

2010 IEEE 9th International Conference on Development and Learning

(ICDL 2010)

**Ann Arbor, Michigan, USA
18 – 21 August 2010**

**IEEE Catalog Number: CFP10294-PRT
ISBN: 978-1-4244-6900-0**

Contents

Letter from the Conference Chairs	iv
List of 2010 ICDL Committee Members	v
List of Reviewers	vi
Technical Track Papers	vii
Learning to recognize shapes with a sensory substitution system: a longitudinal study with 4 non-sighted adolescents <i>Katia Rovira, Olivier Gapenne, and Amal Ali Ammar</i>	1
Tactile Guidance for Policy Refinement and Reuse <i>Brenna D. Argall, Eric L. Sauser, and Aude G. Billard</i>	7
kx-trees: An unsupervised learning method for use in developmental agents <i>Brandon Rohrer</i>	13
A Model of the Emergence of Early Imitation Development based on Predictability Preference <i>Takashi Minato, Dale Thomas, Yuichiro Yoshikawa, and Hiroshi Ishiguro</i>	19
A Computational Model for Grounding Words in the Perception of Agents <i>Claudius Gläser and Frank Joublin</i>	26
Recognizing Behaviors and the Internal State of the Participants <i>Wesley Kerr and Paul Cohen</i>	33
Towards the Object Semantic Hierarchy <i>Changhai Xu and Benjamin Kuipers</i>	39
Dealing with uncertain input in word learning <i>Maarten Versteegh, Louis ten Bosch, and Lou Boves</i>	46
Bootstrapping Syntax from Morpho-Phonology <i>Thomas R. Shultz, Vincent G. Berthiaume, and Frédéric Dandurand</i>	52
Using Information Gain to Build Meaningful Decision Forests for Multilabel Classification <i>Kevin Gold and Allison Petrosino</i>	58
Optimality of Human Teachers for Robot Learners <i>Maya Cakmak and Andrea L. Thomaz</i>	64
Learning To Look <i>Nicholas J. Butko and Javier R. Movellan</i>	70
Developing feedback: how children of different age contribute to a tutoring interaction with adults <i>Anna-Lisa Vollmer, Karola Pitsch, Katrin S. Lohan, Jannik Fritsch, Katharina J. Rohlfing, and Britta Wrede</i>	76
A human fetus development simulation: Self-organization of behaviors through tactile sensation <i>Hiroki Mori and Yasuo Kuniyoshi</i>	82
Distribution of Object Types of "Light" and "Heavy" Early-Learned English Verbs <i>Josita Maouene, Aarre Laakso, Mounir Maouene, and Linda B. Smith</i>	88
Evolution of Social Learning Strategies <i>Marcel R. Montrey and Thomas R. Shultz</i>	95

Intrinsically Motivated Information Foraging <i>Ian Fasel, Andrew Wilt, Nassim Mafi, and Clayton T. Morrison</i>	101
Using the Head to Stabilize Action: Reaching by Young Children <i>Hongwei Shen, Thomas J. Baker, T. Rowan Candy, Chen Yu, and Linda B. Smith</i>	108
Joint Attention through the Hands: Investigating the Timing of Object Labeling in Dyadic Social Interaction <i>Martin Rickert, Chen Yu, and Amanda Favata</i>	114
Discovering Sensor Space: Constructing Spatial Embeddings That Explain Sensor Correlations <i>Joseph Modayil</i>	120
The Odd One Out Task: Toward an Intelligence Test for Robots <i>Jivko Sinapov and Alexander Stoytchev</i>	126
Learning to Press Doorbell Buttons <i>Vladimir Sukhoy, Jivko Sinapov, Liping Wu, and Alexander Stoytchev</i>	132
A Spiking Neural Model for the Spatial Coding of Cognitive Response Sequences <i>Suresh Vasa, Tao Ma, Kiran V. Byadarhaly, Mithun Perdoor, and Ali A. Minai</i>	140
Bootstrapping inverse Kinematics with Goal Babbling <i>Matthias Rolf, Jochen J. Steil, and Michael Gienger</i>	147
Effect of Neuromodulation on Performance in Game Playing: A Modeling Study <i>Derrick E. Asher, Andrew Zaldivar, and Jeffrey L. Krichmar</i>	155
Becoming a Gaze User: Joint Attention and Cooperation in One- and Two-year-olds <i>Zhen Wu, Jingtong Pan, Yanjie Su, and Julie Gros-Louis</i>	161
Developmental Learning of Integrating Visual Attention Shifts and Bimanual Object Grasping and Manipulation Tasks <i>Sungmoon Jeong, Minho Lee, Hiroaki Arie, and Jun Tani</i>	165
An Integrated Three-Stage Model Towards Grammar Acquisition <i>Yo Sato, Joe Saunders, Frank Broz, Caroline Lyon, and Chrystopher L. Nehaniv</i>	171
Investigating word learning processes in an artificial agent <i>Michele Gubian, Christina Bergmann, and Lou Boves</i>	178
Prenatal to Postnatal Transfer of Motor Skills Through Motor-Compatible Sensory Representations <i>Timothy A. Mann and Yoonsuck Choe</i>	185
Real Time Targeted Exploration in Large Domains <i>Todd Hester and Peter Stone</i>	191
Maturationally-Constrained Competence-Based Intrinsically Motivated Learning <i>Adrien Baranes and Pierre-Yves Oudeyer</i>	197
A developmental approach to the emergence of communication in socially situated embodied agents <i>Michael Sheldon and Mark Lee</i>	204
A Reinforcement Learning Model of Reaching Integrating Kinematic and Dynamic Control in a Simulated Arm Robot <i>Daniele Caligiore, Eugenio Guglielmelli, Anna M. Borghi, Domenico Parisi, and Gianluca Baldassarre</i>	211
Batch versus Interactive Learning by Demonstration <i>Peng Zang, Runhe Tian, Andrea L. Thomaz, and Charles L. Isbell</i>	219
Toddlers' Transitions on Non-verbal False- belief Tasks Involving a Novel Location: A Constructivist Connectionist Model <i>Vanessa C. Evans, Vincent G. Berthiaume, and Thomas R. Shultz</i>	225

How can bottom-up information shape learning of top-down attention-control skills? <i>Dimitri Ognibene, Giovanni Pezzulo, and Gianluca Baldassarre</i>	231
On the Influence of Sensor Morphology on Eye Motion Coordination <i>H. Martinez, M. Lungarella, and R. Pfeifer</i>	238
Scenes and Tracking with Dynamic Neural Fields: How to Update a Robotic Scene Representation <i>Stephan K. U. Zibner, Christian Faubel, Ioannis Iossifidis, Gregor Schöner, and John P. Spencer</i>	244
Serial order in an acting system: a multidimensional dynamic neural fields implementation. <i>Yulia Sandamirskaya and Gregor Schöner</i>	251
Competence Progress Intrinsic Motivation <i>Andrew Stout and Andrew G. Barto</i>	257
Imitation Learning with Hierarchical Actions <i>Abram L. Friesen and Rajesh P. N. Rao</i>	263
Autism as an impairment in detecting invariants <i>Norbert Michael Mayer and Ian Fasel</i>	269
Robot Motivator: Increasing User Enjoyment and Performance on a Physical/Cognitive Task <i>Juan Fasola and Maja J. Matarić</i>	274
WWN-Text: Cortex-Like Language Acquisition with "What" and "Where" <i>Kajal Miyan and Juyang Weng</i>	280
The Similarity-Attraction Effect in Human-Robot Interaction <i>Emily P. Bernier and Brian Scassellati</i>	286
Mutually constrained multimodal mapping for simultaneous development: modeling vocal imitation and lexicon acquisition <i>Yuki Sasamoto, Yuichiro Yoshikawa, and Minoru Asada</i>	291
A Dynamic Field Theoretic Model of Iowa Gambling Task Performance <i>Robert Lowe, Boris Duran, and Tom Ziemke</i>	297
Discovering the concept of anaphora from grounded verb models <i>Kruti Neema and Amitabha Mukerjee</i>	305
Where-What Network-4: The Effect of Multiple Internal Areas <i>Matthew Luciw and Juyang Weng</i>	311
External Rotation as Morphological Bootstrapping for Emergence of Biped Walking <i>Koh Hosoda and Yoichiro Ishii</i>	317
Author Index	323
