

2010 Third International Conference on Dependability

(DEPEND 2010)

**Venice, Italy
18 – 25 June 2010**

**IEEE Catalog Number: CFP1098G-PRT
ISBN: 978-1-4244-7530-8**

2010 Third International Conference on Dependability

DEPEND 2010

Table of Contents

Preface.....	viii
Program Committee.....	x
Reviewers.....	xii

DEPEND 1: Dependability, Adaptability and New Technologies

End-to-End Transfer Rate Adjustment Mechanism for VANET	1
<i>Tomoyuki Ohta, Kazuki Ogasawara, and Yoshiaki Kakuda</i>	
Randomized Consensus in Wireless Environments: A Case Where More is Better	7
<i>Bruno Vavala, Nuno Neves, Henrique Moniz, and Paulo Verissimo</i>	
Software-Implemented Fault Injection at Firmware Level	13
<i>Peter Tröger, Felix Salfner, and Steffen Tschirpke</i>	
A User Requirement-Driven Service Dynamic Personalized QoS Model	17
<i>Yan Gao, Bin Zhang, Shao-wei Shi, Hong-ning Zhu, Jun Na, and Fu-cai Zhou</i>	

DEPEND 2: Dependability Facets I

From Formal Specification in Event-B to Probabilistic Reliability Assessment	24
<i>Anton Tarasyuk, Elena Troubitsyna, and Linas Laibinis</i>	
FTDIS: A Fault Tolerant Dynamic Instruction Scheduling	32
<i>Roza Ghamari and Amir Rajabzadeh</i>	
Dependability of a Network Monitoring Hardware	38
<i>Sándor Plósz, István Moldován, Pál Varga, and László Kántor</i>	
Estimating Reliability of Mobile Agent System for Mobile Ad Hoc Networks	45
<i>Chandreyee Chowdhury and Sarmistha Neogy</i>	

DEPEND 3: Dependability Facets II

Software-Implemented Hardware Error Detection: Costs and Gains	51
<i>Ute Schiffel, André Schmitt, Martin Süßkraut, and Christof Fetzer</i>	
Feature Specific Control Flow Checking in COTS-Based Embedded Systems	58
<i>Amir Rajabzadeh and Seyed Ghassem Miremadi</i>	
Effective Data Dissemination for Large-Scale Complex Critical Infrastructures	64
<i>Christian Esposito, Catello Di Martino, Marcello Cinque, and Domenico Cotroneo</i>	
Performability Comparison of Schedulability Conditions in Real-Time Embedded Systems	70
<i>Mohsen Bashiri and Seyed Ghassem Miremadi</i>	

DEPEND 4: Trust, System Dependability and Security

Advanced Policies for the Administrative Delegation in Federated Environments	76
<i>Manuel Gil Pérez, Gabriel López, Antonio F. Gómez Skarmeta, and Aljosa Pasic</i>	
A Survey on Trust-Based Web Service Provision Approaches	83
<i>Nicola Dragoni</i>	
Enhanced Vulnerability Ontology for Information Risk Assessment and Dependability Management	92
<i>Marco D. Aime and Fabio Guasconi</i>	
An Intrusion Tolerance Approach to Enhance Single Sign on Server Protection	98
<i>David Pham and Arun K. Sood</i>	

DEPEND 5: Dependability Facets III

Towards Dependable Business Processes with Fault-Tolerance Approach	104
<i>Angel Jesus Varela-Vaca, Rafael M. Gasca, Diana Borrego, and Sergio Pozo</i>	
RMAP: A Reliability-Aware Application Mapping for Network-on-Chips	112
<i>Ahmad Patooghy, Hamed Tabkhi, and Seyed Ghassem Miremadi</i>	
System Fault Behavior Model Considering the Effects of Structural Factors and Method of Its Description	118
<i>Zhao Guangyan, Kang Rui, Sun Yufeng, and Zhao Gang</i>	

DEPEND 6: Dependability Facets III and Self-Adaptability

A Computational Approach to Multi-level Analysis of Network Resilience	125
<i>Christian Doerr and Javier Martin Hernandez</i>	
Emergence: A New Source of Failures in Complex Systems	133
<i>Lorenzo Vinerbi, Andrea Bondavalli, and Paolo Lollini</i>	
Coordination and Deployment of Mobile Agents on Dependable Systems	139
<i>Ichiro Satoh</i>	
Improved Adaptation of Web Service Composition Based on Change Impact Probability	146
<i>Jun Na, Yan Gao, Bin Zhang, Li-ping Huang, and Zhi-liang Zhu</i>	

DEPEND 7: Adaptability and Dependability

Definition of Core Requirements and a Reference Architecture for a Dependable, Secure and Adaptive Distributed Monitoring Framework	154
<i>Teemu Kanstrén and Reijo Savola</i>	
Handling Crash and Software Faults Efficiently in Distributed Event Stream Processing	164
<i>Andrey Brito, Stefan Weigert, Martin Süßkraut, Christof Fetzer, and Pascal Felber</i>	
On Modelling and Analysis of Dynamic Reconfiguration of Dependable Real-Time Systems	173
<i>Manuel Mazzara and Anirban Bhattacharyya</i>	
Classification and Impact Analysis of Faults in Automated System Management	182
<i>Barry McLarnon, Philip Robinson, Paul Sage, and Peter Milligan</i>	
Author Index	189
