## Table of Contents

### Volume I of II

#### Oxy-Fuel I -- Overview & Demonstrations

*Dr. Ligang Zheng, CanmetENERGY*

##### **Coal-fired Oxyfuel Technology Status and Progress to Deployment**

*Professor Terry Wall, Asia-Pacific Partnership Oxy-fuel Working Group, and University of Newcastle, AUSTRALIA; and Jianglong Yu, Faculty of Power and Energy Engineering, Shenyang Institute of Aeronautical Engineering (and International Energy Agency), PEOPLE'S REPUBLIC OF CHINA.....1*

##### **First Test Results from Vattenfall's 30 MWth Oxyfuel Pilot Plant in Schwarze Pumpe**

*Lars Strömberg and Göran Lindgren, Vattenfall AB; Jürgen Jacoby, Rainer Giering, and Marie Anheden, Vattenfall Research and Development AB, SWEDEN; Uwe Burchhardt and Hubertus Altmann, Vattenfall Europe Generation AG & Co. KG; and Frank Kluger and Georg-Nikolaus Stamatelopoulos, Alstom Power Systems GmbH. GERMANY....13*

##### **Babcock & Wilcox and Air Liquide's 100 MWe Oxy-Fuel Demonstration Program**

*Dennis K. McDonald, Power Generation Group, Inc. and Douglas DeVault, Advanced Technologies, The Babcock & Wilcox Company; and Rajani Varagani, Air Liquide, USA; Jean-Pierre Tranier, Philippe Court, and Nicolas Perrin, Air Liquide, FRANCE.....25*

##### **Alstom's Oxy-Firing Technology Development -- and Demonstration - Near Term CO<sub>2</sub> Solutions**

*Armand A. Levasseur, Paul J. Chapman and Nsakala ya Nsakala, Power Plant Laboratories, ALSTOM Power Inc., USA; and Frank Kluger, ALSTOM Power GmbH, GERMANY.....37*

##### **Ignition of a Group of Coal Particles in Oxyfuel Combustion with CO<sub>2</sub> Recirculation**

*Alejandro Molina, Escuela de Procesos y Energía, Facultad de Minas, Universidad Nacional de Colombia, Medellín, COLOMBIA; Ethan S. Hecht, and Christopher R. Shaddix, Combustion Research Facility, Sandia National Laboratories, USA.....49*

#### Oxy-Fuel II -- Experimental Studies

*Dr. Ligang Zheng, CanmetENERGY and  
Horst Hack, Foster Wheeler North America*

##### **Characterization and Prediction of Oxy-combustion Impacts in Existing Coal-fired Boilers**

*Andrew Fry and Bradley Adams, Reaction Engineering International, USA.....55*

##### **Retrofit of a 1MW PC Test Facility to Oxy-Fire with Flue-Gas Recycle**

*Thomas K. Gale, Southern Research Institute; and Curtis L. Taylor, MAXON Corporation; USA.....67*

##### **Basic Experiments and CFD Calculations of Air and Oxyfuel Firing of Lignite and Bituminous Coals in 0.5 and 1 MW Scale Combustion Test Facilities**

*S. Rehfeldt, C. Bergins, C. Kuhr and M. Ehmman. Hitachi Power Europe GmbH; G Scheffknecht and J. Maier, University of Stuttgart, Institute of Process Engineering and Power Plant, GERMANY; and S. Wu, Hitachi Power Systems America, Ltd, USA.....69*

**The Effects of Cofiring Biomass with PRB Coal on NO<sub>x</sub> Formation under Air-Fired and Oxy-Fuel Conditions**

*Scott A. Skeen, Benjamin M. Kumfer, and Richard L. Axelbaum, Department of Energy, Environmental, and Chemical Engineering, Consortium for Clean Coal Utilization, Washington University in St. Louis, USA.....81*

**Coal Pyrolysis and Char Combustion under Oxy-fuel Conditions**

*Leema Al-Makhadmeh, J. Maier, and G. Scheffknecht, Institute of Process Engineering and Power Plant Technology (IVD), University of Stuttgart, GERMANY.....91*

**Control System Requirements for Recycle Gas and Oxygen Burners**

*Eladio Ruiz de Molina, Corr Systems Inc, John E. Cover, John E. Cover Engineering, and Thomas K. Gale. Southern Research Institute, USA.....103*

**OTM Based Oxy-fuel Combustion for CO<sub>2</sub> Capture**

*Jamie Wilson, Maxwell Christie, Nick Degenstein, Minish Shah and Juan Li, Praxair, Inc.; and V. Venkateswaran, ENrG Inc.; and Eric Eddings and Joseph Adams, University of Utah, USA.....117*

**Oxy-Fuel III – Burner Developments**

*Dr. Ligang Zheng, CanmetENERGY and  
Dr. Lawrence E. Bool, Praxair, Inc.*

**Utility-Scale Flexi-Burn™ CFB Power Plant To Meet the Challenge of Climate Change**

*Horst Hack, Zhen Fan and Andrew Seltzer, Foster Wheeler North America Corp., R&D, USA.....129*

**Influence of Various O<sub>2</sub>/CO<sub>2</sub>-Concentrations on the Burning Behavior of Different Coals**

*Dipl.-Ing. Stephanie Tappe and Prof. Dr.-Ing. Hans Joachim Krautz, Brandenburg University of Technology Cottbus, GERMANY.....139*

**Design of a Flexi-Burn™ Pulverized Coal Power Plant for Carbon Dioxide Sequestration**

*Andrew Seltzer, Zhen Fan, and Horst Hack, Foster Wheeler North America Corp. R&D, USA.....147*

**A Numerical Study on Characteristics of Oxy-Pulverized Coal Combustion in a Corner-firing Boiler of 125 MWe Scale**

*Taeyoung Chae, Byeong Ryeol Bang, Tae U Yu, and Won Yang, High Temperature Processing R&D Department, Korea Institute of Industrial Technology; and Sung Chul Kim, Power Generation Laboratory, Korea Electric Power Research Institute, KOREA.....159*

**Development of Oxygen-Enriched High Temperature Air Combustion Burner for PC Boilers**

*Hai Zhang, Kai Cui, Zenshan Li, Tao Wang, Hairui Yang, Qing Liu, Junfu Lu, and Guangxi Yue, Key Laboratory for Thermal Science and Power Engineering of Ministry of Education, Department of Thermal Engineering, Tsinghua University, PEOPLE'S REPUBLIC OF CHINA.....169*

**Experiment and Model of the Low-NO<sub>x</sub> Swirl O<sub>2</sub>/CO<sub>2</sub> Burner and NO<sub>x</sub>/CO<sub>2</sub>/CO Emission in 0.3MW<sub>t</sub> Vertical Furnace**

*Liu Jingzhang, Liu Zhaohui, Kong Hongbin, Huang Xiaohong, Zhang Tai, Zhang Qian, Shi Yunye, and Zheng Chuguang, National Key Laboratory of Coal Combustion, Huazhong University of Science and Technology, PEOPLE'S REPUBLIC OF CHINA.....177*

**Oxy-Fuel IV – Emissions**

*Dr. Ligang Zheng, CanmetENERGY and*

*Dr. Yao Qiang, Tsinghua University*

**Particulate Matter Emission Characteristics of a Brown Coal under Oxy-fuel Combustion**

*Liu Zhaohui, Han Jingyi, Zhang Tai, Liu Jingzhang, Huang Xiaohong, and Zheng Chuguang, State Key Laboratory of Coal Combustion, Huazhong University of Science and Technology, PEOPLE'S REPUBLIC OF CHINA.....179*

**Nitrogen Species Measurements and Modeling in Staged Oxy-Fuel Combustion**

*Dale R. Tree, Brigham Young University, and Andrew J. Mackrory, The Babcock and Wilcox Company, USA.....187*

**Ash Related Aspects of Oxy-combustion of Coal and Biomass: A Thermodynamic Approach**

*Arthur Stam and Pierre Ploumen, KEMA; and Gerrit Brem, University of Twente, Faculty of Engineering, Laboratory of Thermal Engineering, THE NETHERLANDS.....197*

**Numerical Simulation of the NO<sub>x</sub>/SO<sub>2</sub>/CO Emission and Temperature Distribution in the 0.3MW<sub>t</sub> Vertical Furnace at the Atmosphere of O<sub>2</sub>/N<sub>2</sub> and O<sub>2</sub>/CO<sub>2</sub> and O<sub>2</sub>/FGR**

*Liu Jingzhang, Liu Zhaohui, Kong Hongbin, Huang Xiaohong, Zhang Tai, Zhang Qian, Shi Yunye, and Zheng Chuguang, Nation Key Laboratory of Coal Combustion, Huazhong University of Science and Technology, PEOPLE'S REPUBLIC OF CHINA.....199*

**Pollutant Formation During Oxy-Coal Combustion**

*Eric G. Eddings, and Liyong Wang, Dept. of Chemical Engineering, University of Utah, USA; and Astrid Sanchez and Fanor Mondragon, Dept. of Chemistry, University of Antioquia, COLOMBIA.....201*

**Homogeneous Mechanism Research on NO<sub>x</sub> Conversion in Methane Flame under O<sub>2</sub>/CO<sub>2</sub> Atmosphere**

*Zhao Ran, Liu Hao, Hu Han, Yan Zhiqiang, and Qiu Jianrong, State Key Laboratory of Coal Combustion, Huazhong University of Science and Technology, PEOPLE'S REPUBLIC OF CHINA.....203*

## **Oxy-Fuel V Fundamentals & Advanced Concepts**

*Dr. Ligang Zheng, CanmetENERGY; Alejandro Molina, Escuela de Procesos y Energía, Facultad de Minas, Universidad Nacional de Colombia, Medellín, and Christopher R. Shaddix, Sandia National Laboratory*

### **Evaluation of Rank Effects and Gas Temperature on Coal Char Burning Rates During Oxy-Fuel Combustion**

*Christopher R. Shaddix and Ethan S. Hecht, Combustion Research Facility, Sandia National Laboratories, USA; Santiago Jimenez, LITEC, University of Zaragoza, SPAIN; and Sang Min Lee, Korea Institute of Machinery & Materials, KOREA.....213*

### **Radiation Modeling in Oxy-Fuel Combustion Scenarios**

*Gautham Krishnamoorthy, Stefano Orsino, and Mehrdad Shahn timer, ANSYS Inc.; and David E. Huckaby and Mehrdad Shahn timer, U.S. Department of Energy, National Energy Technology Laboratory, USA; and Anura Perera, Fluent Europe Ltd., UNITED KINGDOM.....219*

### **Performance of the Pressurized Oxy-Fuel Combustion Power Cycle with Increasing Operating Pressures**

*Jongsup Hong, and Ahmed Ghoniem, Department of Mechanical Engineering, and Randall Field, MIT Energy Initiative, Massachusetts Institute of Technology, USA; and Marco Gazzino, Enel Produzione SpA, ITALY.....231*

### **Flue Gas Recycle Strategies in Oxy-coal Combustion**

*Ligang Zheng, Bruce Clements, Yewen Tan and Richard Pomalis, CANMET Energy Technology Center, Natural Resources Canada, CANADA.....243*

### **Oxy-Coal Combustion in a Small-Scale CFB**

*Lawrence E. Bool, III and Stefan Laux Praxair, Inc.; and Eric Eddings, University of Utah, USA.....255*

### **Oxy-Natural Gas Firing of the Jupiter Oxygen Oxy-Fuel Test Facility**

*Thomas Ochs, Danylo Oryshchyn, Cathy Summers, Stephen Gerdemann, Rigel Woodside, Casey Carney, and Paul Turner, National Energy Technology Laboratory, U.S. Department of Energy; and Brian Patrick, Daniel O'Brien, and Mark Schoenfield, Jupiter Oxygen, USA.....263*

## **Post-Combustion CO<sub>2</sub> Capture**

*Dr. Yewen Tan, CanmetENERGY*

### **CO<sub>2</sub> Capture by Amino Acid Salts Proven under Industrial Conditions: Preliminary Pilot Test Results**

*Dr. Ir. E.L.V. Goetheer, and Dhr. Ir. L.M. Nell, TNO Science & Industry, THE NETHERLANDS.....275*

### **Experimental Study on Blended Solvent of Chemical Absorption for CO<sub>2</sub> Separation from Coal-fired Flue Gas**

*Mengxiang Fang, Zhu Dechen, Shuiping Yan, Zhen Wang, Zhongyang Luo, and Kefa Cen, State Key Laboratory of Clean Energy Utilization, Zhejiang University, PEOPLE'S REPUBLIC OF CHINA.....277*

**Sub-Pilot Demonstration of the CCR Process: High Temperature CO<sub>2</sub> Capture Sorbents for Coal Fired Power Plants**

*Bartev Sakadjian, The Babcock & Wilcox Company; William K. Wang, Songgeng Li, Shwetha Ramkumar, Siddarth Gumuluru, and Liang-Shih Fan, The Ohio State University, Department of Chemical and Biomolecular Engineering; and Robert M. Statnick, Clear Skies Consulting, USA.....289*

**IEF-PCM DFT Study of Solvent-based CO<sub>2</sub> Capture Thermochemistry**

*Phil Jackson and Moetaz Attalla, CSIRO Energy Transformed Flagship, AUSTRALIA; and A. Beste, Oak Ridge National Laboratories, U.S. Department of Energy, USA....299*

**Wetted-Wall Column Experiments Guiding B&W's RSAT™ CO<sub>2</sub> Scrubbing Development Process**

*L. M. Rimpf, E.P. Bonnin-Nartker, L. Ji, S.J. Miksche, R. Zhang and G.A. Farthing, Babcock & Wilcox Research Center, The Babcock & Wilcox Power Generation Group, USA.....311*

**Coal Conversion to Chemicals & Fuels**

*Massood Ramezan, Science Applications International Corp.*

**Effect of Different Biomass Materials on the Combustion Performance of Soma Lignite**

*H. Haykiri-Acma and S. Yaman, Istanbul Technical University, Chemical and Metallurgical Engineering Faculty, Chemical Engineering Department, TURKEY....315*

**Coal/Biomass to Liquids as a Carbon Management Option for Clean Liquid Fuels**

*Mark Ackiewicz and G. DeHoratiis, U.S. Department of Energy, Office of Fossil Energy Headquarters; Daniel Cicero, PhD., U.S. Department of Energy, National Energy Technology Laboratory; and Edward Schmetz and John Winslow, Leonardo Technologies, Inc., USA.....323*

**Rheological Study of Coal Liquids Derived from Direct Coal Liquefaction**

*Qiujing Yang, Sharon Falcone Miller, and Bruce G. Miller, The EMS Energy Institute, Pennsylvania State University, USA. ....333*

**Coal-To-Liquid Processes for Production of Transportation Fuels, Carbons, and Coal-Based Pitch**

*Caroline E. Burgess Clifford, Ömer Gül, Josefa Griffith, Parvana Aksoy, Gareth Mitchell, Maria Escallón, Utaiporn Suriapraphadilok, M. Solomon Nyathi, Jingwen Zhang and Harold H. Schobert, Pennsylvania State University, The EMS Energy Institute USA.....343*

**Pressurized Oxy-Fuel for Advanced Coal to Liquids Power Plant**

*Alex G. Fassbender, P.E. and Robert S. Henry, ThermoEnergy Power Systems, LLC, USA.....355*

**Advanced Materials**

*Stanley J. Vecchi, B&W Research Center, The Babcock & Wilcox Company*

**Materials for Advanced Ultra Supercritical Fossil Plant**

*R. Viswanathan and J. Shingledecker, Electric Power Research Institute; J. Hawk, GE; and M. Santella, Oak Ridge National Lab, USA.....367*

**Update on the Fireside Corrosion Resistance of Proposed Advanced Ultrasupercritical Superheater and Reheater Materials: Laboratory and Field Test Results**

*Michael Gagliano, Ph.D., Horst Hack and Greg Stanko, Foster Wheeler North America Corp., USA.....379*

**Corrosion Tests of MA956 ODS Tube Specimens**

*Archie Robertson , Michael Gagliano, Horst Hack, and Greg Stanko, Foster Wheeler North America Corp., USA.....391*

**Elimination of Fissures in Thick Section Inconel Alloy 740 Welds**

*John M Sanders and John A Siefert, The Babcock and Wilcox Co.; and Brian Baker and Ronald Gollihue, Special Metals Corp., USA.....399*

**Refractory Wear During Gasification**

*Larry Baxter, Brigham Young University, USA.....411*

**Hydrogen Production from Opportunity Fuels**

*Dr. Yen Nguyen, Advanced Technologies Solutions*

**A Fundamental Study on the Hydrogen Production through Coal Gasification**

*Dong Kyoon Seo, Sun Ki Lee and Jeongho Hwang, Mechanical Engineering Department, Yonsei University; Won Yang, High Temperature Processing R&D Department, Korea Institute of Industrial Technology; and Jong Min Lee, and Jae Sung Kim, High Temperature Processing R&D Department, Korea Institute of Industrial Technology, KOREA.....423*

**Effective Utilization of Hydrogen Membranes for CO<sub>2</sub> Capture**

*Doug S. Jack, Carl R. Evenson IV, David H. Anderson, Richard Mackay, and Jesse Taylor, Eltron Research & Development Inc., USA.....433*

**Alternative Hydrogen Carriers: Higher Alcohols from Coal-Derived Syngas**

*James J Spivey, A. Egbebi, N. Subramanian, M. Gupta, and N. Kumar; Cain Dept. Chemical Engineering, Louisiana State University; James G. Goodwin, Jr., and Xenhua Mo, Dept. Chemical and Biomolecular Engineering, Clemson University; and Steve Overbury, and V. Schwarz, Oak Ridge National Laboratory, USA.....435*

**Pyrolysis and Gasification of Biomass and Low Grade Fuels**

*A. K. Gupta and I. I. Ahmed, University of Maryland, Dept. of Mechanical Engineering, USA.....437*

**Production of Hydrogen at Elevated Temperatures from Texas Lignite**

*Joshua J. Stanislawski, University of North Dakota Energy & Environmental Research Center, USA.....447*

**Mercury Abatement Options for Power Plants**

*Giselle Sherman, Corning, Inc.*

**Full Scale Evaluation of Mercury Re-emission in Wet Flue Gas Desulfurization Systems**

*Chung-li Wu, Yan Cao and Wei-Ping Pan, Institute for Combustion Science and Environmental Technology (ICSET), Western Kentucky University, USA.....449*

## Carbon Capture & Storage II

*Prof.-Dr. Klaus R.G. Hein, University of Stuttgart*

### **Development of CFB Technology to Provide Flexible Air/Oxy Operation for a Power Plant with CCS**

*Toni Pikkarainen, Timo Leino and Antti Tourunen, VTT Technical Research Centre of Finland; and Reijo Kuivalainen, Foster Wheeler Energia Oy, FINLAND.....527*

### **Proposal for New CO<sub>2</sub> Capture IGCC System**

*Yoshinobu Nakao, Central Research Institute of Electric Power Industry, JAPAN.....539*

### **The DECARBit Project- Enabling Technologies for Pre-Combustion CCS Power Plants**

*Nils A. Røkke and Nils Erland Haugen, SINTEF Energy Research, NORWAY.....551*

### **The Research Activities on Carbon Capture and Storage in Southeast University, China**

*Changsui Zhao, Xiaoping Chen, Laihong Shen, Rui Xiao, Lunbo Duan, Yingjie Li, Chuanwen Zhao, and Qilei Song, School of Energy and Environment, Southeast University, PEOPLE'S REPUBLIC OF CHINA.....565*

### **Gas Separation Membranes for CO<sub>2</sub>- free Power Plants**

*L. Singheiser, T. Markus, R.W. Steinbrech, and W.A. Meulenber, Forschungszentrum Jülich GmbH, Institute for Energy Research, GERMANY.....577*

### **Incorporation of Catalytic Dehydrogenation into Fischer-Tropsch Synthesis of Liquid Fuels to Minimize Carbon Dioxide Emissions**

*Gerald P. Huffman, Consortium for Fossil Fuel Science and Department of Chemical & Materials Engineering, University of Kentucky, USA.....579*

## Carbon Capture & Storage III

*Hamid Sarv, The Babcock & Wilcox Company*

### **The Partnership for CO<sub>2</sub> Capture**

*Brandon M. Pavlish and Scott G. Tolbert, Energy & Environmental Research Center, USA.....583*

### **Investigation of a Synthetic Brown Coal Material for the Purpose of CO<sub>2</sub> Sequestration in Deep Coal Seams**

*J. Dileeka and P. G. Ranjith, Monash University; and S. K. Choi, CSIRO, AUSTRALIA.....585*

### **Effects of Temperature and Pressure on CO<sub>2</sub> Capture Using Nanoparticle Ionic Materials**

*Ah-Hyung Alissa Park, Lenfest Junior Professor in Applied Climate Science and Associate Director of the Lenfest Center for Sustainable Energy, and Kunyi Andrew Lin, Department of Earth and Environmental Engineering and Lenfest Center for Sustainable Energy, Columbia University, USA.....587*

### **CO<sub>2</sub> Abatement Supply Curves for Coal Fired Power Plants**

*Gary L. Leatherman, Ph.D. and Ralph Braccio, Booz Allen Hamilton, USA.....589*

## **Update on EPA Research and Regulatory GS Activities**

*Bruce J. Kobelski, Geologist/GS Team Leader, Underground Injection Control Program  
– USEPA Office of Ground Water and Drinking Water, USA.....591*

## **VOLUME II of II**

### **Advanced Modeling**

*Dr. Edmundo Vasquez, Combustion Components Associates*

#### **Mechanisms of Coal Secondary Pyrolysis and Soot Formation**

*Dong Zeng, Shengteng Hu and Alan N. Sayre, Babcock & Wilcox Power Generation  
Group, Inc.; and Thomas H. Fletcher, Brigham Young University, USA.....593*

#### **Fouling Evaluation of a PC-Fired Boiler Using a Comprehensive CFD Ash Prediction Tool**

*Dr. Zhanhua Ma, Felicia Iman and Dr. Pisi Lu, RMT, Inc.; and Fran Mara, Columbia  
Energy Center, WP&L, USA.....605*

#### **Temporally and Spatially Resolved Calculations of a Reacting Coal Jet Using Large Eddy Simulations (LES) and Direct Quadrature Method of Moments (DQMOM)**

*Jeremy N. Thornock, Charles Reid, and Philip J. Smith, University of Utah, USA.....617*

#### **Technologies for the Efficient Design and Operation of Coal Gasification Processes**

*Chai Bhat and Paul Talley, Aspen Technology, Inc., USA.....629*

#### **Alternate Methods for Computing NO<sub>x</sub> and CO Emissions for Fossil Fired Boilers**

*T. Eldredge, E. Vasquez and S. Jangiti, Combustion Components Associates,  
USA.....635*

#### **Validation and Uncertainty Quantification of Coal Devolatilization Models**

*Julien Pedel, Jeremy Thornock, and Philip Smith, University of Utah, USA.....647*

### **Advanced Concepts for Emissions Control**

*Dr. Yiannis Levendis, Northeastern University*

#### **Electrostatic Precipitation of Powdered Activated Carbon and Implications for Secondary Mercury Adsorption within ESPs**

*Vinit Prabhu and Herek L. Cluck, Department of Mechanical, Materials, and Aerospace  
Engineering, Illinois Institute of Technology, USA.....671*

#### **Artificial Neural Networks Applications in Energy Control Systems**

*Janusz Lichota, Wroclaw University of Technology, POLAND.....683*

#### **Research on the Effect of Flow Field on Mercury Removal Efficiency in Flue Gas in Multiphase Flow Reactor**

*Jiang Wu, Minqiang Shen, Weiguo Pan, Jianxing Ren, Ping He, Wenhuan Wang, Yun Jin,  
Xuefeng Leng, Xinye Wang, Yanhua Zhu, Zhen Yang, Aichen Wang, Guitong Gao, Liqun  
Lin, and Xuyuan Yu, School of Energy and Environmental Engineering, Shanghai  
University of Electric Power, PEOPLE'S REPUBLIC OF CHINA.....695*

**Research on the effect of NH<sub>4</sub>Cl addition on Mercury and NO in the Flue Gas**

*Weiguo Pan, Jiang Wu, Wenhuan Wang, Ping He, Xuefeng Leng, Minqiang Shen, Yuying Du, Baihan Liu, Shanghai University of Electric Power, PEOPLE'S REPUBLIC OF CHINA.....701*

**A Physical Coal Upgrading Process and Its Impact on NO<sub>x</sub> Emissions**

*Kevin Davis and Hong-Shig Shim, Reaction Engineering International; Stan Harding, N.S. Harding & Associates; and Rafic Minkara, Headwaters Energy Services, USA...703*

**Cryogenic CO<sub>2</sub> Capture to Control Climate Change Emissions**

*Larry Baxter and Andrew Baxter (and Sustainable Energy Technologies), and Stephanie Burt, Brigham Young University, USA.....705*

**Radiative Properties of Biomass and Coal Deposits in Particulate and Slag Forms**

*Richard Reid, Joseph Hoskisson and Larry Baxter, Brigham Young University, USA.....719*

**Gasification Technology I**

*Bruce C. Folkedahl, University of North Dakota Energy & Environmental Research Center*

**Underground Coal Gasification with CO<sub>2</sub> Capture and Sequestration as an Alternative Source of Hydrogen for Oil Sands Upgrading: An Alberta/Canada Scenario**

*Surindar Singh, Dzung Nguyen, P. Eng., and Dr. Eddy Isaacs, Alberta Energy Research Institute, CANADA.....731*

**Steam Gasification of Woody Biomass in a Fluidized Bed for F-T Synthesis**

*Jae Hun Song, Yeon Kyung Sung, In Hwan Choi, Hyo Je Jung, Tae U Yu, and Uen Do Lee, Korea Institute of Industrial Technology, KOREA.....743*

**Feasibility of Hybrid Coal Gasification Units for Combined Heat and Power**

*Donald L. Bonk, National Energy Technology Laboratory, U.S. Department of Energy; and Michael J. De Feo, P.E., Steven W. O'Neill, and Richard E. Weinstein, P.E., WorleyParsons Group, Inc., USA.....751*

**HydroMax: Results and Status of DOE/NETL Pilot Demonstration Project**

*Phillip Brown, Michael Sarin, Diversified Energy; Tom Weyand and Dale Nickels, Pittsburgh Mineral and Environmental Technology, USA.....763*

**Fischer-Tropsch Catalyst Testing in a Continuous Bench-Scale Coal Gasification System: Design and Early Results**

*Joshua R. Strege, Michael L. Swanson, Bruce C. Folkedahl, Jason D. Laumb, and Joshua J. Stanislawski, University of North Dakota Energy & Environmental Research Center, USA.....765*

**Gasification Technology II**

*Bruce C. Folkedahl, University of North Dakota Energy & Environmental Research Center*

**Sorbents for Removing Trace Metal Contaminants from Coal-Derived Synthesis Gas**

*Gokhan Alptekin, Margarita Dubovik and Bob Amalfitano, TDA Research, Inc., USA.....767*

**The Relationship Between Fuel Composition and Pyrolysis Kinetics**

*Laura C. Bradley, and Sharon Falcone Miller, Earth and Mineral Sciences Energy Institute, The Pennsylvania State University, USA.....769*

**Lignite Gasification Testing at the Power Systems Development Facility**

*Johnny Dorminey, John Northington, Roxann Leonard and Ruth Ann Yongue, Southern Company Services, Power Systems Development Facility, USA.....781*

**Fluidized Bed Gasification of Mediterranean Agricultural Residues: Effect of Pre-Treatments on the Gas Composition and Tar Production**

*Dr. S. Arvelakis and Professor E. G. Koukios, Laboratory of Organic and Environmental Technologies, National Technical University of Athens, GREECE; and Assistant Prof. Truls Liliedahl and Associate Prof. Krister Sjoström, Royal Institute of Technology, Department of Chemical Technology, SWEDEN.....793*

**Physio-Chemical Properties of Low Rank Coal/Liquid CO<sub>2</sub> Slurries as Gasifier Feedstocks**

*John P Dooher, Adelphi University/Dooher Institute of Physics and Energy; Marco J. Castaldi and Heide Buttermann/Earth & Environmental Engineering Department (HKSM)/Columbia University; and Jeffrey N. Phillips, Electric Power Research Institute, USA.....805*

**Co-pyrolysis Characteristics of Low Rank Coals with Hybrid Poplar**

*H. Haykiri-Acma and S. Yaman, Istanbul Technical University, Chemical and Metallurgical Engineering Faculty, Chemical Engineering Department, TURKEY.....817*

**Biomass USA**

*Dr. John Dooher, Adelphi University*

**Fuel Selection for Cofiring Biomass in Pulverized Coal and Cyclone Fired Boilers**

*David A. Tillman and Dao N.B. Duong, Foster Wheeler NA, USA.....825*

**Comparative Emission Yields from Combustion of Beds of Various Solid Fuels**

*Yiannis A. Levendis, Mechanical and Industrial Engineering, Northeastern University, USA.....835*

**Emission Control and Combustion Optimization in Wood Stokers**

*E. R. Vasquez, R.G. Broderick, T. Eldredge and S. Jangiti, Combustion Components Associates; H. Dodge, B. Gagne and M. Driscoll, Bethlehem Power Station; B. Joubert, R. Rutter and R. Dowd, Tamworth Power Station; and D. Stacey, J. Stowers and Jim Henslee, GDF SUEZ Energy Generation North America, USA.....847*

**Principles of Burner Design for Biomass Co-Firing**

*Brad Moulton, PE, Foster Wheeler North America Corp, USA.....859*

**Chlorine Issues with Biomass Cofiring in Pulverized Coal Boilers: Sources, Reactions, and Consequences – A Literature Review**

*Dao N.B. Duong and David A. Tillman, Foster Wheeler NA, USA.....871*

## **Biomass Europe I**

*Prof.-Dr. Klaus R.G. Hein, University of Stuttgart*

### **Biomass for Power Production in Denmark**

*Bo Sander, DONG Energy Power, DENMARK.....885*

### **From Lab-Scale Tests to Full Scale Operation - Liquid Biofuels Combustion in PC Boiler of 200MW Unit H**

*H. Kruczek, and Włodzimierz Rydz, Wrocław University of Technology; and Jarosław Zuwała, Institute for Chemical Processing of Coal, POLAND.....893*

### **Coal and Biomass in High Efficiency Utilities**

*M.P. de Jong, S. van Rijen, and R. Meijer, KEMA, THE NETHERLANDS.....903*

### **Foster Wheeler References and Tools for Biomass- and Waste-Fired CFBs**

*Edgardo Coda Zabetta, Vesna Barišić, Foster Wheeler – R&D Department, FINLAND; and Brad Moulton Foster Wheeler – Power Group International, USA.....915*

### **Evaluation of the Impact of Co-Combustion on Ash Utilization, Fouling, and Corrosion by Large Scale Co-Firing of SRF in a CFB Boiler**

*Aaron Fuller, Alexander Gerhardt, Jörg Maier, and G. Scheffknecht, Institute of Process Engineering and Power Plant Technology, Department of Power Plant Technology, Universität Stuttgart. GERMANY.....917*

### **Prediction of Slagging and Fouling with Enhanced Biomass Co-Firing in Dutch Utility Boilers**

*Arthur Stam, KEMA; and Gerrit Brem, University of Twente, Faculty of Engineering, Laboratory of Thermal Engineering, THE NETHERLANDS.....929*

## **Biomass II**

*Prof.-Dr. Klaus R.G. Hein, University of Stuttgart*

### **The Application of the Dedicated Milling Concept for 100% Wood Firing at Atikokan Generating Station**

*Les Marshall and Denym Burlock, Ontario Power Generation; and Daryl Gaudry, Atikokan GS, CANADA.....939*

### **Biomass Co-Firing Experience in the Netherlands with the Focus on Slagging and Fouling**

*M.K. Cieplik, T.J. Zagórski, J.Kalivodová and W.L. van de Kamp, Energy research Centre of the Netherlands (ECN), THE NETHERLANDS.....953*

### **Danish Experiences on Waste Incineration on Grates vs. Coal-SRF Co-Firing in Suspension**

*Flemming J. Frandsen, Anne J. Pedersen, Hao Wu, and Peter Glarborg, Dept. of Chemical and Biochemical Engineering, Technical University of Denmark, DENMARK.....955*

### **Effects of Biomass Co-Firing on Speciation and Availability of Trace Elements**

*R.J. van Eijk, and A.F. Stam, KEMA, and M.K. Cieplik, ECN, THE NETHERLANDS.....967*

**Release to the Gas Phase of Inorganic Metals, S and Cl from Waste Fractions During Combustion**  
*A. J. Pedersen, S. van Lith, F. J. Frandsen, S. D. Steinsen, and L. B. Holgersen, Department of Chemical and Biochemical Engineering, Technical University of Denmark, DENMARK.....***979**

**A Thermogravimetric Analysis on Effects of Municipal Solid Waste Blending on Combustion Characteristics of Different Rank Coal**  
*Marisamy Muthuraman and Tomoaki Namioka, Department of Environmental Science and Technology and Kunio Yoshikawa, Frontier Collaborative Research Center, Tokyo Institute of Technology, JAPAN.....***989**

#### **Low NO<sub>x</sub> Technology**

*Alan Paschedag, Siemens Energy, Inc. and J. J. Letcavits, American Electric Power*

**TDF<sup>®</sup> Low NO<sub>x</sub> Burner and Windbox Modifications for Emissions Control on a TURBO<sup>®</sup> Furnace**  
*Bonnie Courtemanche, P.E., Qingsheng Lin, and Meagan L. Healy, Riley Power Inc.; and Duane L. Hill, Dairyland Power, USA.....***997**

**Dynamic Stability of Lean Premixed Gas Turbine Combustors Operating on Coal-Derived Syngas Fuels**  
*Lorenzo Figura, Jong Guen Lee and Bryan D. Quay and Domenic A. Santavicca, Pennsylvania State University, USA.....***1,007**

**Oxygen-Enriched Combustion of a Powder River Basin Black Thunder Coal for NO<sub>x</sub> Reduction in a Cyclone Furnace**  
*Hamid Sarv, Zumao Chen, Alan N. Sayre, and Gerald J. Maringo, The Babcock & Wilcox Company; and Rajani Varagani and Susie Levesque, American Air Liquide, USA.....***1,019**

**Reducing NO<sub>x</sub> Emissions on Riley Turbo<sup>®</sup> Furnaces -- Latest Results and Experiences**  
*Craig Penterson, Bonnie Courtemanche, P.E., and Vlad Zarnescu, Ph.D, Riley Power Inc., USA.....***1,031**

**Selective Use of Oxygen and In-Furnace Combustion Techniques for NO<sub>x</sub> Reduction in a Wall-Fired Pulverized Coal Burning Pilot Boiler**  
*Hamid Sarv, Alan N. Sayre, and Gerald J. Maringo, The Babcock & Wilcox Company; and Rajani Varagani and Susie Levesque, American Air Liquide, USA.....***1,043**

**Recent Field Experiences with the Mark III Opti-Flow<sup>™</sup> Low NO<sub>x</sub> Burner in Minimizing Unburned Carbon and NO<sub>x</sub>**  
*Jiefeng Shan PhD, Nathan Hart, George Schiazza, Mark Linideman and Joel Vatsky, Siemens Environmental Systems & Services, USA.....***1,055**

#### **Computer Simulations**

*Dr. Edmundo Vasquez, Combustion Components Associates*

**Simulation of Oxy-Coal Combustion in Sub-Grid Scale with One-Dimensional Turbulence Model**  
*Yuxin Wu, Department of Thermal Engineering, Tsinghua University, PEOPLE'S REPUBLIC OF CHINA; and Philip J. Smith, and Jeremy N. Thornock, Institute for Clean and Secure Energy, University of Utah, USA.....***1,073**

- A Computational Submodel for Prediction of Soot From Pulverized Coal Combustion**  
*Alan N. Sayre, Dong Zeng, Shengteng Hu and Hamid Sarv, Babcock & Wilcox Power Generation Group, Inc., USA.....1,085*
- Evaluation of Furnace Nose Arch Modifications to Reduce Slag Formation on a 695 MW Utility Boiler Firing PRB Coal**  
*Vlad Zarnescu, Ph.D. and Mark Lewis, Riley Power Inc., USA.....1,097*
- Development of a Simulation Program for Mercury Behavior in Flue Gas Treatment System of Coal-Fired Power Plants**  
*Noriyuki Imada, Motoomi Iwatsuki, Hirofumi Kikkawa, Nobuo Morimoto, and Hisayuki Orita and Kure Research Laboratory, Babcock-Hitachi K.K., Masaaki Mukaide, Power & Industrial Systems R&D Laboratory, Hitachi, Ltd. Power Systems, JAPAN.....1,109*
- Multi Emissions Control**  
*Bruce Clements, CanmetENERGY*
- Oxidative Desulfurization of Diesel Fuel Catalyzed by Phosphomolybdic Acid Mixed with Quaternary Ammonium Salt**  
*Jianghua Qiu, Guanghui Wang, Danlin Zeng, College of Chemical Engineering and Technology, and Meng Wang and Yanjun Li, College of Chemistry and Molecular Science, Wuhan University of Science and Technology. PEOPLE'S REPUBLIC OF CHINA.....1,121*
- Dynawave/Membrane WESP- A Low Cost Technology for Reducing SO<sub>2</sub>, SO<sub>3</sub>, Hg<sup>+2</sup>, and Particulate from Coal-fired Power Plants**  
*Hardik Shah and John Caine, Southern Environmental, Inc.; and Steven F. Meyer and Andrea Trapet, MECS, Inc., USA.....1,129*
- Multi-Pollutant Emissions Control from Coal Combustion with Oil Shale**  
*Dr. Khalid Omar, Dr. Philip Martin, and Dr. Vijay Sethi, Western Research Institute; Dr. Robert Carrington, RAC Consulting Services. Dr. Richard Boardman, Idaho National Laboratory; and Dr. Brian Higgins and Guisu Lu, Nalco Mobotec, USA.....1,141*
- The Research on Preparation of Iron-oxide Desulfurizer from Steel-making Waste Dust**  
*Danlin Zeng, Guanghui Wang, Dingqiang Hu, Jianghua Qiu, Yongshen Tian, Yi Hu and Lei Tan, College of Chemical Engineering and Technology, Hubei Key Laboratory of Coal Conversion and New Carbon Material, Wuhan University of Science and Technology. PEOPLE'S REPUBLIC OF CHINA.....1,157*
- Application of Commercial Sensor Manufacturing Methods for NO<sub>x</sub>/NH<sub>3</sub> Mixed Potential Sensors for Emissions Control**  
*Eric L. Brosha, Rangachary Mukundan, Mark Nelson, Praveen Sekhar, Todd Williamson and Fernando H. Garzon, Los Alamos National Laboratory, Sensors and Electrochemical Devices Group, USA.....1,167*

## Chemical Looping

*Bartev Sakadjian, The Babcock & Wilcox Company*

### **Alstom's Calcium Oxide Chemical Looping Combustion Coal Power Technology Development**

*Herbert E. Andrus, Jr., John H. Chiu, and Paul R. Thibeault, Power Plant Laboratories, ALSTOM Power Inc., USA; and Andreas Brautsch, ALSTOM Ltd., SWITZERLAND.....1,179*

### **Syngas Chemical Looping Process for Hydrogen Production: Bench Demonstration and Process Simulation**

*Fanxing Li, Deepak Sridhar, Andrew Tong, Hyung Kim, Liang Zeng, Fei Wang, and L. - S. Fan, Department of Chemical and Biomolecular Engineering, the Ohio State University, USA.....1,191*

### **Development Status of Metal Oxides Chemical Looping Process for Coal-Fired Power Plants**

*Corinne Beal and Laurent Maghdissian, Alstom Power Boilers SA, FRANCE; and Andreas Brautsch, ALSTOM Ltd., SWITZERLAND.....1,203*

### **Tailored Synthesis of Precipitated Magnesium Carbonates and Iron-based Chemical Looping Sorbents during Carbon Mineral Sequestration**

*Ah-Hyung Alissa Park, Lenfest Junior Professor in Applied Climate Science and Associate Director of the Lenfest Center for Sustainable Energy and Huangjing Zhao, Department of Earth and Environmental Engineering and Lenfest Center for Sustainable Energy, Columbia University, USA.....1,211*

### **Coal Direct Chemical Looping (CDCL) Process for Hydrogen and Power Generation**

*Fanxing Li, Hyung Kim, Deepak Sridhar, Liang Zeng, Fei Wang, Andrew Tong, and L. - S. Fan, Department of Chemical and Biomolecular Engineering, The Ohio State University, USA.....1,213*

## Options for Improving Efficiency and Reducing Emissions

*Dr. Nenad Sarunac, Energy Research Center, Lehigh University*

### **Preliminary Results on the Characterization of Coal and Coal Combustion Products (CCP's) from a Western Power Plant Utilizing Powder River Basin Coal from the Wyodak-Anderson Coal Zone**

*Ronald H. Affolter, Michael Brownfield, Ricardo Olea, William Betterton, and Margaret Ellis, U.S. Geological Survey, USA.....1,223*

### **Generation Efficiency Improvement – No Regret Pathway to Immediate Reduction in CO<sub>2</sub> Emissions**

*Nenad Sarunac, PhD., Energy Research Center, Lehigh University, USA.....1,235*

### **Database and Model of Coal-fired Power Plants in the United States for Examination of the Costs of Retrofitting with CO<sub>2</sub> Capture Technology**

*Phil Dipietro and Chris Nichols, National Energy Technology Laboratory, U.S. Department of Energy; Jeffrey Eppink and Michael Marquis, Enegis, LLC; and Lynn Manfredo, Research and Development Solutions, LLC, USA.....1,247*

**Potential Water Vapor Recovery Rates and Heat Rate Reductions Resulting from Condensation of Water Vapor in Boiler Flue Gas**

*E. K. Levy, C. Whitcombe, I. Laurenzi, and H. Bilirgen, Energy Research Center, Lehigh University, USA.....I,261*

**Effect of Ultrasonic Irradiation on the Electrolysis of Coal**

*Xiaoxong Xin and Gerardine G. Botte, Department of Chemical Engineering, Russ College of Engineering and Technology, Ohio University, USA.....I,273*

**A Simple Burner Retrofit Opacity Solution for High Aspect Ratio Furnaces**

*Jonathan D. Regele, Prabhat Naredi, and Majed Toqan, Creative Power Solutions Inc., USA.....I,275*
