2010 Third International Joint Conference on Computational Science and Optimization

(CSO 2010)

Huangshan, Anhui, China
28 – 31 May 2010

Volume 1
Pages 1-545

IEEE Catalog Number: CFP1050G-PRT
ISBN: 978-1-4244-6812-6

2010 Third International Joint Conference on Computational Science and Optimization

CSO 2010

Table of Contents

Volume - 1

Message from the General Co-Chairs and Program Co-Chairs - Volume 1 xv
CSO 2010 Organizing Committee - Volume 1 xvii
CSO 2010 Program Committees - Volume 1 xviii
CSO 2010 External Reviewers - Volume 1 xxi
Message from the IWHGA 2010 Workshop Chair - Volume 1 xxiii
IWHGA 2010 Workshop Committee - Volume 1 xxiv
Message from the IIP 2010 Workshop Chairs - Volume 1 xxv
IIP 2010 Organizing Committee - Volume 1 xxvi
Message from the ICMA 2010 Workshop Chairs - Volume 1 xxvii
ICMA 2010 Workshop Committee - Volume 1 xxviii
Message from the CTS 2010 Workshop Chairs - Volume 1 xxix
CTS 2010 Workshop Committee - Volume 1 xxx
Keynote Addresses - Volume 1 xxxi

Numerical Algorithm and Analysis

A Sufficiency and Necessity Condition on Convergence of Ishikawa Iterative Process for Asymptotically Pseudocontractive Mapping 3
Hongshan Du and Guanglan Wang
The TSVD Method for Numerical Differentiation of 2D Functions 7
Zhenyu Zhao and Chuan Yue

Numerical Methods for Solving Energy Equations of Dilatant Fluid Flow 11
Botong Li, Liancun Zheng, and Xinxin Zhang
A New Passive Sonar Bearing Estimation Algorithm Combined with Blind Source Separation 15
Wentao Fan, Xinhua Zhang, and Biao Jiang
Data Fusion Algorithm for Measurement of Multiple Equipments on Maritime Mobile Tracking Stations 19
Xiaoyong Li, Zhonghua Zhang, Lei Yang, Guiming Chen, and Jubo Zhu
Crashworthiness Design of Frontal Rail Using Strain-Energy-Density and Topology Optimization Approach 24
Tao Xu, Yiwen Li, Qiang Li, Liang Hao, and Wenjun Song
Interpolation and Numerical Integration of the Septuple Supported Spline Wavelet 29
Zhongshe Gao and Yonghong Shen
Stochastic Vehicle Routing Problem with Uncertain Demand and Travel Time and Simultaneous Pickups and Deliveries 32
Lingjuan Hou and Hong Zhou
Study on Weight Function of Meshless Method Based on B-spline Wavelet Function 36
Tao Xu, Peng Zou, Tianshuang Xu, and Chenmeng Jiye
Meshless Virtual Boundary Least-Square Collocation Method for 2-D Elastic Problems 41
Zhijia Zhang and Qiang Xu
A Self-Adaptive Trust Region Algorithm with Line Search Technique 46
Wenjuan Wu, Lanping Chen, and Baocong Jiao
Foreign Currency Option Pricing with Both Fixed and Proportional Transaction Costs 52
Wenli Huang and Shonghong Li
A Comparative Study of the DGTD Algorithm and the FVTD Algorithm in Computational Electromagnetics 56
Cong Deng, Wenlu Yin, Shunlian Chai, and Junjie Mao
On the Analysis of Performance of the Artificial Tribe Algorithm 60
Tanggong Chen, Xiaowei Wei, Wenhui Jia, and Zhi Liu
An Exact Fast Algorithm for Minimum Hitting Set 64
Lei Shi and Xuan Cai
Dynamic Analysis of Tall-Pier Aqueduct Using ODE Solver 68
Shaowei Hu, Ri You, Zhiguo Niu, and Jun Lu
General Solution of Queueing Model with Batch Renewal Arrival by Two Approaches 73
Wei Li, Rod J. Fretwell, and Demetres D. Kouvatsos

An Improved Method for Depicting Workspace Boundary of Planar Robot Manipulator 77
Yi Cao and Huanfeng Li

Computational Simulation and Analysis

Denoising Mutation of FPRGA Based on Wavelet Decomposition 81
Mingyi Cui and Wei Cui
A Fuzzy Method for Signal Smoothing 85
Wenjing Yang and Yuanguo Zhu
SSCM-Based Simulation of Stock Market: Put Bounded Rational into Social and Stock Environment 90
Nan Lin, Xiaochao Ding, and Zheng Qin
Analysis of Transient Electromagnetic Field Coupling to Shielded Twisted-Pairs 95
Chao Liu, Lixin Wang, and Gang Zhang
Nonlinear Numerical Simulation to Thermo-elastic-plastic Creep Constitutive Equation for Concrete Subjected to Fire 99
Zhenqing Wang, Dalei Zhu, Mu Qiao, and Yulai Han
CFD Simulation on Dense Gas-Solid Flow for Blast Furnace Slag Waste Heat Recovery 103
Fang Liu, Jianxiang Guo, Baojin Yang, and Chang Liu
Dynamic Relocating Vehicle Resources Using a Microscopic Traffic Simulation Model for Carsharing Services 108
Hao Wang, Ruey (Kelvin) Cheu, and Der-Horng Lee
Fuzzy Fatigue Reliability Analysis for a Landing Gear Structure 112
Hong Wang, CaiJun Xue, and WenTao Jiang
Framework for Simulation of Quantized Virtual Society Based on Semantic P2P Network 116
Lican Huang

Hybrid and Combined Computational Methods

Application of Bayesian Network Knowledge Reasoning Based on CBR in ITS 123
Jihong Ding, Huazhong Liu, and Anyuan Deng
Amoeba-Based Knowledge Discovery System 128
Toshinori Munakata, Masashi Aono, and Masahiko Hara
A Nonmonotone Conjugate Gradient Method for Nonlinear Optimization 132
Ying Song and Liying Liu
Retail Location Decision-Making Based on the Combination of AHP and Entropy Weight 136
Tao Li and Lian She

Complex Systems Modeling and Simulation

Scaling in Different Dynamic Regimes of a Multi-agent Stock Market Model 143
Tongkui Yu
Fluctuation in a Multi-region Economic Network 147
Hong Fan
A CA Model for HIV Transmission among Intravenous Drug Users 151
Jian Qiao, Feng Zhao, and Bo Shao
A Multi-dimensional Micro-benchmark for Performance Study and Prediction 156
Hongzhang Shan and Erich Strohmaier
Stability Analysis of Pedestrian Flow and Phase Structure in the Improved Two-Dimensional OV Models 161
Haiou Li, Xiaomei Zhao, and Dongfan Xie
A Belief Comparison Matrix and its Integration Method for AHP with Incomplete Information 166
Hongtao Zhang, Weidong Zhu, Yong Wu, and Hui Wang
An Implementation of an Optimum-Time Firing Squad Synchronization Algorithm on Two-Dimensional Arrays 170
Kinuo Nishide, Takuya Yamawaki, and Hiroshi Umeo
A Construction of Number-Conserving Firing Squad Synchronization Algorithm on One-Dimensional Arrays 172
Katsuhide Suzuki and Hiroshi Umeo

Possibility Theory and Markov Models

Option Valuation under a Multivariate Markov Chain Model 177
Na Song, Wai-Ki Ching, Tak-Kuen Siu, Eric S. Fung, and Michael K. Ng
The Approximate Distribution of Nonparametric Regression Estimates 182
Jifu Nong
The Simple Deterministic Equivalents of Fuzzy Random Inequality Based on Chance Measure 186
Hui Wang, Hongtao Zhang, and Zhixiang Yin
Recursions for Moments of n-fold Convolutions 191
Jifu Nong

Computational Mathematics

Generalized (Alpha, Beta)-Fuzzy Interior Ideals in Semigroups 197
Zuhua Liao, Miaohan Hu, Min Chen, Lihua Yi, Mingli Rui, Jinhua Lu, and Chunzhi Liu
A Stabilized Finite Element Method for Darcy-Stokes Problems 201
Yumei Chen
Parameter Identification Method for Ship Swaying Motion Differential Equations 205
Zhonghua Zhang, Xiaoyong Li, Lei Yang, Guiming Chen, and Yi Wu

A Two-Parameter Family of Combined Iterative Methods for Solving Nonlinear Equations 209
Xueliang Zheng and Shuping Chen
On the Max-geometric Mean Powers of a Fuzzy Matrix 213
Chia-Cheng Liu, Yung-Yih Lur, and Yan-Kuen Wu
A New Two Level Difference Scheme for Solving One-Dimensional Second-Order Hyperbolic Equations 218
Tang-Wei Liu, Li-Bin Liu, He-Hua Xu, and Li-Hua Le
A Fast Fingerprint Image Enhancement Method 222
Keming Mao, Zhiliang Zhu, and Huiyan Jiang

Computational Biology

Support Vector Machine Methods for the Prediction of Cancer Growth 229
Xi Chen, Wai-Ki Ching, Kiyoko F. Aoki-Kinoshita, and Koh Furuta
Missing Data Analysis of St. Louis Risk Research Data 233
Xue Zhao
A Clustering System for Gene Expression Data Based upon Genetic Programming and the HS-Model 238
Guiquan Liu, Xiufang Jiang, and Lingyun Wen
Meta-analysis and Network Analysis of Five Ovarian Cancer Gene Expression Dataset 242
Hua Dong, Shengjun Hong, Xiaomin Xu, Yanghua Xiao, Li Jin, and Momiao Xiong

Computational Graphics

A New Contour Tracing Algorithm in Eight-Connected Binary Images 249
Ding Sun and Yan Liu
Representing Railway Wheel Profile Using Quadratic NURBS 254
Xiaofang Liu, Qingfu He, and Yongjun Liu

Computational Engineering

Numerical Analysis on Chaotic Performance of Concrete Material Using Nonlinear Dynamical Equation 261
Ning Liu
Control Strategy for Four-Wheel Steering Vehicle Handling Stability Based on Partial Decoupling Design 265
Bin Yang, Maosong Wan, and Qinghong Sun
The Secondary Flow of the Flow of the Second-Order Fluid having Variable Coefficients in Annulus with the Inner Cylinder Executing a Planetary Motion 268
Shuyun Zhang and Haiqing Cui
A Lightweight Currency-Based P2P VoD Incentive Mechanism 272
Chi Wang, Hongbo Wang, Yu Lin, and Shanzhi Chen

Computational Intelligence

Adaptive Time-Frequency Parameterization of Frequency-Hopping Signals Based on Evolutionary Algorithm 279
Jiantao Guo

Dynamic Parameter Selection Based on Trigonometric Function in Particle Swarm Optimization 283
Wenxue Zhang, Tieke Li, and Cantao Shi

Swarm Intelligence Algorithm Based on Orthogonal Optimization 287
Yongxian Li and Jiazhong Li

Robust Sensor Placement Problem in Municipal Water Networks 291
Xin Ma, Yuantao Song, Jun Huang, and Jun Wu

Biogeography-Based Optimization for the Traveling Salesman Problems 295
Ying Song, Min Liu, and Zheng Wang

A Note on Synchronization Steps in Firing Squad Synchronization Problem 300
Akira Nomura, Jean-Baptiste Yunès, and Hiroshi Umeo

Asymmetric Verification of Business Cycle by Forecasting Turning Points Based on Neural Networks 302
Dabin Zhang and Haibin Xie

Computational Statistics and Computational Mechanics

Nonparametric Methods and Weekend Effect: New Evidence from the Shanghai Stock Market 309
Jincheng He and Lingxiao Tang

The Impact of Memory on Travelers' Behaviour and the Evolution of Transportation System 313
Wenxiang Wu

Convexity and Optimization of Set-Valued Mapping in Vector Space 317
Xiuhong Liu

A New Static Reanalysis Method of Topological Modifications with Added Degrees of Freedom 321
Tao Xu, Huen Wai Kai, Fei Cheng, Guikai Guo, and Tatsuo Yoshino

Scientific and Engineering Computing

The Reliability Analysis of Reinforced Concrete Beams under High Temperature 327
Zhenqing Wang, Mu Qiao, Dalei Zhu, and Yulai Han

A New Method for Computing Contact Angle of High Speed Ball Bearing 331
Chunli Lei, Zhiyuan Rui, Jun Liu, Ruicheng Feng, and Juntian Zhao

Experimental and Numerical Analyses of Electromagnetic Attenuation Properties of an L-Shaped Channel Constructed by Electromagnetic Absorbing Concrete 335
Liuhong Huang and Shijing Ding
Homotopy Method for a Class of Fixed-Point Problems 339
Jiawei Tan, Jia Chen, and Qinghuai Liu
Workflow-Based High Performance Data Transfer and Ingestion to Support Petascale Simulations on TeraGrid 343
Jun Zhou, Yifeng Cui, Sashka Davis, Clark C. Guest, and Philip Maechling
Seesaw: Performance Guarantee for RAID Reconstruction 348
Junping Liu, Ke Zhou, Zhikun Wang, Liping Pang, and Dan Feng

Parallel and Distributed Computing

An Effective Technique to Reduce Querying Routing Table for Mesh-based Network-on-Chip 355
Minghua Tang and Xiaola Lin
An Algorithm for Assigning Tasks in Parallel Computing 360
Yang Rui and Zhang Xinyu
Transactional Memory Consistency: A New Consistency Model for Distributed Transactional Memory 364
Xuping Tu, Xuepeng Fan, Hai Jin, Long Zheng, and Xin Peng
A Dynamic Adjustment Mechanism with Heuristic for Thread Pool in Middleware 369
Ning-jiang Chen and Pan Lin
Parallel Viewshed Analysis on GPU Using CUDA 373
Yingjie Xia, Yang Li, and Xingmin Shi

Cluster Computing and Internet Computing

Proactive Failure Management for High Availability Computing in Computer Clusters 377
Ziming Zhang and Song Fu
Compression of Inverted Index for Comprehensive Performance Evaluation in Lucene 382
Xianghua Xu, Shengyi Pan, and Jian Wan
Item Type Based Collaborative Algorithm 387
Zhengwu Wang, Xinwei Wang, and Haifeng Qian
A Secure Virtual Verification Model for Wireless Sensor Network 391
Yang Li, Yingjie Xia, and Guo-hua Zhan

Granular Computing and Soft Computing

A Binary Particle Swarm Optimization for Structural Topology Optimization 395
Guan-Chun Luh and Chun-Yi Lin
A Novel Clone Selection Algorithm and its Application for Three Dimension Bin Packing Problem of Web Mode 400
Jian-hua Li, Hui Chen, and Lina Ren
Improved Particle Swarm Optimization Algorithm Based on Random Perturbations 404
Xiao Xiao, Congli Mei, and Guohai Liu
Solving Facility Layout Problem via Particle Swarm Optimization 409
Shunichi Ohmori, Kazuho Yoshimoto, and Kenshu Ogawa

Kernel-Based Computing and SVM

Grid Resources Prediction with Support Vector Regression and Particle Swarm Optimization 417
Guosheng Hu, Liang Hu, Hongwei Li, Kun Li, and Wei Liu
Morphological Component Analysis Based Hybrid Approach for Prediction of Crude Oil Price 423
Kaijian He, Kin Keung Lai, and Jerome Yen

Neural Computing and Social Computing

Development of Repetitively Enhanced Neural Networks (RENN) for Efficient Missile Design and Optimization 431
Nhu-Van Nguyen, Kwon-Su Jeon, Jae-Woo Lee, and Yung-Hwan Byun
A Fast Algorithm for Finding Community Structure Based on Community Closeness 436
Xiufang Jiang, Guiquan Liu, and Zhiting Lin
Improved BM Pattern Matching Algorithm for Intrusion Detection 440
Qingzhang Chen, Yibo Niu, Zhehu Wang, and Feng Du

Data Mining and KDD

A Fast Bidirectional Method for Mining Maximal Frequent Itemsets 447
Chao Wang, Zhi-wei Ni, and Jun-fen Guo
Relief Demand Forecasting in Emergency Logistics Based on Tolerance Model 451
Zhi-Hua Hu
Data-Adaptive Clustering Analysis for Online Botnet Detection 456
Xiaocong Yu, Xiaomei Dong, Ge Yu, Yuhai Qin, and Dejun Yue
Language Detection with GMM Optimization Using Neural Networks 461
Ali Shadmand and Khalil Monfaredi

A k-Means-Based Projected Clustering Algorithm 466
Yufen Sun, Gang Liu, and Kun Xu

Signal and Image Processing

A PET Bottle Mouth Detection Method Based on Morphologic 473
Zhenhan Lv, Liqun Lin, Taisong Jin, and Yuan Li
A New Image Segmentation Method Based on Grey Graph Cut 477
Miao Ma, Jiao He, Hualei Guo, and Hongpeng Tian
The Research of Pulse Wave Signal Denosing Based on EMD and ICA 482
Yingying Zheng, Yongliang Zhang, and Yanli Liu
The Projective Invariants of Six 3D Points from Three 2D Uncalibrated Images 486
Yuanbin Wang, Bin Zhang, and Fenghua Hou
Perceived Depth Assessment from Noised Stereo Images 488
Chaohui Lü, Lili Xu, Hui Wang, and Hui Ren

Heuristic and Meta-Heuristic Methods

Hybrid Heuristics for Vehicle Routing Problem with Fuzzy Demands 493
Changshi Liu and Fuhua Huang
An Effective Method for Complete Visual Coverage Path Planning 497
Jie Li, Changwen Zheng, and Xiaohui Hu
Engineering Optimization Using Modified Binary Differential Evolution Algorithm 501
Chun-Yin Wu and Ko-Ying Tseng

Economics and Finance Modeling

Assessing the Internal Fraud Risk of Chinese Commercial Banks 509
Lijun Gao and Linjie Sun
A Weak-Form Efficiency Testing of China's Stock Markets 514
Xianming Wen, Kexi Li, and Lin Liang
Analysis on the Volatility of SHIBOR 518
Qi Yang and Xiaofeng Zhang
A Method for Price Limits Setting in Futures Market 522
Yong Xue, Ju-e Guo, and Dong Xue
An Investment Decision-Making Research Based on Mothballing Option 526
Bo Gao, Ju-e Guo, and Guoxing Zhang
Risk Analysis with Investment in Uncertain Environments 530
Qingfeng Song, Wansheng Tang, and Ruiqing Zhao
Reset Put Option Pricing with Transaction Costs 535
Jiangang Shen, Chuan Qin, Zhe Chen, and Shenghong Li

Author Index - Volume 1 541

2010 Third International Joint Conference on Computational Science and Optimization

(CSO 2010)

Huangshan, Anhui, China
28 – 31 May 2010

Volume 2
Pages 1-543

ISBN: 978-1-4244-6812-6

2010 Third International Joint Conference on Computational Science and Optimization

CSO 2010

Table of Contents

Volume - 2

Message from the General Co-Chairs and Program Co-Chairs - Volume 2 xv
CSO 2010 Organizing Committee - Volume 2 xvii
CSO 2010 Program Committees - Volume 2 xviii
CSO 2010 External Reviewers - Volume 2 xxi
Message from the IWHGA 2010 Workshop Chair - Volume 2 xxiii
IWHGA 2010 Workshop Committee - Volume 2 xxiv
Message from the IIP 2010 Workshop Chairs - Volume 2 xxv
IIP 2010 Organizing Committee - Volume 2 xxvi
Message from the ICMA 2010 Workshop Chairs - Volume 2 xxvii
ICMA 2010 Workshop Committe - Volume 2 xxviii
Message from the CTS 2010 Workshop Chairs - Volume 2 xxix
CTS 2010 Workshop Committee - Volume 2 xxx
Keynote Addresses - Volume 2 xxxi

Linear and Nonlinear Programming

A Parametric Method for Solving Continuous-Time Linear Fractional Programming Problems 3
Ching-Feng Wen and Hsien-Chung Wu
Duality for Multiobjective Optimization Involving Extended (F, alpha, rho, d)-type I Functions 8
Guolin Yu

Epsilon-Optimality Conditions for a Class of F epsilon-G Convex Fractional Semi-infinite Programming 13
Yong Yang
Sufficiency and Duality in Nonsmooth Multiobjective Programming with Generalized Dini Convextiy 16
Guolin Yu
The Complexity Analysis of an Efficient Interior-Point Algorithm for Linear Optimization 21
Liying Liu and Liya Fan
Self-Dual Embedding for SDP Using ELSD and its Lagrangian Dual 25
Qinghong Zhang, Gang Chen, and Ting Zhang
A Global Optimization Method for the Nonlinear Sum of Ratios Problem 30
Zhongmin Fang and Zhiya Chen
Improved Discrete Time Model for Container Yard Crane Scheduling 34
Zhi-Hua Hu
A New Conjugate Gradient Trust Region Method and its Convergence 38
Yueting Yang, Wenyu Li, and Jing Gao
A New Switching Algorithm Based on Modified Quasi-Newton Updates 42
Xiaowei Jiang, Yunlong Lu, and Yueting Yang
A Modified BFGS Trust Region Method 46
Yunlong Lu, Xiaowei Jiang, and Yueting Yang
A Smoothing Method of the Square-root Exact Penalty Function for Inequality Constrained Optimization 50
Sanming Liu, Zhijie Wang, and Enmin Feng
Global Minimum of Measure Function and Quasi-convex Function 54
Zhong Chen, Cai-Yun Liu, and Yi-Bing Lv
Primal-Dual Interior-Point Methods for Second-Order Cone Complementarity Based on a New Class of Kernel Function 57
Xue-mei Yang, Hua-li Zhao, and Guo-ling Hu
A Modified Feasible SSLE Algorithm for Nonlinearly Constrained Optimization 61
Zhijun Luo, Guohua Chen, and Zhibin Zhu
A New Parameter-Free Filled Function for Unconstrained Global Optimization 65
Youlin Shang, Pu Li, and Hailing Xie
A New Hybrid PRP-DY Conjugate Gradient Method 70
Junli Dong and Baocong Jiao

Stochastic Programming and Convex Programming

A Distributed Coevolutionary Multidisciplinary Design Optimization Algorithm 77
Yonggang Xing and Shuo Tang
Emergency Distribution for Multiple Disaster Points with Time Independent Relief Request 81
Zhi-Hua Hu
The Combined Homotopy Method for Solving a Class of Programming Problems with a Bounded Feasible Set 85
Xiuyu Wang, Taishan Yang, Xingwu Jiang, and Qinghuai Liu
On Marginal Subgradients of Convex Functions 90
Roxin Zhang
Evaluation of 3D Reinforcement Corrosion Shape in Concrete Based on Observed Temperature on Concrete Surface 94
Takahiko Kurahashi and Hideki Oshita
Numerical Solution of a Kind of Boundary Inverse Problem for Parabolic Equation 99
Zhousheng Ruan and Hai Sun

Nonsmooth Programming and Multiobjective Programming

Trust Region Secant/Finite Difference Method for Large Sparse Minimax Problems 105
Junxiang Li, Jiazhen Huo, and Limei Dou
A New Smooth Method for the l1 Exact Penalty Function for Inequality Constrained Optimization 110
Zhijie Wang and Sanming Liu

Game Theory

The Revenue Share Allocation Decision for the Retailer under Consignment Contract with Revenue Sharing and Asymmetry of Manufacturing Cost 117
Dan Li and Jiafu Tang
Optimal Pricing of a Two-Echelon Distribution System Considering Retailers' Different Competitive Behaviors 121
Na Zhao
Equilibrium Analysis of the Observable Queue with Balking and Delayed Repairs 125
Feng Zhang and Jinting Wang
A Finitely Repeated Bayesian Game with Hidden Markovian States 130
Wen He and Jinwu Gao

Fuzzy Optimization

Fuzzy Probability Theory-Based Optimization Scheme for Deep Foundation Pit of Metro 137
Zhangjun Liu, Yaolong Lei, and Min Xiong
One Simple Procedure to Finding the Best Approximate Solution for a Particular Fuzzy Relational Equation with Max-min Composition 141
Yak-Kuen Wu, Chia-Cheng Liu, Yung-Yih Lur, and Sy-Ming Guu
Characteristic Functions of Fuzzy Random Variables 145
Lixing Yang and Jinwu Gao

Global and Robust Optimization

Optimal Parameter Estimation for Muskingum Model Using a Modified Particle Swarm Algorithm 153
Wenchuan Wang, Yingbin Kang, and Lin Qiu
Election Campaign Algorithm for Multimodal Function Optimization 157
Wenge Lv, Qinghua Xie, Zhiyong Liu, Xiangwei Zhang, Shaoming Luo, and Siyuan Cheng
DEM Construction from Contour Lines Based on Regional Optimum Control 162
Dunjiang Song, Tianxiang Yue, and Zhengping Du
An Approach to Determining Internal Forces of a Walking Mechanism Using Multilayer Perceptron Neural Network 166
Jun Han, Yubao Zhang, Gaojie Chen, Jixin Feng, Haibo Jin, and Depin Gao

Combinatorial Optimization

The Wide Diameter of Folded Hypercube 173
Hongmei Liu
Makespan Minimization for Two Parallel Machines Scheduling with a Periodic Availability Constraint: The Preemptive Offline Version 177
Dehua Xu and Meng Qu
Single-Machine Scheduling Problems with Past-Sequence-Dependent Setup Times and Deterioration Jobs 182
Yunqiang Yin, Zhousheng Ruan, and Hai Sun
Single-Machine Scheduling Problems with General Learning Effects and Deterioration Jobs 186
Yunqiang Yin, Hai Sun, and Zhousheng Ruan
Problem Reduction Graph Model for Discrete Optimization Problems 190
Yujun Zheng and Jinyun Xue

Finance and Industrial Optimization

The Measurement Model for Enterprise Informationization Capability Maturity 197
Yiping Yang, Hui Ma, Li Dai, and Eli Zhang
A New Finding for Board Size Effects 203
Jun Xie
Optimization of Ultra High Pressure Preparation Parameters of Ursolic Acid: Beta-Cyclodextrin Inclusion Compound by Orthogonal Array Designs 207
Wei Zong, Yanhong Bai, and Rongchen Miao
Three-Part-Pricing Model for Digital Content when the Supply is Limited 211
Chengxiong Zhou, Lanxiang Zhao, and Zhuojun Liu
How to Increase the Supplier Profits under the VMI Model 216
Jingmon Zhang and Yongsheng Zhou
Empirically Analyzing the Necessity of EICMM Ranking by Clustering 219
Hui Ma, Yiping Yang, Yan Zhu, and Mingxia Zhao
A Time-Varying Structural VAR Method for the Effects of Oil Shocks on US Dollars 225
Wei Sun, Zhongying Qi, and Niannian Jia

Managerial and Engineering Optimization

Structural Fatigue Life Optimization Based on Metamodels 233
YaQuan Deng, CaiJun Xue, and Yuan Xu
The Interval DEA Model with Preference and its Application in Vendor Selection 238
Rui Ding and Yan Chen
An Optimal Best Practice Selection Approach 242
Yan Xu and Chung-Hsing Yeh
Multi-objective Model and Heuristic Algorithm of Slab Designing Problem for the Integrated Steel Production 247
Wenxue Zhang, Tieke Li, and Cantao Shi
Application of AHP/DEA to Facility Layout Selection 252
Zhenhua Gao, Kazuho Yoshimoto, and Shunichi Ohmori
Current Status Analysis and Countermeasures on Supervising Informatization of Chinese Construction Enterprises 255
Lianbo Zhu and Lin Wang
Parameters and Schemes Selection in the Optimization of the Fragment-Type Tag Antenna 259
Zusheng Jin, Hu Yang, Xingji Tang, and Junjie Mao
Pricing the Cost of Dredging Engineering Based on the Dynamic Game 263
Bin Zhou and Zi Gang Zhang

An Iterative Strategy for Yield Optimization of Metabolic Pathways 268
Gongxian Xu

IWHGA: HPC and Grid Applications

A Simulation-Based Study on Spurious Timeouts and Fast Retransmits of TCP in Wireless Networks 273
Mi-Young Park and Sang-Hwa Chung
VectorSTM: Software Transactional Memory without Atomic Instructions 278
Lin Peng, Lun-guo Xie, Xiao-qiang Zhang, and Xin-yan Xie
Dynamic Fair Cache Partitioning for Chip Multiprocessor 283
Juan Fang and Jiang Pu
Design and Realization of an Optimized Memory Access Scheduler 288
Li Luo, Hongjun He, Chunke Liao, Qiang Dou, and Weixia Xu
An Efficient Approach for Reducing Power Consumption in a Production-Run Cluster 293
Chin-Hung Li, Shuen-Tai Wang, Hsi-Ya Chang, and Cherng-Yeu Shen
A Parallel Bulk Loading Algorithm for M-tree on Multi-core CPUs 300
Chu Qiu, Yongquan Lu, Pengdong Gao, Jintao Wang, and Rui Lv
MPI+OpenMP Implementation and Results Analysis of Matrix Multiplication Based on Rowwise and Columnwise Block-Striped Decomposition of the Matrices 304
Lidong He, Weichang Shen, Yongjin Li, Anlei Shi, and Dong Zhao
Parallel Sorting by Approximate Splitting for Multi-core Processors 308
Wei Wu, Pin Wu, Weilie Shang, and Youtong Fang
Matrix Description on Cryphographic Properties of Plateaued Functions 312
Xiaojian Luo and Bin Hu
Self-Acting Load Balancing with Parallel Sub File Migration for Parallel File System 317
Bin Dong, Xiuqiao Li, Limin Xiao, Li Ruan, and Binbin Yu
Simple Orchestration Application Framework to Control “Burning Plasma Integrated Code” 322
Takayuki Tatekawa, Kohei Nakajima, Naoya Teshima, Guehee Kim, Yoshio Suzuki, Hiroshi Takemiya, Nobuhiko Hayashi, and Katsuyuki Iba
Using Condor Glideins for Distributed Testing of Network Facing Services 327
Igor Sfiligoi, Frank Würthwein, and Christopher Theissen
Task Scheduling of Computational Grid Based on Particle Swarm Algorithm 332
Hui Li, Lifeng Wang, and Jianhong Liu
An Optimization Algorithm for Wireless Sensor Networks Localization Using Multiplier Method 337
Caixia Li, Yuanjie Li, Yu Shen, Linlang Liu, and Qiying Cao

Real Time Biomedical Data Streaming Platform (RIMES): A Data-Intensive Virtual Environment 342
Kejun Dong, Kai Nan, Sameer Tilak, Cindy Zheng, Dong Xu, Jurgen Schulze, Peter Arzberger, and Wilfred Li
Massive Spatial Data Processing Model Based on Cloud Computing Model 347
Dong Cui, Yunlong Wu, and Qiang Zhang
Research on Spatial Data Interoperability in Spatial DATA Grid Environment 351
Qidong Yin, Qi Li, and Xi Wu

IIP: Intelligent Information Processing

An Evolutionary Clustering Algorithm Based on Adaptive Fuzzy Weighted Sum Validity Function 357
Hongbin Dong, Wei Hou, and Guisheng Yin
A Dynamic Weighted Sum Validity Function for Fuzzy Clustering with an Adaptive Differential Evolution Algorithm 362
Zhi-Feng Wu and Hou-Kuan Huang
Selection of the Suitable Neighborhood Size Based on Bayesian Information Criterion 367
Chao Shao and Bin Zhang
(F, epsilon)-Parallel Reducts in a Series of Decision Subsystems 372
Dayong Deng
The Naïve Bayesian Classifier Learning Algorithm Based on Adaboost and Parameter Expectations 377
Hongbo Shi and Xiaoyong Lv
Subtopic-based Multi-documents Summarization 382
Shu Gong, Youli Qu, and Shengfeng Tian
Novel Access Control Scheme with User Authentication Using Smart Cards 387
Chen Yang, Zhengtao Jiang, and Jianjun Yang
A Group Trust Model with Control Flow Constraint Based on Bayesian Method 390
Gui-ping Dai, Yong Wang, Zheng-tao Jiang, and Ya-rong Hou
Analysis of Response Factors in Intrusion Response Decision-Making 395
Chengpo Mu, Bing Shuai, and Haifeng Liu
Efficiently CCA Secure HIBE Schemes under Double Models with Constant Ciphersize 400
Zheng-tao Jiang, Yong-bin Wang, Wen Liu, and Chen Yang
Improved SVM Algorithm and its Application in Media Information Security System 405
Wenqian Shang, Tong Wang, and Hongbin Dong
A Neural Network Based Intrusion Detection Data Fusion Model 410
Wei Gong, Wenlong Fu, and Li Cai

Representation Methods of Reusable Software Components 415
Xichen Wang and Luzi Wang
Trust Cluster Head Election Algorithm Based on Ant Colony Systems 419
Li Yan, Yun Pan, and Jianpeng Zhang
Online Declaration System Based on Web Service 423
Wenyu Bao, Wenqian Shang, Ligu Zhu, and Liu Yang
MDMeter—A New Test Tool for Meta-data Throughput of Parallel File System 427
Xiaoshan Yang, Ligu Zhu, Qiang Li, Wenjun Dai, and Na Ma
A Metadata-based Interoperable Digital Rights Management System Architecture 432
Weiguo Lin, Naishuai Zhang, and Suiyang Liu
Novel Space-Time Processing Method for Airborne SAR to Detect and Image the Slowly Moving Targets 435
Ling Wang, Lugui Zhen, and Yalin Guan
A New Vanishing Point Detection Algorithm Based on Hough Transform 440
Xuehui Chen, Ruiqing Jia, Hui Ren, and Yinbin Zhang
Virtual View Synthesis for Multi-view 3D Display 444
Chaohui Lü, Hui Wang, Hui Ren, and Yinhua Shen
2D Cartoon Character Deformation by Sketch Skeleton 447
Xin Feng and Minyong Shi
Measurement Method of Background Noise in Theatre Based on Stage Machinery 452
Hui Ren, Jingjing Zhang, Wei Jiang, and Zhibin Su
Research on the Total Bondage Number of a Spectial Network 456
Jianxiang Cao, Minyong Shi, and Bin Wu

ICMA: Intelligent Computing in Meteorological Applications

The Effect of Model Input on Forecast Results of the Neural Network Ensemble Model 461
Long Jin, Ying Huang, Hui Yu, Xiaoyan Huang, and Hui Xiao
A Novel Bayesian Additive Regression Trees Ensemble Model Based on Linear Regression and Nonlinear Regression for Torrential Rain Forecasting 466
Jiansheng Wu, Liangyong Huang, and Xiaoming Pan
A Nonlinear Ensemble Prediction Model Based on Genetic Algorithm for Calculation Wind of the Wind Assessment 471
Kai-ping Lin, Xiao-yan Huang, Wei-liang Liang, and Bing-lian Chen
A Prediction of the Monthly Precipitation Model Based on PSO-ANN and its Applications 476
Hua-sheng Zhao, Long Jin, and Xiao-yan Huang

The Short-Range Precipitation Forecasting Method of Neural Network Based on Principal Component Analysis 480
Jifu Nong
Support Vector Regression Based on Particle Swarm Optimization for Rainfall Forecasting 484
Shian Zhao and Lingzhi Wang
Rainfall Forecasting Using Projection Pursuit Regression and Neural Networks 488
Fangqiong Luo and Jiansheng Wu

CTS: Computational Transportation Science

A Network-Based Method for Modeling Pedestrian Evacuation in Indoor Areas 495
Renyong Guo
Evolutionary Analysis on the Dynamical Systems of Travel Behavioral Decision-Making 499
Xingguang Chen, Jing Zhou, Zhuojun Li, and Shouchang Huang
Reliability-Based Marginal Cost Pricing with Stochastic Demand 504
Wei Xu and Qian Wang
Modeling Mixed Continuous and Discrete Corridor Problems with Multimodal Choices 508
Tianliang Liu, Xiaoshan Lu, and Qi Deng
Particle Swarm Optimization Algorithm in Transport Continuous Network Design Problems 513
Meng Xu, Jin Yang, and Ziyou Gao
Simulation of Two-Lane Traffic Flow Considering the Combined Effect of Intersection and Bus Stop 518
Lijun Tian and Haijun Huang
Cellular Automaton Simulation of Emergent Evacuation Considering the Classroom Seats Arrangement 523
Qiong Tian and Yihang Xu
Comparison of Convergence of the Modified and Relaxed Hybrid Steepest-Descent Methods for Variational Inequalities under Different Conditions 527
Haiwen Xu and Qianchuan Zhang
Travel Time Reliability-Based Optimal Path Finding 531
Shuopeng Wang, Hu Shao, Li Tao, and Qinjian Ni
Stochastic-Combination Search Direction Method for Monotone Variational Inequality Problems 535
Hu Shao and Guodong Wang
