

# **2010 26th Annual IEEE Semiconductor Thermal Measurement and Management Symposium**

## **(SEMI-THERM 2010)**

**Santa Clara, California, USA  
21 - 25 February 2010**

**IEEE Catalog Number: CFP10SEM-PRT  
ISBN: 978-1-4244-683-5**

# TABLE OF CONTENTS

## SEMICONDUCTOR THERMAL MEASUREMENT AND MANAGEMENT SYMPOSIUM

Welcome to SEMI-THERM 26

“Thermi” Award

Steering and Program Committees

Harvey Rosten Award

### Session 1: Modeling and Simulation I

Chair: George Meyer - Celsia Technologies

**A Simplified CFD Modeling Technique for Small Form Factor Pluggable Transceiver .....**1

Jun Shen ..... Ericsson Inc. USA

Arun P. Raghupathy ..... Electronic Cooling Solutions Inc., USA

**Characteristic Length and Cooling Circle .....**7

Ir. G. A. (Wendy) Luiten ..... Philips Applied Technologies, The Netherlands

**Practical CFD Modeling of Synthetic Air Jets for Thermal Management of Electronics .....**1(

Ralph Remsburg ..... Amulaire Thermal Technology, USA

Tim Lucas and Ronald J. Binshtok ..... Influent Corp., USA

### Session 2: Thermal Issues in 3D Packaging

Chair: Zeki Celik - LSI Logic

**Investigations of Cooling Solutions for Three-Dimensional (3D) Chip Stacks .....**25

Keiji Matsumoto, Soichiro Ibaraki, Masaaki Sato, Katsuyuki Sakuma,

Yasumitsu Orii and Fumiaki Yamada ..... ASET, Japan

**A Novel Conduction-Convection based Cooling Solution for 3D Stacked Electronics .....**33

Krishna Kota, Pablo Hidalgo, Yogendra Joshi and Ari Glezer .....

..... Georgia Institute of Technology, USA

**Thermal Characterization of Fan-in Package-on-Packages .....**41

Nandini Nagendrappa, Nicole Okamoto and Fred Barez ..... San Jose State University, USA

**Thermo-Mechanical Simulative Study for 3D Vertical Stacked**

**IC Packages with Spacer Structures.....**47

Ming-Che Hsieh, Chih-Kuang Yu, and Sheng-Tsai Wu .....

..... EOL/Industrial Technology Research Institute, Taiwan

**Experimental Analysis Model of an Active Cooling Method for 3D-ICs**

**Utilizing a Multidimensional Configured Thermoelectric .....**55

Huy N. Phan and Dereje Agonfer ..... University of Texas at Arlington, USA

### Session 3: Micro-Scale Cooling

Chair: David Copeland - Sun Microsystems, Inc.

**The Development of a Valveless Piezoelectric Micropump.....**59

H.K. Ma and B. R. Chen ..... National Taiwan University, Taiwan

**Thermal Performance of a Direct-Bond-Copper Aluminum Nitride**

**Manifold - Microchannel Cooler .....**68

Darin J. Sharar, Nicholas R. Jankowski and Brian Morgan ..... Army Research Laboratory, USA

**Enhanced Gaseous Natural Convection from**

**Micro-Scale Fin Structures Using Acoustic Stimulation .....**74

Sung Ki Kim, Milnes David and Kenneth Goodson ..... Stanford University, USA

Sang Hak Kim, Jin Sup Kim ..... Samsung Electronics, Korea

## **Session 4: Materials**

Chair: Sharon Adam – Infinera Corp

<b>Metal Filament Enhanced Thermal Energy Storage Applied to On-Demand Cooling of High Power-Density Hand-Held Electronics.....</b>	<b>78</b>
Matt Yaquinto and Richard Wirtz .....	University of Nevada Reno, USA
<b>Fabrication and Characterization of Carbon-Aluminum Thermal Management Composites .....</b>	<b>87</b>
N. Jiang, J. P. Novak and R. L. Fink.....	Applied Nanotech, Inc., USA
<b>Alkali Silicate Glass Based Thermal Coatings.....</b>	<b>93</b>
Nate Lower and Ross Wilcoxon.....	Rockwell Collins, Inc., USA
<b>Thermal Characteristics of TIMs with Elliptical Particles .....</b>	<b>100</b>
Reza H. Khiabani, Yogendra Joshi and Cyrus K Aidun .....	Georgia Institute of Technology, USA
<b>TIM Selection Criteria for Silicon Validation Environment .....</b>	<b>107</b>
Ying Feng Pang, Rahima K. Mohammed, Ridvan A. Sahan, Yi Xia and Mohanraj Prabhugoud .....	Intel Corporation, USA

## **SESSION 5: Green Technologies**

Chair: David L. Saums – DS&A LLC

<b>Energy Conservation Approach for Data Center Cooling Using Heat Pipe Based Cold Energy Storage System .....</b>	<b>115</b>
Xiao Ping Wu, Masataka Mochizuki, Koichi Mashiko, Thang Nguyen, Vijit Wuttijumnong, and Gerald Cabsao .....	Fujikura Ltd., Japan
Randeep Singh and Aliakbar Akbarzadeh .....	RMIT University, Australia
<b>The Merits of Open Bath Immersion Cooling of Datacom Equipment .....</b>	<b>123</b>
Phillip E. Tuma.....	3M Company, USA
<b>Solar Photovoltaic Cell Thermal Measurement Issues .....</b>	<b>132</b>
Bernie Siegal .....	Thermal Engineering Associates, Inc., USA
<b>New Approach to System Server Air Flow/Thermal Design Development, Validation and Advancement in Green Fan Performance.....</b>	<b>136</b>
Marlin Vogel, Tony Chen, and Steve Doan.....	Sun Microsystems, USA
Howard Harrison.....	Distributed Thermal Systems, USA
Rajeesh Nair .....	Degree Controls, USA
<b>Low Profile Heat Pipe Heat Sink and Green Performance Characterization for Next Generation CPU Module Thermal Designs.....</b>	<b>145</b>
Marlin Vogel.....	Electronic Cooling Solutions, USA
Guoping Xu and David Copeland .....	Sun Microsystems, USA
Sukhvinder Kang and Brad Whitney .....	Aavid Thermalloy, USA
George Meyer.....	Celsia Technologies, USA
Kenya Kawabata.....	Furukawa, USA
Matt Conners .....	Thermacore, USA

## **SESSION 6: Experimental Methods I**

Chair: Yan Zhang – Tessera Technologies, Inc.

<b>The Junction-To-Case Thermal Resistance, a Boundary Condition Dependent Thermal Metric .....</b>	<b>151</b>
Dirk Schweitzer.....	Infineon Technologies AG, Germany
<b>Issues in Junction-to-Case Thermal Characterization of Power Packages with Large Surface Area .....</b>	<b>158</b>
Andras Vass-Varnai, Zoltan Sarkany, Gabor Farkas, Andras Poppe and Marta Rencz .....	Mentor Graphics Hungary Ltd., Hungary
Shan Gao, Jongman Kim and Seogmoon Choi .....	Samsung Electro-Mechanics, Korea
Andras Vass-Varnai, Andras Poppe and Marta Rencz .....	Budapest University of Technology & Economics, Hungary
<b>Determination of Channel Temperature of AlGaN/GaN HEMT by Electrical Method .....</b>	<b>165</b>
Shiwei Feng, Peifeng Hu, Guangchen Zhang, Chunsheng Guo and Xuesong Xie.....	Beijing University of Technology, China
Tangsheng Chen .....	Nanjing Electronic Devices Institute, China
<b>Thermal Performance of a Dual 1.2 kV, 400 A Silicon-Carbide MOSFET Power Module .....</b>	<b>170</b>
Lauren Boteler, Damian Urciuoli, Gregory Ovrebo, Dimeji Ibitayo and Ronald Green .....	Army Research Laboratory, USA
<b>PTAT Sensor for Chip Overheat Protection .....</b>	<b>176</b>
Michał Szermer, Marcin Janicki, Piotr Pietrzak, Zbigniew Kulesza and Andrzej Napieralski .....	Technical University of Łódź, Poland

## **SESSION 7: Thermal Issues in Multi-Core Architectures**

Chair: Rahima Mohammed – Intel Corporation

<b>Proactive Power Migration to Reduce Maximum Value and Spatiotemporal Non-uniformity of On-chip Temperature Distribution in Homogeneous Many-Core Processors .....</b>	<b>180</b>
M. Cho, N. Sathe, S. Yalamanchilli, S. Mukhopadhyay, M. Gupta and S. Kumar.....	Georgia Institute of Technology, USA
<b>Cooling Solutions for Processor Infrared Thermography .....</b>	<b>187</b>
Ehsan K. Ardestani, Francisco-Javier Mesa-Martínez, and Jose Renau .....	University of California Santa Cruz, USA
<b>Exploring the Thermal Impact on Manycore Processor Performance .....</b>	<b>191</b>
Wei Huang, Kevin Skadron, Sudhanva Gurumurthi, Robert J. Ribando, and Mircea R. Stan.....	University of Virginia, Charlottesville, USA
Wei Huang .....	IBM, USA
<b>Interaction of Scaling Trends in Processor Architecture and Cooling .....</b>	<b>198</b>
Wei Huang, Mircea R. Stan, Sudhanva Gurumurthi, Robert J. Ribando, and Kevin Skadron.....	University of Virginia, Charlottesville, USA
Wei Huang .....	IBM, USA
<b>Hot Spots and Core-to-Core Thermal Coupling in Future Multi-Core Architectures .....</b>	<b>205</b>
M. Janicki and A. Napieralski .....	Technical University of Łódź, Poland
J.H. Collet .....	Université de Toulouse, France
A. Louri .....	University of Arizona, Tucson, USA

## **SESSION 8: Single and Two-Phase Cooling**

Chair: Younes Shabany - Flextronics

<b>A Compliant Thermal Spreader with Internal Liquid Metal Cooling Channels .....</b>	<b>210</b>
Ross Wilcoxon, Nate Lower and Dave Dlouhy .....	Rockwell Collins, Inc., USA
<b>Development of Ultra Thin Plate-Type Heat Pipe with Less than 1 mm Thickness .....</b>	<b>217</b>
Hirofumi Aoki, Nobuyoshi Shioya, Masami Ikeda and Yuichi Kimura .....	Furukawa Electric Co., LTD., Japan
<b>Dropwise Condensation in Vapor Chambers.....</b>	<b>224</b>
Richard W. Bonner III.....	Advanced Cooling Technologies, Inc., USA

## **SESSION 9: Experimental Methods II**

Chair: Marta Rencz - Mentor Graphics MicReD Division

<b>Time and Frequency Domain CCD-Based Thermoreflectance Techniques for High-Resolution Transient Thermal Imaging .....</b>	<b>228</b>
B. Vermeersch, J. Christofferson, K. Maize and A. Shakouri.....	
.....	University of California, Santa Cruz, USA
B. Vermeersch and G. De Mey .....	Ghent University, Belgium
<b>Thermoreflectance Imaging Measurement of In-plane Thermal Properties of Thin-film Structures.....</b>	<b>235</b>
Xi Wang and Ali Shakouri .....	University of California Santa Cruz, USA
Anastassios Mavrokefalos, Yong Lee, Huijun Kong and Li Shi.....	
.....	University of Texas Austin, USA
<b>Experimental Validation of the Power Blurring Method.....</b>	<b>240</b>
Je-Hyoung Park, James Christofferson and Ali Shakouri .....	
.....	University of California at Santa Cruz, USA
Sangho Shin and Sung-Mo Kang .....	University of California at Merced, USA

<b>Application of Thermoreflectance Imaging to Identify Defects in Photovoltaic Solar Cells .....</b>	<b>245</b>
Dustin Kendig, James Christofferson, Glenn B. Alers, and Ali Shakouri.....	
.....	Department of Electrical Engineering, University of California Santa Cruz

<b>Investigation of Dust in Electrohydrodynamic (EHD) Systems .....</b>	<b>249</b>
N. E. Jewell-Larsen, S. V. Karpov, H. Ran, P. Savalia and K. A. Honer .....	Tessera, USA

## **SESSION 10: Modeling and Simulation II**

Chair: Hongyu Ran – Tessera Technologies, Inc.

<b>Thermo-mechanical Design Challenges in Silicon Validation Platforms.....</b>	<b>256</b>
Rahima Mohammed and Ashok Kabadi.....	Intel Corporation, USA
<b>Thermal Analysis of Opto-Electronic Packages – the Delphi-Based Compact Thermal Model and Other Modeling Practices in the Industry .....</b>	<b>264</b>
Arun P. Raghupathy Ph.D. and Jun Shen Ph.D.....	Electronic Cooling Solutions Inc., USA
<b>Energy Minimization Based Fan Configuration for Double Walled Telecommunication Cabinet with Solar Load .....</b>	<b>270</b>
Bharathkrishnan Muralidharan, Feroz Ahamed Iqbal Mariam, Saket Karajgikar and Dereje Agonafer.....	
.....	The University of Texas at Arlington, USA
Mark Hendrix .....	CommScope Solutions Inc., USA
<b>Phonon Relaxation Times of Germanium Determined by Molecular Dynamics at 1000 K .....</b>	<b>278</b>
Javier V. Goicochea and Bruno Michel.....	IBM, Switzerland

## **Session 11: LED Thermal Management**

Chair: Himanshu Pokharna – Sheetak, Inc.

<b>Temperature Dependent Thermal Resistance in Power LED Assemblies and a Way to Cope with It .....</b>	<b>283</b>
András Poppe, Gábor Molnár and Tamás Temesvölgyi .....	MicReD, Hungary
András Poppe and Tamás Temesvölgyi .....	Budapest University of Technology and Economics, Hungary
<b>Study of an LED Device with a Honeycomb Heat Sink .....</b>	<b>289</b>
H.K. Ma, B. R. Chen and H.W. Lan .....	National Taiwan University, Taiwan
C.Y. Chao .....	Outstanding Electronics Manufacturer Co., Ltd, Taiwan
<b>Thermal Analysis of High Power LED Array System .....</b>	<b>299</b>
Guangchen Zhang, Shiwei Feng, Chunsheng Guo, Chenning Ge and Kaikai Ding .....	
.....	Beijing University of Technology, China
<b>Enabling New LED Designs through Advanced Cooling Technology.....</b>	<b>305</b>
Brandon Noska, Che Cheung, Hailin Jin and Raghav Mahalingam.....	Nuventix, Inc., USA
