

# **2010 Eighth ACIS International Conference on Software Engineering Research, Management and Applications**

**(SERA 2010)**

**Montreal, QC, Canada  
24 – 26 May 2010**

**IEEE Catalog Number: CFP10386-PRT  
ISBN: 978-1-4244-7336-6**

# 2010 Eighth ACIS International Conference on Software Engineering Research, Management and Applications

## *SERA 2010*

# Table of Contents

<b>Message from Conference Chairs</b> .....	ix
<b>Message from Program Chairs</b> .....	x
<b>Conference Organizers</b> .....	xi
<b>International Program Committee</b> .....	xii
<b>Reviewers</b> .....	xiv
<b>Keynotes</b> .....	xvi
<b>Design Exhibition</b> .....	xviii

---

### **Artificial Intelligence**

Autonomic View of Query Optimizers in Database Management Systems .....	3
<i>Basit Raza, Abdul Mateen, Muhammad Sher, Mian Muhammad Awais, and Tauqeer Hussain</i>	

### **Communication Systems and Networks**

Access List Based VLAN Map Architecture and Modified 802.1q Frame Scheme for Addressing VTP Issues .....	11
<i>Hartinder Singh Johal</i>	
Cross Engine Database Joining .....	19
<i>Wesley Leonard and Paul Albee</i>	

### **Computer & Software Engineering**

Adopting an RIA-Based Tool for Supporting Assessment, Implementation and Learning in Software Process Improvement under the NMX-I-059/02-NYCE-2005 Standard in Small Software Enterprises .....	29
<i>I. Garcia, C. Pacheco, and D. Cruz</i>	
An Empirical Study of Fan-In and Fan-Out in Java OSS .....	36
<i>E. Nasser, S. Counsell, and E. Tempero</i>	

Representing Unique Stakeholder Perspectives in BPM Notations .....	42
<i>Carlos Monsalve, Alain April, and Alain Abran</i>	
Toward a Business Model for Software Product Line Architecture .....	50
<i>Mohammad Tanhaei, Shahrouz Moaven, Jafar Habibi, and Hamed Ahmadi</i>	
<b>Economic and Financial Systems</b>	
A New Algorithm Based on Incentive Design in E-commerce Systems .....	59
<i>Koki Murakata and Tokuro Matsuo</i>	
Implementation of a Suggested E-commerce Model Based on SET Protocol .....	67
<i>Xuan Zhang, Qinlong Huang, and Peng Peng</i>	
<b>Formal Methods and Tools</b>	
An Operational Semantics for ASSL .....	77
<i>Emil Vassev</i>	
Multi-perspective Software Process Modeling .....	85
<i>Noureddine Kerzazi and Pierre-n Robillard</i>	
On Formal Modeling of TOPPERS Embedded Software .....	93
<i>Yoshinobu Kawabe, Nobuhiro Ito, and Naohiro Ishii</i>	
Using the General Intensional Programming System (GIPSY) for Evaluation of Higher-Order Intensional Logic (HOIL) Expressions .....	101
<i>Serguei A. Mokhov and Joey Paquet</i>	
<b>Information Systems Engineering</b>	
Flexible Flow Shop Scheduling by Intelligent Multi-agents .....	113
<i>Wei Weng and Shigeru Fujimura</i>	
Managing Semantics Knowledge for 3D Architectural Reconstruction of Building Objects .....	121
<i>Yucong Duan, Christophe Cruz, and Christophe Nicolle</i>	
The Software Modeling and Implementation of Reliable Server Pooling and RSPLIB .....	129
<i>Xing Zhou, Thomas Dreibholz, Martin Becke, Jobin Pulinthanath, Erwin P. Rathgeb, and Wencai Du</i>	
Towards a Pattern-Based Framework for Goal-Driven Business Process Modeling .....	137
<i>Saeed Ahmadi Behnam, Daniel Amyot, and Gunter Mussbacher</i>	
<b>Modeling with UML</b>	
Extending the UML Metamodel to Provide Support for Crosscutting Concerns .....	149
<i>Zohreh Sharafi, Parisa Mirshams, Abdelwahab Hamou-Lhadj, and Constantinos Constantinides</i>	

Object-Oriented Intensional Programming: Intensional Java/Lucid Classes .....	158
<i>Aihua Wu, Joey Paquet, and Serguei A. Mokhov</i>	
<b>Parallel and Distributed Computing</b>	
L-SYNC: Larger Degree Clustering Based Time-Synchronisation for Wireless Sensor Network .....	171
<i>Masoume Jabbarifar, Alireza Shameli Sendi, Hosein Pedram, Mahdi Dehghan, and Michel Dagenais</i>	
<b>Process Management &amp; Improvement</b>	
Functional Requirement Improvements through Size Measurement: A Case Study with Inexperienced Measurers .....	181
<i>Sylvie Trudel and Alain Abran</i>	
Process Patterns for MDA-Based Software Development .....	190
<i>Mohsen Asadi, Naeem Esfahani, and Raman Ramsin</i>	
Applying the Psychometric Theory to Questionnaire-Based Appraisals for Software Process Improvement .....	198
<i>Ivan Garcia, Carla Pacheco, and Gabriel Andrade</i>	
<b>Re-engineering, Reverse Engineering</b>	
An Approach for Detecting Execution Phases of a System for the Purpose of Program Comprehension .....	207
<i>Heidar Pirzadeh, Akanksha Agarwal, and Abdelwahab Hamou-Lhadj</i>	
<b>Requirements Engineering</b>	
A Generic Model for the Specification of Software Interface Requirements and Measurement of Their Functional Size .....	217
<i>Khalid T. Al-Sarayreh and Alain Abran</i>	
Automated Generation of Use Case Descriptions from Problem Frames .....	223
<i>Ali Fatolahi, Stéphane S. Somé, and Timothy C. Lethbridge</i>	
How Do Real Options Concepts Fit in Agile Requirements Engineering? .....	231
<i>Zornitza Racheva and Maya Daneva</i>	
Investigation of the Capability of XP to Support the Requirements of ISO 9001 Software Process Certification .....	239
<i>Malik Qasaimeh and Alain Abran</i>	
Requirements Management Tool with Evolving Traceability for Heterogeneous Artifacts in the Entire Life Cycle .....	248
<i>Youngki Hong, Minho Kim, and Sang-Woong Lee</i>	

## Software Architecture

Advances in the Design and Implementation of a Multi-tier Architecture in the GIPSY Environment with Java .....	259
<i>Bin Han, Serguei A. Mokhov, and Joey Paquet</i>	

## Software Estimation

Applying a Feedforward Neural Network for Predicting Software Development Effort of Short-Scale Projects .....	269
<i>Ivica Kalichanin-Balich and Cuauhtemoc Lopez-Martin</i>	
Experimental Study Using Functional Size Measurement in Building Estimation Models for Software Project Size .....	276
<i>Nelly Condori-Fernandez, Maya Daneva, Luigi Buglione, and Olga Ormanjieva</i>	

## Software Process Models

Process Improvement Based on Causal Networks .....	285
<i>R. Dumke, K. Richter, K. Georgieva, and E. Asfoura</i>	

## Software Reuse and Metrics

Cryptolysis: A Framework for Verification of Optimization Heuristics for the Automated Cryptanalysis of Classical Ciphers and Natural Language Word Segmentation .....	295
<i>Serguei A. Mokhov</i>	
Service-Oriented Measurement Infrastructure .....	303
<i>H. Yazbek, R. Dumke, A. Schmietendorf, and R. Neumann</i>	

## Software Testing Techniques

Modeling and Validating Requirements Using Executable Contracts and Scenarios .....	311
<i>Dave Arnold, Jean-Pierre Corriveau, and Wei Shi</i>	
Techniques for Quantitative Analysis of Software Quality throughout the SDLC: The SWEBOK Guide Coverage .....	321
<i>Manar Abu Talib, Adel Khelifi, Alain Abran, and Olga Ormandjieva</i>	
Towards Automated Monitoring and Forecasting of Probabilistic Quality Properties in Open Source Software (OSS): A Striking Hybrid Approach .....	329
<i>Reza Meimandi Parizi and Abdul Azim Abdul Ghani</i>	

## Web Engineering, Web-Based Applications

Privacy Protection Mechanisms for Web Service Technology .....	337
<i>Diego Garcia, David S. Allison, Miriam Capretz, and M. Beatriz F. Toledo</i>	

<b>Author Index</b> .....	345
---------------------------	-----
