2010 IEEE 10th International Conference on Computer and Information Technology

(CIT 2010)

Bradford, United Kingdom
29 June – 1 July 2010

Volume 1
Pages 1-808

IEEE Catalog Number: CFP10355-PRT
ISBN: 978-1-4244-7547-6

2010 10th IEEE International Conference on Computer and Information Technology (CIT 2010)

CIT 2010

Table of Contents

Message from the CIT-2010 General Chairs xxxvii
Message from the CIT-2010 Program Chairs xxxviii
Message from the CIT-2010 Steering Chairs xxxix
Message from the CIT-2010 Workshop/Symposium Chairs xl
Message from the IntelNet-2010 Workshop Chairs xli
Message from the TSP-2010 Symposium Chairs xlii
Message from the FGC-2010 Workshop Chairs xliii
Message from the SMLA-2010 Workshop Chairs xliv
Message from the DSOC-2010 Workshop Chairs xlv
Message from CSEA-2010 Symposium Chairs xlvi
Message from ITA-2010 Symposium Chairs xlvii
CIT-2010 Organizing and Program Committees xlviii
IntelNet-2010 Organizing and Program Committees lvii
TSP-2010 Organizing and Program Committees lviii
FGC-2010 Organizing and Program Committees lxi
SMLA-2010 Organizing and Program Committees lxii
DSOC-2010 Organizing and Program Committees lxiii
Message from the ICESS-2010 General Chairs lxiv
Message from the ICESS-2010 Program Chairs lxv
Message from the ICESS-2010 Steering Chairs lxvi
Message from the ICESS-2010 Workshop/Symposium Chairs lxvii
Message from the IWCSEI-2010 Workshop Chairs lxviii
Message from the IWVT-2010 Workshop Chairs lxix
Message from the ESA-2010 Symposium Chairs lxx
ICESS-2010 Organizing and Program Committees lxxi
IWCSEI-2010 Organizing and Program Committees lxxvii
IWVT-2010 Organizing and Program Committees lxxviii
Message from the ScalCom-2010 General Chairs lxxix
Message from the ScalCom-2010 Program Chairs lxxx
Message from the ScalCom-2010 Steering Chairs lxxxi

Message from the ScalCom-2010 Workshop/Symposium Chairs lxxxii
Message from the HMWN-2010 Workshop Chairs lxxxiii
Message from the IFSN-2010 Workshop Chairs lxxxiv
Message from the SEACUBE-2010 Workshop Chairs lxxxv
Message from the ATSC-2010 Symposium Chairs lxxxvi
Message from the FSC-2010 Symposium Chairs lxxxvii
Scalcom-2010 Organizing and Program Committees lxxxviii
HMWN-2010 Organizing and Program Committees xci
IFSN-2010 Organizing and Program Committees xcii
SEACUBE-2010 Organizing and Program Committees xciii
Keynote: Steps Toward Self-Aware Networks xciv
Keynote: Protein Structure Prediction and its Understanding Based on Machine Learning Methods xcv
Keynote: Cross-Network Security for Interactive Multimedia Applications xcvii
Keynote: Networks and Economics: Incentives, Algorithms and Pricing xcix

---

Volume 1: CIT-2010: The 10th IEEE International Conference on Computer and Information Technology

Computer and System Architecture (1)

Texture Classification by Matching Co-occurrence Matrices on Statistical Manifolds 1
Jian Zou and Chuan-Cai Liu

A Learning Automaton Based Approach for Data Fragments Allocation in Distributed Database Systems 8
Ali Safari Mamaghani, Mostafa Mahi, and Mohammad Reza Meybodi

Providing Context-awareness in the Smart Car Environment 13
Jie Sun, Yongping Zhang, and Kejia He

Term Weighting Approaches for Mining Significant Locations from Personal Location Logs 20
Zhengwei Qiu, Cathal Gurrin, Aiden R. Doherty, and Alan F. Smeaton

Experience with Hardware-Software Codesign of Network Protocol Stacks Supporting Real-Time Inter-Task Communication 26
Taehoon Kim and Sungwoo Tak

Dynamically Programmable Image Processor for Compact Vision Systems 33
Andreas Loos, Michael Schmidt, Dietmar Fey, and Jens Gröbel

Performance Comparison of IPv4 and IPv6 in Peer-Peer and Client Server Local Area Networks 41
Samad S. Kolahi, Navneet Chand, Burjiz K. Soorty, and Zhang Qu

Computer and System Architecture (2)

Analysis of Software Rejuvenation in Clustered Computing System with Dependency Relation between Nodes 46
Menghui Yang, Zhituo Li, Weikang Yang, and Tonghong Li

Distributed Memory Management Units Architecture for NoC-based CMPs 54
Cao Man, Xie Bin, Qiao Fuming, Shi Qingsong, Chen Tianzhou, and Yan Like

Homogeneous NoC-based FPGA: The Foundation for Virtual FPGA 62
Jie Yang, Like Yan, Lihan Ju, Yuan Wen, Shaobin Zhang, and Tianzhou Chen

Adaptive Algorithms for Efficient Content Management in Social Network Services 68
Claudia Canali, Michele Colajanni, and Riccardo Lancellotti

A Self-Adaptable Approach for Easing the Development of Grid-Oriented Services 76
André Lage Freitas and Jean-Louis Pazat

A P2P REcommender System based on Gossip Overlays (PREGO) 83
Matteo Mordacchini, Ranieri Baraglia, Patrizio Dazzi, and Laura Ricci

A Triggering and Scheduling Approach for ETL in a Real-time Data Warehouse 91
Jie Song, Yubin Bao, and Jingang Shi

Improving the Efficiency of Scheduling and Placement in FPGA by Small-world Model Based Genetic Algorithm 99
Jie Cui, Xue Chen, Yongmei Lei, and Weimin Xu

High Performance Computing

Low Power Branch Predictor for Embedded Processors 107
Sunwook Kim, Eutteum Jo, and Hyungshin Kim

Speeding up K-Means Algorithm by GPUs 115
You Li, Kaiyong Zhao, Xiaowen Chu, and Jiming Liu

Effects of Allocation Request Shape Changes on Performance in 2D Mesh-Connected Multicomputers 123
Ismail Ababneh, Wail Mardini, Hilal Alawneh, Mohammad Hamed, and Saad Bani-Mohammad

Optimizing Adaptive Synchronization in Parallel Simulators for Large-scale Parallel Systems and Applications 131
Chuanfu Xu, Yonggang Che, Jianbin Fang, and Zhenghua Wang

A Data Communication Scheduler for Stream Programs on CPU-GPU Platform 139
Tao Tang, Xinhai Xu, and Yisong Lin

Collective Communication in Recursive Dual-Net: An Interconnection Network for High-Performance Parallel Computer Systems of the Next Generation 147
Yamin Li, Shietung Peng, and Wanming Chu

A Causal Model Method for Fault Diagnosis in Wireless Sensor Networks 155
Shih-Hao Chang, Madjid Merabti, and Hala Mokhtar

On-Chip Operating System Design for NoC-Based CMP 163
Chao Wang, Bin Xie, Jiexiang Kang, Tianzhou Chen, Wei Hu, and Zhenwei Zheng

An Efficient Power-Aware Optimization for Task Scheduling on NoC-based Many-core System 171
Wei Hu, Xingsheng Tang, Bin Xie, Tianzhou Chen, and Dazhou Wang

Utility Computing/Could Computing/Ubiquitous Computing

TMemCanal: A VM-oblivious Dynamic Memory Optimization Scheme for Virtual Machines in Cloud Computing 179
Yaqiong Li and Yongbing Huang
A Multi-criteria Job Scheduling Framework for Large Computing Farms 187
Ranieri Baraglia, Patrizio Dazzi, Gabriele Capannini, and Giancarlo Pagano
Resource Pricing and Equilibrium Allocation Policy in Cloud Computing 195
Fei Teng and Frédéric Magoulès
An Efficient Data Mining Framework on Hadoop using Java Persistence API 203
Yang Lai and Shi ZhongZhi
Developing a Cloud Computing Charging Model for High-Performance Computing Resources 210
Matthew Woitaszek and Henry M. Tufo
Distributed Bottleneck Node Detection in Wireless Sensor Network 218
Haosong Gou and Younghwan Yoo
Ad hoc Grid: An Adaptive and Self-Organizing Peer-to-Peer Computing Grid 225
Pablo G.S. Tiburcio and Marco Aurélio Spohn

Software Engineering

Using the Software Process Improvement approach for Defining a Methodology for Embedded Systems Development using the CMMI-DEV v1.2 233
I. Garcia and I. Andrea
The Impact of Acceptance Tests on Analyzing Component-Based Systems Specifications: An Experimental Evaluation 241
Sajjad Mahmood
Software Stage-Effort Estimation Based on Association Rule Mining and Fuzzy Set Theory 249
Mohammad Azzeh, Peter I. Cowling, and Daniel Neagu
A Recognizer of Rational Trace Languages 257
Federico Maggi
A Framework for Distributed Management of Dynamic Self-adaptation in Heterogeneous Environments 265
Mohamed Zouari, Maria-Teresa Segarra, and Françoise André

Computer Networks (1)

A New Private Data Aggregation Scheme for Wireless Sensor Networks 273
Rabindra Bista, Kim Hee-Dae, and Jae-Woo Chang
Ferry Route Design with Delay Bounds in Delay-Tolerant Networks 281
Wei Peng, Baokang Zhao, Wanrong Yu, Chunqing Wu, and Xiaorong Yan
Fuzzy Location Service for Mobile Ad Hoc Networks 289
Yongming Xie, Guojun Wang, and Jie Wu
Analysis of Anomalies on a Virtualized Network Testbed 297
Chunghan Lee, Hirotake Abe, Toshio Hirotsu, and Kyoji Umemura

AOMDV with Sufficient Bandwidth Aware 305
Pattana Wannawilai and Chanboon Sathitwiriyawong
Metadata-Based Adaptive Sampling for Energy-Efficient Collaborative Target Tracking in Wireless Sensor Networks 313
Yousef E.M. Hamouda and Chris Phillips

Computer Networks (2)

QoS Algorithm for Localised Routing Based on Bandwidth as the Dominant Metric for Candidate Path Selection 321
Turki A. Alghamdi and M.E. Woodward
Delta-Multiplexing: A Novel Technique to Improve VoIP Bandwidth Utilization between VoIP Gateways 329
Mosleh M. Abu-Alhaj, Manjur S. Kolhar, Lingeswari V. Chandra, O. Abouabdalla, and Ahmed M. Manasrah
Novel QoS-Aware Gateway Centralized Multi-hop Routing for Wireless Mesh Networks 336
Liang Zhao, Ahmed Y. Al-Dubai, and Imed Romdhani
Evaluation of QoS Parameters for Real-time Rich Media Applications Using a Test-bed Implementation 343
Sivanantharasa Panchadcharam, Qiang Ni, and Gareth A. Taylor
Server Placement for Peer-to-Peer Live Streaming Systems 349
Xiaoqun Yuan, Hao Yin, Xuening Liu, Changlai Du, and Geyong Min
A Sofrware Framework for Robust Packet Delivery in Wireless Multi-hop Networks 356
Taehoon Kim, Bora Kang, and Sungwoo Tak
Enhanced Packet Buffering for DiffServ in Fast Handover Mobile IP 364
Jaehyun Choi, Seungwok Han, Changhoon Lyu, and Hee Yong Youn

Computer Networks (3)

Active Analysis of BT with a Modified Azureus Client 371
Zhe Yang, Lingzhi Li, Zhihao Wang, and Linqing Li
Analyzing Performance for Complex Protocol using Validated CP-nets Models 377
Jing Liu, Xinming Ye, and Jun Li
Distributed Energy Balanced Clustering for Wireless Sensor Networks 385
Fuad Bajaber and Irfan Awan
Impact of Peers' Similarity on Recommendations in P2P Systems 393
Loubna Mekouar, Youssef Iraqi, and Raouf Boutaba
Dynamic Single Frequency Networks in Wireless Multihop Networks - Energy Aware Routing Algorithms with Performance Analysis 400
Magnus Eriksson and Arif Mahmud
A Query based Formal Security Analysis Framework for Enterprise LAN 407
P. Bera, Soumya Maity, S.K. Ghosh, and Pallab Dasgupta
Distributed Adaptive Interference-Avoidance Multi-channel MAC Protocol for ZigBee Networks 415
Wei Yuan, Xiaolei Cui, and Ignas G.M.M. Niemegeers

A Comparative Study on Iterative Methods Regarding Cross-Layer Optimization for OFDMA Systems 420
Charilaos C. Zarakovitis, Ilias G. Nikolaros, Dionysios Skordoulis, Marios G. Hadjinicolaou, and Qiang Ni

Artificial Intelligence

An Efficient Method to Set RBF Network Paramters Based on SOM Training 426
Kazuhiko Yamashita, Goutam Chakraborty, Hiroshi Mabuchi, and Masafumi Matsuhara
Fuzzy Expert System Based Intelligent Website Assessment System 432
Huan Liu, Shuang Zhang, and Shixiong Zhang
Training Recurrent Neuro-Fuzzy System Using Two Novel Population-Based Algorithms for Temperature Forecasting 438
Zahra Khanmirzaei
Intelligent Recognition of Gearbox Status by Wavelet Packet Decomposition 446
Mohammad-Reza Feizi-Derakhshi and Masood R.P. Derakhshan
A Novel Neural Network-Based Approach for Multiple Instance Learning 451
Cheng Hua Li and Iker Gondra
The Logical Difference for Fuzzy Ontologies 457
Sha-sha Feng, Dan-tong Ou-yang, and Yong-gang Zhang
Multiobjective Evolutionary Algorithms and a Combined Heuristic for Route Reconnection Applied to Multicast Flow Routing 464
Marcos L.P. Bueno and Gina M.B. Oliveira
A Model of Intelligent Controller for Hypothyroidism Treatment 472
Luiz G.A. Martins and Luiz H.A. Monteiro
Intelligent Modelling for Benign Tumour Growth with Cell-Cell and Cell-Matrix Adhesion and Movement 480
N. Kazmi, M.A. Hossain, and R. Phillips

Computer Graphics/Image Processing

Moving Object Tracking Method Based on Adaptive On-line Clustering and Prediction-based Cross-correlation 487
Jian Wu, Heng-jun Yue, Zhi-ming Cui, and Jian-ming Chen
Robust Detection of Corners and Corner-line Links in Images 495
Andres Solis Montero, Milos Stojmenovic, and Amiya Nayak
Flame Recognition Algorithm Research under Complex Background 503
Qing Liu, Sun'an Wang, XiaoHui Zhang, and Yun Hou
Accuracy Enhancement for License Plate Recognition 511
Lihong Zheng, Xiangjian He, Bijan Samali, and Laurence T. Yang
Moving Object Detection based on Clausius Entropy 517
J.H. Park, G.S. Lee, W.H. Cho, N. Toan, S.H. Kim, and S.Y. Park
Non-negative Matrix Factorization for Inferring Implicit Preference of Potential Customer 522
Masakatsu Ohta

Voting Based Text Line Segmentation in Handwritten Document Images 529
Toan Nguyen Dinh, Jonghyun Park, and GueeSang Lee
Object Recognition using Full Pixel Matching 536
Jun Ma, Long Zheng, Yuichi Yaguchi, Mianxiong Dong, and Ryuichi Oka
An Extraction Method of Moving Object Based on Visual Cognition Mechanism 544
Min Li, Huibin Wang, Xijun Yan, and Lizhong Xu

Information Visualization

Detecting the Orientation of N-gonal Cropped Sub-images and Its Application 552
Jong-Woo Kim, Woo-Keun Chung, Seon-Yeong Kim, and Hwan-Gue Cho
A Photo Visualization System Considering Region of Interest 560
Dong-Sung Ryu, SeonYeong Kim, and Hwan-Gue Cho

Information Security

A Framework for Building Trust Based Communities in P2P Mobile Social Networks 567
Basit Qureshi, Geyong Min, and Demetres Kouvatsos
High Speed NIDS using Dynamic Cluster and Comparator Logic 575
Monis Akhlaq, Faeiz Alserhani, Ahsan Subhan, Irfan Ullah Awan, John Mellor, and Pravin Mirchandani
Concurrent Error Detection for Multiplicative Inversion of Advanced Encryption Standard 582
Flavius Opritoiu, Mircea Vladutiu, Mihai Udrescu, and Lucian Prodan
Quantifying Information Leakage for Fully Probabilistic Systems 589
Guo Yunchuan, Yin Lihua, Zhou Yuan, and Fang Binxing
A Secure Storage System Combining Secret Sharing Schemes and Byzantine Quorum Mechanisms 596
Qiongxiao Wang, Jiwu Jing, and Jingqiang Lin
Selective and Early Threat Detection in Large Networked Systems 604
Michele Colajanni, Mirco Marchetti, and Michele Messori
Enforcing Access Control to Web Databases 612
Ahlem Bouchahda, Nhan Le Thanh, Adel Bouhoula, and Faten Labbene

Management of Data and Database Systems

New GML Storage Schema Models for Spatial and Non-spatial Information 620
Yong-ki Kim, Hye-kyeom Yoo, and Jae-woo Chang
An Efficient Technique for Continuous K-Nearest Neighbor Query Processing on Moving Objects in a Road Network 627
Guohui Li, Ping Fan, YanHong Li, and Jianqiang Du
F-KDB: An K-D-B Tree Implementation over Flash Memory 635
Guohui Li, Pei Zhao, Sheng Gao, and Jianqiang Du
A Smart Filtering System for Newly Coined Profanities by Using Approximate String Alignment 643
Taijin Yoon, Sun-Young Park, and Hwan-Gue Cho
Two Novel Semantics of Top-k Queries Processing in Uncertain Database 651
Dexi Liu, Changxuan Wan, N. Xiong, Laurence T. Yang, and Lei Chen

Robust Top-k Query Evaluation in Wireless Sensor Networks 660
Baichen Chen and Geyong Min
Failure Semantic of Neighbour Replication Grid Transaction Model 668
Noraziah Ahmad, Mohammad Fadel Jamil Klaib, and Roslina Mohd Sidek

New Web Technology and Applications

How to Apply the Skip List to the Management of a Massive Set of Replying Comments in Web Bulletins by Exploiting the Power-Law Distribution 674
Yun-Jung Lee, Sung-Min Yoon, Jeong-Hoon Ji, Hwan-Gue Cho, and Gyun Woo
iDARE: Proactive Data Replication Mechanism for P2P VoD System 682
Xiaofei Liao, Fan Zhang, Hai Jin, and Linchen Yu
Information Retrieval via Truncated Hilbert Space Expansions 690
Patricio Galeas, Ralph Kretschmer, and Bernd Freisleben
Delivering Categorized News Items Using RSS Feeds and Web Services 698
Subrata Saha, Atul Sajjanhar, Shang Gao, Robert Dew, and Ying Zhao

IT for Biomedicine

Fuzzy Neural Networks to Detect Cardiovascular Diseases Hierarchically 703
Jun Shi, Booma Devi Sekar, Ming Chui Dong, and Wai Kei Lei

IntelNet-2010: The 2010 International Workshop on Intelligent Sensor and Wireless Networks

Wireless Sensor Networks

A New Congestion Control Mechanism for WSNs 709
Vasilis Michopoulos, Lin Guan, and Iain Phillips
Maximal Weight Topology Discovery in Ad hoc Wireless Sensor Networks 715
Yasir Fayyaz, Mehwish Nasim, and Muhammad Younus Javed
Error-Tolerant Coverage Control based on Bio-inspired Attractor Selection Model for Wireless Sensor Networks 723
Takuya Iwai, Naoki Wakamiya, and Masayuki Murata
Pattern Recognition Comparative Analysis Applied to Fingerprint Indoor Mobile Sensors Localization 730
Jose Vicente Marti Aviles and Raul Marin Prades
Concept and Prototype for a Real-Time Enabled Publish/Subscribe System 737
Matthias Andree, Alexander Gebel, and Holger Karl
A Lifetime Extended Routing Protocol Based on Data Threshold in Wireless Sensor Networks 743
Ning Sun, Nai-bin Su, and Sang-ho Lee

Mobile Computing and Wireless Networks

Enhanced Fibonacci Backoff Algorithm for Mobile Ad-Hoc Network 749
Muneer Bani Yassein, Osama Al Oqaily, Geyong Min, Wail Mardini, Yaser Khamayseh, and Saher S. Manaseer
Facilitating Mobile Communication with Annotated Messages 755
Ghaidaa Al-Sultany, Maozhen Li, Sadaqat Jan, and Hamed Al-raweshidy
A SIP Signaling Retransmission Scheme for Efficient Mobile IPTV Service over 3G Wireless Networks 761
Byungjun Lee, Kyung Tae Kim, Hyung Do Lee, and Hee Yong Youn
Effective Video Transport over WiMAX with Data Partitioning and Rateless Coding 767
Laith Al-Jobouri, Martin Fleury, Salah S. Al-Majeed, and Mohammed Ghanbari
Fastest-Vehicle Multi-hop Routing in Vehicular Ad hoc Networks 773
M. Bilal, P.M.L. Chan, and P. Pillai
Discrete-Time Simulator for Wireless Mobile Agents 779
Damien Martin-Guillerez and Jean Fanchon
Collective Behaviour in a Square Lattice of Driven Duffing Resonators Coupled to van der Pol Oscillators 785
Michel F. Randrianandrasana, Xueyong Wei, and David Lowe
Self-organizing Load Balancing for Relay Based Cellular Networks 791
Lexi Xu, Yue Chen, and Yue Gao

TSP-2010: The Third International Symposium on Trust, Security and Privacy for Emerging Applications

Metrics, Architectures, and Models

Towards Secure and Reliable Data Storage with Multi-coefficient Secret Sharing 797
Feng Shen, Chonglei Mei, Hai Jiang, and Zhiqian Xu
A Model of Security Information Flow on Entities for Trust Computation 803
Serif Bahtiyar, Murat Cihan, and Mehmet Ufuk Caglayan
Toward a Target Function of an Information Security Management System 809
Wolfgang Boehmer
Trust Model for Open Resource Control Architecture 817
Lusha Wang and Raquel Hill
Are the Con Artists Back? A Preliminary Analysis of Modern Phone Frauds 824
Federico Maggi
A Privacy-Preserving Trust Model for VANETs 832
Ayman Tajeddine, Ayman Kayssi, and Ali Chehab
Linguistic Fuzzy Logic Enhancement of a Trust Mechanism for Distributed Networks 838
Félix Gómez Mármol, Javier G. Marín-Blázquez, and Gregorio Martínez Pérez

Trust, Security and Privacy in Systems

Enabling Use of Single Password over Multiple Servers in Two-Server Model 846
Yanjiang Yang and Feng Bao
Virtual Security Kernel: A Component-Based OS Architecture for Self-Protection 851
Ruan He, Marc Lacoste, and Jean Leneutre
Spyware Security Management via a Public Key Infrastructure for Client-Side Web Communicating Applications 859
Peter Clutterbuck
A Secure User Interface for Web Applications Running Under an Untrusted Operating System 865
Chunxiao Li, Anand Raghunathan, and Niraj K. Jha
Efficient Encryption-Authentication of Shared Bus-Memory in SMP System 871
Fangyong Hou, Hongjun He, Nong Xiao, Fang Liu, and Guangjun Zhong
An Analytical Framework for Evaluating Survivability of SCADA Systems 877
Carlos Queiroz, Abdun Mahmood, and Zahir Tari

Trust, Security and Privacy in Mobile and Wireless Communications

An Authentication Framework for Wireless Sensor Networks using Identity-Based Signatures 882
Rehana Yasmin, Eike Ritter, and Guilin Wang
Secure Secret Key Distribution and Storage in Wireless Sensor Networks 890
Juliano F. Kazienko and Célio V.N. Albuquerque
Trust Management Scheme for Mobile Ad-Hoc Networks 896
Raihana Ferdous, Vallipuram Muthukkumarasamy, and Abdul Sattar
Learning Autonomic Security Reconfiguration Policies 902
Juan E. Tapiador and John A. Clark
Reverse Tree-based Key Routing: Robust Data Aggregation in Wireless Sensor Networks 910
Lei Zhang, Honggang Zhang, Mauro Conti, Roberto Di Pietro, Sushil Jajodia, and Luigi Vincenzo Mancini
Tin-Key: Effective Key-Establishment for Wireless Sensor Networks 916
Somanath Tripathy

Trust, Security and Privacy in Virtualization Technologies and Cloud Computing

Efficient Sharing of Secure Cloud Storage Services 922
Qin Liu, Guojun Wang, and Jie Wu
Designing Cloud Services Adhering to Government Privacy Laws 930
Frank Doelitzscher, Christoph Reich, and Anthony Sulistio
A Practical Approach to Improve the Data Privacy of Virtual Machines 936
Jinzhu Kong
Incorporating Trust in Network Virtualization 942
Loubna Mekouar, Youssef Iraqi, and Raouf Boutaba
A Security Management Architecture for the Protection of Kernel Virtual Machines 948
Flavio Lombardi and Roberto Di Pietro

MobiTrust: Trust Management System in Mobile Social Computing 954
Juan Li, Zonghua Zhang, and Weiyi Zhang

Privacy, Anonymity and Risk Analysis

Hiding Short Secret Messages based on Linguistic Steganography and Manual Annotation 960
Alfonso Muñoz, Justo Carracedo, and Irina Argüelles Álvarez
Measuring the Security of Linguistic Steganography in Spanish based on Synonymous Paraphrasing with WSD 965
Alfonso Muñoz, Justo Carracedo, and Irina Argüelles Álvarez
Bi-directional RPROB-based Location Anonymizer System for Location-Based Services 971
Minh-Triet Tran, Vi-Minh Luong, Anh-Duc Duong, and Isao Echizen
Using Game Theory to Reveal Vulnerability for Complex Networks 978
Xiaoying Zhang, Chi Guo, and Lina Wang
A Privacy Enhanced Data Aggregation Model 985
Shu Qin Ren, Khin Mi Mi Aung, and Jong Sou Park
A Culture of Trust Threatens Security and Privacy in Qatar 991
Mariam Al-Hamar, Ray Dawson, and Lin Guan
Image Steganography and Chrominance Components 996
Adel Almohammad and Gheorghita Ghinea

Network Attacks and Defenses

Distinguishing the Master to Defend DDoS Attack in Peer-to-Peer Networks 1002
Lei Hou, Haixin Duan, and Jianping Wu
Augmented Attack Tree Modeling of Distributed Denial of Services and Tree Based Attack Detection Method 1009
Jie Wang, Raphael C.-W. Phan, John N. Whitley, and David J. Parish
Simultaneous Analysis of Time and Space for Conflict Detection in Time-Based Firewall Policies 1015
Subana Thanasegaran, Yuichiro Tateiwa, Yoshiaki Katayama, and Naohisa Takahashi
On Small Subgroup Non-confinement Attack 1022
Feng Hao
Compressing Attack Graphs Through Reference Encoding 1026
Pengsu Cheng, Lingyu Wang, and Tao Long
Decentralized XACML Overlay Network 1032
Ali Alzahrani, Helge Janicke, and Sarshad Abubaker

Cryptography and Security Protocols

Cryptanalysis of the Bisectional MQ Equations System 1038
Xiaoyi Zhou, Jixin Ma, Wencai Du, Bo Zhao, Mingrui Chen, and Yongzhe Zhao
Achieving High Efficiency in Membership Proof without Compromising or Weakening any Security Property 1044
Kun Peng and Feng Bao

Fault Propagation Pattern Based DFA on Feistel Ciphers, with Application to Camellia 1050
Haining Chen, Yongbin Zhou, Wenling Wu, and Na Wang
Offline Submission with RSA Time-Lock Puzzles 1058
Yves Igor Jerschow and Martin Mauve
Attacks on an Efficient RFID Authentication Protocol 1065
Imran Erguler and Emin Anarim
Think Before Your LFSRs Jump 1070
Mujahid Mohsin, Mehreen Afzal, and Muhammad Arif Wahla
Distinguishing Attack on Bivium 1075
Zainab Noferesti, Neda Rohani, Javad Mohajeri, and Mohammad Reza Aref

Authentication, Access Control, and Accounting

Security and Trust of Public Key Cryptography Options for HIP 1079
Harri Forsgren, Kaj Grahn, Timo Karvi, and Göran Pulkkis
CATRAC: Context-Aware Trust- and Role-Based Access Control for Composite Web Services 1085
Cesar Ghali, Ali Chehab, and Ayman Kayssi
Enabling Privacy-preserving Credential-based Access Control with XACML and SAML 1090
Claudio A. Ardagna, Sabrina De Capitani di Vimercati, Gregory Neven, Stefano Paraboschi, Franz-Stefan Preiss, Pierangela Samarati, and Mario Verdicchio
Security in Outsourced Storage: Efficiently Checking Integrity and Service Level Agreement Compliance 1096
Roberto Bragantini, Mauro Conti, and Roberto Di Pietro
A Novel Dynamic ID-based Remote User Authentication and Access Control Scheme for Multi-server Environment 1102
Min-Hua Shao and Ying-Chih Chin
Recommending Access to Web Resources based on User's Profile and Traceability 1108
Nuno Bettencourt and Nuno Silva
Privacy-Aware Access Control and Authorization in Passive Network Monitoring Infrastructures 1114
Fotios Gogoulos, Anna Antonakopoulou, Georgios V. Lioudakis, Aziz S. Mousas, Dimitra I. Kaklamani, and Iakovos S. Venieris

FGC-2010: The First International Workshop on Frontier of GPU Computing

Fundmentals of of GPU Computing

Efficiently Using a CUDA-enabled GPU as Shared Resource 1122
Hagen Peters, Martin Köper, and Norbert Luttenberger
Efficient Independent Component Analysis on a GPU 1128
Rui Ramalho, Pedro Tomás, and Leonel Sousa
XMalloc: A Scalable Lock-free Dynamic Memory Allocator for Many-core Machines 1134
Xiaohuang Huang, Christopher I. Rodrigues, Stephen Jones, Ian Buck, and Wen-mei Hwu

Algorithms and Toolkits

Parallel Best Neighborhood Matching Algorithm Implementation on GPU Platform 1140
Guangyong Zhang, Liqiang He, and Yanyan Zhang
Improving the Performance of the Sparse Matrix Vector Product with GPUs 1146
F. Vázquez, G. Ortega, J.J. Fernández, and E.M. Garzón
Memory Saving Discrete Fourier Transform on GPUs 1152
Daniel Kauker, Harald Sanftmann, Steffen Frey, and Thomas Ertl
The GPU-based String Matching System in Advanced AC Algorithm 1158
Jiangfeng Peng, Hu Chen, and Shaohuai Shi
GPUMP: A Multiple-Precision Integer Library for GPUs 1164
Kaiyong Zhao and Xiaowen Chu

Software Developments

Accelerating Linpack Performance with Mixed Precision Algorithm on CPU+GPGPU Heterogeneous Cluster 1169
Wang Lei, Zhang Yunquan, Zhang Xianyi, and Liu Fangfang
Exploiting More Parallelism from Applications Having Generalized Reductions on GPU Architectures 1175
Xiao-Long Wu, Nady Obeid, and Wen-Mei Hwu
SBLOCK: A Framework for Efficient Stencil-Based PDE Solvers on Multi-core Platforms 1181
Tobias Brandvik and Graham Pullan

Applications of GPU Computing

Astrophysical Particle Simulations with Custom GPU Clusters 1189
R. Spurzem, P. Berczik, K. Nitadori, G. Marcus, A. Kugel, R. Männer, I. Berentzen, R. Klessen, and R. Banerjee
Massively Parallel Finite Element Simulator for Full-Chip STI Stress Analysis 1196
Jiying Xue, Xiaomeng Jiao, Yangdong Deng, Hao Qian, Dajie Zeng, Guoyu Li, and Zhiping Yu
CUDA-based Signed Distance Field Calculation for Adaptive Grids 1202
Taejung Park, Sung-Ho Lee, Jong-Hyun Kim, and Chang-Hun Kim
Graphics Card Computing for Cosmology: Cholesky Factorization 1207
Steven Gratton
GPU Accelerated VLSI Design Verification 1213
Yangdong (Steve) Deng
Realtime Simulation of Burning Solids on GPU with CUDA 1219
Jian Zhu, Youquan Liu, Kai Bao, Yuanzhang Chang, and Enhua Wu

SMLA-2010: The 2010 International Workshop on Scalable Machine Learning and Applications

Tibetan Language Speech Recognition Model Based on Active Learning and Semi-Supervised Learning 1225
Xiuqin Pan, Yongcun Cao, Yong Lu, and Yue Zhao

Geomagnetic Precursor Z Component Diurnal Variation Phase Anomaly Recognition based on the Pattern Distance 1229
Shaochun Wu, Tongyu Yuan, Yan Tang, Bofeng Zhang, and Daming Wei

Scaling the iHMM: Parallelization versus Hadoop 1235
Sébastien Bratières, Jurgen van Gael, Andreas Vlachos, and Zoubin Ghahramani

Stochastic Mirror Descent Algorithm for L1-Regularized Risk Minimizations 1241
Hua Ouyang and Alexander Gray

DSOC-2010: The 2010 International Workshop on Dependable Service-Oriented Computing

An Approach on Service Component Selection and Analysis of the Resulting System Reliability 1246
Lin Xi, Qinglei Zhou, and Linlin Xie

MMPI: A Scalable Fault Tolerance Mechanism for MPI Large Scale Parallel Computing 1251
Zhiyuan Wang, Xuejun Yang, and Yun Zhou

Implementation of Non-Pipelined and Pipelined Data Encryption Standard (DES) Using Xilinx Virtex-6 FPGA Technology 1257
Saeid Taherkhani, Enver Ever, and Orhan Gemikonakli

Testing the Effectiveness of Dynamic Binding in Web Services 1263
Anthony Sargeant, David Webster, Karim Djemame, and Jie Xu

Realizing Network Enabled Capability Through Dependable Dynamic Systems Integration 1269
Duncan J. Russell, Lu Liu, Zongyang Luo, Colin C. Venters, David E. Webster, and Jie Xu

A P2P e-Commerce Reputation Model Based on Fuzzy Logic 1275
Ji Li, Lu Liu, and Jie Xu

CSEA-2010: International Symposium on Frontier of Computer Science, Engineering and Applications

New Web Technology and Applications

DT-Tree: A Semantic Representation of Scientific Papers 1280
Syed Raza Ali Rizvi and Shawn Xiong Wang

Noise Robustness Evaluation of Audio Features in Segment Search 1285
Masaki Kuwabara and Masahide Sugiyama

Context-based Ontology Matching: Concept and Application Cases 1292
Feiyu Lin, Jonathan Butters, Kurt Sandkuhl, and Fabio Ciravegna

CCA-Secure Type-based Proxy Re-encryption with Invisible Proxy 1299
Xiaoqi Jia, Jun Shao, Jiwu Jing, and Peng Liu

Classification of Closed Frequent Patterns Improved by Feature Space Transformation 1306
Cheng Hao Jin, Gouchol Pok, Hi-Seok Kim, Eun-Jong Cha, and Keun Ho Ryu

High Performance Computing and Architecture

Towards Garbage Collection Mechanism for RTSJ-Oriented Embedded Java Processor 1312
Guang Hu, Zhilei Chai, Wenke Zhao, and Shiliang Tu
Power Measurements and Analyses of Massive Object Storage System 1317
Yong Dong, Juan Chen, and Tao Tang
Scalable and Parallel Implementation of a Financial Application on a GPU: With Focus on Out-of-Core Case 1323
Myungho Lee, Jin-hong Jeon, Joonsuk Kim, and Joonhyun Song
Information Security Risk Management Framework for the Cloud Computing Environments 1328
Xuan Zhang, Nattapong Wuwong, Hao Li, and Xuejie Zhang
Pervasive Service Computing: Visions and Challenges 1335
Jiehan Zhou, Ekaterina Gilman, Mika Ylianttila, and Jukka Riekki
Reasoning for Smart Space Application: Comparing Three Reasoning Engines CLIPS, Jess and Win-prolog 1340
Ekaterina Gilman, Iván Sánchez, Timo Saloranta, and Jukka Riekki
User Adaptive Recommendation Model by Using User Clustering based on Decision Tree 1346
Sanghyun Ryu, Kang-hak Han, Hyunsu Jang, and Young Ik Eom

Software Engineering

Co-Locating Virtual Machine Logging and Replay for Recording System Failures 1352
Jin Kawasaki and Shuichi Oikawa
Complementary Classification Techniques based Personalized Software Requirements Retrieval with Semantic Ontology and User Feedback 1358
Tao Zhang and Byungjeong Lee
Assessing Object-Oriented Software Systems Based on Change Impact Simulation 1364
Lin Li, Li Zhang, Linqing Lu, and Zhiqiang Fan
Implementation of x86 Binary-to-C Translator by Using GNU Tools 1370
Kirill Makankov and Seon Wook Kim
A Tree Based Strategy for Test Data Generation and Cost Calculation for Uniform and Non-Uniform Parametric Values 1376
Mohammad F.J. Klaib, Sangeetha Muthuraman, Noraziah Ahmad, and Roslina Sidek

Computer Graphics/Image Processing

Applying Feature Selection for Effective Classification of Microcalcification Clusters in Mammograms 1384
Dong Wang, Jinchang Ren, Jianmin Jiang, and Stan S. Ipson
Disparity Adjustment for Local Stereo Matching 1388
Xia Hu, Caiming Zhang, Wei Wang, and Xifeng Gao

A Rotate-based Best Neighborhood Matching Algorithm for High Definition Image Error Concealment 1393
Liqiang He and Yanyan Zhang
Local Hybrid Level-set Method for MRA Image Segmentation 1397
Qingqi Hong, Qingde Li, and Jie Tian
Research on the Recognition Method of Bridge Target in SAR Image 1403
Dong Yin and Rong Zhang
Face Recognition using Layered Linear Discriminant Analysis and Small Subspace 1407
Muhammad Imran Razzak, Muhammad Khurram Khan, Khaled Alghathbar, and Rubiyah Yousaf
Text Detection using Multilayer Separation in Real Scene Images 1413
Manoj Kumar, Young Chul Kim, and Guee Sang Lee

Artificial Intelligence

Awareness Program and AI based Tool to Reduce Risk of Phishing Attacks 1418
O. Salem, A. Hossain, and M. Kamala
Incremental Emerging Patterns Mining for Identifying Safe and Non-safe Power Load Lines 1424
Jong Bum Lee, Minghao Piao, and Keun Ho Ryu
Methods of Pattern Extraction and Interval Prediction for Equipment Maintenance 1430
Yongjun Fei, Bofeng Zhang, Wenhao Zhu, and Jianbo Hu
Teachers' and Students' Attitudes Towards Traditional and Computer Assisted Blended Teaching and Learning Processes in Mechanical Engineering Subjects Area 1436
Salah Abdulrasool, R. Mishra, and Haifa Khalaf
Feature Selection of Gene Expression Data Using Regression Model 1442
Ho Sun Shon, Kenu Ho Ryu, and Kyung-Sook Yang

ITA-2010: International Symposium on Advanced Topics on Information Technologies and Applications

Networking and Telecommunications (1)

Conceptual Multi-Level Hierarchy for Evaluation and Classification 1448
Doug Won Choi and Jin Gyu Shin
QoS Assessment over Multiple Attributes 1456
Hmood Al-Dossari, Jianhua Shao, and Alun Preece
The Effects of Network Density of a New Counter-based Broadcasting Scheme in Mobile Ad Hoc Networks 1462
Muneer Masadeh, Sanabel Fathi Nimer, and Ahmed Y. Al-Dubai
An Energy Efficient Clustering Scheme for Self-Organizing Distributed Wireless Sensor Networks 1468
Kyung Tae Kim, Han Ku Yoo, Byung Ha Son, and Hee Yong Youn
Scalable Orchestration Strategy for Automatic Service Composition 1474
Hiroshi Mizugai, Incheon Paik, and Wuhui Chen
Evaluation of Drowsiness During Driving using Electrocardiogram - A Driving Simulation Study 1480
Masaru Tasaki, Motoaki Sakai, Mai Watanabe, Hui Wang, and Daming Wei

A SOA Based Approach to User-Oriented System Migration 1486
Zhuo Zhang, Hongji Yang, Dongdai Zhou, and Shaochun Zhong
Towards Exhibiting Ability of Service Communication Models 1492
Fangfang Liu, Jie Yu, Bofeng Zhang, and Chengling Li

Networking and Telecommunications (2)

Experimenting Scheduling Policies with Continuation-based Services 1498
Claudia Di Napoli and Maurizio Giordano
Using Chemical Metaphor to Express Workflow and Service Orchestration 1504
Chen Wang and Jean-Louis Pazat
A Key Management Scheme for Multicast Based on Layer 2 Control 1512
Cao Zheng, Yin Pengpeng, and Lu Zhengjun
Selective and Heterogeneous SVM Ensemble for Demand Forecasting 1519
Liu Yue, Liao Zhenjiang, Yin Yafeng, Teng Zaixia, Gao Junjun, and Zhang Bofeng
Performance Comparison of Category 5e vs. Category 6 Cabling Systems for both IPv4 and IPv6 in Gigabit Ethernet 1525
Burjiz K. Soorty, Samad S. Kolahi, Navneet Chand, and Zhang Qu
Adding Standards Based Job Submission to a Commodity Grid Broker 1530
David Colling, A. Stephen McGough, Tiejun Ma, Vesso Novov, Jazz Mack Smith, David Wallom, and Xin Xiong
Semantic Service Discovery Exploiting Efficient Concept Match over Large Amount of Heterogeneous Ontologies 1536
Dohyun Kim and Younghee Lee
SRCP: Sensor Reliability and Congestion Control Protocol 1542
Raees Khan and Farrukh Aslam Khan
A Novel Adaptive FEC Scheme Integrating Multi-Layer Functions 1549
Chi Xuefen, Zhang Wei, Zhao Kun, Guan Lin, and Feng Jiao

Information Visualization

A Lossless Data Hiding based on Discrete Haar Wavelet Transform 1554
Hu-Yu Huang and Shih-Hsu Chang
Methods of Improving Communications by a Life-Like Animated Pedagogical Agent 1560
Jie Yan and Ruth Agada
Researching on Simulation of Traffic Accidents Scene by OpenGL 1566
Shuang Zhang, Huan Liu, and Shixiong Zhang
A Tracking Model for Enhancing Social Video Integration and Sharing 1571
Liao Zhuhua, Yang Jing, Fu Chuan, and Zhang Guoqing
An Efficient Multi Recipient Signcryption Scheme Offering Non Repudiation 1577
Fahad Ahmed, Asif Masood, and Firdous Kausar
Modifed Re-sampling Based Particle Filter for Visual Tracking with MPH 1582
Md. Zahidul Islam, Chi-Min Oh, and Chil-Woo Lee
Text Detection in Binarized Text Images of Korean Signboard by Stroke Width Feature 1588
Huy Phat Le, Toan Nguyen Dinh, Soo Hyung Kim, and Guee Sang Lee

Exploiting Context in Location-Based Information Systems 1593
Christos Mettouris and George A. Papadopoulos
Automatic Segmentation for Breast Skin-line 1599
Zhiyong Zhang, Joan Lu, and Yau Jim Yip

Information Security

A Novel Two-Server Password Authentication Scheme with Provable Security 1605
Dexin Yang and Bo Yang
Improved Kerberos Security Protocol Evaluation using Modified BAN Logic 1610
N.T. Abdelmajid, M.A. Hossain, S. Shepherd, and K. Mahmoud
Static, Dynamic and Incremental MAC Combined Approach for Storage Integrity Protection 1616
Fangyong Hou, Hongjun He, Nong Xiao, Fang Liu, and Guangjun Zhong
Information Flow Analysis of Web Service Net 1622
Xing Jin-Liang, Li Xiao-Hong, Cao Yan, Feng Zhi-Yong, and Liu Ran
Cluster-based Cooperative Back Propagation Network Approach for Intrusion Detection in MANET 1627
Min-Hua Shao, Ji-Bin Lin, and Yi-Ping Lee

Database Systems and Information Management

TMN-tree: New Trajectory Index Structure for Moving Objects in Spatial Networks 1633
Jae-Woo Chang, Myoung-Seon Song, and Jung-Ho Um
Group-Based Prime Number Labeling Scheme for XML Data 1639
Dongchan An and Seog Park
An Information Extraction Method for Digitized Textbooks of Traditional Chinese Medicine 1645
Wenhao Zhu, Shunlai Bai, Bofeng Zhang, Weimin Xu, and Daming Wei
Using Significant Classification Rules to Analyze Korean Customers' Power Consumption Behavior: Incremental Tree Induction using Cascading-and-Sharing Method 1649
Minghao Piao, Meijing Li, and Keun Ho Ryu
Transitive Association Rule Discovery by Considering Strategic Importance 1654
Doug Won Choi and Young Jun Hyun
Algorithms for Data Retrieval from Online Social Network Graphs 1660
Ruqayya Abdulrahman, Sophia Alim, Daniel Neagu, and Mick Ridley
Wearable Video Retrieval and Navigation System using GPS Data 1667
Datchakorn Tancharoen and Kiyoharu Aizawa
Gait Symmetry Analysis Based on Affinity Propagation Clustering 1673
Susu Jiang, Bofeng Zhang, Weimin Xu, and Daming Wei

Volume 2: ICESS-2010: The 7th IEEE International Conference on Embedded Software and Systems

Systems, Models and Algorithms (1)

Studying Filter Cache Bypassing on Embedded Systems 1679
Jie Tao, Dominic Hillenbrand, Lizhe Wang, and Holger Marten
SEPL: Smart Evicted Page List Buffer for NAND Flash Storage System 1687
Xin Jin, Sanghyuk Jung, and Yong Ho Song
CSDA: An Adaptive Data Storage Strategy for Predictive Branch Path on Multi-Core Architecture 1695
Zhang Jun, Mei Kui-Zhi, and Zhao Ji-Zhong
Touchware: A Software based Implementation for High Resolution Multi-touch Applications 1703
Xiaoling Wu, Bang Won Lee, Chulyong Joung, and Seeun Jang
SAT: A Stream Architecture Template for Embedded Applications 1711
Qianming Yang, Nan Wu, Mei Wen, Yi He, Huayou Su, and Chunyuan Zhang
Flexible Static Scheduling of Software with Logical Execution Time Constraints 1719
Patricia Derler and Stefan Resmerita
Efficient PC-FPGA Communication over Gigabit Ethernet 1727
Nikolaos Alachiotis, Simon A. Berger, and Alexandros Stamatakis
Towards Free Task Overloading in Passive Replication Based Real-time Multiprocessors 1735
Wei Sun, Naixue Xiong, Laurence T. Yang, and Chunming Rong

Systems, Models and Algorithms (2)

Real-time Adaptation and Load Balancing Aware OS Services for Distributed Reconfigurable System on Chip 1743
Sufyan Samara and Gunnar Schomaker
A Sufficient Condition for Rate Monotonic Schedulability Based on Response Time Analysis 1751
Sangchul Han, Moonju Park, and Minkyu Park
Performance and Power Consumption Analysis of DVFS-Enabled H.264 Decoder on Heterogeneous Multi-Core Platform 1758
Shau-Yin Tseng, Kuo-Hung Lin, Wen-Shan Wang, Chung-Ta King, and Shih-Hsueh Chang
Locality and Duplication-Aware Garbage Collection for Flash Memory-Based Virtual Memory Systems 1764
Seunggu Ji and Dongkun Shin
Guaranteeing Optional Task Completions on (m,k)-Firm Real-Time Systems 1772
Claude Evequoz
Hybrid of Job Sequencing and DVFS for Peak Temperature Reduction with Nondeterministic Applications 1780
Shaobo Liu, Meikang Qiu, Wenzhong Gao, Xiao-jun Tang, and Bin Guo
A Bypass Optimization Method for Network on Chip 1788
Wei Hu, Binbin Wu, Bin Xie, Tianzhou Chen, and Lianghua Miao

Adaptive Router Architecture for Optimising Quality of Service in Networks-on-Chip 1796
Ali Ahmadinia and Alireza Shahrabi

Systems, Models and Algorithms (3)

Leakage Aware Scheduling on Maximum Temperature Minimization for Periodic Hard Real-Time Systems 1802
Vivek Chaturvedi, Huang Huang, and Gang Quan
Leakage-Aware Scheduling for Real-Time Systems with (m,k)-Constraints 1810
Linwei Niu and Gang Quan
Global Register Alias Table: Executing Sequential Program on Multi-Core 1818
Chunhao Wang, Lihan Ju, Di Wu, Lingxiang Xiang, Wei Hu, and Tianzhou Chen
Combining Behavioural Real-time Software Modelling with the OSCI TLM-2.0 Communication Standard 1825
Ke Yu and Neil Audsley
Predicting Events for the Simulation of Hybrid Systems 1833
Kerstin Bauer and Klaus Schneider
Dynamic Workload Prediction for Soft Real-Time Applications 1841
Florian Kluge, Sascha Uhrig, Jörg Mische, Benjamin Satzger, and Theo Ungerer
Dynamic Resource Provision in Multi-Channel P2P Live Streaming Systems 1849
Xiaoqun Yuan, Hao Yin, Xuening Liu, Changlai Du, and Geyong Min
Timely Recovery from Task Failures in Non-preemptive, Deadline-driven Schedulers 1856
Michael Short and Imran Sheikh
Mixed-Criticality Real-Time Scheduling for Multicore Systems 1864
Malcolm S. Mollison, Jeremy P. Erickson, James H. Anderson, Sanjoy K. Baruah, and John A. Scoredos
R-BATCH: Task Partitioning for Fault-tolerant Multiprocessor Real-Time Systems 1872
Junsung Kim, Karthik Lakshmanan, and Ragunathan (Raj) Rajkumar

Design Methodology and Tools (1)

SESAM: An MPSoC Simulation Environment for Dynamic Application Processing 1880
N. Ventroux, A. Guerre, T. Sassolas, L. Moutaoukil, G. Blanc, C. Bechara, and R. David
Model-Level Debugging of Embedded Real-Time Systems 1887
Wolfgang Haberl, Markus Herrmannsdoerfer, Jan Birke, and Uwe Baumgarten
Combining Target-independent Analysis with Dynamic Profiling to Build the Performance Model of a DSP 1895
Marco Lattuada and Fabrizio Ferrandi
Introducing Hardware-in-Loop Concept to the Hardware/Software Co-design of Real-time Embedded Systems 1902
Dogan Fennibay, Arda Yurdakul, and Alper Sen
A Model Checking Approach for Multi-core Time Partitions Design 1910
Georgiana Macariu

Design Methodology and Tools (2)

Superblock-Based Source Code Optimizations for WCET Reduction 1918
Paul Lokuciejewski, Timon Kelter, and Peter Marwedel
Coverage and Profiling for Real-Time Tiny Kernels 1926
Sital Prasad Kedia, Anusree Bhattacharjee, Rajeshwar Kailash, and Saurabh Dongre
Timing Analysis and Optimization of FlexRay Dynamic Segment 1932
Haibo Zeng, Arkadeb Ghosal, and Marco Di Natale
Towards a Generic Design Space Exploration Framework 1940
Tripti Saxena and Gabor Karsai
Reorganizing Data Blocks in Flash Memory by Program Translation 1948
Joon-Young Paik, Eun-Sun Cho, and Tae-Sun Chung

Embedded Applications and Interdisciplinary Topics

Response Time Analysis of the Abort-and-Restart Model under Symmetric Multiprocessing 1954
Jim Ras and Albert M.K. Cheng
Achieving Scalable Privacy Preserving Data Aggregation for Wireless Sensor Networks 1962
Rabindra Bista, Hye-Kyeom Yoo, and Jae-Woo Chang
Virtual Machine for Software Defined Radio: Evaluating the Software VM Approach 1970
Riadh Ben Abdallah, Tanguy Risset, Antoine Fraboulet, and Jérôme Martin
Real-time Non-invasive Detection of Timing-constraint Violations in Time-triggered Embedded Systems 1978
Kam L. Chan and Michael J. Pont
Dynamic Priority Assignment Scheme for Contract-Based Resource Management 1987
Marisol Garcia-Valls, Iria Estevez-Ayres, and Pablo Basanta-Val
An Algorithm of Micromouse Maze Solving 1995
Jianping Cai, Xuting Wan, Meimei Huo, and Jianzhong Wu

IWCSEI-2010: The Third International Workshop on Computer System Education and Innovation

Computer Science Courses Teaching Technology Reformation (1)

The Research on Teaching Method of Basics Course of Computer based on Cluster Analysis 2001
ZhiXin Tie, Rong Jin, Hong Zhuang, and ZhaoQing Wang
Study on the Industry Oriented Education for Computing of Ireland and Its Application 2005
Wu Tao, Chen Ya-ping, Ning Feng, and Gu Xi-Qian
Teaching Practice of Project-based VB Programming 2010
Hong Zhuang and Li Liu
Research on J2EE Teaching Based on Mainstream Open Source Frameworks 2014
Xiaoliang Xu and Weihua Hu

Research and Reformation of Online Practice Oriented Teaching in Programming Foundation Course 2018
Guiping Wang and Rui Feng
Construction of Role-Switch Model in College Information Technology Experiment Course 2025
Nanli Zhu, Tang Yun-ting, Jianghua Xuan, Bo Guan, and Man Zhao
Applying Role-Switch Model in College Information Technology Course 2029
Nanli Zhu, Meng Cheng, Jianbo Fan, and Rina Shu
Research and Practice on Constructing the Course of Programming Language 2033
Kaiyu Dai, Yiming Zhao, and Ronghua Chen

Mobil and Smartphone Technologies

A Software Architecture for Adapating Virtual Reality Content to Mobile Devices 2039
José Barbosa Dias Júnior, Marlus Dias Silva, Alexandre Cardoso, and Edgard Afonso Lamounier Júnior
Design and Implementation of Smartphone's Efficient E-mail Client Software 2046
Wen-Xiang Zhang and Xuan Zhang
Mobile Payment based on RFID-SIM Card 2052
Junwei Zou, Chu Zhang, Chongbo Dong, Chunxiao Fan, and Zhigang Wen
xFace: A Lightweight Web Application Engine on Multiple Mobile Platforms 2055
Fan Jiang, Zhigang Feng, and Lei Luo
Research on Mobile Web Applications End to End Technology 2061
Siyu Mi, Zhijie Qiu, and Lei Luo
Decompression Method for Massive Compressed Files in Mobile Rich Media Applications 2066
Houchen Li, Zhijie Qiu, and Lei Luo
Component-based Mobile Web Application of Cross-platform 2072
Biao Pan, Kun Xiao, and Lei Luo
Research on Mobile Web Application Phone Simulator 2078
Ziqiong Wang, Yanhong Peng, and Lei Luo

Software Systems and Alogrithms

The Coal Mining Safety Equipment's Intelligent Monitoring and Management of Being based on the Web-environment 2084
Shu-Fang Zhao and Li-Chao Chen
A Learning Spectrum Hole Prediction Model for Cognitive Radio Systems 2089
Zhigang Wen, Chunxiao Fan, Xiaoying Zhang, Yuexin Wu, Junwei Zou, and Jie Liu
CFCSS without Aliasing for SPARC Architecture 2094
Wang Chao, Fu Zhongchuan, Chen Hongsong, Ba Wei, Li Bin, Chen Lin, Zhang Zexu, Wang Yuying, and Cui Gang

Computer Science Courses Teaching Technology Reformation (2)

Research on Case Learning System for Engineering Subject - Software Engineering as an Example 2101
Zhaocheng Wang and Cheng Yang
Industry/University Collaboration: An Effective Way to Conduct Engineering Education Towards Undergraduates 2105
Huang Xiao Tao, Wu Chi, and Li Guilan
Applying Two New Methods to the Teaching of Computer Architecture 2109
Zhigang Gao, Ganggang Xue, Guojun Dai, and Xuehui Wei
Technical Research of Streaming Media Video Course Development Platform 2114
Li Qingsheng and Wang Jipeng
Discussion on the Teaching Reform of Single-chip Computer Base on Mode CDIO at Vocational College 2120
Baiqing Zhou, Xiuhui Kui, and Youtian Qu
Study on Evaluation Method of Practical Teaching: A Practical Teaching Test Analysis 2124
Haiwei Jin

Graph Algorithms and Mobile Technologies

Improvement of the Optimal Hamilton Circuit for Undirected Complete Graph 2129
Hua Liu, Huilai Zou, Lili Zhong, Chaonan Wang, and Youtian Qu
Non-recursive Algorithm of Tower of Hanoi Problem 2134
Fuwan Ren, Qifan Yang, Jiexin Zheng, and Hui Yan
Optimized Application and Practice of A* Algorithm in Game Map Path-Finding 2138
Huilai Zou, Lili Zong, Hua Liu, Chaonan Wang, Zening Qu, and Youtian Qu
Remainder Sign Analysis in Fixed-point Division 2143
Xuting Wan, Jianping Cai, and Qifan Yang
The Strategy of Advancing Mobile Web Application's Layout and Drawing 2148
Liankui Qiu, Panlong He, and Lei Luo
Caching Strategy on Mobile Rich Media Engine 2153
Xin Min, Jixian Zhang, and Lei Luo
Porting Mobile Web Application Engine to the Android Platform 2157
Yonghong Wu, Jianchao Luo, and Lei Luo

Prior Training and Education Technologies

The Development of Online Innovative Education Program in Our University 2162
Hu Wei-hua, Du Jiang-tao, Zhou Qi-li, Hong Dao-ping, and Wu Xiao-kai
Research and Practice of Experimental Teaching System for OPhone Technology Courses 2166
Jiali Bian, Jian Kuang, Xiaojun Chen, and Zhiwen Nie
Exploration on Cultivating OPhone Technology Talents in Universities 2170
Jian Kuang, Zhiwen Nie, Jiali Bian, and Lin Han
Micromouse Competition Training Method Based on 3D Simulation Platform 2174
Meimei Huo, Jianzhong Wu, Jianping Cai, and Bin Song

Smartphone Software Development Course Design Based on Android 2180
Wei Hu, Tianzhou Chen, Qingsong Shi, and Xueqing Lou
ISTS: An Integrated Simulation Training System for Education in Police College 2185
Shulong Li
Promoting Multi-Core Education via Special Training and Workshop Program 2191
Wei Hu, Tianzhou Chen, Jingwei Liu, and Qingsong Shi
Application of Concept Maps-based Anchored Instruction in Programming Course 2196
Liu Li, Haijun Mao, and Licheng Xu

Computer Science Courses Teaching Technology Reformation (3)

Reform and Practice in the Course "The Principle of Computer Organization" 2201
Qifan Yang and Jianping Cai
Reform and Practice of Programming Teaching Based on Applied Ability Building 2205
Yong Zhang and Hui Yan
Design of Teaching System for Computer Network Application Learning 2209
Liu Li, Tianzhou Chen, Qingsong Shi, and Wei Hu
Centralized Project-Based Teaching Approach in Database Application Development Training 2214
Gaoyan Zhang, Haifeng Ke, Minghui Wu, and Jun Liu
The Curriculum Reform of Database System Principle Based on Paperless Examination Platform 2218
Haifeng Ke, Gaoyan Zhang, and Minghui Wu

Network Systems and Courses

Research on Key Technologies of Building Home Control Based on the Wireless Network 2222
Si-You Xiao and Xuan Zhang
An Innovative Course about Network Storage and System Virtualization Technologies in PKU 2228
Xiaolin Wang, Xinxin Jin, Yingwei Luo, and Zhenlin Wang
Research on PID Control Algorithm of BP Network based on Two Axis Digital Control Turntable 2233
Jie Hao, Wenxiang Zhang, and Mingqing Ling
The Research and Application of "PBL Didactics" in the Computer Network Technology Course 2239
Haijun Mao and Li Liu

IWVT-2010: The 2010 International Workshop on Virtualization Technology

Implementation of Virtual Machine Monitor for ARM Architecture 2244
Akihiro Suzuki and Shuichi Oikawa
Virtual I/O Based on ScratchPad Memory for Embedded System 2250
Binbin Wu, Xiangsheng Tang, Hui Yuan, Qingsong Shi, Jiexiang Kang, and Tianzhou Chen
A Virtual Timing Device for Program Performance Analysis 2255
Wen-Chang Hsu, Shih-Hao Hung, and Chia-Heng Tu

Cache Effects of Virtual Machine Placement on Multi-Core Processors 2261
Wesley Emeneker and Amy Apon
I/O Virtualization Architecture for Security 2267
J. Lakshmi and S.K. Nandy
Detecting and Analyzing VM-exits 2273
Xiaolin Wang, Binbin Zhang, Haogang Chen, Xinxin Jin, Yingwei Luo, Xiaoming Li, and Zhenlin Wang
Data Hiding in Virtual Machine Disk Images 2278
Yu Su, Xiaofei Liao, Hai Jin, and Tim Bell
A Dynamic Binary Translation Framework Based on Page Fault Mechanism in Linux Kernel 2284
Fan Xu, Li Shen, and Zhiying Wang

ESA-2010: International Symposium on Advanced Topics on Embedded Systems and Applications

Embedded Systems and Algorithms

Sorena: New on Chip Network Topology Featuring Efficient Mapping and Simple Deadlock Free Routing Algorithm 2290
Majid Janidarmian, Vahhab Samadi Bokharaie, Ahmad Khademzadeh, and Misagh Tavanpour
Augmenting NoC with Naming Service for Slot-based Reconfigurable Devices on Chip 2300
Li-ke Yan, Yuan Wen, Man Cao, Tian-zhou Chen, and De-gui Feng
Sparse Matrix-Vector Multiplication Based on Network-on-Chip in FPGA 2306
Chi-Chia Sun, Jürgen Götze, Hong-Yuan Jheng, and Shanq-Jang Ruan
A New Specification-based Test Data Generation Strategy for OSEK OS 2311
Lin Zhou, Min Yao, Yongjun Li, Chengshuo Zhang, and Liujie Yao
Project-Oriented Laboratory with Cross Platform Software Programming for Embedded System Education 2317
Wenjing Lv, Lili Ye, Zhewen Wang, Zhengguo Yang, and Yikui Zhang
PUF-based Encryption Processor for the RFID Systems 2323
Wonseok Choi, Sungsoo Kim, Yonghwan Kim, Yongsoo Park, and Kwangseon Ahn
Design and Implementation of a Heterogeneous High-performance Computing Framework using Dynamic and Partial Reconfigurable FPGAs 2329
Xingjun Zhang, Yanfei Ding, Yiyuan Huang, and Xiaoshe Dong
A Rectangle-Intersection Algorithm with Limited Resource Requirements 2335
Frank Dévai and László Neumann
Towards a Cyber-Physical Architecture for Industrial Systems via Real-Time Java Technology 2341
Pablo Basanta-Val, Marisol García-Valls, and Iria Estévez-Ayres
A Time-Triggered Communication Protocol for CAN-based Networks with a Fault-Tolerant Star Topology 2347
Amir Muhammad and Michael J. Pont

Scheduling Approach for Static Segment using Hybrid Genetic Algorithm in FlexRay Systems 2355
Shan Ding
Interpretation of AADL Behavior Annex into Synchronous Formalism Using SSA 2361
Yue Ma, Jean-Pierre Talpin, and Thierry Gautier

Design and Implementation of Embedded Systems

Integer Promotion Elimination on Abstract Syntax Tree 2367
Qing'an Li, Yanxiang He, Lei Zhou, Wei Wu, and Yong Chen
Separating Functional and Dependability Requirements of Embedded Systems 2373
Zhe Chen and Gilles Motet
Towards Estimating Physical Properties of Embedded Systems using Software Quality Metrics 2381
Ulisses Brisolara Corrêa, Luis Lamb, Luigi Carro, Lisane Brisolara, and Júlio Mattos
FPGA-based Implementation of Efficient Sample Rate Conversion for Software Defined Radios 2387
Muhammad Ali Siddiqi, Nabeel Samad, Shahid Masud, and Faheem Sheikh
Implementing Medical CT Algorithms on Stand-alone FPGA Based Systems Using an Efficient Workflow with SysGen and Simulink 2391
Zhiqiang Que, Yongxin Zhu, Xuan Wang, Jibo Yu, Tian Huang, Zhe Zheng, Li Yang, Feng Zhao, and Yuzhuo Fu
Tour-Guide: Providing Location-Based Tourist Information on Mobile Phones 2397
Xiaoyu Shi, Ting Sun, Yanming Shen, Keqiu Li, and Wenyu Qu

Application of Embedded Systems

A Pervasive Temporal Error Concealment Algorithm for H.264/AVC Decoder 2402
Xingang Liu, Kwanghoon Sohn, Laurence T. Yang, and Wei Zhu
An Extensible Hash Function Construction Based on Embedded Chaos Maps 2407
Xiaohong Zhang, Yixian Yang, Lixiang Li, and Haipeng Peng
Embedded Implementation of a SIP Server Gateway with Forward Error Correction to a Mobile Network 2415
I. Lopetegui, R.A. Carrasco, S. Boussakta, and O. Azpitarte
Android on Mobile Devices: An Energy Perspective 2421
Kolin Paul and Tapas Kumar Kundu
The Embedded Application of Wireless Short-distance Communication Technology in Vehicle Diagnosis Process 2427
Haijun Zhao and Yikui Zhang
Low Effort Evaluation of Real-Time and Reliability Requirements for Embedded Systems 2433
Ralf Mitsching, Carsten Weise, Thomas Gatterdam, and Stefan Kowalewski
A Novel Power Tuning Anchors Localization Algorithm for Mobile Wireless Sensor Nodes 2441
Sohail Jabbar, Muhammad Zubair Aziz, Abid Ali Minhas, and Danial Hussain

Volume 3: ScalCom-2010: The 10th IEEE International Conference on Scalable Computing and Communications

Scalable Computing (1)

Private and Secure Service Discovery Using Incrementally Progressive Exposure and Random Match 2447
Zhong Yuan Li, Sung Keun Song, Sukjung Yong, and Hee Yong Youn

EBDA: An Effective Bottom-up Discretization Algorithm for Continuous Attributes 2455
Yu Sang, Keqiu Li, and Yanming Shen

A New Sensitive Data Aggregation Scheme for Protecting Integrity in Wireless Sensor Networks 2463
Rabindra Bista, Hye-Kyeom Yoo, and Jae-Woo Chang

Robust H.264/AVC Video Transmission using Data Partitioning and Unequal Loss Protection 2471
Xingjun Zhang, Xiaohong Peng, Scott Fowler, and Dajun Wu

Dynamic Load Balancing in Parallel KD-Tree k-Means 2478
Giuseppe Di Fatta and David Pettinger

System Design of a Super-Peer Network for Content-Based Image Retrieval 2486
Sahar M. Ghanem, Mohamed A. Ismail, and Samia G. Omar

Scalable Computing (2)

A Hierachical VoIP System Based on Peer-to-Peer SIP: A Manageable Approach 2494
Linchen Yu, Xiaofei Liao, Hai Jin, and Pengcheng Qin

A Rental-Based Approach in a Cluster or a Grid Environment 2501
Amril Nazir, Hao Liu, and Søren-Aksel Sørensen

A Novel Approach for Finding Candidate Locations for Online FPGA Placement 2509
W. Hu, C. Wang, J.L. Ma, T.Z. Chen, and D. Chen

Network Main Memory Architecture for NoC-Based Chips 2516
Xingsheng Tang, Binbin Wu, Tianzhou Chen, Wei Hu, Jiexiang Kang, and Zhenwei Zheng

A Framework for Sharing Heterogeneous Grid Resources in a Campus Environment 2524
Tiejun Ma, Xin Xiong, and David Wallom

Understanding Resource Provisioning for ClimatePrediction.net 2532
Malik Shahzad K. Awan and Stephen A. Jarvis

An Extended SNMP-based Management of Digital Convergence Devices 2540
Gil Heo, Eunhoe Kim, and Jaeyoung Choi

Collusion Detection and Prevention with FIRE+ Trust and Reputation Model 2548
Basit Qureshi, Geyong Min, and Demetres Kouvatsos

Network Technologies and Applications (1)

On the Study of Radio Resource Allocation of Heterogeneous Services with Soft QoS Traffics in OFDMA-based Wireless Networks 2556
Xing Zhang, Lei Fu, Xin Wu, and Wenbo Wang

Queue Analysis of Finite Buffer for Self-Similar Traffic in Three-node Cooperative Relay Wireless Networks 2562
Jing Xiao, Xiaodong Ji, Xing Zhang, Shuping Chen, and Wenbo Wang
Bargaining Game and Cross-layer Design Based Optimization Strategy in Wireless Multi-hop Network 2570
Xinyu Chen, Li Xu, and Jie Li
Research on Performance Estimation Model of Distributed Network Simulation Based on PDNS Conservative Synchronization Mechanism in Complex Environment 2576
Yu Xiangzhan, Wu Gang, Jin Dailiang, and Li Wei
Investigation of PHY, MAC and APP Layers for Adaptive and Cross-Layer Optimization in IEEE802.11 WLAN 2581
Mirghiasaldin Seyedebrahimi and Xiao-Hong Peng
An Efficient VoD Scheme Providing Service Continuity for Mobile IPTV in Heterogeneous Networks 2589
Sun Sik Park, Myung Jin Hwang, Sung Soo Moon, and Hee Yong Youn

Network Technologies and Applications (2)

Multi-Phase Correlator-based Realistic Clock Synchronization for Wireless Networks on IEEE 802.15.4 2596
Hyuntae Cho, Hyunsung Jang, and Yunju Baek
Implementation of a PTP Bridge to Extend IEEE 1588 to Zigbee Networks 2604
Hyuntae Cho, Youngwoo Jin, Jusik Heo, and Yunju Baek
P2P-TV Service and User Characterization 2612
José Mendes, Paulo Salvador, and António Nogueira
A Novel Routing Algorithm for Achieving Static Fault-Tolerance in 2-D Meshes 2621
F. Safaei and A. Mortazavi
SAFE: A Secure Area of Interests Filter for P2P-based MMOGs 2628
Jianan Hao and Suiping Zhou
Implementation and Performance for Lawful Intercept of VoIP Calls based on SIP Session Border Controller 2635
Menghui Yang, Hua Liu, and Tonghong Li

Network Technologies and Applications (3)

Prediction Model for Tiered Accuracy Requirements in Large-scale Object Tracking Sensor Networks 2643
Guangcheng Qin, Panlong Yang, Qiang Chen, Hao Yin, and Kai Lin
Cross-layer Design for Multiuser OFDMA Systems with Cooperative Game and MMPP Queuing Considerations 2649
Ilias G. Nikolaros, Charilaos C. Zarakovitis, Dionysios Skordoulis, Marios G. Hadjinicolaou, and Qiang Ni
Performance Analysis of Secondary Users in Dynamic Spectrum Access under Interference Temperature Constraints 2655
Zhi Yan, Xing Zhang, and Wenbo Wang

A New Link Lifetime Prediction Method for Greedy and Contention-based Routing in Mobile Ad Hoc Networks 2662
Hadi Noureddine, Qiang Ni, Geyong Min, and Hamed Al-Raweshidy
Fair Early Drop: An Active Queue Management Scheme for the Control of Unresponsive Flows 2668
Ghadah Aldabbagh, Miguel Rio, and Izzat Darwazeh
A New Approach in Improving Operational Efficiency of Wireless Response System 2676
Joan Lua, Zhaozong Meng, Gehao Lu, and John B. Stav
Performance of Structure Based Multicast Routing Protocols in Wireless Ad hoc Networks 2684
M. Bala Krishna and M.N. Doja

Parallel and Distributed Systems (1)

Impacts of Inaccurate Information on Resource Allocation for Multi-Core Embedded Systems 2692
Jiayin Li, Meikang Qiu, Jianwei Niu, Meiqin Liu, Bin Wang, and Jingtong Hu
On Post-Generation Data Operations in Secure Distributed Storage Systems with Internal Padding 2698
Feng Shen, Hai Jiang, and Zhiqian Xu
Distributed Lock Manager for Distributed File System in Shared-Disk Environment 2706
Sungchune Choi, Minseuk Choi, Chunkyeong Lee, and Hee Yong Youn
An Asymmetric Data Conversion Scheme based on Binary Tags 2714
Zhu Wang, Chonglei Mei, Hai Jiang, and Gregory A. Wilkin
A Synthesized Data Mining Algorithm Based on Clustering and Decision Tree 2722
Ji Dan, Qiu Jianlin, Gu Xiang, Chen Li, and He Peng

Parallel and Distributed Systems (2)

Hybrid OpenCL: Connecting Different OpenCL Implementations over Network 2729
Ryo Aoki, Shuichi Oikawa, Ryoji Tsuchiyama, and Takashi Nakamura
SAMR: A Self-adaptive MapReduce Scheduling Algorithm in Heterogeneous Environment 2736
Quan Chen, Daqiang Zhang, Minyi Guo, Qianni Deng, and Song Guo
A Framework for Performance Evaluation of Large-scale Interactive Distributed Virtual Environments 2744
Duong Ta, Thang Nguyen, Suiping Zhou, Xueyan Tang, Wentong Cai, and Rassul Ayani
Service Level Agreements in a Rental-based System 2752
Amril Nazir, Hao Liu, and Søren-Aksel Sørensen
Distributed On-Chip Operating System for Network on Chip 2760
Wei Hu, Jianliang Ma, Binbin Wu, Lihan Ju, and Tianzhou Chan
Dynamic Reconfigurable Networks in NoC for I/O Supported Parallel Applications 2768
J.L. Ma, C. Wang, Y. Wen, T.Z. Chen, W. Hu, and J. Chen
Predictive and Dynamic Resource Allocation for Enterprise Applications 2776
M. Al-Ghamdi, A.P. Chester, and S.A. Jarvis

HMWN-2010: The International Workshop on Heterogeneous Multimedia Wireless Networks

Spectrum Usage Prediction Based on High-order Markov Model for Cognitive Radio Networks 2784
Yang Li, Yu-ning Dong, Hui Zhang, Hai-tao Zhao, Hai-xian Shi, and Xin-xing Zhao
Synchronization in Wireless Local Area Networks for Practical MIMO OFDM systems 2789
Muhammad Khurram Kiyani, Muhammad Usman Ahmed, and Asim Loan
Impact of Scatterer Density on the Performances of Double-Scattering MIMO Channels 2793
G.-C. Zhang, X.-H. Peng, and X.-Y. Gu
Minimum Node Degree and Connectivity of Two-dimensional MANETs under Random Waypoint Mobility Model 2800
Huihui Xiang, Jiakang Liu, and Jingming Kuang
Semantic Video Adaptation using a Preprocessing Method for Mobile Environment 2806
Hong-jie Huang, Xing-ming Zhang, and Zhi-wei Xu

IFSN-2010: The 2010 International Workshop on Frontiers of Secure Networks

An Efficient Collaborative Traceback Scheme Based on Packet Digests Logging 2811
Yan Dong, Wang Yu-long, Su Sen, and Yang Fang-chun
An Efficient Group Signature Scheme in Ferry-Based Delay-Tolerant Networks 2816
Ziming Song, Chunqing Wu, and Zhu Tang
The Research of Component-Based Dependable Software Development 2822
Bo Deng and Shuanghui Yi
Mix-zones Deployment for Location Privacy Preservation in Vehicular Communications 2825
Yipin Sun, Xiangyu Su, Baokang Zhao, and Jinshu Su
Privacy-preserving Data Aggregation Based on the P-function Set in Wireless Sensor Networks 2831
Wei-ni Zeng, Ya-ping Lin, and Lei Wang
A Distributed Query Protocol for Continuous Privacy Preserving in Wireless Sensor Networks 2837
Baokang Zhao, Xiangyu Su, Yipin Sun, Jinshu Su, and Shanshan Li
Towards Detecting the Interaction Vulnerabilities in Large Distributed System 2843
Zhao Jinjing, Zhao Gang, Wen Yan, and Li Xiang
Analyzing and Correlating Security Events Using State Machine 2849
Feng Xuewei, Wang Dongxia, Zeng Jiemei, Ma Guoqing, and Li Jin

SEACUBE-2010: The Second International Workshop on Sensing and Acting in Ubiquitous Environments

Reliable Hybrid Service Discovery Protocol in Mobile Ad-Hoc Grid 2855
Askari Parichehreh, Bahman Javadi, Mehdi Sarikhani, and Fereshte Momeni

Query-based Energy-aware Protocol for Real-time Routing in Wireless Sensor Network 2861
Abid Ali Minhas, Sohail Jabbar, Raja Adeel Akhtar, and Waiser Mehmood

Model Checking of a Target Tracking Protocol for Wireless Sensor Networks 2867
Sania Bhatti, Jie Xu, and Mohsin Memon

Context-awareness in Battlefield using Ubiquitous Computing: Network Centric Warfare 2873
Yong-Woon Moon, Hae-Sun Jung, and Chang-Sung Jeong

An Extensible Sensor based Inferencing Framework for Context Aware Applications 2878
Henry Bruce, Giuseppe Raffa, Louis LeGrand, Jonathan Huang, Bernie Keany, and Rick Edgecombe

Efficient Localized Detection of Erroneous Nodes (ELDEN) 2884
Ralf Behnke, Jakob Salzmann, Stephan Simanowski, and Dirk Timmermann

Tessellating Cell Shapes for Geographical Clustering 2891
Jakob Salzmann, Ralf Behnke, and Dirk Timmermann

ATSC-2010: The 2nd International Workshop on Advanced Topics on Scalable Computing

A Reconfigurable Processor Architecture Combining Multi-core and Reconfigurable Processing Unit 2897
Like Yan, Binbin Wu, Yuan Wen, Shaobin Zhang, and Tianzhou Chen

Tree-Based Task Scheduling Model and Dynamic Load-Balancing Algorithm for P2P Computing 2903
Weiwei Lin and Wuyao Shen

Evaluating the Performance and Accuracy Impact of Trace Generation to the BigSim Emulator 2908
Yonggang Che, Chuanfu Xu, and Pingjing Lu

A Study on XML and Ontology-based Web Data Integration 2914
Li Yan-heng, Zhang Jin, and Peng YIng

iLife: A Novel Mobile Social Network Services on Mobile Phones 2920
Ting Sun, Xiaoyu Shi, Yanming Shen, Keqiu Li, and Wenyu Qu

Consistency Aware Dead Reckoning Threshold Tuning with Server Assistance in Client-Server-Based DVEs 2925
Yusen Li and Wentong Cai

Comparative Performance Evaluation of Non-Contiguous Allocation Algorithms in 2D Mesh-Connected Multicomputers 2933
Saad Bani-Mohammad, Ismail Ababaneh, and Mazen Hamdan

Minimization Algorithm of Unate Logic Functions 2940
Qiu Jianlin, Gu Xiang, Li Fen, Ji Dan, and He Peng

cCell: A S2S Compiler with Profiling Support for the Cell BE Architecture 2946
Xiuxiu Bai, Xingjun Zhang, Guofu Feng, Jinghua Feng, and Xiaoshe Dong

Cross Comparison on C Compilers' Reliability Impact on UNIX Based Fedora OS 2952
Anil Kumar Karna and Hengming Zou
Toward an Automatic Load Balanced Distribution Model in Conjugate Gradient Method for One-Dimensional One-Phase Oil Reservoir Simulation 2958
Leila Ismail and J.H. Abou-Kassem

FSC-2010: The 2nd International Symposium on Frontier of Scalable Communications

A Federated Broker Architecture for Large Scale Context Dissemination 2964
Saad Liaquat Kiani, Michael Knappmeyery, Nigel Baker, and Boris Moltchanov
User Centred Mobile Aided Learning System: Student Response System (SRS) 2970
Joan Lu, Raoul Pascal Pein, Gabrielle Hansen, Kjetil L. Nielsen, and John B. Stav
A Scalable, Bidirectional-Based Search Strategy to Generate Attack Graphs 2976
Junchun Ma, Yongjun Wang, Jiyin Sun, and Xiaofeng Hu
An Efficient Search Mechanism in Unstructured P2P Networks Based on Semantic Group 2982
Wenwu Shen, Sen Su, Kai Shuang, Fangchun Yang, and Jingshu Xia
