Uniformity Using the Discrete Element Method 104
William R. Ketterhagen
Controllability Analysis and Identification of Optimal Control-Loop Pairings in a Multiple-Input Multiple-Output Granulation Process 105
Rohit Ramachandran, Charles D. Immanuel, Frantisek Stepanek
Expanding the Acceptance Region for Incoming Materials Via the Usage of a Mid-Course Correction Controller for Wet Granulation 107
Salvador Garcia-Munoz, Stephanie Brecht, Howard W. Ward II
Application of ICAS-PAT On Design of Process Monitoring and Control System for a Batch Cooling Crystallization Process through Hybrid Multiscale Model-Based Analysis 108
Ravendra Singh, Noor Asma Fazli Bin Abdul Samad, Gürkan Sin, Krist V. Gernaey, Rafiqul Gani
Feed-Forward Process Control Strategy for Pharmaceutical Tablet Development 110
Koji Muteki, Vidya Swaminathan, Sonja Sekulic
Automation of a Fluidized Bed Dryer Utilizing Multi-Variate near Infrared Spectra and MPC 111
Ariel Vargas, Carlos Velazquez
Integration of Principal Component Modeling Methods in a Model Predictive Control Architecture 130
Chris McCready
A QbD Approach to Selection of Materials for Drug Product Packaging and Medical Devices 131
Arthur J. Shaw III
Application of Modeling to Scale-up Liquid Mixing Processes 132
Venkat R. Koganti, Fred Carroll, Richard Ferraina, Mark Berry, Robert Leasure, Jeffrey Gaudio, Yang Liu, Kenneth Norris, Bryan Braxton, WIlliam Petre, Yogesh Waghmare, Rick Falk
Application of Quality by Design Principles to Development of Freeze-Dried Parenteral Dosage Forms 133
Linas Mockus, Michael Pikal, Nancy Harper, Prabir K. Basu, Steven Nail, Nathan Pease, Mansoor A. Khan, Tim Paul
On the Optimization of the Cooling Profile in Crystallization Using the Design of Dynamic Experiments Approach 138
Andrew Hagger, Andrew Fiodalis, Christos Georgakis
Quality-by-Design (QbD): Examining the Impact of Process Variables On Particle Size Distribution for a Pharmaceutical Co-Precipitation Process Using Real-Time Lasentec FBRM and PVM Process Monitoring and Design of Experiments (DoE) Approach 139
Huiquan Wu, Maury White, Mansoor A. Khan
The in Situ Analysis and Characterization of the Coprecipitation of a Model Drug and Polymer 151
Juandria V. Williams, Rakhi B. Shah, Huiquan Wu, Mansoor A. Khan
Improving Process Understanding through Good Experimental Planning 152
Kelly Canter, Leonard Perry
The Use of the Design of Dynamic Experiments Methodology to Quantify the Design Space in QbD Tasks 153
Christos Georgakis
The ICH Q8 Definition of Design Space: A Comparison of the Overlapping Means and the Bayesian Predictive Approaches 154
John J. Peterson, Kevin R. Lief
Correlating Powder Flowability to Particle Size Distribution Using Chemometric Techniques 193
Christopher L. Burcham, Robert T. Roginski
Predictive Modeling of Pharmaceutical Processes with Missing and Noisy Data 194
Fani Boukouvala, Fernando Muzzio, M.G. Ierapetritou
Nonlinear Programming Based Methods for PCA Parameter Estimation Using Data with Missing Elements 197
Rodrigo López-Negrete de la Fuente, Salvador Garcia-Munoz, Lorenz T. Biegler
