

2009 44th International Universities Power Engineering Conference

(UPEC 2009)

**Glasgow, United Kingdom
1-4 September 2009**

**IEEE Catalog Number: CFP09569-PRT
ISBN: 978-1-4244-6823-2**

TABLE OF CONTENTS

Demand Side Primary Frequency Response Support Through Smart Meter Control.....	1
<i>Kamalanath Samarakoon, Janaka Ekanayake</i>	
Windowed Standard Deviation-Based Transient Feature Extraction for Earth Fault Protection in MV Networks.....	6
<i>Nagy I. Elkalashy, Abdelsalam M. Elhaffar, Mohamed F. Abdel-Fattah, M. Lehtonen Naser, G. Tarhuni</i>	
Flexible Transmission Network Planning with Post-Contingency Network Switching	10
<i>A. K. Kazerooni, J. Mutale</i>	
Effect of Generator Models and Load Models on the Results of the Transient Stability Analysis of a Power System.....	15
<i>Elmer Sorrentino, Orlando Salazar, Daniel Chávez</i>	
Islanded Operation of UK Radial Distribution: Earthing Strategy	20
<i>Hasmaini Mohamad, Peter A. Crossley</i>	
Assessing the Impact of Micro CHP on Gas and Electricity Distribution Networks	26
<i>Thipnatee Sansawatt, James R. G. Whiteford, Gareth P. Harrison</i>	
Applications of Web-based Learning for Power Engineering in the World	31
<i>B. Bitzer, Hezron</i>	
Modeling and Simulation of Automotive Interleaved Buck Converter.....	35
<i>Tammam Benmusa, Mohamed. A. Shrud, Amar Bonsbaine, Ahmed. S. Ashur, Richard Thorn</i>	
Development of UHF Transformer Probe Sensors for On-Line Partial Discharge Measurement	40
<i>Alistair Reid, Martin Judd, Carl Johnstone</i>	
Wireless Sensor Networks for Partial Discharge Condition Monitoring	44
<i>I. S. Hammoodi, B. G. Stewart, A. Kocian, S. G. McMeekin, A. Nesbit</i>	
A Novel Correlation Tester for Multicore Power Cable Fault Finding and Identification Using Pseudonoise Sequences.....	49
<i>H. Geisler, R. A. Guinee</i>	
An Improved Transformer Protection Scheme Based on Integrated Protection System	54
<i>Hao Zhang, Jinghan He, Bin Li, Zhiqian Bo</i>	
Synthetic Loading Technique for Efficiency Evaluation of Permanent Magnet Synchronous Machines	58
<i>Abdelaziz Y. M. Abbas, John E. Fletcher</i>	
Voltage Profile Support in LV Distribution Networks with Distributed Generation	63
<i>Leopold Herman, Boštjan Blažič, Igor Papic</i>	
An Evaluation of Integrated Fuel Cell and Energy Storage Systems for Residential Applications	68
<i>Omar A. Shabe, Philip C. Taylor</i>	
Transient Stability Assessment of SMIB System with “Mixed” Overhead-Cable Line - Sensitivity Analysis.....	73
<i>Mariano G. Ippolito, Fabio Massaro, Giuseppe Morana, Rossano Musca</i>	
Local Voltage Stability Constraint for OPF	78
<i>Raúl Rodriguez, Mario A. Ríos</i>	
Pulsed Light Technology for Microbial Inactivation.....	82
<i>Endarko, M. Maclean, I. V. Timoshkin, S. J. Macgregor, J. G. Anderson</i>	
Using Optimal Power Flow for Management of Power Flows in Active Distribution Networks within Thermal Constraints	86
<i>M. J. Dolan, E. M. Davidson, G. W. Ault, F. Coffele, I. Kockar, J. R. McDonald</i>	
Accurate Methods for Solving Electromagnetic Interference Problems Between Power Lines and Underground Metallic Pipelines.....	91
<i>Dan Doru Micu, Levente Czumbil, Andrei Ceclan, Laura Darabant</i>	
A Study of Transient Torque Analysis in the Squirrel-cage Induction Motor with Reactor and Damping Resistor Starter	96
<i>Junichi Fukushima, Yoshihisa Urin, Keita Katawama, Hiroyuki Iki, Yoshihide Kado</i>	
The Effect of Different Fuzzy Membership Function Forms on Controlling Loop Flows.....	100
<i>G. Ozdemir Dag, M. Bagriyanik</i>	
Electric Power System’s Steady-State Security Analysis Applying the Rough Set Theory Considering an Incomplete Information System	105
<i>C. I. Faustino Agreira, C. M. Machado Ferreira, F. P. Maciel Barbosa</i>	
Wheeling Charge Based on Identification of Transaction Paths in Deregulated Power Markets	110
<i>Hiromu Hamada, Hideo Tanaka, Ryuichi Yokoyama</i>	

Phase-frequency Characteristic of Zero Sequence Networks in Neutral Indirectly Grounded Power System.....	115
<i>W. G. Zhang, B. H. Zhang, M. You, H. S. Hu, L. C. Zhou, Z. Q. Bo, A. Klimek</i>	
Multicriteria Optimal Location of TCPAR in a Competitive Energy Market Using ELECTRE III	120
<i>Muwaffaq I. Alomoush</i>	
Optimal Co-ordinated Operation of Distributed Multi-generation in Active Distribution Networks.....	125
<i>Loredana Carradore, Roberto Turri</i>	
Microgrid Intentional Islanding for Network Emergencies	130
<i>I. Grau, L. M. Cipcigan, N. Jenkins, P. Papadopoulos</i>	
Techno-economic Evaluation of Different Hybrid Power Generation Systems for an Off-Grid Residence in Greece.....	135
<i>Ioannis P. Panapakidis, Minas C. Alexiadis, Dimitrios N. Sarafianos, Michael I. Seiragakis</i>	
Analysis of Switching Over-voltages in a Three-ended 400 kv Cable System.....	140
<i>Denis T. A. Kho, Martin D. Greenwood, Kenneth S. Smith</i>	
A Review of Short-term Electricity Price Forecasting Techniques in Deregulated Electricity Markets.....	145
<i>Linlin Hu, Gareth Taylor, Hai-Bin Wan, Malcolm Irving</i>	
Control of Multi-terminal VSC-HVDC Transmission System for Offshore Wind Power Generation	150
<i>Shu Zhou, Jun Liang, Janaka B. Ekanayake, Nick Jenkins</i>	
A Comparison of Imbalance Settlement Methods of Electricity Markets	155
<i>Mingming Zhang, Kwok L. Lo</i>	
The Realisation of Fuzzy Cognitive Agents Representing Electricity Market Participants	160
<i>David Borrie, C. S. Özeren</i>	
Assessment of Vehicle to Grid Power as Power System Support.....	165
<i>Xiaotao Zhong, Andrew Cruden, David Infield, Piotr Holik, Sikai Huang</i>	
Study of Propagation Behaviour of Partial Discharge Acoustic Signals in a 3-D Model Tank	170
<i>Syed Aqeel Ashraf, Brian G. Stewart, Donald M. Hepburn, Chengke Zhou</i>	
Control Schemes for Distributed Generators Connected to Distribution Networks.....	175
<i>Wenting Shang, Miles A. Redfern</i>	
The Future of the UK Generation Sector	180
<i>David Borrie, C. S. Özeren</i>	
FBG-based Fibre-optic Current Sensors for Power Systems Protection: Laboratory Evaluation	185
<i>Philip Orr, Paweł Niewczas, Adam Dysko, Campbell Booth</i>	
Communication Assisted Protection Selectivity for Reconfigurable and Islanded Power Networks	190
<i>Robert J. Best, D. John Morrow, Peter A. Crossley</i>	
Characterization of Wind and Solar Generation and Their Influence on Distribution Network Performances	195
<i>Emanuele Pasca, Giacomo Petretto, Samuele Grillo, Mattia Marinelli, Federico Silvestro</i>	
Industrial Power System Protection Against Transmission System Blackouts	201
<i>Mircea Scutariu, Mott Macdonald</i>	
Lightning Performance Indices of Overhead Distribution Lines	206
<i>N. Klairuang, P. Unahalekhaka, S. Somkanea, A. Soasawan</i>	
Rotor Design and Analysis of Stall-regulated Horizontal Axis Wind Turbine	211
<i>Xinzi Tang, Xiongwei Liu, Ahmad Sedaghat, Lik-Kwan Shark</i>	
Operational Control and Protection Implications of Fault Current Limitation in Distribution Networks.....	216
<i>S. M. Blair, N. K. Singh, C. D. Booth, G. M. Burt</i>	
Market Power Analysis in the Italian Electricity Market Using a Supply Function Equilibrium Model	221
<i>A. M. A. K. Abeygunawardana, C. Bovo, A. Berizzi</i>	
Assessment of Tradable Short-Term Transmission Access Rights to Integrate Renewable Generation	226
<i>Mohamed Shaaban, Keith Bell</i>	
Comparative Analysis of Different Types of Generator Voltage Controllers.....	231
<i>Katarzyna Zalewska, Waldemar Rebizant, Rafal Kawecki</i>	
Control Room Scenarios on Active Distribution Networks: Early Results and Next Steps.....	235
<i>Stephanie L. Hay, Graham W. Ault, Keith R. W. Bell</i>	
Methodology for Applying Real-time Ratings to Wood Pole Supported Overhead Lines.....	240
<i>John Cunningham, Jeremy Colandairaj</i>	
Flexible Heat Load for Managing Wind Variability in the Irish Power System	245
<i>Muhammad Akmal, Damian Flynn, Jason Kennedy, Brendan Fox</i>	
Application of SVPWM to Three-Level Voltage and Current Inverters	250
<i>Hind Djeghloud, Hocine Benalla, Amar Bentouensi</i>	
Algorithm for Microgrid On-Line Central Dispatch Of Electrical Power and Heat	255
<i>Eduardo Alvarez, Javier Gómez-Aleixandre, Nicolás De Abajo, Antonio M. Campos Lopez</i>	

Unit Commitment Considering Voltage and Reactive Power Constraints	260
Z. Y. Pan, X. S. Han, P. P. Yang	
Centralized Control of Dispersed Generators Providing Ancillary Services in Distribution Networks -	
Part I: Theoretical Aspects	265
A. Bracale, R. Angelino, G. Carpinelli, D. Lauria, M. Mangoni, D. Proto	
A Novel Electro-magnetic Transient Analysis Method for Distributed Parameter Transmission Lines	270
Hengxu Ha, Bo Chen, Z. Q. Bo	
Identification of the Dynamic Equivalent of a Power System.....	275
T. Singhavilai, O. Anaya-Lara, K. L. Lo	
Autonomous Distributed Reactive Power Control Agents for Local Area Network.....	280
T. Nagata, H. Saiki, R. Hatano	
Role of DC Capacitor in VSI Based Active Power Line Conditioning System	285
Moleykutty George, Kartik Prasad Basu	
Harmonic Source-Sink Nodal Diagram for Analyzing Directional Flow of Reactive Power	289
M. T. Jankowski, G. Atkinson—hope	
Comparative Study of On-line Three Phase PD Monitoring Systems for Overhead Covered Conductor Distribution Lines	294
Muzamir Isa, Ghulam Murtaza Hashmi, Matti Lehtonen	
Influence of the Transient Stability Performance Indices on a Contingency Screening and Ranking Algorithm	299
C. M. Machado Ferreira, F. P. Maciel Barbosa	
Dynamic Performance of Single Phase Active Power Filters Using Virtual Two Axis Strategy	304
W. Hosny, B. Dobrucky, M. Pokorny	
Dynamics Behaviour of a Grid Connected DFIG for Wind Energy Conversion during Disturbances	308
Milton Kumar Das, S. Chowdhury, S. P. Chowdhury, C. T. Gaunt	
Dispatching System for the Highly Distribution Power System.....	313
Rina Mohd Sharip, Stuart Galloway, Graeme Burt	
Impulse Corona Inception in Dielectric Covered Rod-Plane Air Gaps.....	317
P. N. Mavroidis, P. N. Mikropoulos, C. A. Stassinopoulos	
Microgrid Power Electronic Converters: State of the Art and Future Challenges	321
M. Jamil, B. Hussain, M. Abu-Sara, R. J. Boltryk, S. M. Sharkh	
Impact of Combined Heat and Power (CHP), Plant on Small and Medium Size Enterprise (SME), Energy Supply Used as Trigeneration	326
Liam Buckley, Sreto Boljevic, Noel Barry	
Fault Diagnostic Testing Using Partial Discharge Measurements on High Voltage Rotating Machines	331
Paul Smeeton, Amar Bousbaine	
Transient Behaviour of a “Mixed” Overhead-Cable EHV Line Under Lightning Events	336
Fabio Massaro, Giuseppe Morana, Rossano Musca	
A Power Demand Simulator of Electric Transportation Systems for Distribution Utilities.....	341
Gabriel Garcia, Mario A. Rios, Gustavo Ramos	
Economic Feasibility of Wind Farm Using Low Wind Speed Turbine	346
U. Sangpanich, G. A. Ault, K. L. Lo	
Noise Amplitude Distribution of Impulsive Noise from Measurements in a Power Substation.....	351
Qingshan Shan, Shahzad Bhatti, Ian A. Glover, Robert Atkinson, Philip J. Moore, Iliana E. Portugues, Richard Rutherford	
Identification of Simultaneously Active PD Sources Using Passive Comparison of UHF Signals	356
A. J. Reid, M. D. Judd	
A Modified IEEE 802.11 Protocol for Reliable Data Transmission in Automated Power Distribution Systems	360
Fabio Campoccia, Maria Luisa Di Silvestre, Eleonora Riva Sanseverino, Gaetano Zizzo	
Feeder Reconfiguration with Dispatchable Distributed Generators in Distribution System by Tabu Search	365
N. Rugthaicharoencheep, S. Sirisumrannukul	
Partial Discharge Resulting from Internal Degradation in Underground MV Cables: Modelling and Analysis.....	370
Mohamed Alsharif, Peter A. Wallace, Donald M. Hepburn, Chengke Zhou	
A Novel Approach to the Optimal Planning of Flexible Active Distribution Networks.....	375
Robert A. Macdonald, Graham W. Ault, James R. McDonald	
Practical Tables for the Design of the Grounding Systems in Distribution Networks in Presence of Metallic Interconnection	380
Angelo Campoccia, Eleonora Riva Sanseverino, Gaetano Zizzo	

Failure Diagnosis Techniques of Grounding Grid of Substations and the Urgent Problems Existing in the Area	385
<i>Huizhong Xu, Hongzhong Ma, Zhixin Zhang, Guanghe Li, Feng Zhao, Tongkuang Liu</i>	
Modelling Interaction Between Solid Oxide Fuel Cell, Inverters and AC Power Networks	390
<i>Jiancong Ren, Stephen Gamble, Andrew J. Roscoe, Graeme Burt</i>	
Transformer Winding Losses Evaluation When Supplying Non Linear Load.....	395
<i>W. Frelin, L. Berthet, M. Petit, J. C. Vannier</i>	
Expansion Planning of Distribution Networks Considering Uncertainties.....	400
<i>David T. -C. Wang, Luis F. Ochoa, Gareth P. Harrison</i>	
Frequency Response from Wind Turbines	405
<i>Ian Moore, Janaka Ekanayake</i>	
An Improved Approach to the Simulation of Single-Line-to-Ground Faults in Transmission Networks.....	410
<i>Angelo Campoccia, Eleonora Riva Sanseverino, Gaetano Zizzo</i>	
Robust Grid Synchronisation in Three-Phase Distributed Power Generation Systems by Synchronous Reference Frame Pre-Filtering.....	415
<i>Roberto Petrella, Alessandro Revelant, Piero Stocco</i>	
Development of a Voltage and Frequency Control Strategy for an Autonomous LV Network with Distributed Generators	420
<i>Justin Au-Yeung, Greet M. A. Vanalme, Johanna M. A. Myrzik, Panagiotis Karaliolios, Martijn Bongaerts, Jan Bozelie, Wil L. Kling</i>	
An Alternative Method for the Monitoring of Strain and Temperature in a Nuclear Fusion Reactor	425
<i>Paul Crolla, Paweł Niewczas, James R. McDonald</i>	
Distribution Networks with Electric Vehicles	429
<i>P. Papadopoulos, L. M. Cipcigan, N. Jenkins, I. Grau</i>	
Method for Setting the Resistive Reach of Quadrilateral Characteristics of Distance Relays	434
<i>Elmer Sorrentino, Eliana Rojas, Jesús Hernández</i>	
Fuzzy Logic Based Power Optimization of Variable Speed, Variable Pitch Wind Power Generation Systems	439
<i>Kamaljeet Kaur, S. Chowdhury, S. P. Chowdhury, T. Gaunt</i>	
Design of Protection and Control Scheme for Microgrid Systems	444
<i>Bin Li, Yongli Li, Zhiqian Bo, A. Klimek</i>	
A Dynamic-Inductance Model for Controlled.....	449
<i>M. S. Perdigão, Bruno Baptista, E. S. Saraiva, J. M. Alonso</i>	
Development of Magnetic Induction Energy Harvesting for Condition Monitoring	454
<i>N. M. Roscoe, M. D. Judd, J. Fitch</i>	
Performance Analysis of MAC Layer Protocols in Access BPL for Power Grid Monitoring and Control.....	459
<i>Linyu Wang, Kristof Sleurs, Dagang Li, Geert Deconinck, Emmanuel Van Lil</i>	
Extension of Pulse-Sequence-Analysis for Evaluating Insulation PD Characteristics.....	464
<i>Iain D. Bruce, Brian G. Stewart</i>	
The Renewable Energy Resources of Iceland and Their Extended Future Utilization.....	469
<i>Egill Benedikt Hreinsson</i>	
A New Method for Charging Transmission Services.....	473
<i>Chunyang Zhao, S. Galloway, K. L. Lo</i>	
Detection of Turbine Generator Field Winding Serious Inter-Turn Short Circuit Based on the Rotor Vibration Feature	478
<i>Haizhou Huang, Kanjun Zhang, Yong Zhang</i>	
Control of a Grid Connected Doubly-Fed Induction Generators for Wind Energy Conversion	483
<i>Milton Kumar Das, S. Chowdhury, S. P. Chowdhury, C. T. Gaunt</i>	
Improving the Transient Frequency Response of Islands Using Generation Tripping	488
<i>Ahmed Yakout, Olimpo Anaya-Lara, Graeme Burt</i>	
Application of Single Pole Auto Reclosing in Distributaion Networks with High Penetration of DGS.....	493
<i>S. F. Tan, S. K. Salman</i>	
Modeling Energy Storage Systems into Electric Power Transmission Systems	498
<i>Wenjuan Du, Haifeng Wang, Liye Xiao, Rod Dunn</i>	
Experimental Test on a Fuel Cell – Supercapacitor Hybrid Power Supply for a Digital Still Camera.....	503
<i>Valeria Boscaino, Giuseppe Capponi, Filippo Marino</i>	
Voltage Stability Analysis for the South-West Libyan Electrical Power System: Problem Simulation and Analysis	508
<i>M. R. Wadi, M. F. Bara, O. Carlson, K. M. Elarroudi</i>	
Developed Single End Low Voltage Fault Location Using Distributed Parameter Approach.....	513
<i>M. M. Alamuti, H. Nouri, N. Makhol, M. Montakhab</i>	

Analysis of a Three-Phase In-Wheel Electric Motor	518
<i>D. Luque, E. Ruppert, N. Bianchi, M. Castiello</i>	
High Frequency Modeling of Protection / Measurement Current Transformers for Partial Discharge Detection	523
<i>Faisal Peer Mohamed, W. H. Siew, John Soraghan</i>	
Novel Quasi-autonomous Corona-based Power Supplies for Remote Telecommunication Repeaters Under Overhead HVDC Power Transmission	528
<i>R. Kaseke, E. L. Meyer</i>	
Benchmarking and Optimisation of Simulink Code Using Real-time Workshop and Embedded Coder for Inverter and Microgrid Control Applications	532
<i>A. J. Roscoe, S. M. Blair, G. M. Burt</i>	
Improving UHF Partial Discharge Location in High Voltage Equipment	537
<i>Tanya Pinpart, Martin D. Judd</i>	
Modeling of Gas-Insulated Lines Buried in Single and in Two-Layer Earth	542
<i>D. A. Tsiamitros, T. A. Papadopoulos, G. K. Papagiannis</i>	
Microgrid Operational Decisions Based on CfaR with Wind Power and Pool Prices Uncertainties	547
<i>Noor Miza Muhamad Razali, Amir Hisham Hashim</i>	
Damping Inter-area Oscillations by FACTS Devices	552
<i>Valentin Ilea, Alberto Berizzi, Mircea Eremia</i>	
Data Mining of the Substation Data in Distribution Network Using Rough Set and Genetic Algorithms	557
<i>Peter Crossley, Yi Liu</i>	
Optimal Placement of Distributed Generation on Distribution Networks	562
<i>Camilo Táutiva, Ángela Cadena, Fredy Rodríguez</i>	
On the Efficiency of an Alternative Codification for Multiobjective Service Restoration in Electric Distribution Networks	567
<i>Vinicius Jacques Garcia, Daniel Pinheiro Bernardon, Adriana Scheffer Quintela Ferreira, Paulo Morelato Franca</i>	
Modelling of Power Semiconductor Devices for Pulse Power Applications	572
<i>Dinesh Chamund, Noel Y. A. Shamma, Paul Taylor</i>	
Vulnerability Analysis of the Integrated Energy Infrastructure	577
<i>Meysam Qadrdan, Modassar Chaudry, Jianzhong Wu</i>	
Analysis and Simulation of a 42V Power System for Automotive Applications	582
<i>Nacer Benamrouche, Mohamed. A. Shrud, Amar Bousbaine, Abdulghena Elazrag</i>	
Forced Outage Time Analysis of a Portuguese Wind Farm	587
<i>R. F. Mesquita Brandão, J. A. Beleza Carvalho, F. P. Maciel Barbosa</i>	
Control Design of Grid-connected Three-phase Inverters for Voltage Unbalance Correction	591
<i>Bart Meersman, Bert Renders, Lieven Degroote, Tine Vandoorn, Lieven Vandervelde</i>	
Centralized Control of Dispersed Generators Providing Ancillary Services in Distribution Networks - Part II: Numerical Applications	596
<i>A. Bracale, R. Angelino, M. Mangoni, D. Proto</i>	
Efficient Proposed Solutions for Current Transformers Saturation Effects on Overcurrent Relays Operations in Distribution Systems	601
<i>Nabil H. Al-Abbas</i>	
Impulse-Driven Surface Flashover of Polymeric Dielectric Materials Immersed in Insulating Oil	607
<i>M. P. Wilson, M. J. Given, I. V. Timoshkin, S. J. Macgregor, M. A. Sinclair, K. J. Thomas</i>	
Computation of Unstable Equilibrium Points on the Transient Stability Boundary of Power Systems with Detailed Generator Modeling	612
<i>Wang Kaipeng, Zhang Yiwei, Chen Lei, Min Yong</i>	
Simulation Performance of Lightning Discharges Around Medium Voltage Underground Cables	617
<i>Michael A. Omidiora, Matti Lehtonen</i>	
Analysis of Overlap in Power Electronic Drives in Marine Networks	622
<i>Senananda P. Abhayasinghe, Richard R. W. G. Bucknall</i>	
Effects of Including Automatic Excitation Control in Transient Field Simulations of Hydrogenerators	627
<i>Johan Lidenholm, Martin Ranlöf, Urban Lundin</i>	
Optimal Reactive Power Compensation in a Deregulated Distribution Network	632
<i>Atefeh Pourshafie, S. S. Mortazavi, M. Saniei, Marjan Saadati, A. Saidian</i>	
Load Forecasting on Demand Side by Multi-Regression Model for Operation of Battery Energy Storage System	638
<i>Yusuke Hida, Ryuichi Yokoyama, Kenji Iba, Kouji Tanaka, Kuniaki Yabe</i>	
PBL Implementation in a Lighting Design Course	643
<i>M. M. Travassos Valdez, C. I. Faustino Agreira, C. M. Machado Ferreira, F. P. Maciel Barbosa</i>	

Tracking Wheel Test Facilities	648
<i>A. Muncivi, P. Sarkar, A. Haddad</i>	
A Surge Analysis of a Cable System Composed of Submarine and Underground / Overhead Cables.....	653
<i>Yo Goto, Akihiro Ametani, Toshihiro Kubo</i>	
Influence of a Wind Farm in the Dynamic Voltage Stability of a Power Network.....	658
<i>R. M. Monteiro Pereira, C. M. Machado Ferreira, F. P. Maciel Barbosa</i>	
Research on the Temporary Performance of the Protective Current Transformers with DC Bias Excitation.....	663
<i>Chang-Yun Li, Qingmin Li, Jinxin Huang, Hongshun Liu, Li Zhang, W. H. Siew</i>	
The Integrated Control of the Rotor Side and Grid Side Converters in a DFIG to Reduce Both Power and Torque Pulsations During Network Voltage Unbalance Conditions.....	668
<i>Joseph Kearney, Michael F. Conlon, Eugene Coyle</i>	
Speed Control in Vector Controlled Induction Motors.....	673
<i>S. Masoudi, M. Reza Feyzi, M. B. B. Sharifian</i>	
A New Transient Current Based Centralized Selectivity Algorithm for Earth Faults in Isolated and Compensated Neutral MV Networks	678
<i>Mohamed F. Abdel-Fattah, Matti Lehtonen</i>	
Simulation of Cascade Contingencies in Power Systems.....	683
<i>John Alejandro Sanchez, Mario Alberto Ríos, Baisser Antonio Jimenez</i>	
An Efficient Voltage Stability Ranking Using Load Shedding for Stabilizing Unstable Contingencies.....	688
<i>Su Su, Kazuyuki Tanaka</i>	
An Integrated PMU and Protection Scheme for Power Systems.....	693
<i>Chao Zhang, Zhiqian Bo, Baohui Zhang, Andrew Klimek, Min Han, Jiancheng Tan</i>	
Impact of The Weather Factors on Frequency-Domain Characteristics of The Antennas Used for EMC Measurement in Power Systems.....	697
<i>Qingmin Li, Li Zhang, Wei Wang, J. D. Yan, W. H. Siew</i>	
Modeling and Control of Z-Source Grid-connected PV System with APF Function.....	702
<i>Xiaogao Chen, Qing Fu, David Infield, Shijie Yu</i>	
Current and Voltage Distribution in a Horizontal Earth Electrode Under Impulse Conditions	707
<i>M. Ahmeda, N. Ullah, N. Harid, H. Griffiths, A. Haddad</i>	
Dispatcher Training Simulator in JCC (Role-Play of Power System Blackout and Restoration)	711
<i>Dhany Barus, Sanggam Robaga P. Sinaga</i>	
Database Management for High Resolution Condition Monitoring of Wind Turbines.....	716
<i>Ammar Zaher, Andrew Cruden, Campbell Booth, Bill Leithhead</i>	
Analysis and Comparison of Tidal Datasets for Resource Assessment and Network Modelling	721
<i>A. Sankaran Iyer, A. Robin Wallace, Gareth P. Harrison, Scott J. Couch</i>	
An Equivalent Magnetic Circuit Coupled Model of PMFC for Transient Simulation	726
<i>Hongshun Liu, Qingmin Li, Liang Zou, Yuan Ma, Wah Hoon Siew</i>	
Transient Based Protection Scheme for Distribution Grids Supplied with Distributed Generation	731
<i>Ioanna Xyngi, Marjan Popov</i>	
Lightning Attachment Models and Perfect Shielding Angle of Transmission Lines.....	736
<i>Pantelis N. Mikropoulos, Thomas E. Tsovilis</i>	
Phillips-Heffron Model of Power Systems Installed with Energy Storage Systems (ESS).....	741
<i>Wenjuan Du, Haifeng Wang, Liye Xiao, Rod Dunn</i>	
Emissions-based Simulation to Evaluate Long-term Low Carbon Transition Pathways for the UK Gas and Electricity Infrastructure.....	746
<i>Malcolm A. Barnacle, Arturo D. Alarcon, Graham W. Ault, Stuart J. Galloway</i>	
Grid Integration of a Large Offshore Wind Farm Using VSC-HVDC in Parallel with an AC Submarine Cable	751
<i>O. A. Giddani, G. P. Adam, O. Anaya-Lara, K. L. Lo</i>	
Thermal Effect of Intermittent Generation on Conventional Generator.....	756
<i>Peiran Shi, K. L. Lo</i>	
Application of Statistical Wind Models for System Impacts	761
<i>D. Hill, D. McMillan, K. Bell, D. Infield, G. W. Ault</i>	
Allocation of Hydroelectric Economic Rent Using a Cooperative Game Theoretic Approach	766
<i>Egill Benedikt Hreinsson</i>	
Study on the Feasibility of Developing High Voltage and Large Capacity Permanent-magnetbiased Fault Current Limiter	771
<i>Liang Zou, Qing-Min Li, Hong-Shun Liu, W. H. Siew</i>	
An Integrated Electro-thermal Model of IGBT Devices (Experimental Validation)	776
<i>N. Benamrouche, Amar Bonsbaine, G. Trigkidis</i>	

Hybrid Real-Time Embedded Controller Concept for Power Electronics Applications	781
<i>Ansgar Kern</i>	
Power Flow Solution with Controls and Limits Represented by Nonlinear Programming Techniques	786
<i>Adriana S. Q. Ferreira, Carlos A. Castro, Daniel P. Bernardon, Vinícius J. Garcia</i>	
Decentralised Voltage Control for Active Distribution Networks	791
<i>Thipnatee Sansawati, Jim O'Donnell, Luis F. Ochoa, Gareth P. Harrison</i>	
Predictive Control of Wind Turbines by Considering Wind Speed Forecasting Techniques	796
<i>Mahinsasa Narayana, Ghanim Putrus, Milutin Jovanovic, Pak Sing Leung</i>	
Micro-Generation for 2050: Life-Cycle Carbon Footprint of Micro-Generation Sources	800
<i>Spyros Skarvelis-Kazakos, Liana M. Cipcigan, Nicholas Jenkins</i>	
Steady State Flow Analysis for Integrated Urban Heat and Power Distribution Networks.....	805
<i>Marc Rees, Jianzhong Wu, Bishoy Awad</i>	
Development Testing of ±800kV Hvdc Thyristor Valves	810
<i>Muhammad Ashraf, Aruna Gunatilake, Norman Macleod</i>	
Modal Propagation Characteristics of Underground Power Cable Systems.....	815
<i>T. A. Papadopoulos, D. A. Tsiamitros, G. K. Papagiannis</i>	
Have Wind Turbines Stop Maturing?	820
<i>Davut Solyali, Miles A. Redfern</i>	
Measurement and Characterization of the Radiated Interference Produced by a Static Var Compensator	825
<i>Li Zhang, Qingmin Li, Wei Wang, W. H. Siew, J. D. Yan</i>	
A New PSPWM Converter for High Performance Welding Machines.....	830
<i>A. Faruk Bakan</i>	
A TCSC Model for the Power Flow Solution of the Power Transmission System of Vietnam.....	835
<i>Nguyen Tuan Anh, Dirk Van Hertem, Johan Driesen</i>	
Prospects of a Virtual Power Plant to Control a Cluster of Distributed Generation and Renewable Energy Sources	840
<i>K. El Bakari, J. M. A. Myrzik, W. L. Kling</i>	
Design of an Intelligent Diagnostic Architecture to Support the Condition Monitoring of Power Generation Assets	845
<i>A. D. Kenyon, V. M. Catterson, S. D. J. McArthur, J. Twiddle</i>	
Grid Connection Oriented Modelling of Wind Turbines with Full Converters	850
<i>D. D. Banham-Hall, G. A. Taylor, C. A. Smith, M. R. Irving</i>	
A Review of Artificial Intelligence Techniques as Applied to Adaptive Autoreclosure, with Particular Reference to Deployment with Wind generation	855
<i>Simon Le Blond, Raj Aggarwal</i>	
The Induced Overvoltage Between UHV AC and DC Transmission Lines Built on the Same Tower Under Fault Conditions	860
<i>Qiuqin Sun, Wei Shi, W. H. Siew, Hongshun Liu, Qingmin Li</i>	
Power Transformer Ferroresonance Suppression by Shunt Reactor Switching	865
<i>S. P. Ang, Z. D. Wang, P. Jarman, M. Osborne</i>	
Efficiency Improvement Techniques of High Current Low Voltage Rectifiers Using MOSFETs	871
<i>Ziyad M. Shafik, Mahmoud I. Masoud, John E. Fletcher, Stephen J. Finney, Barry W. Williams</i>	
Application of Distributed GAs to Outage Planning for Electric Power Facilities Maintaining Diversity of Solutions	878
<i>Koji Kawahara, Shinya Yoshimoto</i>	
Aircraft Electrical Systems – Coping With Harmonics for Changing Power Demands	883
<i>Kenny Fong, Stuart Galloway, Ian Harrington, Graeme Burt</i>	
Determination of Transient Overvoltages During Shunt Reactor Deenergization	888
<i>H. Abdul Hamid, N. Harid, A. Haddad</i>	
A Turbocharged Diesel Generator Set Model	892
<i>A. R. Cooper, D. J. Morrow, K. D. R. Chambers</i>	
Gain Scheduled Controller with Wind Speed Estimation via Kalman Filtering for a Stall Regulated Variable Speed Wind Turbine	897
<i>Dimitrios Bourlis, J. A. M. Bleijs</i>	
New Fuzzy Multicriteria Decision Making Algorithm to Distribution Network Reconfiguration.....	902
<i>D. P. Bernardon, V. J. Garcia, A. S. Q. Ferreira, L. N. Canha, A. R. Abaide</i>	
Review of Dielectric Behaviour of Insulating Liquids	907
<i>I. V. Timoshkin, M. J. Given, M. P. Wilson, S. J. Macgregor</i>	
Outline for an Integrated Multiple Energy Carrier Model of the UK Energy Infrastructure.....	911
<i>Elizabeth M. Robertson, Arturo D. Alarcon-Rodriguez, Stuart J. Galloway, Graham W. Ault</i>	

Fault Ride-through Behavior of MV-connected Wind Turbines and CHP-plants During Transmission Grid Disturbances.....	916
<i>Panagiotis Karaiolios, Edward Coster, Johanna Myrzik, Wil Kling</i>	
A Novel Market Based Distribution System Controller for Active Distribution Networks.....	921
<i>F. Bignucolo, R. Caldon, A. Sacco</i>	
The Suitability of N₂ to Replace SF₆ in a Triggered Spark-Gap Switch for Pulsed Power Applications	926
<i>G. Stewart, M. P. Wilson, I. V. Timoshkin, M. J. Given, S. J. Macgregor, M. A. Sinclair, K. J. Thomas</i>	
The Potential of Domestic Electric Vehicles to Contribute to Power System Operation Through Vehicle to Grid Technology	931
<i>Sikai Huang, David Infield</i>	
Identification of Faulted Section in TCSC Transmission Line Based on DC Component Measurement	936
<i>Piotr Mazniewski, Jan Izquierdo</i>	
Microgrid: Control Techniques and Modeling	941
<i>Prasenjit Basak, A. K. Saha, S. Chowdhury, S. P. Chowdhury</i>	
Validation of a Proposed Voltage Sag Prediction Methodology for Interconnected Systems During Motor Starting	946
<i>Alexis Polycarpou, Hassan Nouri</i>	
An Investigation into the Design of an IEC 61850 Based Protection Relay	951
<i>Xin Sun, Miles A. Redfern</i>	
A Novel Proposal to Increase the Power Factor of Photovoltaic Grid-Connected Converters at Light Loads.....	956
<i>Roberto Petrella, Alessandro Revelant, Piero Stocco</i>	
Multi-terminal DC Transmission System Based on Modular Multilevel Converter.....	961
<i>Grain P. Adam, Olimpo Anaya-Lara, Graeme Burt</i>	
Voltage Stability Assessment For Systems With Large Wind Power Generation.....	966
<i>S. Abdelkader</i>	
Impact of Grid-Connected PV Systems in Residential Areas in Saudi Arabia.....	971
<i>R. A. Shalwala, J. A. M. Bleijs</i>	
Two-stage Fuzzy Clustering Approach for Load Profiling	976
<i>Z. Zakaria, K. L. Lo</i>	
An Application of Generator Units and ULTCs in Reactive Power Management in a Large Scale Power System	981
<i>G. Reza Yousefi, Erfan Riahi</i>	
Impact of Wind Generation on Voltage Stability in Low-Voltage Distribution Networks.....	985
<i>I. S. Naser, A. Garba, O. Anaya-Lara, K. L. Lo</i>	
Towards Faster Branch Outage Simulations Using Simulated Annealing and Parallel Programming	990
<i>Oguzhan Ceylan, Aydogan Ozdemir, Hasan Dag</i>	
Agent-Based Control for Power Quality Enhancement in Highly Distributed Generation Networks	995
<i>P. Pachanapan, O. Anaya-Lara, K. L. Lo</i>	
Investigation Into the Accuracy Limits of a Proposed Voltage Sag Index	1000
<i>Alexis Polycarpou, Hassan Nouri, Rade Ciric</i>
