

2010 Data Compression Conference

(DCC 2010)

**Snowbird, Utah, USA
24-26 March 2010**

**IEEE Catalog Number: CFP10DCC-PRT
ISBN: 978-1-4244-6425-8**

Contents

Technical Sessions

Session 1

| | |
|---|----|
| Stationary and Trellis Encoding for IID Sources and Simulation..... | 3 |
| <i>Mark Z. Mao and Robert M. Gray</i> Stanford University | |
| Bounding the Rate Region of Vector Gaussian Multiple Descriptions with Individual and Central Receivers | 13 |
| <i>Guoqiang Zhang, W. Bastiaan Kleijn, and Jan Østergaard[†]</i> KTH - Royal Institute of Technology, [†] Aalborg University | |
| Arbitrary Directional Edge Encoding Schemes for the Operational Rate-Distortion Optimal Shape Coding Framework | 20 |
| <i>Zhongyuan Lai, Junhuan Zhu, Zhou Ren, Wenyu Liu, and Baolan Yan[†]</i> Huazhong University of Science and Technology, [†] Huazhong Normal University | |
| Maximum Mutual Information Vector Quantization of Log-Likelihood Ratios for Memory Efficient HARQ Implementations | 30 |
| <i>Matteo Danieli, Søren Forchhammer, Jakob Dahl Andersen, Lars P. B. Christensen[†], and Søren Skovgaard Christensen[†]</i> Technical University of Denmark, [†] Nokia Denmark | |
| An MCMC Approach to Lossy Compression of Continuous Sources | 40 |
| <i>Dror Baron and Tsachy Weissman[†]</i> Technion – Israel Institute of Technology, [†] Stanford University | |
| Rate Distortion Bounds for Binary Erasure Source Using Sparse Graph Codes | 49 |
| <i>Grégory Demay, Vishwambhar Rathi, and Lars K. Rasmussen</i> KTH - Royal Institute of Technology | |

Session 2

| | |
|--|----|
| Local Average-Based Model of Probabilities for JPEG2000 Bitplane Coder | 59 |
| <i>Francesc Aulí-Llinàs</i> Universitat Autònoma de Barcelona, Spain | |
| On the Adaptive Coefficient Scanning of JPEG XR/HD Photo | 69 |
| <i>Vanessa Testoni, Max H. M. Costa, Darko Kirovski[†], and Henrique S. Malvar[†]</i> University of Campinas - Unicamp, [†] Microsoft Research | |
| Spatial Constant Quantization in JPEG XR is Nearly Optimal..... | 79 |
| <i>Thomas Richter</i> University of Stuttgart | |
| Subsampling-Adaptive Directional Wavelet Transform for Image Coding..... | 89 |
| <i>Jizheng Xu and Feng Wu</i> Microsoft Research Asia | |

| | |
|---|-----|
| Smart JPIP Proxy Server with Prefetching Strategies..... | 99 |
| <i>José Lino Monteagudo-Pereira, Francesc Aulí-Llinàs, Joan Serra-Sagristà,</i> <i>and Joan Bartrina-Rapesta</i> | |
| Universitat Autònoma de Barcelona, Spain | |
| A Lossless Circuit Layout Image Compression Algorithm for Maskless Lithography Systems | 109 |
| <i>Jeehong Yang and Serap A. Savari†</i> | |
| University of Michigan, †Texas A&M University | |

Session 3

| | |
|--|-----|
| Estimation-Theoretic Delayed Decoding of Predictively Encoded Video Sequences | 119 |
| <i>Jingning Han, Vinay Melkote, and Kenneth Rose</i> | |
| University of California, Santa Barbara | |
| Causal Transmission of Colored Source Frames over a Packet Erasure Channel | 129 |
| <i>Ying-zong Huang, Yuval Kochman, and Gregory W. Wornell</i> | |
| Massachusetts Institute of Technology | |
| Spatially Scalable Video Coding Based on Hybrid Epitomic Resizing | 139 |
| <i>Qijun Wang, Ruimin Hu, and Zhongyuan Wang</i> | |
| Wuhan University | |
| Information Flows in Video Coding | 149 |
| <i>Jia Wang and Xiaolin Wu†</i> | |
| Shanghai Jiao Tong University, †McMaster University | |

Session 4

| | |
|---|-----|
| Optimized Analog Mappings for Distributed Source-Channel Coding..... | 159 |
| <i>Emrah Akyol, Kenneth Rose, and Tor Ramstad†</i> | |
| University of California, Santa Barbara, †Norwegian University of Science and Technology | |
| A SAT-Based Scheme to Determine Optimal Fix-Free Codes | 169 |
| <i>Navid Abedini, Sunil P. Khatri, and Serap A. Savari</i> | |
| Texas A&M University | |
| Efficient Algorithms for Constructing Optimal Bi-directional Context Sets | 179 |
| <i>Fernando Fernández, Alfredo Viola, and Marcelo J. Weinberger†</i> | |
| Universidad de la República, Montevideo, Uruguay, †Hewlett Packard Laboratories | |
| On Computation of Performance Bounds of Optimal Index Assignment..... | 189 |
| <i>Xiaolin Wu, Hans D. Mittelmann†, Xiaohan Wang‡, and Jia Wang♦</i> | |
| McMaster University, †Arizona State University, ‡Research in Motion, ♦Shanghai Jiaotong University | |

Session 5

| | |
|--|-----|
| A New Searchable Variable-to-Variable Compressor..... | 199 |
| <i>Nieves R. Brisaboa, Antonio Fariña, Juan R. López, Gonzalo Navarro†,</i> <i>and Eduardo R. López</i> | |
| University of A Coruña, †University of Chile | |

| | |
|--|-----|
| Neural Markovian Predictive Compression: An Algorithm for Online Lossless Data Compression..... | 209 |
| <i>Erez Shermer[†], Mireille Avigal[†], and Dana Shapira^{†,‡}</i> | |
| [†] The Open University of Israel, [‡] Ashkelon Academic College | |
| An Efficient Algorithm for Almost Instantaneous VF Code Using Multiplexed Parse Tree..... | 219 |
| <i>Satoshi Yoshida and Takuya Kida</i> | |
| Hokkaido University | |
| Lossless Data Compression via Substring Enumeration..... | 229 |
| <i>Danny Dubé and Vincent Beaudoin</i> | |
| Université Laval | |
| LZ77-Like Compression with Fast Random Access | 239 |
| <i>Sebastian Kreft and Gonzalo Navarro</i> | |
| Univeristy of Chile | |
| Bidirectional Delta Files | 249 |
| <i>Dana Shapira^{†,‡} and Michael Kats[†]</i> | |
| [†] Ashkelon Academic College, [‡] The Open University of Israel | |

Session 6

| | |
|--|-----|
| Bandwidth Expansion in a Simple Gaussian Sensor Network Using Feedback..... | 259 |
| <i>Anna N. Kim and Tor A. Ramstad</i> | |
| Norwegian University of Science and Technology | |
| A Flexible Multiple Description Coding Scheme Based on Rateless Codes..... | 269 |
| <i>O. Y. Bursalioglu and G. Caire</i> | |
| University of Southern California | |
| Fixed-Lag Smoothing for Low-Delay Predictive Coding with Noise Shaping for Lossy Networks..... | 279 |
| <i>Thomas Arildsen, Jan Østergaard, Manohar N. Murthi[†], Søren Vang Andersen, and Søren Holdt Jensen</i> | |
| Aalborg University, [†] University of Miami | |
| Rate-Compatible Slepian-Wolf Coding with Short Non-Binary LDPC Codes..... | 288 |
| <i>Kenta Kasai, Takayuki Tsujimoto, Ryutaroh Matsumoto, and Kohichi Sakaniwa</i> | |
| Tokyo Institute of Technology | |
| A Systematic Distributed Quantizer Design Method with an Application to MIMO Broadcast Channels | 297 |
| <i>Erdem Koyuncu and Hamid Jafarkhani</i> | |
| University of California, Irvine | |
| Scalar Quantizer Design for Noisy Channel with Decoder Side Information..... | 307 |
| <i>Sepideh Shamaie and Farshad Lahouti</i> | |
| University of Tehran | |

Session 7

| | |
|---|-----|
| A Symbolic Dynamical System Approach to Lossy Source Coding with Feedforward | 317 |
| <i>Ofer Shayevitz</i> | |
| University of California, San Diego | |

| | |
|---|-----|
| When Huffman Meets Hamming: A Class of Optimal Variable-Length Error Correcting Codes | 327 |
| <i>Serap A. Savari and Jörg Kliewer[†]</i> | |
| Texas A&M University, [†] New Mexico State University | |
| Lossless Compression Based on the Sequence Memoizer | 337 |
| <i>Jan Gasthaus, Frank Wood[‡], and Yee Whye Teh</i> | |
| UCL, [†] Columbia University | |
| A Similarity Measure Using Smallest Context-Free Grammars..... | 346 |
| <i>Daniele Cerra[†] and Mihai Datcu^{†, ‡}</i> | |
| [†] German Aerospace Center (DLR), [‡] Télécom Paris | |

Session 8

| | |
|---|-----|
| On the Systematic Measurement Matrix for Compressed Sensing in the Presence of Gross Errors | 356 |
| <i>Zhi Li, Feng Wu[†], and John Wright[†]</i> | |
| Stanford University, [†] Microsoft Research Asia | |
| Xampling: Analog Data Compression | 366 |
| <i>Moshe Mishali and Yonina C. Eldar</i> | |
| Technion - Israel Institute of Technology | |
| Tanner Graph Based Image Interpolation..... | 376 |
| <i>Ruiqin Xiong and Wen Gao</i> | |
| Peking University | |

Session 9

| | |
|---|-----|
| Lossless Reduced Cutset Coding of Markov Random Fields | 386 |
| <i>Matthew G. Reyes and David L. Neuhoff</i> | |
| University of Michigan | |
| gFPC: A Self-Tuning Compression Algorithm..... | 396 |
| <i>Martin Burtscher and Paruj Ratanaworabhan[†]</i> | |
| University of Texas at Austin, [†] Kasetsart University | |
| Advantages of Shared Data Structures for Sequences of Balanced Parentheses..... | 406 |
| <i>Simon Gog and Johannes Fischer[†]</i> | |
| Universität Ulm, [†] Universität Tübingen | |
| Segment-Parallel Predictor for FPGA-Based Hardware Compressor and Decompressor of Floating-Point Data Streams to Enhance Memory I/O Bandwidth | 416 |
| <i>Kentaro Sano, Kazuya Katahira, and Satoru Yamamoto</i> | |
| Tohoku University | |
| I/O-Efficient Compressed Text Indexes: From Theory to Practice | 426 |
| <i>Sheng-Yuan Chiu, Wing-Kai Hon, Rahul Shah[†], and Jeffrey Scott Vitter[‡]</i> | |
| National Tsing Hua University, [†] Louisiana State University, [‡] Texas A&M University | |

Session 10

| | |
|--|-----|
| Enhanced Adaptive Interpolation Filters for Video Coding..... | 435 |
| <i>Yan Ye, Giovanni Motta[†], and Marta Karczewicz[‡]</i> | |
| Dolby Laboratories, [†] Hewlett Packard Corp., [‡] Qualcomm Inc. | |
| Packet Dropping for Widely Varying Bit Reduction Rates Using a Network-Based Packet Loss Visibility Model | 445 |
| <i>Ting-Lan Lin, Jihyun Shin, and Pamela Cosman</i> | |
| University of California, San Diego | |
| Auto Regressive Model and Weighted Least Squares Based Packet Video Error Concealment..... | 455 |
| <i>Yongbing Zhang, Xinguang Xiang, Siwei Ma[†], Debin Zhao, and Wen Gao[†]</i> | |
| Harbin Institute of Technology, [†] Peking University | |
| A Hybrid Media Transmission Scheme for Wireless VoIP..... | 465 |
| <i>Ala' Khalifeh and Homayoun Yousefi'zadeh</i> | |
| University of California, Irvine | |
| Low-Complexity PARCOR Coefficient Quantizer and Prediction Order Estimator for G.711.0 (Lossless Speech Coding) | 475 |
| <i>Yutaka Kamamoto, Takehiro Moriya, and Noboru Harada</i> | |
| NTT Communication Science Laboratories | |

Session 11

| | |
|--|-----|
| Shape Recognition Using Vector Quantization | 484 |
| <i>Antonella Di Lillo, Giovanni Motta[†], and James A. Storer</i> | |
| Brandeis University, [†] Hewlett-Packard Corp. | |
| Optimization of Overlapped Tiling for Efficient 3D Image Retrieval | 494 |
| <i>Zihong Fan and Antonio Ortega</i> | |
| University of Southern California | |
| Depth Compression of 3D Object Represented by Layered Depth Image..... | 504 |
| <i>Sang-Young Park and Seong-Dae Kim</i> | |
| KAIST | |

Poster Session

(listed alphabetically by first author)

- Modelling Parallel Texts for Boosting Compression 517
*Joaquín Adiego, Miguel A. Martínez-Prieto, Javier E. Hoyos-Torio,
and Felipe Sánchez-Martínez*
Universidad de Valladolid, [†]Universitat d'Alacant
- Lossless Compression of Maps, Charts, and Graphs via Color Separation 518
Saif alZahir and Arber Borici
University of N. British Columbia
- Local Modeling for WebGraph Compression..... 519
Vo Ngoc Anh and Alistair Moffat
University of Melbourne
- Modeling the Quantization Staircase Function..... 520
Salman Aslam, Aaron Bobick, and Christopher Barnes
Georgia Institute of Technology
- Dual Contribution of JPEG 2000 Images for Unidirectional Links 521
Jesús M. Barbero, Eugenio Santos, and Abraham Gutiérrez
Polytechnic University of Madrid
- Analysis of LDPC Codes for Compression of Nonuniform Sources
with Side Information Using Density Evolution 522
Raghunadh K. Bhattar^{†, ‡}, K. R. Ramakrishnan[†], and K. S. Dasgupta[‡]
[†]IISc, [‡]ISRO
- Multi-resolution Mean-Shift Algorithm for Vector Quantization..... 523
P. L. M. Bouttefroy^{†, ‡}, A. Bouzerdoum[†], A. Beghdadi[‡], and S. L. Phung[†]
[†]University of Wollongong, [‡]Université Paris
- A Pseudo-Random Number Generator Based on LZSS..... 524
*Weiling Chang[†], Binxing Fang^{†, ‡}, Xiaochun Yun[‡], Shupeng Wang[‡],
and Xiangzhan Yu[†]*
[†]Harbin Institute of Technology, [‡]Chinese Academy of Science
- Inverted Index Compression for Scalable Image Matching 525
*David M. Chen, Sam S. Tsai, Vijay Chandrasekhar, Gabriel Takacs,
Ramakrishna Vedantham[†], Radek Grzeszczuk[†], and Bernd Girod*
Stanford University, [†]Nokia Research Center
- A Novel Frame Error Concealment Algorithm Based on Dynamic
Texture Synthesis..... 526
Hao Chen, Ruimin Hu, Dan Mao, and Zhongyuan Wang
Wuhan University
- Image Compression Using the DCT and Noiselets: A New Algorithm
and Its Rate Distortion Performance 527
*Zhuoyuan Chen, Jiangtao Wen, Shiqiang Yang, Yuxing Han[†],
and John D. Villasenor[†]*
Tsinghua University, [†]University of California, Los Angeles
- The Non-existence of Length-5 Perfect Slepian-Wolf Codes of Three Sources 528
Samuel Cheng and Rick Ma[†]
University of Oklahoma, [†]Hong Kong University of Science and Technology

| | |
|--|-----|
| Robust Detection and Lossless Compression of the Foreground in Magnetic Resonance Images | 529 |
| <i>Andrés Corvetto, Ana Ruedin, and Daniel Acevedo</i> | |
| Universidad de Buenos Aires | |
| Tree Structure Based Analyses on Compressive Sensing for Binary Sparse Sources..... | 530 |
| <i>Jingjing Fu[‡], Zhouchen Lin[‡], Bing Zeng[‡], and Feng Wu[‡]</i> | |
| [‡] Hong Kong University of Science and Technology, [#] Microsoft Research Asia | |
| Data Compression Based on a Dictionary Method Using Recursive Construction of T-Codes..... | 531 |
| <i>Kenji Hamano and Hirosuke Yamamoto</i> | |
| The University of Tokyo | |
| Lossless Compression of Mapped Domain Linear Prediction Residual for ITU-T Recommendation G.711.0 | 532 |
| <i>Noboru Harada, Yutaka Kamamoto, and Takehiro Moriya</i> | |
| NTT Communication Science Laboratories | |
| A Fast Compact Prefix Encoding for Pattern Matching in Limited Resources Devices..... | 533 |
| <i>S. Harrusi, A. Averbuch, and N. Rabin</i> | |
| Tel Aviv University | |
| Compressed Indexes for Approximate Library Management | 534 |
| <i>Wing-Kai Hon, Winson Wu, and Ting-Shuo Yang</i> | |
| National Tsing Hua University | |
| Two-Step Coding for High Definition Video Compression..... | 535 |
| <i>Wenfei Jiang, Wenyu Liu, Longin Jan Latecki[‡], Hui Liang, Changqing Wang, and Bing Feng</i> | |
| Huazhong University of Science and Technology, [#] Temple University | |
| Exploiting Wavelet-Domain Dependencies in Compressed Sensing | 536 |
| <i>Yookyung Kim, Mariappan S. Nadar[‡], and Ali Bilgin</i> | |
| University of Arizona, [#] Siemens Corporation | |
| Arbitrary ROI-Based Wavelet Video Coding | 537 |
| <i>Xuguang Lan, Nanning Zheng, Wen Ma, Miao Hui, and Jianru Xue</i> | |
| Xi'an Jiaotong University | |
| Optimum String Match Choices in LZSS..... | 538 |
| <i>Graham Little and James Diamond</i> | |
| Acadia University | |
| Error Resilient Dual Frame Motion Compensation with Uneven Quality Protection | 539 |
| <i>Da Liu, Debin Zhao, and Siwei Ma[‡]</i> | |
| Harbin Institute of Technology, [#] Peking University | |
| A New Approach to Time-Frequency Analysis | 540 |
| <i>Xiteng Liu</i> | |
| McMaster University | |
| An Integrated Algorithm for Fractional Pixel Interpolation and Motion Estimation of H.264 | 541 |
| <i>Jiyuan Lu[‡], Peizhao Zhang[‡], Hongyang Chao[‡], and Paul Fisher[♦]</i> | |
| [‡] Sun Yat-Sen University, [#] Guangdong University of Finance, [♦] Winston-Salem State University | |

| | |
|---|-----|
| A Matrix Completion Approach to Reduce Energy Consumption in Wireless Sensor Networks..... | 542 |
| <i>Angshul Majumdar and Rabab K. Ward</i> | |
| University of British Columbia | |
| High-Order Text Compression on Hierarchical Edge-Guided | 543 |
| <i>Miguel A. Martínez-Prieto, Joaquín Adiego, Pablo de la Fuente,</i> <i>and Javier D. Fernández</i> | |
| University of Valladolid, Spain | |
| TreeZip: A New Algorithm for Compressing Large Collections of Evolutionary Trees..... | 544 |
| <i>Suzanne J. Matthews, Seung-Jin Sul, and Tiffani L. Williams</i> | |
| Texas A&M University | |
| Lossy Audio Compression via Compressed Sensing..... | 545 |
| <i>Rubem J. V. de Medeiros, Edmar C. Gurjão, and João M. de Carvalho</i> | |
| Federal University of Campina Grande | |
| Enhanced Lossless Coding Tools of LPC Residual for ITU-T G.711.0 | 546 |
| <i>Takehiro Moriya, Yutaka Kamamoto, and Noboru Harada</i> | |
| NTT Communication Science Laboratories | |
| Block Compressed Sensing of Images Using Directional Transforms..... | 547 |
| <i>Sungkwang Mun and James E. Fowler</i> | |
| Mississippi State University | |
| On the Overflow Probability of Fixed-to-Variable Length Codes with Side Information | 548 |
| <i>Ryo Nomura and Toshiyasu Matsushima[†]</i> | |
| Aoyama Gakuin University, [†] Waseda University | |
| Data Compression Technology Dedicated to Distribution and Embedded Systems..... | 549 |
| <i>Junichi Odagiri, Noriko Itani, Yasuhiko Nakano, and David E. Culler[†]</i> | |
| Fujitsu Laboratories LTD., [†] University of California, Berkeley | |
| Analysis of Amplitude Quantization in ACELP Excitation Coding | 550 |
| <i>Wisarn Patchoo, Thomas R. Fischer, Changho Ahn[†], and Sangwon Kang[†]</i> | |
| Washington State University, [†] Hanyang University | |
| LDPC Codes for Information Embedding and Lossy Distributed Source Coding | 551 |
| <i>Mina Sartipi</i> | |
| University of Tennessee at Chattanooga | |
| Horizontal Spatial Prediction for High Dimension Intra Coding | 552 |
| <i>Pin Tao, Wenting Wu, Chao Wang, Mou Xiao, and Jiangtao Wen</i> | |
| Tsinghua University | |
| Batch-Pipelining for H.264 Decoding on Multicore Systems | 553 |
| <i>Tang-Hsun Tu and Chih-Wen Hsueh</i> | |
| National Taiwan University | |
| Development of Optimum Lossless Compression Systems for Space Missions..... | 554 |
| <i>Alberto G. Villafranca^{†, ‡}, Jordi Portell^{†, ♦}, and Enrique García-Berro^{†, ‡}</i> | |
| [†] Institut d'Estudis Espacials de Catalunya, [‡] Universitat Politècnica de Catalunya, | |
| [♦] Universitat de Barcelona | |
| Region Based Rate-Distortion Analysis for 3D Video Coding..... | 555 |
| <i>Qifei Wang, Xiangyang Ji, Qionghai Dai, and Naiyao Zhang</i> | |
| Tsinghua University | |

| | |
|---|-----|
| Reconstruction of Sparse Binary Signals Using Compressive Sensing..... | 556 |
| <i>Jiangtao Wen, Zhuoyuan Chen, Shiqiang Yang, Yuxing Han[†], and John D. Villasenor[†]</i> | |
| Tsinghua University, [†] University of California, Los Angeles | |
| Fast Rate Distortion Optimized Quantization for H.264/AVC | 557 |
| <i>JiangTao Wen, Mou Xiao, Jianwen Chen, Pin Tao, and Chao Wang</i> | |
| Tsinghua University | |
| Theoretically Optimal Low-Density Parity-Check Code Ensemble for Gallager's Decoding Algorithm A..... | 558 |
| <i>Feng Wu and Peiwen Yu[†]</i> | |
| Microsoft Research Asia, [†] University of Science and Technology of China | |
| File-Size Preserving LZ Encoding for Reversible Data Embedding | 559 |
| <i>Hidetoshi Yokoo</i> | |
| Gunma University | |
| | |
| Author Index..... | 561 |
