

2010 Information Theory and Applications Workshop

(ITA 2010)

**La Jolla, California, USA
31 January – 5 February 2010**

**IEEE Catalog Number: CFP1032C-PRT
ISBN: 978-1-4244-7012-9**

Table of Contents

Title	Authors	Page Number
MAC Polar Codes and Matroids	Emmanuel Abbe and Emre Telatar	8
Quasi-Cyclic LDPC Codes on Latin Squares and the Ranks of their Parity-Check Matrices	Li Zhang, Qin Huang, Shu Lin, Khaled Abdel-Ghaffar, and Ian F. Blake	16
The Capacity of Markov Channels with Noiseless Output and State Feedback	Jung Hyun Bae and Achilleas Anastasopoulos	23
Multiple Beamforming with Constellation Precoding: Diversity Analysis and Sphere Decoding	Hong Ju Park, Boyu Li, and Ender Ayanoglu	28
Network Coding Delay: A Brute-Force Analysis	Maricica Nistor, João Barros, Fausto Vieira, Tiago T. V. Vinhoza, and Joerg Widmer	39
Markov Chain Monte Carlo Detection for Underwater Acoustic Channels	Hong Wan, Rong-Rong Chen, Jun Won Choi, Andrew Singer, James Preisig, and Behrouz Farhang-Boroujeny	44
On Sum Capacity of Continuous-Time Overloaded CDMA Systems	Yeo Hun Yun and Joon Ho Cho	49
On the Improved Path Metric for Soft-input Soft-output Tree Detection	Jun Won Choi, Byonghyo Shim, and Andrew C. Singer	59
When is Compress-and-Forward Optimal?	Si-Hyeon Lee and Sae-Young Chung	64
Asymptotically Regular LDPC Codes with Linear Distance Growth and Thresholds Close to Capacity	Michael Lentmaier, David G. M. Mitchell, Gerhard P. Fettweis, and Daniel J. Costello, Jr.	67
High-Dimensional Linear Speech Representations for Robust Speech Recognition	Matthew Ager, Zoran Cvetkovic, and Peter Sollich	75
A Tutorial on Stochastic Approximation Algorithms for Training Restricted Boltzmann Machines and Deep Belief Nets	Kevin Swersky, Bo Chen, Ben Marlin, and Nando de Freitas	80
Facebrowsing: Search and Navigation through Comparisons	Dominique Tschopp and Suhas Diggavi	90
On the Existence of Typical Minimum Distance for Protograph-Based LDPC Codes	Shadi Abu-Surra, Dariush Divsalar, and William E. Ryan	100
On Absorbing Sets of Structured Sparse Graph Codes	Lara Dolecek	107
On Capacity Outer Bounds for a Simple Family of Wireless Networks	Michelle Effros	112
Information theory-based design of phase-change memories	Michele M. Franceschini, L. A. Lastras-Montano, John P. Karidis, and Ashish Jagmohan	119
Team Decision for the Cooperative MIMO Channel with Imperfect CSIT Sharing	Randa Zakhour and David Gesbert	126
New Rate Distortion Bounds for Speech Coding Based on Composite Source Models	Jerry D. Gibson, Jing Hu, and Pravin Ramadas	132
An Analytical Expression of the Probability of Error for Relaying with Decode-and-forward	Alexandre Graell i Amat and Ingmar Land	137

Energy-Distortion Tradeoff with Multiple Sources and Feedback	Aman Jain, Deniz Gunduz, Sanjeev R. Kulkarni, H. Vincent Poor, and Sergio Verdu	142
Asymptotic Outage Analysis of General Motion-Invariant Ad Hoc Networks	Riccardo Giacomelli, Radha Krishna Ganti, and Martin Haenggi	147
Barrage Relay Networks	Thomas R. Halford and Keith M. Chugg	153
Polymatroids with Network Coding	Te Sun Han	161
Grassmannian Predictive Frequency Domain Compression for Limited Feedback Beamforming	Takao Inoue and Robert W. Heath Jr.	173
On Generalized Bent Functions	Tor Helleseth and Alexander Kholosha	178
New results on network error correction: capacities and upper bounds	Sukwon Kim, Tracey Ho, Michelle Effros, and Salman Avestimehr	184
Statistical Distributions that Arise in Constrained Beamforming with Incomplete Channel Information	Bertrand M. Hochwald and Louay M.A. Jalloul	194
Performance Bounds of Distributed CSMA Scheduling	Libin Jiang, Jian Ni, R. Srikant, and Jean Walrand	204
On Weight Enumerators and MacWilliams Identity for Convolutional Codes	Irina E. Bocharova, Florian Hug, Rolf Johannesson, and Boris D. Kudryashov	210
On the MISO Compound Wiretap Channel	Ashish Khisti	216
Achievable Strategies for General Secure Network Coding	Tao Cui, Tracey Ho, and Joerg Kliewer	223
On Secrecy Capacity Scaling in Wireless Networks	O. Ozan Koyluoglu, C. Emre Koksal, and Hesham El Gamal	229
Performance of Round Robin Policies for Dynamic Multichannel Access	Changmian Wang, Bhaskar Krishnamachari, Qing Zhao, and Geir E. Øien	233
Explicit and Optimal Codes for Distributed Storage	K. V. Rashmi, N. B. Shah, P. V. Kumar, and K. Ramchandran	240
Superposition coding in rewritable channels	L. A. Lastras-Montano, Thomas Mittelholzer, and Michele M. Franceschini	245
Sum-Rate Capacity of Correlated Multi-User MIMO Channels	Jin-Woo Lee, Hee-Nam Cho, Han-Jun Park and Yong-Hwan Lee	254
Linear Capacity Scaling in Wireless Networks: Beyond Physical Limits?	Ayfer Özgür, Olivier Leveque, and David Tse	259
Iterative Decoding of a Class of Cyclic Codes	Li Zhang, Qin Huang, and Shu Lin	269
Channel Estimation for Opportunistic Spectrum Sensing: Uniform and Random Sensing	Quanquan Liang, Mingyan Liu, and Dongfeng Yuan	278
Simulation, MMSE Estimation, and Interpolation of Sampled Continuous-Time Signals Using Factor Graphs	Lukas Bolliger, Hans-Andrea Loeliger, and Christian Vogel	288
Delay Performance of CSMA policies in Multihop Wireless Networks: A New Perspective	Mahdi Lotfinezhad and Peter Marbach	292
Channel Modeling for Millimeter Wave MIMO	Eric Torkildson, Hong Zhang, and Upamanyu Madhow	300
Density Evolution-Based Analysis and Design of LDPC Codes with A Priori Information	M. Martalò, G. Ferrari, A. Abrardo, M. Franceschini, and R. Raheli	308

On analyzing and improving COPE performance	Fang Zhao and Muriel Medard	317
Transmitter optimization for distributed Gaussian MIMO channels	H.F. Chong, M. Motani, and F. Nan	323
Statistical Modeling and Analysis of Content Identification	Pierre Moulin	329
An information inequality for the BSSC broadcast channel	Varun Jog and Chandra Nair	334
Asynchronous Stochastic Convex Optimization over Random Networks: Error Bounds	B. Touri, A. Nedich, and S. Sundhar Ram	342
Stochastic Network Optimization with Non-Convex Utilities and Costs	Michael J. Neely	352
Perfect Omniscience, Perfect Secrecy and Steiner Tree Packing	S. Nitinawarat and P. Narayan	362
Independent Source Coding for Control over Noiseless Channels	Eduardo I. Silva, Milan S. Derpich, and Jan Ostergaard	367
MDL hierarchical clustering with incomplete data	Po-Hsiang Lai and Joseph A. O'Sullivan	369
Optimization of Power and Channel Allocation Using the Deterministic Channel Model	Yue Zhao and Gregory J. Pottie	374
Random Capture Algorithms: Fluid limits and Stability	M. Feuillet, A. Proutiere, and P. Robert	382
Rethinking Network MIMO: Cost of CSIT, Performance Analysis, and Architecture Comparisons	Giuseppe Caire, Sean A. Ramprasad, and Haralabos C. Papadopoulos	386
Trapping Set Enumerators for Specific LDPC Codes	Shadi Abu-Surra, David DeClerq, Dariush Divsalar, and William Ryan	396
Utility and Privacy of Data Sources: Can Shannon Help Conceal and Reveal Information?	Lalitha Sankar, S. Raj Rajagopalan, and H. Vincent Poor	401
Dynamic Malware Attack in Energy-Constrained Mobile Wireless Networks	M. H. R. Khouzani and Saswati Sarkar	408
Voting Models in Random Networks	M.E Yildiz, R. Pagliari, A. Ozdaglar, and A. Scaglione	419
Correcting Limited-Magnitude Errors in the Rank-Modulation Scheme	Itzhak Tamo and Moshe Schwartz	426
Is Feedback a Performance Equalizer of Classic and Modern Codes?	Tsung-Yi Chen, Ba-Zhong Shen, and Nambi Seshadri	428
The Asymptotic Behavior of Minimum Buffer Size Requirements in Large P2P Streaming Networks	Lei Ying, R. Srikant, and Srinivas Shakkottai	433
Adaptive Spectrum Sensing	Wenyi Zhang, Ahmed K. Sadek, Cong Shen, and Stephen Shellhammer	439
Compressed Sensing-based Pooling Experiments Using Next Generation Sequencing	Noam Shental, Amnon Amir, and Or Zuk	446
Mutual Information and Time-Interleaved Analog-to-Digital Conversion	Andrew C. Singer, Andrew J. Bean, and Jun Won Choi	448
On the MIMO Interference Channel	Francesco Negro, Shakti Shenoy, Irfan Ghauri, and Dirk Slock	453
Single Sensor Radio Scene Analysis for Packet Based Radio Signals	G. Ivkovic, P. Spasojevic, and I. Seskar	462
Multiuser Cognitive Access of Continuous Time Markov Channels: Maximum Throughput and Effective Bandwidth Regions	Shiyao Chen and Lang Tong	472

Multi-User Diversity for Secrecy in Wireless Networks	S. Vasudevan, S. Adams, D. Goeckel, Z. Ding, D. Towsley, and K. Leung	482
Multi-Stream Information Transmission over K-User Interference Networks	Dmitri Trukhachev	491
An Outer Bound Region for Interference Channels with Generalized Feedback	Daniela Tuninetti	500
Optimal Buffer Partitioning on a Multiuser Wireless Link	Omur Ozel, Elif Uysal-Biyikoglu, and Tolga Girici	505
Iterative Decoding Beyond Belief Propagation	Shiva K. Planjery, Shashi Kiran Chilappagari, Bane Vasic, David Declercq, and Ludovic Danjean	515
A Factor-Graph-Based Random Walk, and its Relevance for LP Decoding Analysis and Bethe Entropy Characterization	Pascal O. Vontobel	525
A Deterministic Approach to Rate-Compatible Fountain Communication	Thomas Courtade and Richard D. Wesel	535
A new sufficient condition for sum-rate tightness of quadratic Gaussian MT source coding	Yang Yang, Yifu Zhang, and Zixiang Xiong	540
On Interactive Encoding and Decoding for Distributed Lossless Coding of Individual Sequences	En-hui Yang and Jin Meng	545
Universal Relaying for the Interference Channel	Peyman Razaghi and Wei Yu	552
Hardware Complexities of Algebraic Soft-decision Reed-Solomon Decoders and Comparisons	Xinmiao Zhang and Jiangli Zhu	558
Decentralized Multi-Armed Bandit with Multiple Distributed Players	Keqin Liu and Qing Zhao	568
