

2009 11th International Symposium on Symbolic and Numeric Algorithms for Scientific Computing

(SYNASC 2009)

**Timisoara, Romania
26-29 September 2009**

**IEEE Catalog Number: CFP09387-PRT
ISBN: 978-1-4244-5910-0**

2009 11th International Symposium on Symbolic and Numeric Algorithms for Scientific Computing

SYNASC 2009

Table of Contents

Preface	x
Conference Committees	xii
Reviewers	xv

Invited Talks

The Sparsity Challenges	3
<i>James Harold Davenport and Jacques Carette</i>	
Coloring Random Graphs: A Short Survey	8
<i>Lefteris Kirousis</i>	
A Compiler for Origami Construction and Verification	9
<i>Tetsuo Ida</i>	
Finding Loop Invariants for Programs over Arrays Using a Theorem Prover	10
<i>Laura Kovacs and Andrei Voronkov</i>	
Embedding Formal Methods into Systems Engineering	11
<i>Helmut Veith</i>	

Tutorials

SMT Solvers for Testing, Program Analysis and Verification at Microsoft	15
<i>Nikolaj Bjorner</i>	
Satisfiability and Theories	16
<i>Andrei Voronkov</i>	
Automated Methods for Proving Program Termination and Liveness	17
<i>Andrey Rybalchenko</i>	
Automated Software Analysis	18
<i>Helmut Veith</i>	

Symbolic Computation

m-Hilbert Polynomial and Arbitrariness of the General Solution of Partial Differential Equations	21
<i>Qi Ding and Hongqing Zhang</i>	
Computing Self-intersection Loci of Parametrized Surfaces Using Regular Systems and Groebner Bases	28
<i>Yanli Huang and Dongming Wang</i>	
A Hybrid Algorithm for Solving 7 Parameters Transformation	37
<i>Amir Hashemi and Mahzad Kalantari</i>	
Superfluous S-polynomials in Strategy-Independent Groebner Bases	45
<i>Grant Olney Passmore and Leonardo de Moura</i>	
Toom-Cook 8-way for Long Integers Multiplication	54
<i>Alberto Zanoni</i>	

Logic and Programming

A Hierarchy of Tractable Subclasses for SAT and Counting SAT Problems	61
<i>Stefan Andrei, Gheorghe Grigoras, Martin Rinard, and Roland Hock Chuan Yap</i>	
Formal Proof of Theorems on Genetic Regulatory Networks	69
<i>Maxime Dénès, Benjamin Lesage, Yves Bertot, and Adrien Richard</i>	
A Calculus for Imperative Programs: Formalization and Implementation	77
<i>Madalina Erascu and Tudor Jebelean</i>	
Simplification and Generalization in CIRC	85
<i>Eugen-Ioan Goriac, Georgiana Caltais, and Dorel Lucanu</i>	
Using a fUML Action Language to Construct UML Models	93
<i>Codrut Lucian Lazar, Ioan Lazar, Bazil Parv, Simona Motogna, and Istvan Gergely Czibula</i>	
On Herbrand-like Theorems for Cut-free Modal Sequent Logics	102
<i>Alexander Lyaletski</i>	

Numerical Computing

The Lucas Optimal Growth Model on Finite Horizon	113
<i>Nadia Bonchis</i>	
Hybrid Modelling of an Audio Signal Based on 1-D Wold Decomposition	118
<i>Iuliana Borza, Flavius Turcu, and Mohamed Najim</i>	
Finding the Solutions of Nonlinear Equation Systems from an Interval	124
<i>Cristian Cira Mihai</i>	
A Numerical Solution of the Semi Linear Singularly Perturbed Boundary Value Problem Using Multi Region Finite Difference Method	130
<i>David Edwards Jr.</i>	
Monte Carlo Variance Reduction. Importance Sampling Techniques	137
<i>Olariu Emanuel Florentin</i>	

Solving Nonsmooth Interval Equations with Slopes	142
<i>Rongfen Lin, Hao Jiang, and Lizhi Cheng</i>	
On a Functional-Differential Equation from Price Theory	150
<i>Anton S. Muresan</i>	
An Algorithm for the Approximation of the Solution of a Functional-Integral Equation	157
<i>Viorica Muresan</i>	
Cancer Prediction Modeling from Volumetric Data	162
<i>Marius Paltanea, Sabin Tabirca, Mark Tangney, and Yin Jie Chen</i>	
Sparse Matrix Computations Using the Quadtree Storage Format	168
<i>Ivan Simecek</i>	
MATLAB Package for Laguerre Spectral Method	174
<i>Damian Trif</i>	
Parallel and Distributed Computing	
Fairness and QoS Enhancement Models and Techniques for Peer-to-Peer Content Sharing Systems	181
<i>Mugurel Ionut Andreica, Irina Borozan, Lucian-Ionut Balaceanu, and Nicolae Tapus</i>	
A Grid Enabled Quantum Computer Simulator	189
<i>Simona Caraiman, Alexandru Archip, and Vasile Manta</i>	
Description and Execution of Patterns for Symbolic Computations	197
<i>Alexandru Carstea, Georgiana Macariu, Marc Frincu, and Dana Petcu</i>	
Distributed Scheduling Policy in Service Oriented Environments	205
<i>Marc Eduard Frincu</i>	
Dynamic Resources Allocation in Grid Enviroments	213
<i>Marius Ion, Florin Pop, Ciprian Dobre, and Valentin Cristea</i>	
Performance Improvement of Genetic Algorithms by Adaptive Grid Workflows	221
<i>Boro Jakimovski, Dragan Sahpaski, and Goran Velinov</i>	
Fault Tolerance Using a Front-End Service for Large Scale Distributed Systems	229
<i>Marieta Nastase, Ciprian Dobre, Florin Pop, and Valentin Cristea</i>	
Bounded Parallelism in PowerList and ParList Theories	237
<i>Virginia Niculescu and Adriana Guran</i>	
Semantic Annotation Based Service Composition for Grid Workflow Description and Execution	245
<i>Denisa Rodila, Victor Bacu, and Dorian Gorgan</i>	
Dynamic Scheduling Algorithms for Workflow Applications in Grid Environment	254
<i>Alina Simion, Dragos Sbirlea, Florin Pop, and Valentin Cristea</i>	

Advances in the Theory of Computing

Algorithms for Identifying Sequence Patterns with Several Types of Occurrence Constraints	265
<i>Mugurel Ionut Andreica, Andrei Grigorean, and Nicolae Tapus</i>	
A Depth-first Algorithm to Reduce Graphs in Linear Time	273
<i>Miklos Bartha and Miklos Kresz</i>	
On the Existence of Complete Disjoint NP-Pairs	282
<i>Olaf Beyersdorff</i>	
A Methodology for Concurrent Languages Development Based on Denotational Semantics	290
<i>Gabriel Ciobanu and Eneia Nicolae Todoran</i>	
Classes of Szilard Languages in NC^1	299
<i>Liliana Cojocaru, Erkki Makinen, and Ferucio Laurentiu Tiplea</i>	
Factorizations of Regular Hedge Languages	307
<i>Mircea Marin and Adrian Craciun</i>	

Artificial Intelligence

Matching Semantic Web Services Using Learning Accuracy	317
<i>Viorica R. Chifu, Ioan Salomie, Emil St. Chifu, Roland Vachter, and Alpár Kövér</i>	
Semantic Web Service Composition Method Based on Fluent Calculus	325
<i>Viorica R. Chifu, Ioan Salomie, Ioana Harsa, and Marius Gherga</i>	
A Policy-Based Context Aware Self-Management Model	333
<i>Tudor Cioara, Ionut Anghel, Ioan Salomie, and Mihaela Dinsoreanu</i>	
Dynamic Customization of Data Structures Instances Using an Agent Based Approach	341
<i>Istvan Gergely Czibula, Gabriela Czibula, and Adriana Mihaela Guran</i>	
Beliefs and Communication, The Basis of Collaborative Agents	348
<i>Ion Mircea Diaconescu and Gerd Wagner</i>	
Approximating and Combining Equilibria in Non-cooperative Games	356
<i>D. Dumitrescu, Rodica Ioana Lung, and Tudor Dan Mihoc</i>	
Alleviating Urban Traffic Congestion by Means of Adaptive Routing	361
<i>Cristian Gratie and Adina Magda Florea</i>	
Mamdani FLC with Various Implications	368
<i>Ion Iancu and Mihaela Colhon</i>	
Immune-inspired Web Service Composition Framework	376
<i>Cristina Bianca Pop, Viorica R. Chifu, Ioan Salomie, Mihaela Dinsoreanu, Iulia Vartic, and Monica Vlad</i>	
Exploring New Directions in Iris Recognition	384
<i>Nicolaie Popescu-Bodorin</i>	

A Bray-Curtis Weighted Automaton for Detecting Malicious Code Through System-Call Analysis	392
<i>Ciprian-Petrisor Pungila</i>	
Enhanced Rule-Based Phonetic Transcription for the Romanian Language	401
<i>Mihai Alexandru Ordean, Andrei Saupe, Mihaela Ordean, Melania Duma, and Gheorghe Cosmin Silaghi</i>	
Relational Operators in Heterogeneous Random Databases	407
<i>Letitia Velcescu and Laurentiu Vasile</i>	
Unified Strategy for Feature Selection and Data Imputation	413
<i>Camelia Vidrighin Bratu and Rodica Potolea</i>	
On Sensor Data Simulation	420
<i>Alexandru-Ciprian Zavoianu and Ciprian-Dorin Craciun</i>	
Author Index	426
