

2010 27th International Conference on Microelectronics Proceedings

(MIEL 2010)

**Nis, Serbia
16-19 May 2010**

**IEEE Catalog Number: CFP10432-PRT
ISBN: 978-1-4244-7200-0**

CONTENTS

Mini-Colloquium Nanotechnologies and Nanodevices

Invited Keynote Papers

Drain Current Computation in Nanoscale nMOSFETs: Comparison of Transport Models E. Sangiorgi, C. Alexander, A. Asenov, V. Aubry-Fortuna, G. Baccarani, A. Bournel, M. Braccioli, B. Cheng, P. Dollfus, A. Esposito, D. Esseni, C. Fenouillet-Beranger, C. Fiegna, G. Fiori, A. Ghetti, G. Iannaccone, A. Martinez, B. Majkusiak, S. Monfray, P. Palestri, V. Peikert, S. Reggiani, C. Riddet, J. Saint-Martin, A. Schenk, L. Selmi, L. Silvestri, P. Toniutti, J. Walczak.....	3
Nanoscaling of MOSFETs and the Implementation of Schottky Barrier S/D Contacts M. Ostling, J. Luo, V. Gudmundsson, P.-E. Hellström, B. Gunnar Malm.....	9
Growth of Dielectric-Embedded Silicon Nanocrystallites for Silicon Integrated Photonics H. Wong, C. K. Wong.....	15
Quantum Mechanical Tunnelling in Nanoelectronic Circuits: Design of a Nanoelectronic Single-Electron RAM P. I. Hagouel, I. Karafyllidis.....	21
Application of Non-equilibrium Plasmas in Top-Down and Bottom-Up Nanotechnologies and Biomedicine Z. Petrović, M. Radmilović-Radenović, P. Maguire, M. Radetić, N. Puač, D. Marić, B. Radjenović, G. Malović.....	29

Plenary Sessions

Invited Keynote Papers

Voltage Scaling Limitations and Challenges of Memory-Rich Nanoscale CMOS LSIs K. Itoh, R. Tsuchiya.....	39
Modeling Floating Body Z-RAM Storage Cells V. Sverdlov, S. Selberherr.....	45
Electrical Measurements in Nanotechnology Using Single Electron Bipolar Avalanche Transistors R. S. Popović, M. Lany.....	51
Single Electron Tunneling Based Computation S. Cotofana.....	57

Session
Physics and Modeling

Invited Keynote Paper

Future Trends in High Power Devices J. Vobecky.....	67
---	----

Invited Keynote Paper

Perspective on Power IC Technology: From Design Lab to Wafer Fab P. Igić, M. P. Elwin, P. M. Holland.....	73
---	----

BJT Static Behavior Improvement by Modification of the Epitaxial Layer L. Théolier, L. V. Phung, N. Batut, A. Schellmanns, Y. Raingeaud, J.-B. Quoirin.....	79
---	----

Modeling of Substrate Effects Inducing Non-Ideal Collector Current at Low Bias D. Vidal, R. van der Torn.....	83
---	----

On p-n Junction Depletion Capacitance Parameter Extraction Strategies V. Milovanović, R. van der Toorn.....	87
---	----

Current-Voltage Characteristic of a p-n Junction: Problems and Solutions E. Velázquez-Pérez, Yu. Gurevich.....	91
--	----

Simple Model for the Switching I-V Characteristic in Electroformed MIM Structures E. Miranda, D. Jimenez.....	95
---	----

Modeling of Main Leakage Currents and their Contribution to Channel Current in Fin-FETS I. Garduño, A. Cerdeira, M. Estrada, V. Kilchytska, D. Flandre.....	99
---	----

Comparative Studies of Single- and Double-nanocrystal Layer NVM Structures: Charge Accumulation and Retention V. Turchanikov, V. Ievtukh, A. Nazarov, V. Lysenko, M. Theodoropoulou, A. Nassiopoulou.....	103
---	-----

Quantization Effects in Gate-All-Around Nanowire MOSFETs: A Numerical Study S. Gamal, D. Selim.....	105
---	-----

Poster Session
Physics and Modeling

Contactless Measurement of Thin Metallic Films V. Papež, S. Papežova.....	111
---	-----

A Quantum Mechanical Correction of Classical Surface Potential Model of MOS Inversion Layer T. Kevkić, D. Petković.....	115
---	-----

Electron Spectrum of δ-Doped Quantum Wells by Thomas – Fermi Method at Finite Temperatures V. Grimalsky, L. M. Gaggero-S., S. Koshevaya, A. Garcia-B.....	119
---	-----

Electronic Structure of Oxygen Vacancy and Poly-Vacancy in α- and γ-Al₂O₃ T. V. Perevalov, V. A. Gritsenko.....	123
Absorption Features of Symmetric Molecular Nanofilms J. Šetrajčić, S. Pelemiš, S. Vučenočić, V. Zorić, S. Armaković, B. Škipina, A. Šetrajčić.....	127
Investigation of Dielectric – Semiconductor Interface in MIS Structures Based on p-Hg_{0.8}Cd_{0.2}Te V. Damnjanović, J. Elazar.....	131
Effect of RF-Discharge Structure on Silicon Etching in CF₄/O₂ Yu. N. Grigoryev, A. G. Gorobchuk.....	135

Session
Opto and Microwave Devices and ICs

Electrical Transport Mechanism in VO₂ Thin Films G. Golan, A. Axelevitch.....	141
Effect of Variations in Blend Preparation on the Properties of P3HT: PCBM Blend Solar Cells M. Estrada, V. Balderrama, J. Albero, J. C. Nolasco, A. Cerdeira, L. F. Marsal, J. Pallarès, B. Iniguez, E. Palomares.....	145
Determination of Recombination Centres in c-Si Solar Cells from Dark I-V Characteristics J. Salinger, V. Benda, Z. Machacek.....	149
Extraction of Thermal Model Parameters for Field-Installed Photovoltaic Module W. Maranda, M. Piotrowicz.....	153
Design of Symmetric Planar Fishnet Metamaterials for Optical Wavelength Range Z. Jakšić, D. Tanasković, J. Matović.....	157
Amplification of Space Charge Waves at Ultra-High Electric Fields in GaAs Films A. Garcia-Barrientos, V. Palankovski, V. Grimalsky.....	161
The Effect of Depletion Layer on the Cut off Frequency of AlGaIn/GaN High Electron Mobility Transistors R. Yahyazadeh, Z. Hashempour.....	165

Poster Session
Opto and Microwave Devices and ICs

Electrical Properties of Au/C60/n-Si Photodiode Structures with Pristine and Dithiolactane-Functionalized C60 Nanolayers N. Dmitruk, O. Borkovskaya, D. Naumenko, E. Basiuk, Zs. Horváth.....	171
Diffraction Gratings with Anticorrelated Relief for New Surface Plasmon Polariton Photodetectors & Sensors N. Dmitruk, S. Mamykin, M. Sosnova, A. Korovin, V. Mynko.....	175

Sputtering of ZnO:Ga Thin Films with the Inclined Crystalline Texture V. Tvarožek, I. Novotný, P. Šutta, M. Netřvalová, S. Flickyngrová, L. Spiess, P. Schaaf.....	177
Influence of Different Dopants on Physical Properties of ZnO for Photovoltaic Applications M. Netřvalová, I. Novotný, V. Tvarožek, L. Prušáková, P. Šutta.....	181
Effect of the Grain Size on the Structural and Optical Properties of the Sprayed Cd_xZn_{1-x}S Films M. Oztas, M. Ozturk, M. Bedir, S. Sur.....	185
Effect of Temperature on the Electronic Current of Two Dimensional Quantum Well in AlGaIn/GaN High Electron Mobility Transistors (HEMT) R. Yahyazadeh, Z. Hashempour	189
SPM Electrical Characterization of Ti/Al – Based Ohmic Contacts for Sub-Micron Devices L. Kolaklieva, D. Nesheva, R. Kakanakov, I. Bineva, V. Cimalla.....	195

Session
Microsystem Technologies

Study, Simulation and Manufacturing of New Geiger-APD for Applications in Astrophysics and Biology K. Jradi, T. Camps, D. Pellion, D. Esteve, A. Le Padellec, A. R. Bazer-Bachi.....	201
Quasi 3D Model of Resonance Piezoelectric Array Sensor D. Kolev, V. Todorova.....	205
Transparent Conductive Oxide Nanoparticle-Based Layers for Laminar Plasmonic Devices Z. Jakšić, J. Buha.....	209
Structural and Microhardness Characterization of Thin Electrodeposited Ni/Cu Multilayers on Copper Substrates J. Lamovec, V. Jović, B. Popović, D. Vasiljević-Radović, R. Aleksić, V. Radojević.....	213
Modeling of Thermopile-Based MEMS Sensors Using Analytical and Numerical Techniques D. Randelović, C. Tsamis, G. Kaltsas, A. Petropoulos, Ž. Lazić.....	217
Micro Force Sensor Fabricated in the LTCC Technology G. Radosavljević, W. Smetana, A. Marić, Lj. Živanov, M. Unger, G. Stojanović.....	221

Poster Session
Microsystem Technologies

Injection Molded Mn-Zn Ferrite Ceramics Z. Stanimirović, I. Stanimirović.....	227
Piezoelectric Ceramics by Powder Injection Molding I. Stanimirović, Z. Stanimirović.....	231

T/RH-sensitive Thick-film Structures for Ecological Control and Environment Monitoring O. Shpotyuk, I. Hadzaman, H. Klym, M. Brunner.....	235
PALS as Characterization Tool in Application to Humidity-Sensitive Electroceramics H. Klym, A. Ingram, O. Shpotyuk, J. Filipecky.....	239
Micromachining by Maskless Wet Anisotropic Etching {hkl} Structures on {100} Oriented Silicon V. Jović, J. Lamovec, M. M. Smiljanić, M. Popović.....	243
Photothermal Elastic Vibration Spectra of SiO₂ Film on Si D. M. Todorović, B. Cretin, Y. Q. Song, V. Jović.....	247

Session Processes and Technologies

Platinum Decoration of Silicon Direct Wafer Bonded Interfaces D. Valente, N. Batut, L. Ventura.....	253
Study of Re-crystallization Processes in Amorphous Silicon Films V. Vavrunkova, M. Netrvalova, L. Prušakova, J. Mullerova, P. Šutta.....	257
Electrical and Micromechanical Performance of Ultrasonically Cleaned Silicon Wafers A. Nadtochiy, A. Podolian, V. Kuryliuk, A. Kuryliuk, O. Korotchenkov, J. Schmid, V. Schlosser.....	261
Line Width Roughness Effects on Device Performance: The Role of the Gate Width Design V. Constantoudis, E. Gogolides, G. Patsis.....	265
Evolution of Resist Roughness During Development: Stochastic Simulation and Dynamic Scaling Analysis V. Constantoudis, G. Patsis, E. Gogolides.....	269

Session Circuit Design and Testing

On Prediction in Electronics J. Milojković, S. Bojanić, V. Litovski.....	275
Design of Rad-Hard SRAM Cells: A Comparative Study M. Benigni, V. Liberali, A. Stabile, C. Calligaro.....	279
Systematic Expression Shearing in Symbolic CMOS Circuits Analysis Based on Topology Reduction S. Djordjević, P. Petković.....	283
Design of a Digital Send-Site Synchronizing and Deskewing Circuit for Multi-Lane Serial High-Speed Communication S.-H. Voss, S. Weide, U. Langenbach.....	287

Sine-Wave Signal Sources for Dynamic ADC Testing	
V. Papež, S. Papežova.....	291
Power Reduction and Technology Mapping of Digital Circuits using AND-Inverter Graphs	
R. Mehrotra, E. Popovici, K. L. Man, M. Schellekens.....	295
The Impact of Process Faults on Specific Parameters of a 2.3GHz CMOS LNA	
A. Karagounis, A. Kanapitsas, B. Kotsos, C. Tsonos, A. Polyzos, B. Petropoulou.....	299

Session System Design

Model Based Performance Estimation in ZigBee Based Wireless Sensor Networks	
F. Lohse, V. Zerbe.....	307
Wireless Sensor Networks with Embedded Intelligence for Agricultural Applications	
B. Lilly, K. Shenai.....	311
Implementation and Testing of a Secure Fall Detection System for Body Area Networks	
S. Marinković, R. Puppo, R. L. C. Pan, E. Popovici.....	315
Robotic Surgical System Integrated with Advanced Electronic Tracking	
B. Lilly, K. Shenai, V. Goel, A. Biyani.....	319
Comparative Study of Software vs. Hardware Implementations of Shortened Reed-Solomon Code for Wireless Body Area Network	
R. Mc Sweeney, C. Spagnol, E. Popovici.....	323
Synthesis of Orthogonal Systolic Arrays for Fault-Tolerant Matrix Multiplication	
M. Stojčev, E. Milovanović, S. Marković, I. Milovanović.....	327

Poster Session Circuit and System Design

Design and Simulation of D-Latch and Multiplexer Using vMOS	
R. Kumar, A. Kumar.....	337
A Low-Voltage CMOS Voltage-Controlled Resistor with Wide Resistance Dynamic Range	
N. Tadić, M. Zogović.....	341
BLDC Motor Driver – Development of Control and Power Electronics	
D. Krklješ, Č. Morvai, K. Babković, L. Nađ.....	345
Web-Based Tool for FSM Encoding Targeting Low-Power FPGA Implementation	
D. Mihhailov, A. Sudnitson, K. Tarletski.....	349
Virtual Instrumentation Software Applied to Integrated Circuit Testing Procedure	
B. Dimitrijević, M. Simić.....	353

LEON2 Processor with High-Speed USB Port: A System-On-Chip for Wireless Applications M. Erić, G. Panić, Z. Stamenković.....	357
Accelerating First-Time-Right High-Speed System Designs with High-Performance FPGAs S.-H. Voss, M. Schueler, M. Baerwolff, M. Kranz, S. Dressler.....	361
Multiple-Bit Parallel CDMA Data Transfer over Common Bus T. Nikolić, M. Stojčev.....	365
Design of Low Noise Fractional-N Frequency Synthesizer Using Sigma-Delta Modulation Technique N. Fatahi, H. Nabovati.....	369
AADL Modeling of M2M Terminal A. Prijić, Z. Prijić, D. Vučković, A. Stanimirović.....	373

Session
Modeling and Simulation

Compact Electro-Thermal Modeling and Simulation of Large Area Multicellular Trench-IGBT M. Riccio, M. Carli, L. Rossi, A. Irace, G. Breglio, P. Spirito.....	379
Thermal Modelling of Electronic Systems Based on the Spectral Analysis of Circuit Temperature Response M. Janicki, J. Banaszczyk, M. Szermer, G. De Mey, A. Napieralski.....	383
TCAD Modeling of NPN-SiGe-HBT Electrical Performance Improvement through Extrinsic Stress Layer M. Al-Sa'di, S. Fregonese, C. Maneux, T. Zimmer.....	387
RF Compact Small-Signal Model for SOI DG-MOSFETs A. Cerdeira, J. C. Tinoco, M. Estrada, J.-P. Raskin.....	391
Electro-Thermal Modeling of Nano-Scale Devices K. Raleva, D. Vasileska, S. M. Goodnick.....	395
Benchmarking for HBT Models for InP Based DHBT Modeling S. Ghosh, T. Zimmer, B. Ardouin, C. Maneux, S. Fregonese, F. Marc, B. Grandchamp, G. A. Kone.....	399

Poster Session
Modeling and Simulation

An Ultimate Planar MOS Transistor for High-Performance Applications Based on Classical and Modern Techniques J.-T. Lin, Y.-C. Eng, C.-H. Kuo, P.-H. Lin.....	405
3D Simulation of Triple-Gate MOSFETs J. Conde, A. Cerdeira, M. Pavanello, V. Kilchytska, D. Flandre.....	409

A Comparative Numerical Simulation of a Nanoscaled Body on Insulator FinFET	
A. Ashfaqul, H. Imran.....	413

**Session
Reliability Physics**

Invited Keynote Paper

On Randomness and Reliability of Electronic Devices: A Case-Study of Thick Dielectrics	
M. A. Alam.....	419

Invited Keynote Paper

Doping of Ta₂O₅ as a Way to Extend Its Potential for DRAM Applications	
E. Atanassova, A. Paskaleva, D. Spassov.....	427

Rise Time and Dwell Time Impact on Triac Solder Joints Lifetime During Power Cycling	
S. Jacques, P. M. Diack, N. Batut, R. Leroy, L. Gonthier.....	435

Tantalum and Niobium Oxide Capacitors: Field Crystallization, Leakage Current Kinetics and Reliability	
V. Sedlakova, J. Sikula, J. Majzner, H. Navarova, M. Chvatal, T. Zednicek.....	439

Degradation of p-channel Power VDMOSFETs under Pulsed NBT Stress	
S. Djorić-Veljković, D. Danković, A. Prijić, I. Manić, V. Davidović, S. Golubović, Z. Prijić, N. Stojadinović.....	443

Random Telegraph Noise Characterization of p-type Silicon Nanowire FinFETs	
C. Mukherjee, T. Maiti, C. Maiti.....	447

Engineering of the Nitride Charge Trapping Layer for Non-Volatile Memory	
J.-P. Colonna, E. Nowak, G. Molas, M. Bocquet, M. Gely, N. Rochat, C. Licitra, J. P. Barnes, M. Veillerot, R. Kies, K. Yckache.....	451

Properties of Al Doped Ta₂O₅ Based MIS Capacitors for DRAM Applications	
A. Skeparovski, N. Novkovski, D. Spassov, E. Atanassova, V. K. Lazarov.....	455

Comparison of GaN-Based MOS Structures with Different Interfacial Layer Treatments	
E. Al Alam, I. Cortes, M. P. Besland, P. Regreny, A. Gouillet, F. Morancho, A. Cazzare, Y. Cordier, K. Isoird, F. Olivie.....	459

**Poster Session
Reliability Physics**

Probing the Electrical Properties of the Si Nitride/Si Interface	
C. Tsonos, A. Kanapitsas, A. Karagounis, I. Stavrakas, D. Triantis, C. Anastasiadis, P. Photopoulos, V. Em. Vamvakas, P. Pissis.....	465

Comparisons of Noise Spectroscopy Analyze and Microplasma Noise Sources	
J. Vanek, J. Dolensky, Z. Chobola, M. Lunak.....	469

RTS Noise Amplitude and Electron Concentration in MOSFETs	
J. Pavelka, J. Sikula, M. Chvatal, M. Tacano, M. Toita.....	475
Effects of the Drain Width on the Electrical Behavior of Deep Defect in AlGaIn/GaN/SiC HEMTs	
O. Fathallah, M. Gassoumi, S. Saadaoui, B. Grimbert, C. Gaquiere, H. Maaref.....	479
Effects of Constant Voltage Stress in Hf-doped Ta₂O₅ Stacks	
I. Manić, E. Atanassova, N. Stojadinović, D. Spassov.....	483
Aging of the Photovoltaic Solar Cells	
A. Vasić, B. Lončar, M. Vujisić, K. Stanković, P. Osmokrović.....	487
Author Index
