

2010 9th International Conference on Environment and Electrical Engineering

(EEEIC 2010)

**Prague, Czech Republic
16-19 May 2010**

**IEEE Catalog Number: CFP1051I-PRT
ISBN: 978-1-4244-5370-2**

Technical Program

Renewable Energy Sources

Analyzing the Impact of Renewable Energy Technologies by means of Optimal Energy Planning Norma Anglani and Giuseppe Muliere	1
Energy supply for sustainable regional development in Cordoba A. Gil-de-Castro, A. Moreno-Muñoz, M.A López-Rodríguez, and J.J González-de-la-Rosa	6
Narrow-band Noise as a Tool for Diagnostics of Solar Cells PN Junctions Pavel Koktavy, Robert Macku, Petr Paracka, and Radim Barinka	10
Off-grid Power Systems Stanislav Misak and Lukas Prokop	14
Excess Reverse Current Modeling of Single Junction Si Solar Cells and Transistor n+pn+ Structure Effect Robert Macku and Pavel Koktavy	18
Pitch Control of Wind Turbine Blades in Noisy and Unstable Wind Conditions Mohsen Faridi, Roghaiyeh Ansari, Seyed Ali Mousavi, and Mahsa Dodman	22
Urban Photovoltaic Potential Harald Schwarz and Shaoqing Ying	26
Optimal sizing of a grid-connected hybrid system for north-west of Iran-case study Fatemeh Jahanbani Ardakani, Gholam Hossein Riahy Dehkordi, and Mehrdad Abedi	29
A New Method for Uninterrupted Operation of Wind Turbines Equipped With DFIGs During Grid Faults Using FCL Mehrdad Fazli and Nemat Talebi	33
Changing photovoltaic array interconnections to reduce mismatch losses: a case study Damien Picault, Bertrand Raison, Seddik Bacha, Jorge Aguilera, and Juan De La Casa	37
Advance Control of Variable Speed Wind Energy Conversion System with DFIG Djilali Kairous, René Wamkeue, Badnir Belmadani	41
Wind Power Forecasting by an Empirical Model Using NWP Outputs E. Pelikan, K. Eben, J. Resler, P. Jurus, P. Krc, M. Brabec, T. Brabec, and P. Musilek	45
Use of exogenous data to improve an artificial neural networks dedicated to daily global radiation forecasting Christophe Paoli, Cyril Voyant, Marc Muselli, and Marie-Laure Nivet	49

Design of a Single Alkaline Fuel Cell Test Bed James Brunton, David M. Kennedy, Fergal O'Rourke, and Eugene Coyle	53
Dispersed energy sources integrated with electrical power systems Piotr Danielski	57
Wind Power Forecasting & Prediction A.M. Foley, P.G. Leahy, and E.J. McKeogh	61
The problems of electrical distance in connection with the operation of wind power generator Stanislav Rusek, Frantisek Strida, and Martin Mach	65
Performance Assessment of A Micro Solar – Wind – Battery Scheme for Residential Load in Malaysia Yong Boon Leong, Chia Daw Bin, Rajparthiban Kumar Rajkumar, and Vigna Kumaran Ramachandaramurthy	69
Design of a PV/Wind Hybrid System for Telecommunication Load in Borneo Region Chia Daw Bin, Yong Boon Leong, Rajparthiban Kumar Rajkumar, and Vigna Kumaran Ramachandaramurthy	73
Modelling of wind power plants operation Jan Tkac, Marek Hvizdos, and Jozef Rusnak	77
Characterization of a Wind Flutter Generator D. Pimentel, P. Musilek, A. Knight, and J. Heckenbergerova	81
Energy Use of Biogas from Waste Water Miroslava Gono, Miroslav Kyncl, and Radomir Gono	85
Development of measuring instruments for long-term measurement of low level illuminances and luminances Karel Sokansky, Petr Zavada, Tomas Novak, Vaclav Kolar, and Roman Hrbac	89
A constant frequency Hybrid Exciter for an autonomous wind energy conversion system A. Karthikeyan, C. Nagamani, G. Saravana Ilango, and M. Jaya Bharata Reddy	93
Light emission from silicon solar cells as characterization technique Pavel Skarvada, Pavel Tomanek, Pavel Koktavy, and Robert Macku	97
An Optimal Power Flow Based Dispatch Model for Distributed Generation Embedded Network Yufeng Lin, Jin Zhong, and Math H.J. Bollen	101
Energy Storage	
A Technique for Unit Commitment in Multiple Energy Carrier Systems with Storage Laura Maria Ramirez-Elizondo, Victor Velez, and G.C. (Bob) Paap	107
Solar Energy Storage Using Hydrogen Technology Petr Moldrik, Zdenek Hradilek, and Roman Chvalebek	111

Power Systems

Quantitative Modeling of an Energy Constraint Regarding V2G Aggregator for Frequency Regulation Sekyung Han, Soohyeong Jang, Kaoru Sezaki, and Soohee Han	115	The Energy Meters Allocation In Electric Systems on the Basis of Observability Theory Andrew Vladimirovich Pazderin, Alexander Olegovich Egorov, and Stanislav Andreevich Eroshenko	168
Impact of SVC and STATCOM on Power System Including a Wind Farm Ali Daneshi, Nima Sadr Momtazi, Hossein Daneshi, and Javad Javan	118	Artificial Neural Network for Detection of Asynchronous State Pawel Kostyla	172
Impact of New Unit Installations on Power System Reliability and Ancillary Services Requirements Ondřej Novák, Tomáš Strnad, Petr Horáček, and Josef Fantík	122	Identification of Critical Aging Segments and Hotspots of Power Transmission Lines Jana Heckenbergerova, Petr Musilek, Md. Mafijul Islam Bhuiyan, Don Koval, and Emil Pelikan	176
Analysis of Sub-Harmonics in Power Systems Zbigniew Leonowicz	126	A New Concept in Evaluating Power System Distortions under Unbalanced and Nonsinusoidal Conditions M. Tourandaz Kenari, S. Mohamadian, and A. Shoulaie	180
Detection of Voltage Sag Using Unscented Kalman Smoother Ehsan M. Siavashi, Alireza Rouhani, and Ramin Moslemi	129	Overvoltage and overcurrent in capacity circuit generated by a vacuum switch Joanna Budzisz	184
A Combined Algorithm for High Speed Transmission-line Protection Based on Traveling-Wave Akbar Sharafi, Peyman Jafarian, and Majid Sanaye-Pasand	133	Effects of Integrating Wind Power for Representative Load Scenarios in a US Electric Power System: Operational Costs and Environmental Impacts Noha Nabil Abdel-Gawad Abdel-Karim	187
Optimal Locating and Sizing of TCSC Using Genetic Algorithm for Congestion Management in Deregulated Power Market Nazanin Hosseinipoor and Seyed Mohammad Hossein Nabavi	137	Comparative Study of Single-phase Earth Fault Responses of FCC-HVDC and LCC-HVDC Zhu Jia Xu, Longfu Luo, Junfeng Bai, Xiaofang Li, Yong Li, Christian Rehtanz, Dechang Yang, Ulf Häger	191
Comparison of Weighted-Least-Squares Power System State Estimation in Polar and Rectangular Coordinate Systems Tomasz Okon and Kazimierz Wilkosz	141	Fault Recognition in Power System Including TCSC Mehdi Karbalaye-Zadeh, Akbar Sharafi, and Hamid Lesani	195
Processing of Databases of Thermal Analyses in Electric Power Networks Miroslav Hrabcik and Radomir Gono	145	Proper Setting of Underfrequency Load Shedding Relays in Industrial Plants Behnam Khaki and Shahram Montaser Kouhsari	199
Application of artificial neural networks for estimation of some quantities in electrical networks Zbigniew Waclawek	149	A New Scheme to Control SSSC in Interconnected Power Systems Gholamreza Zareiegovar, Hosein Shayeghi, Aidin Sakhavati, and Vahid Nabaei	203
Proposal of Enhanced Classification of Disturbing Phenomena in Electrical Networks Przemyslaw Janik	152	A Unique Load Shedding Application in a Large Pulp Mill Electrical System Hui Hwang Goh and Boon Ching Kok	207
The Analysis of Resonance in Feeding Power Networks Maciej Pawlowski	154	Time-frequency analysis of step response in medium voltage networks Veslav Mach, Radomir Gono, Zbigniew Leonowicz, and Tomasz Sikorski	211
Development of a simulation model of a HTS-fault current limiter for the network computation software DIGSILENT PowerFactory Martin Ruge and Klaus Pfeiffer	158	State-feedback current control of VSI-Based D-STATCOM for load compensation Peyman Jafarian and Mohamad Tavakoli-Bina	215
Delayed current zeros close to generator terminals Stefan Fenske	161	Performance evaluation of active anti-islanding scheme for multi-inverter DG systems Alben Cardenas, Kodjo Agbossou, and Mamadou Lamine Doumbia	219
Optimal UPFC based on Genetics Algorithm to Improve the Steady-State Performance of HELENSÄHKÖVERKKO OY 110 KV NETWORK at Increasing the Loading Pattern Ahmed Mohamed Othman, Matti Lehtonen, and Mahdi Mohamed El-Arini	163	Automatic Controller for Cost-optimal Power Balance Control Jakub Novak, Petr Chalupa, and Vladimir Bobal	223

Working Out the Policy of Technical Modernization of Big Cities' Power Supply on the Basis of Network Condition Estimation Model Sergey Kokin and Stepan Dimitriev	227	Analysis of Low Frequency Oscillations in Power System based on HHT Technique Dechang Yang, Christian Rehtanz, Yong Li, and Rongkun Xiu	289
Direct Current Technology to Improve Power Quality for Low Voltage Distribution Network Michal Jankow	n/a	FMECA Evaluation Using Structural Importance and Fuzzy Theory Yun-Seong Lee, Hyung-Chul Kim, Jun-Min Cha, and Jin-O Kim	293
Optimal Power Flow Considering System Security Using Loading Factor Meghdad Tourandaz Kenari and Shahram Jadid	234	Genetic Algorithm Applied in a Geoelectrical Prospecting Method Wesley Pacheco Calixto, Marcel Wu, Luciano Martins Neto, Keiji Yamanaka, and Hipólito Barbosa Machado Filho	297
Smart Metering by using "Matrix Pencil" hala najmeddine, Khalil El Khamlichi Drissi, Christophe Pasquier, Claire Faure, Kamal Kerroum, Thierry Jouannet, Michel Michou, and Alioune Diop	238	A New Auto-Inductive Harmonic-Suppression Transformer and Its Harmonic Equivalent Circuit Model Yong Li, Fu Long Luo, Fei Peng Shao, Christian Rehtanz, Chang De Yang, and Sven Rüberg	301
Inclusion of the zero-sequence mutual impedance in a distributed parameter model of transmission lines Luis de Andrade and Elmer Sorrentino	242	LMI-based Robust Wide-area Time-delay Damping Control of SSSC-type FACTS Device for Stability Enhancement of Power System Yong Li, Christian Rehtanz, Chang De Yang, Ulf Häger, Fang Liu, Fu Long Luo, and Zhu Jia Xu	305
Transformer Use for Active Power Flow Control in the Electric Power System Michal Kolcun, Daniel Hluben, Lubomir Bena, Nikolay Djagarov, and Zhivko Grozdev	246	Condition Monitoring of Distribution Line Insulators using Discrete S-Transform Karthik Chandra B, M. Jaya Bharata Reddy, and D.K. Mohanta	309
Optimal Location and Setting of TCSC under Single Line Contingency Using Mixed Integer Nonlinear Programming Reza Etemad, Heidar Ali Shayanfar, and Reza Navabi	250	SVC Robust Additional Damping Controller Design for Power System with Considering Time-delay of Wide-area Signals Fang Liu, Ryuichi Yokoyama, Yong Li, Cheng Yi Zhou, and Min Wu	313
Sequence Impedances Criterion for Loss of Main Detection of Embedded Generation Ahmad Darabi, Amir Hassannia, Mahdi Saedi, and Ali Moeini	254	Adaptive cluster analysis in electric network of power systems Nikita Tomin and Victor Kurbatsky	317
Contingencies Ranking for Voltage Stability Analysis using Continuation Power Flow Method Mehrdad Ahmadi Kamarposhti and Hamid Lesani	n/a	Optimal Coordination Of Directional Overcurrent Relays Using Harmony Search Algorithm Mostafa Barzegari, Seyed Mohammad Taghi Bathaee, and Mohsen Alizadeh	321
Voltage and Frequency time series analysis. Improvements in transforming data from quality survey into information Dan Apetrei, Gianfranco Chicco, Ralf Neurhor, Mihaela Albu, Petru Postolache, and Ioan Silvas	265	Experimental Investigation of AC Contactor Ride Through Capability During Voltage Sag Azah Mohamed, Hussain Shareef, and Khodijah Mohamed	325
Harmonic Distortion Comparison of Switched Capacitors with Active Power Filter for Reactive Power Compensation Samet Biricik and Ozgur Cemal Ozerdem	269	Real-time Laboratory Implementation Results of an Active Filter Alireza Javadi, Guy Olivier, Frédéric Sirois, and André Youmssi	329
FPGA based cascaded multilevel Pulse Width Modulation for single phase inverter P. Karuppanan and Kamala Kanta Mahapatra	273	A New Approach for Tuning PID Controller Parameters of Load Frequency Control Considering System Uncertainties Gholmarezha Zareiegovar, Aidin Sakhavati, Vahid Nabaei, and G. B. Gharehpetian	333
Shunt Active Power Line Conditioners for compensating harmonics and reactive power P. Karuppanan and Kamala Kanta Mahapatra	277	Power Quality Analysis on EHV Transmission line Using Modified S-Transform Sagar Kondaveti, M. Jaya Bharata Reddy, and D.K. Mohanta	337
A PSO-Based SFE Approach for Congestion-Constrained Power Market Equilibrium Studies Mohammad Iman Ghiyasi, Hassan Khalkhali, S. H. Hosseinian, and Behzad Farhangi Rad	281		
Data Compression of Power Quality Disturbances Using Wavelet Transform and Spline Interpolation Method Gabriel Gasparesc	285		

New Fuel Cell Power Conditioning System for Supplying Dedicated Loads Dmitri Vinnikov, Indrek Roasto, Tanel Jakajas, Tõnu Lehtla, and Juhan Laugis	341
Distribution Network Reliability Enhancement for Minimizing Penalty Cost Vahid Nabaei, Gholamreza Zareiegovar, Mohsen Mohammadi, and Ali Jannesar	345
Economical Benefits of Supporting Voltage Control with Large Solar Parks Ahmad-Rami Al-Awaad and Manhal Arwani	349
MTBF Analysis in OEM Company: Applications to ZCZVT PWM Soft-Transition Inverters Metin Nil, Mustafa Nil, and Bekir Cakir	353
The Romanian Power Quality Monitoring Systems Carmen Stanescu	361
Power Quality Diagnosis in Distribution Networks Using Rule Based S-transform Method Azah Mohamed, Hussein Shareef, and Mohammad Fuad Faisal	365
Application of Analytic Hierarchy Process (AHP) in Load Shedding Scheme for Electrical Power System Hui Hwang Goh and Boon Ching Kok	369
Analytical synchronization of two-end measurements for fault location based on distributed model of overhead line Pawel Dawidowski and Jan Izykowski	373
Detection, classification and localization of power system impulsive transients using S-transform M. Jaya Bharata Reddy and Dushmantha Kumar Mohanta	377
Application of Integrated Linear Programming Models for the Planning of Distribution Networks Alexandre Augusto Angelo de Souza, Carlos César Barioni de Oliveira, and Klaus de Geus	381
Electricity Prices Neural Networks Forecast using the Hilbert-Huang Transform Nikita Tomin, Victor Kurbatsky, Denis Sidorov, and Vadim Spiryaev	384
On The Use of Voltage Stability Index to Prevent Undesirable Distance Relay Operation during Voltage Instability Azah Mohamed	388
Causes of failure of distribution transformers in India Ranjana Singh and Amarjit Singh	392
Estimation of Synchronous Generator Parameters from Load Rejection Analytical Responses René Wamkeue, Christian Jollette, and Djilali Kairous	

Applications

A cost effective ac voltage regulator to mitigate voltage sags and dim lamps in street-lighting applications Alessandro Burgio, Giuseppe Fedele, and Daniele Menniti	396
---	-----

Maturity Scoring Method for Consumer Electronics Products Ali Tarkan Tekcan and Barbaros Kiriskan	400
A multi-platform Data Acquisition Device for Power Quality metrological certification Maurizio Caciotta, Sabino Giarnetti, Fabio Leccese, and Daniele Trinca	404

Education

The virtual common designing in the education on the distance Jaroslav M. Szymanda	408
---	-----

Environmental aspects

Long-term measurements of night sky illuminance Frantisek Dostal, Karel Sokansky, and Tomas Novak	411
Extreme weather events and power systems with high wind penetration: case study on the Irish winter of 2009/10 Paul Leahy	415
An Electrical Analogy for Flow Augmentation in Tropical Rivers Richa Babbar, Rashmi Vikal, and Aruna Thube	419
Characterization of Magnetic Field at Distribution Substations Ismail Said, Halil Bin Hussain, and Vimalla Dave	423
Electric breakdown strength measurement in liquid dielectrics Iraida Kolcunová and Martin Marci	427

Signal Processing

Methods of Frequency Estimation in PWM Converters Systems Pawel Kostyla	431
Spectrum of the Beam Wandering Noise Jan Diblík	435
Structural properties of the SOGI system for parameters estimation of a biased sinusoid Giuseppe Fedele, Andrea Ferrise, and Domenico Frascino	438
Subharmonics Determination Method based on Binary Successive Approximation Feed Forward Fabio Leccese	442
Tunable Oscillator Using Two CCTA-s and Only Grounded Passive Elements Roman Sotner, Josef Slezak, and Tomas Dostal	447

Other

Electric railways operation from the perspective of EMC Vaclav Kolar, Josef Palecek, Vitezslav Styskala, and Jaroslav Kypus	451
Voltage division over the interrupter units of a high voltage circuit breaker without grading capacitors Henryk Stuermer	455
Electrical behaviour of conducting silicon rubber under short high current stress Artur Napierala	459
Dynamic behaviour of a five-level grid connected modular inverters Grain Philip Adam, Stephen Jon Finney, and Barry Wayne Williams	461
Simulation and Component Sizing of a Stand-alone Hybrid Power System with Variable Speed Generator P.Y. Lim, C. V. Nayar, and S. Rajakaruna	465
An extension of the approach to the solar cell problem. Part II Bronislaw Swistacz	469
Utilisation of MCA8 for comparison of systems for storage of energy gained from RES Petr Moldrik, Jiri Gurecky, and Zdenek Hradilek	473
Space charge spectroscopic studies of indium doped Cd _{0.91} Mn _{0.09} Te J. M. Wrobel, E. Placzek-Popko, J. Szatkowski, Adam Gubanski, Jacek Rezmer, and P. Becla	477
Optimization of a New Type of Hysteresis Motor Using Genetic Algorithm Mohammad Hossein Sadeghi and Ahmad Darabi	479
A Fast Method for Fault Section Identification in Series Compensated Transmission Lines Mohamadreza Baradar, Saeed Afsharnia, and Majid Sanaye-Pasand	483
Clipping and Time Domain Statistical Method for PAPR Reduction in OFDM System Aeizaa Abdul Wahab and Mohd. Fadzil Ain	487

Legal & Economic Aspects

Current Trends and Potential Competition in German Electric Power Industry Mikhail Vasilyev	491
What is an effective tax system for Portugal? Nuno Soares Domingues	495
The role of renewable distributed generation in the context of local energy security – the case of Poland Waldemar Dolega	498

Student papers

Aspects of the Influence of Electromagnetic Field on the Oxidation of Insulating Oil Cujbã Tiberiu Octavian	502
Received Signal Strength Uncertainty in Energy-Aware Localization in Wireless Sensor Networks Patrik Morávek, Dan Komosný, David Girbau Sala, and Antoni Lázaro Guillén	506
Offshore Windfarm Layout Optimization Cezary Paweł Szafron	510

Renewable Energy Sources

Stand-Alone PV Generation System with Maximum Power Point Tracking Hadi Ahazadeh, Hossein Kojabadi, Ahmed Yazdikhah	514
Power quality disturbances in power system with distributed generation Tomasz Sikorski, Edward Ziąja, Kazimierz Herlender, and Władysław Bobrowicz	518

Additional Papers

A New Method for Transmission Loss Allocation Method in the Deregulated Power Market M. Bavafa, M. Shakeri, N. Navidi	522
Determining the Best Sequence of Load Pickup During Power System Restoration V. Yari, S. Nourizadeh, A. M. Ranjbar	526
Cwj qt' 16f gz
