Table of Contents

<i>Using Sentence Type Information for Syntactic Category Acquisition</i> Stella Frank, Sharon Goldwater and Frank Keller	1
<i>Did Social Networks Shape Language Evolution?</i> <i>A Multi-Agent Cognitive Simulation</i> David Reitter and Christian Lebiere	9
<i>Syntactic Adaptation in Language Comprehension</i> Alex Fine, Ting Qian, T. Florian Jaeger and Robert Jacobs	18
<i>HHMM Parsing with Limited Parallelism</i> Tim Miller and William Schuler	27
<i>The Role of Memory in Superiority Violation Gradience</i> Marisa Ferrara Boston	36
<i>Close = Relevant? The Role of Context in Efficient Language Production</i> Ting Qian and T. Florian Jaeger	45
<i>Predicting Cognitively Salient Modifiers of the Constitutive Parts of Concepts</i> Gerhard Kremer and Marco Baroni	54
<i>Towards a Data-Driven Model of Eye Movement Control in Reading</i> Mattias Nilsson and Joakim Nivre	63
<i>Modeling the Noun Phrase versus Sentence Coordination Ambiguity in Dutch:</i> <i>Evidence from Surprisal Theory</i> Harm Brouwer, Hartmut Fitz and John Hoeks	72
<i>Uncertainty Reduction as a Measure of Cognitive Processing Effort</i> Stefan Frank	81
