

2010 Complexity in Engineering

(COMPENG 2010)

Roma, Italy
22-24 February 2010

IEEE Catalog Number: CFP1018J-PRT
ISBN: 978-1-4244-5982-7

2010 Complexity in Engineering

COMPENG 2010

Table of Contents

Message from General Chair	ix
Organizing Committee	x
Program Committee	xi
Reviewers	xii

Invited Papers

Propagation of Load Shed in Cascading Line Outages Simulated by OPA	1
<i>Janghoon Kim and Ian Dobson</i>	
Power Grids of the Future: Why Smart Means Complex	7
<i>A. Monti and F. Ponci</i>	
Mechanism Design for Cognitive Radio Networks	12
<i>Maziar Nekovee</i>	
Intelligent Health Monitoring of Critical Infrastructure Systems	18
<i>Marios Polycarpou, Georgios Ellinas, Elias Kyriakides, and Christos Panayiotou</i>	
Power Grids as Complex Networks: Topology and Fragility	21
<i>M. Rosas-Casals</i>	
Interdependency Effects Measured on Complex Interdependent Networks	27
<i>Vittorio Rosato, Sandro Bologna, Sandro Meloni, and Eddy Pascucci</i>	

Power Grids and Systems

Dynamic and Steady State Security Constraints in the Transfer Capability Assessment	33
<i>Stendley Busan, Muhammad Murtadha Othman, Ismail Musirin, Azah Mohamed, and Aini Hussain</i>	
An Integrated Platform for Power System Security Assessment Implementing Probabilistic and Deterministic Methodologies	40
<i>Samuele Grillo, Stefano Massucco, Andrea Pitto, Emanuele Ciapessoni, Diego Cirio, and Enrico Gaglioti</i>	
Modeling of DFIG Wind Turbine and Lithium Ion Energy Storage System	43
<i>Mattia Marinelli, Andrea Morini, and Federico Silvestro</i>	

Towards an Uncertainty-Based Model Level Selection for the Simulation of Complex Power Systems	46
<i>Andrea Benigni, Ferdinanda Ponci, and Antonello Monti</i>	
Discerning Electricity Consumption Patterns from Urban Allometric Scaling	49
<i>Ricard Horta-Bernús, Martí Rosas-Casals, and Sergi Valverde</i>	
The Concept of Betweenness in the Analysis of Power Grid Vulnerability	52
<i>Ettore Bompard, Di Wu, and Fei Xue</i>	
Dispatch of Distributed Generators Using Replicator Dynamics	55
<i>Andrés Pantoja and Nicanor Quijano</i>	
A System Level Model of Possible Integration of Building Management System in SmartGrid	58
<i>Slobodan Lukovic, Velimir Congradac, and Filip Kulic</i>	
Communication Networks	
Initial Radius Selection of Sphere Decoder for Practical Applications of MIMO Channels	61
<i>Fatemeh Eshagh Hosseini and Shahriar Shirvani Moghaddam</i>	
A Dynamic OFDMA Oriented Resource Control for WiMAX Networks	64
<i>Laura Pimpinella</i>	
A Model for the Complex Topology of SDH Telecommunication Networks	67
<i>J.P. Cárdenas, A. Santiago, R.M. Benito, M.L. Mouronte, and V. Feliu</i>	
On the Overall Performance of Informational Networks	70
<i>Daniele De Martino</i>	
Measurement, Analysis and Modeling of Multi-layered Communication Networks	73
<i>Eugenio Costamagna, Stefano Giordano, and Walter Willinger</i>	
Critical Infrastructures	
A Two-Stage Approach to Simulate Interdependent Critical Infrastructures	76
<i>Emiliano Casalicchio, Roberto Setola, and Sandro Bologna</i>	
Macro and Micro Agent-Based Modeling and Simulation of Critical Infrastructures	79
<i>Emiliano Casalicchio, Emanuele Galli, and Salvatore Tucci</i>	
Online Distributed Interdependency Estimation with Partial Information Sharing	82
<i>Andrea Gasparri, Francesco Iovino, Gabriele Oliva, and Stefano Panzieri</i>	
On Modeling and Measuring Inter-dependencies among Critical Infrastructures	85
<i>Vincenzo Fioriti, Gregorio D'Agostino, and Sandro Bologna</i>	

Improving Resilience of Interdependent Critical Infrastructures via an On-Line Alerting System	88
<i>Paolo Capodiecì, Stefano Diblasi, Ester Ciancamerla, Michele Minichino, Chiara Foglietta, Davide Lefevre, Gabriele Oliva, Stefano Panzieri, Roberto Setola, Stefano De Porcellinis, Francesco Delli Priscoli, Marco Castrucci, Vincenzo Suraci, Leonid Lev, Yosi Shneck, Djamel Khadraoui, Jocelyn Aubert, Serguei Iassinovski, Jianmin Jiang, Paulo Simoes, Felipe Caldeira, Agnieszka Spronska, Carlo Harpes, and Matthieu Aubigny</i>	
Ontological Framework to Model Critical Infrastructures and their Interdependencies	91
<i>Elisa Castorini, Paolo Palazzari, Alberto Tofani, and Paolo Servillo</i>	
Complex Systems Science	
Clustering Time Series by Network Community Analysis	94
<i>Carlo Piccardi and Lisa Calatroni</i>	
Global Behaviour of Fixed-Pathways Dynamics in Technological Networks	97
<i>J.P. Cardenas, J. Salcedo, R.M. Benito, M.L. Mouronte, and L.G. Moyano</i>	
On the Boundaries of Basins of Attraction in Piecewise Smooth Systems	100
<i>Alessandro Colombo and Ugo Galvanetto</i>	
A New Model for Growing Social Networks	103
<i>Arturo Buscarino, Luigi Fortuna, Mattia Frasca, and Angelo Sarra Fiore</i>	
Polarization Coding in CO2 Lasers: Spatial and Temporal Behavior	106
<i>R. Meucci, K.A. Al Naimee, S.F. Abdalah, F.T. Arecchi, and S. De Nicola</i>	
Incomplete Homoclinic Scenarios in Semiconductor Devices with Optoelectronic Feedback: Generation and Synchronization	109
<i>K. Al-Naimee, S.F. Abdalah, M. Ciszak, R. Meucci, F.T. Arecchi, and F. Marino</i>	
Controlling Multistability in Chaotic Systems	112
<i>A. Geltrude, K. Al-Naimee, S. Euzzor, R. Meucci, F.T. Arecchi, and B.K. Goswami</i>	
Evolving Topologies for Network Synchronization	115
<i>Pietro DeLellis, Mario diBernardo, Franco Garofalo, and Maurizio Porfiri</i>	
Investigating Information Flows across Complex Product Development Stages by Using Social Network Analysis (SNA)	118
<i>Corrado lo Storto</i>	
Implementation of a Wolfram Machine	121
<i>Paola Belluomo, Luigi Fortuna, Mattia Frasca, and Angelo Sarra Fiore</i>	
Applications of Complex Systems Engineering	
Agents Based Intelligent Grid Matchmaking System for EDA Tools on a Cluster Grid	124
<i>Massimo Orazio Spata and Salvatore Rinaudo</i>	
A New Stock Market Model with Adaptive Rational Equilibrium Dynamics	129
<i>Claudio Cecchetto and Fabio Dercole</i>	

Development of Dynamic Muscle Model with Functional Electrical Stimulation	132
<i>R. Jailani, M.O. Tokhi, S. Gharooni, and Z. Hussain</i>	
Inverse Modeling of 3D High Resolution Ground Deformation Maps Derived by Integrating GPS and DInSAR Data	135
<i>Giuseppe Nunnari, Alessandro Spata, Giuseppe Puglisi, Francesco Guglielmino, and Alessandro Bonforte</i>	
An Agent-Based Architecture for Home Care Monitoring and Education of Chronic Patients	138
<i>Davide Capozzi and Giordano Lanzola</i>	
Constrained Active Power Reschedule Using Immune System Technique for Static Security Enhancement	141
<i>Nor Rul Hasma Abdullah, Ismail Musirin, and Muhammad Murtadha Othman</i>	
Author Index	148
