2010 33rd International Spring Seminar on Electronics Technology

(ISSE 2010)

Warsaw, Poland
12 - 16 May 2010

Editors:

Johann Nicolics **Ryszard Kisiel**
Manuela Franz

IEEE Catalog Number: **CFP10509-PRT**
ISBN: **978-1-4244-7849-1**

Table of Contents

Polymer Electronics towards System Integration
Detlef Bonfert, Gerhard Klink, and Karlheinz Bock 1

Noise Characteristics of Cold Emission Cathodes
A. Andreev, A.Knapek, L.Grmela and O.Sik 7

Thermomechanical Analysis of a Bulk of Electrically Conductive Adhesive
David Bušek, Ivana Pilarčíková, Pavel Mach 10

Phthalocyanine Layers for Humidity Detection
Petr Kubersky, Ales Hamacek, Tomas Dzugan, Michal Kroupa, Jiri Cengery, Jan Reboun 14

Metallographic Preparation of the SnAgCu Solders for Optical Microscopy and EBSD Investigations
Iuliana Panchenko, Maik Mueller and Klaus–Juergen Wolter 18

Characterization of the Organic Field–Effect Transistor Based on Solution Processed P3HT
Silvan Pretl, Michael Kroupa, Aleš Hamáček, Tomáš Džugan, Jan Řeboun, Jiří Čengery 24

Humidity Influence on Antistatic Properties of Optical Coatings
Michal Mazur, Eugeniusz Prociow, Jaroslaw Domaradzki, Danuta Kaczmarek, Marta Karnicka and Lukasz Bielinski 30

Influence of Neodymium Dopant on TiO_2 Structure
M. Zielinski, D. Wojcieszak, J. Domaradzki, D. Kaczmarek, E. Prociow 35

Stabilization of Organic Materials for Sensors
Jan Řeboun, Aleš Hamáček, Tomáš Džugan, Michael Kroupa 40

Control Unit for Smart Concrete Used as Resistive Heating
Daniel Siroky, Pavel Steffan 45

Influence of Metallographic Preparation on Electron Backscatter Diffraction Characterization of Copper Wire Bonds
Anton Tkachenko, Maik Mueller, Thomas Zerna, Klaus–Juergen Wolter 50

Enhanced Hole Transport in Multilayer Organic Based Devices
Ivaylo Zhivkov, Slavena Bozhilova, Deyan Dimov, Stefan Boyadzhiev, Irena Yordanova, Roumen Yordanov, Tatiana Dobreva, Silvia Dimova and Vesselin Sinigersky 55

The Interface between Different Types of Thick Film Layers
Ivana Beshajová Pelikánová 61

Characterization of Reactive Sputtered ITO and TiO_2/ITO Thin Films for Applications at Elevated Temperatures
Stefan I. Boyadzhiev, Milka M. Rassovska, Yoshihito Matsumura, Yuta Kotani, Rumen S. Yordanov and Irena R. Yordanova 65

Piezoelectric Thick Films on LTCC Substrates
Marko Hrovat, Darko Belavič, Hana Uršič, Jena Cilenšek, Silvo Drnovšek, Janez Holc, Marina Santo Zarnik, Marija Kosec 71

Fabrication of Miniaturized Thick–Film Arms for Thermoelectric Microgenerators
P. Markowski, A. Dziedzic 77

Miniaturization of Thick–Film Resistors by Laser–Shaping
Damian Nowak, Andrzej Dziedzic, Marko Hrovat, Jena Cilenšek 82

Lead–Oxide–Free Copper Thick–Film Paste for Alumina Substrates
Kathrin Reinhardt, Christel Kretzschmar, Lars Rebenklau, Jürgen Schulz–Hader, Andreas Meyer and Christian Marx 87

Permittivity and Conductivity of Various LTCC–Tapes at High Temperature
M. Unger, J. Fleig, M. Ahrens, W. Smetana, G. Radosavljevic 93

PTC Temperature Sensors on Curved LTCC–Layers
Michael Weilguni, Robert Medek, Walter Smetana and Wilfried Kausel 99

Tolerance Design of Curing Process of Electrically Conductive Adhesives
Seba Barto, Pavel Mach 103

Bumping Technologies of Fine–Pitch BGA Components
Réka Bátorfi, Péter Szőke, Zoltán Oláh, Attila Géczy, Miklós Ruszinkó, Zsolt Illyefalvi–Vitéz 107

Solderability Measurement of Copper with Different Surface Finishes
Karel Dušek, Michal Novák, Pavel Mach 113

Package–on–Package – Review on a Promising Packaging Technology
Attila Geczy, Zsolt Illyefalvi–Vitez 117

Metallographic Analysis of Laser Soldered Chip Resistors
Tamás Hurtony, Bálint Balogh, Dániel Pintér, Gyula Lénárt 123

Overview of Materials and Bonding Techniques for Inner Connections in SiC High Power and High Temperature Applications
R. Kisiel, M. Guziewicz, Z. Szczepański, K Król 128

Investigating the Increment of Deposited Solder Paste due to Uneven PCB Surface
Olivér Krammer, László Milán Molnár, László Jakab, and Christian Klein 133

Packaging for Radiation Resistant X–Ray Detectors
Thomas Lohse, Martin Oppermann, René Metasch, Thomas Zerna, Martin Seilmayer, and Klaus–Jürgen Wolter 138

Modification of Adhesive Joints Resistance with Current Pulses
Pavel Mach, David Bušek 143

Influence of Curing Process Parameters on Quality of Electrically Conductive Joints
Seba Barto, Pavel Mach 147

Mechanical Cycling of Isotropic Conductive Adhesives
J. E. Morris, Sini Niiranen, and Toni Mattila 151

Contribution to Realization of 3D Structures
Michal Nicák, Ivan Szendiuch and Josef Šandera 156

The Area of Spread Solderability Test Use for Roughness Influence Assessment
Tomáš Novák, František Steiner 160

Investigation of Wire Bonding Power Interconnection
Marek Novotny, Martin Bursik, Ivan Szendiuch, Edita Hejatkova, Jaroslav Jankovsky 166

Principle of X–Ray Investigation of Solder Alloy
A. Pietriková, and J. Ďurišin 170

Infrared Analysis of Temperature Distribution on the Surface of a Populated PCB
R. Bunea, I. Plotog, P. Svasta, A. Pietriková, and J. Ďurišin 174

Evaluation of Tin Whisker Growth
Podzemsky Jiri, Copjan Martin, Urbanek Jan, and Dusek Karel 179

Investigation of Tin Whiskers Formation
Aneta Arazna, Grazyna Koziol, and Wojciech Steplewski 183

Curing Process Steps Detected Based on Frequency Analysis of Signals
Tomáš Blecha, Josef Pihera 186

Inductive Excited Lock–In Thermography for Electronic Packages and Modules
Johannes Bohm and Klaus–Jürgen Wolter 190

Measurement of Cooler Efficiency
Maritn Bursik, Ivan Szendiuch, Jaroslav Jankovsky, Michal Caska 196

Dendrite Material Identification Method Using Fractal Analysis
Cs. Dominkovics, G. Harsányi 200

Comparison of Dynamic and Static Mechanical Stress Applied on Soldered Joints
Karel Dušek, Michal Urbánek 204

Effects of Test Conditions on Shear Strength of Surface Mount Solder Joints
Endre Harkai, Bálint Balogh and István Latos 208

Electron Transport in Ta Nanolayers: Application to Tantalum Capacitors
Martin Kopecký 212

Virtual Instrumentation Application for Vibration Analysis in Electrical Equipments Testing
Ioan Liță, Daniel Alexandru Vişan, and Ion Bogdan Cioc 216

Packaging and Thermal Analysis of Power Electronics Modules
Lucian Man, Cristian Fărcaş, and Raul Fizeşan 220

Multifunctional LED Lamp Thermal Management
Petko Mashkov, Tamara Pencheva and Berkant Gyoch 226

LEDs' Operation Optimizing for Long Term Lumen Maintenance
Petko Mashkov, Tamara Pencheva and Berkant Gyoch 232

Characterization of the Thermal Impedance of High–Power LED Assembly based on Innovative Printed Circuit Board Technology
Michael Weilguni, Johann Nicolics, Robert Medek, Manuela Franz, Gregor Langer, and Ferdinand Lutschounig 238

Economic Reliability Test Methods of New Soldering Materials
Wojciech Niedzwiedz, Marcin Szwech, Jacek Chmielewski and Zdzislaw Drozd 245

Surface Crack Detection in Ferritic and Austenitic Steel Components Using Inductive Heated Thermography
Matthias Noethen, Klaus–Jürgen Wolter and Norbert Meyendorf 249

8 Channel Configurable Data Logger for Reliability Testing and Quality Assurance
Jánó Rajmond, Dan Pitică 255

Committing of Electronic Modules by Ball Pins and Their Reliability
Olga Švecová, Petr Kosína, Josef Šandera and Martin Adámek 259

A Methodology for Optimization of False Call Rate in Automated Optical Inspection Post Reflow
Radek Soukup....263

Utilization of Exhaust Gas Thermal Energy – Theoretical Investigation
Norbert Stuban, Adam Torok....268

An Electronic System for Measuring the Attack Angle of Railway Wheelsets at a Running in Curves
Dobrinka Atmadzhova....273

Low–Cost Capacitive Sensor for Wells Level Measurement
Vlad Bande, Ioan Ciascai, and Dan Pitica....279

A VLSI Implementation of a CMOS Clock Recovery Circuit Based on Edge Detection
Radu Gabriel Bozomitu, Vlad Cehan....284

An Energy Converter Method for Battery Cell Balancing
Dorin V. Cadar, Dorin M. Petreus and Toma M. Patarau....290

Code Parallelization for Wind Speed Model Generator
Mihail Octavian Cernaianu, Paul Harfas, and Aurel Gontean....294

The Influence of Capacitive Discontinuity in Signal Integrity on PCB Traces
Mihai Daraban and Dan Pitica....299

Modelling and Simulation of an Inductive Displacement Sensor for Mechatronic Systems
Andrei Drumea, Paul Svasta, and Marian Blejan....304

Optimization of Microfluidic Flow Sensors for Different Flow Ranges by FEM Simulation
Ferenc Ender, Hunor Sántha, and Vladimír Székely....308

A Comparison between Digital and Analog Control for a Buck Converter
Radu Etz, Stefan R. Daraban, Dorin M. Petreus and Adina R. Rusu....314

Magnetic Equivalent Circuit Modeling of Rolling Rotor Switched Reluctance Motors
Marco Franke, Oliver Punk, Michael Brutscheck, and Ulrich Schmucker....320

Gas Flow Simulation of a Fluxless Si Solder Bonding Oven
Balázs Illés, Gergely Kristóf, László Jakab, and Miklós Ruszinkó....326

High Frequency Permittivity Determinations for the (PMN–PT)/$BaTiO_3$ Polymer–Ceramic Nanocomposites
Daniela Ionescu and Vlad Cehan....332

Analysis of Planar Inductors on Flexible Substrates for RFID Antennas
Ciprian Ionescu, Paul Svasta, Detlef Bonfert, and Gerhard Klink....338

EDK Implemented Temperature Controller
Ioan Lie, Cristian Ionici, Aurel Gontean, Mihail Cernăianu....344

FE Modeling of Capacitive Pressure Sensors Realized in LTCC Technology
Cristina Marghescu, Ciprian Ionescu, Paul Svasta, Marina Santo Zarnik, and Darko Belavič....350

The Modeling & EM Simulation Assessment as Part of DFX Methodology
B. Mihailescu, I. Plotog, P. Svasta and M. Vladescu....354

The Ontology based FMEA of Lead Free Soldering Process
Martin Molhanec, Pavel Mach, David Asamoah Bamfo Mensah....360

Simulation of Transverse Electron Transport in Resonant Tunneling Diode
Vladimir Moskaliuk, Vladimir Timofeev, and Artem Fediai....365

Electronic System for Measuring Railway Vehicle Wheel Load in Motion
Emil Dimitrov, Nencho Nenov, Toma Ruzhekov 370

Modeling the Light of LED's for Position Detection with an Optical Sensor
Septimiu Pop, Ioan Ciascai, Vlad Bande and Dan Pitica 374

Analysis and Simulation of Power Inverter with Load Variation for Induction Heating Applications
Ovidiu Pop, Adrian Taut 378

Contribution to Modeling of Stressing in Microelectronic Structures
Jiri Pulec, Ivan Szendiuch 383

Modern Device Concepts – Digital Part of a NMR Spectrometer
Oliver Punk, Steffen Döhler, and Uwe Heuert 386

A Demystifying Study of Thermal Relief Pads: Tradeoff between Manufacturing and Cooling
Marius Rangu and Catalin Negrea 390

A Demystifying Study of Trace Thickening: How Does it Affect the Current Carrying Capability
Marius Rangu and Catalin Negrea 396

Reduced Order Modelling for Risk Mitigation in Design of Miniaturised / Integrated Products
Stoyan Stoyanov, Pushpa Rajaguru, Ying Kit Tang, Chris Bailey, James Claverley, Richard Leach 402

Influence of Meso–Scale Analysis Parameters of Cross–Linked Polymers on Final Simulation Results
Sebastian J. Tesarski, Ole Holck, Bartosz T. Platek and Artur Wymyslowski 408

Numerical Analysis of Polymer Cure Kinetics in Isotropic Conductive Adhesives
T. Tilford, J. E. Morris, M. Ferenets, P. R. Rajaguru, S. Pavuluri, M. P. Y. Desmulliez and C. Bailey 412

Small–Signal and Noise Parameters of Heterotransistor with Quantum Dots
Vladimir I. Timofeyev, Elena. M. Faleyeva 417

Electrical Coupled Model for Two Coils Vibrating Wire Transducer
L. Viman and S. Lungu 421

An RFID Tag Simulator Based on the Atmel AT91SAM7S64 Micro–Controller
Dan Tudor Vuza, Sorin Chițu, and Paul Svasta 427

Typical Problems and Solutions in Electrochemical Measurement Cell Development
Attila Bonyár and Gábor Harsányi 433

Life Cycle Aspects of the Environmental Impact of Electrical and Electronic Equipment from the European Point of View
Manuela Franz 439

Filling Volume Sensor for Microfluidic Applications Based on Thermic Transient Effect and Standard PCB Technology
Peter Gross, Ferenc Ender and Hunor Sántha 443

Monitoring Drinking Water Quality and Wireless Transmission of Parameters
Mariana Jurian, and Cristian Panait, Visan Daniel, Cioc Bogdan 448

Reliable System for Measurement and Monitoring of Environmental Parameters
Ioan Liță, Daniel Alexandru Vișan, and Ion Bogdan Cioc 454

Necessity for Teaching of Eco–Design in Electric Engineering Education
I. Szendiuch 458

Wireless Measurement System Based on ZigBee Transmission Technology
Daniel Alexandru Vişan, Ioan Liță, Mariana Jurian and Ion Bogdan Cioc 464

Electronic System for Mass Screening of Toxic Substances in Environment
Jaromir Zak, and Jaromir Hubalek 468

Application of Silver Nanoparticles to Improve Wettability of SnAgCu Solder Paste
Marek Kościelski, Krystyna Bukat, Małgorzata Jakubowska, Anna Młożniak 473

Screen–Printed Electrodes Sensing Properties Enhancement by CNTs Based Nanocompositions
Jan Prasek, and Jiri Policky 478

Evaluating Vapor Phase Soldering for Fine Pitch BGA
Attila Geczy, Reka Batorfi, Laszlo Gal, Zsolt Illyefalvi–Vitez and Peter Szoke 482

Towards an Interactive Knowledge Transfer – The Non–Destructive Evaluation Knowledge–Based System
Oliver Albrecht, Klaus–Jürgen Wolter, and Martin Oppermann 488

Advanced Post–Layout Analysis Laboratory Platform
Norocel Codreanu, Iulian Buşu, Paul Svasta, and Elena Ignat 494

MATLab Platform to Calculate the Transfer Impedance of Power and Ground Planes
Raul T. Fizesan and Dan Pitica 500

Building of Web–Enable Expert System for Solderability Testing
Hujer Tomas, Konarek Zdenek, Novak Tomas, and Steiner Frantisek 506

Electrochemical Transducer Utilizing Nanowires Surface
Radim Hrdy, Marina Vorozhtsova, Jana Drbohlavova, Jan Prasek and Jaromir Hubalek 510

Assist Education Tool for Student's Preparation on Practical Laboratory Exercises
Jan Jirsa, Karel Dušek 515

Encased Manipulation Chamber for Technologic Laboratory
Slavomír Kardoš, Alena Pietriková, Juraj Ďurišin, Martin Kusko 518

Educational Platform for Study of Operational Amplifiers Using Matlab
Serban Lungu, Ovidiu Pop, Adrian Taut 521

Agile Project Management Framework
Martin Molhanec 525

Optical Measurements upon Compact Discs in Education in Optoelectronics
Tamara Pencheva, Berkant Gyoch and Petko Mashkov 531

New Testing Platform – From PC to Personal Laboratory
Mădălina Pitică, Lucian Man 536

An Educational Tool for Transmission Lines Animations
Marius Rangu and Catalin Negrea 542

Application of an Universal Electron Beam System on Research and Further Education
J. Schulze, F. Hübner, M. Steinhauser, R. Bauer, G. Eckart 547
