

# **2010 First IEEE International Conference on Smart Grid Communications**

**Gaithersburg, Maryland, USA  
4 – 6 October 2010**

**IEEE Catalog Number: CFP10SGC-PRT  
ISBN: 978-1-4244-6510-1**

# Smart Grid 2010 Table of Contents

## **T-MM1: New Concepts for a Smarter Power Grid**

*Chair: Peter Sauer, University of Illinois, Urbana-Champaign, United States*

**Energy Management System and Pervasive Service-Oriented Networks .....1**  
*Guanghua Yang, The University of Hong Kong, Hong Kong; and Victor O.K. Li, The University of Hong Kong, Hong Kong*

**Distributed Power Balancing for the FREEDM System .....7**  
*Ravi Akella, Missouri University of Science and Technology, United States; Fanjun Meng, Missouri University of Science and Technology, United States; Derek Ditch, Missouri University of Science and Technology, United States; Bruce McMillin, Missouri University of Science and Technology, United States; and Mariesa Crow, Missouri University of Science and Technology, United States*

**Compressing Electrical Power Grids .....13**  
*Zhifang Wang, University of Illinois at Urbana-Champaign, United States; Anna Scaglione, University of California at Davis, United States; and Robert J. Thomas, Cornell University, United States*

**High Assurance Smart Grid: Smart Grid Control Systems Communications Architecture .....19**  
*Thomas M. Overman, The Boeing Company, United States; and Ronald W. Sackman, The Boeing Company, United States*

**Views on Service Oriented Architectures in the Context of Smart Grids .....25**  
*Matthias Postina, OFFIS, Germany; Sebastian Rohjans, OFFIS, Germany; Ulrike Steffens, OFFIS, Germany; and Mathias Uslar, OFFIS, Germany*

## **T-MM2: Wide Area Monitoring and Control**

*Chairs: Gerald Fitzpatrick, NIST, United States; Mladen Kezunovic, Texas A&M, United States; James Thorp, Virginia Tech, United States*

**Calculation and Visualization of Power System Stability Margin Based on PMU Measurements .....31**  
*Michael Vaiman, V&R Energy Systems Research, Inc., United States; Marianna Vaiman, V&R Energy Systems Research, Inc., United States; Slava Maslennikov, ISO New England, United States; Eugene Litvinov, ISO New England, United States; and Xiaochuan Luo, ISO New England, United States*

**Delivery Requirements and Implementation Guidelines for the NASPInet Data Bus .....37**  
*David E. Bakken, Washington State University, United States; Carl H. Hauser, Washington State University, United States; and Harald Gjermundrød, University of Nicosia, Cyprus*

**Fault Detection and Localization in Smart Grid: A Probabilistic Dependence Graph Approach .....43**  
*Miao He, Arizona State University, United States; and Junshan Zhang, Arizona State University, United States*

**The Deployment of a Smart Monitoring System using Wireless Sensor and Actuator Networks .....49**  
*Nicola Bressan, University of Padova, Italy; Leonardo Bazzaco, University of Padova, Italy; Nicola Bui, Patavina Technologioes, Italy; Paolo Casari, University of Padova, Italy; Lorenzo Vangelista, Patavina Technologioes, Italy; and Michele Zorzi, University of Padova, Italy*

**Ontology Matching Approach to the Harmonization of CIM and IEC 61850 Standards .....55**  
*Rafael Santodomingo, Comillas Pontifical University, Spain; José Antonio Rodríguez-Mondéjar, Comillas Pontifical University, Spain; and Miguel Ángel Sanz-Bobi, Comillas Pontifical University, Spain*

## **T-MM3: Distributed Generation and Renewables**

*Chair: Mischa Schwartz, Columbia University, United States*

**Facilitating a Generic Communication Interface to Distributed Energy Resources - Mapping IEC 61850 to RESTful Services .....61**  
*Anders Bro Pedersen, Technical University of Denmark, Denmark; Einar Bragi Hauksson, Technical University of Denmark, Denmark; Peter Bach Andersen, Technical University of Denmark, Denmark; Bjarne Poulsen, Technical University of Denmark, Denmark; Chresten Træholt, Technical University of Denmark, Denmark; and Dieter Gantenbein, IBM Research, Zurich, Switzerland*

**A Primary Evaluation for Applicability of IEC 62056 to A Next-Generation Power Grid .....67**  
*Tetsuo Otani, Central Research Institute of Electric Power Industry, Japan*

**Cascading Failures in Smart Grid - Benefits of Distributed Generation .....73**  
*Xian Chen, University of Connecticut, United States; Hieu Dinh, University of Connecticut, United States; and Bing Wang, University of Connecticut, United States*

<b>Local Control of Reactive Power by Distributed Photovoltaic Generators .....</b>	<b>79</b>
<i>Konstantin Turitsyn, Los Alamos National Laboratory, United States; Petr Šulc, New Mexico Consortium, United States; Scott Backhaus, Los Alamos National Laboratory, United States; and Michael Chertkov, Los Alamos National Laboratory, United States</i>	
<b>Impacts of Communication Delay on the Performance of a Control Scheme to Minimize Power Fluctuations Introduced by Renewable Generation under Varying V2G Vehicle Pool Size .....</b>	<b>85</b>
<i>K. M. Liyanage, The University of Tokyo, Japan; A. Yokoyama, The University of Tokyo, Japan; Y. Ota, The University of Tokyo, Japan; T. Nakajima, The University of Tokyo, Japan; and H. Taniguchi, The University of Tokyo, Japan</i>	
<b>T-MA1: Topics in Advanced Metering</b>	
<i>Chair: Archan Misra, Telcordia Technologies, United States</i>	
<b>WattDepot: An Open Source Software Ecosystem for Enterprise-scale Energy Data Collection, Storage, Analysis, and Visualization .....</b>	<b>91</b>
<i>Robert Brewer, University of Hawaii at Manoa, United States; and Philip Johnson, University of Hawaii at Manoa, United States</i>	
<b>Who Controls the Off Switch? .....</b>	<b>96</b>
<i>Ross Anderson, Cambridge University, United Kingdom; and Shailendra Fuloria, Cambridge University, United Kingdom</i>	
<b>Leveraging Smart-Meters for Initiating Application Migration across Clouds for Performance and Power-Expenditure Trade-offs .....</b>	<b>102</b>
<i>Sumit Kumar Bose, Unisys Global Service India, India; Michael A. Salsburg, Unisys Corporation, United States; and Mohammad Firoj Mithani, Unisys Global Service India, India</i>	
<b>Dynamic Load Modeling of an HVAC Chiller for Demand Response Applications .....</b>	<b>108</b>
<i>Jonathan Berardino, Drexel University, United States; and Chika Nwankpa, Drexel University, United States</i>	
<b>Compressed Meter Reading for Delay-Sensitive and Secure Load Report in Smart Grid .....</b>	<b>114</b>
<i>Husheng Li, The University of Tennessee, United States; Rukun Mao, The University of Tennessee, United States; Lifeng Lai, University of Arkansas, United States; and Robert C. Qiu, Tennessee Technological University, United States</i>	
<b>T-MA2: Field Trials</b>	
<i>Chairs: Skip Ashton, Ember, United States; Gary Stuebing, Duke Energy, United States</i>	
<b>Modeling Power Transformers for the Design of SWER Line Coupling Networks .....</b>	<b>120</b>
<i>Cornelis J. Kikkert, James Cook University, Australia</i>	
<b>PRIME Interoperability Tests and Results from Field .....</b>	<b>126</b>
<i>Aitor Aruzuaga, ZIV Group, Spain; Inigo Berganza, Iberdrola, Spain; Alberto Sendin, Iberdrola, Spain; Manu Sharma, Current Technologies International, Switzerland; and Badri Varadarajan, Texas Instruments, United States</i>	
<b>Scalability of Smart Grid Protocols - Protocols and Their Simulative Evaluation for Massively Distributed DERs .....</b>	<b>131</b>
<i>Johannes Bergmann, Siemens AG, Germany; Christian Glomb, Siemens AG, Germany; Jürgen Götz, Siemens AG, Germany; Jörg Heuer, Siemens AG, Germany; Richard Kuntschke, Siemens AG, Germany; and Martin Winter, Siemens AG, Germany</i>	
<b>Substation Automated Data Analysis: Deployment Challenges .....</b>	<b>137</b>
<i>Mladen Kezunovic, TLI INC, United States; Tomo Popovic, TLI INC, United States; Scott Sternfeld, FirstEnergy Corporation, United States; Bruce Fardanesh, New York Power Authority, United States; Brian Clowe, CenterPoint Energy, United States; and Paul Myrda, EPRI, United States</i>	
<b>SmartGridLab: A Laboratory-Based Smart Grid Testbed .....</b>	<b>143</b>
<i>Gang Lu, Washington State University, United States; Debraj De, Washington State University, United States; and Wen-Zhan Song, Washington State University, United States</i>	

### **T-MA3: Electric Vehicles**

*Chair: Onur Altintas, Toyota InfoTechnology Center, Japan*

#### **Architecture and Communication of an Electric Vehicle Virtual Power Plant.....149**

*Bernhard Jansen, IBM Research - Zurich, Switzerland; Carl Binding, IBM Research - Zurich, Switzerland; Olle Sundström, IBM Research - Zurich, Switzerland; and Dieter Gantenbein, IBM Research - Zurich, Switzerland*

#### **Assessment Framework of Plug-in Electric Vehicles Strategies.....155**

*Aline Senart, Accenture, France; Scott Kurth, Accenture, United States; and Gaëlle Le Roux, Accenture, France*

#### **Interconnections and Communications of Electric Vehicles and Smart Grids .....161**

*Sebastian Käbisch, University of Passau, Germany; Anton Schmitt, Siemens AG, Germany; Martin Winter, Siemens AG, Germany; and Joerg Heuer, Siemens AG, Germany*

#### **Smart Grid Charger for Electric Vehicles Using Existing Cellular Networks and**

#### **SMS Text Messages.....167**

*Clark Hochgraf, Rochester Institute of Technology, United States; Rahul Tripathi, Rochester Institute of Technology, India; and Spencer Herzberg, Rochester Institute of Technology, United States*

#### **Locating PHEV Exchange Stations in V2G .....173**

*Feng Pan, Los Alamos National Laboratory, United States; Russell Bent, Los Alamos National Laboratory, United States; Alan Berscheid, Los Alamos National Laboratory, United States; and David Izraelevitz, Los Alamos National Laboratory, United States*

### **T-TM1: Control and Communication**

*Chair: Mardavij Roozbehani, MIT, United States*

#### **Spectral Analysis of Synchronization in a Lossless Structure-Preserving Power Network Model.....179**

*Florian Dörfler, UC Santa Barbara, United States; and Francesco Bullo, UC Santa Barbara, United States*

#### **A Framework for Optimizing Measurement-based Power Distribution under**

#### **Communication Network Constraints .....185**

*Michael G. Kallitsis, North Carolina State University, United States; George Michailidis, University of Michigan, United States; and Michael Devetsikiotis, North Carolina State University, United States*

#### **Communication Capacity Requirement for Reliable and Secure State Estimation in Smart Grid .....191**

*Husheng Li, The University of Tennessee, United States; Lifeng Lai, University of Arkansas, United States; and Robert C. Qiu, Tennessee Technological University, United States*

#### **Control Over a Hybrid MAC Wireless Network .....197**

*José Araújo, KTH - Royal Institute of Technology, Sweden; Yassine Ariba, KTH - Royal Institute of Technology, Sweden; Pangun Park, KTH - Royal Institute of Technology, Sweden; Henrik Sandberg, KTH - Royal Institute of Technology, Sweden; and Karl Henrik Johansson, KTH - Royal Institute of Technology, Sweden*

#### **Robust Broadcast-Communication Control of Electric Vehicle Charging .....203**

*Konstantin Turitsyn, Los Alamos National Laboratory, United States; Nikolai Sinitsyn, Los Alamos National Laboratory, United States; Scott Backhaus, Los Alamos National Laboratory, United States; and Michael Chertkov, Los Alamos National Laboratory, United States*

#### **GERI - Bell Labs Smart Grid Research Focus: Economic Modeling, Networking, and Security and Privacy .....208**

*Ken Budka, Bell Labs, Alcatel-Lucent, United States; Jayant Deshpande, Bell Labs, Alcatel-Lucent, United States; John Hobby, Bell Labs, Alcatel-Lucent, United States; Young-Jin Kim, Bell Labs, Alcatel-Lucent, United States; Vladimir Kolesnikov, Bell Labs, Alcatel-Lucent, United States; Wonsuck Lee, Bell Labs, Alcatel-Lucent, United States; Thomas Reddington, Bell Labs, Alcatel-Lucent, United States; Marina Thottan, Bell Labs, Alcatel-Lucent, United States; Chris A. White, Bell Labs, Alcatel-Lucent, United States; Jung-In Choi, Gachon Energy Research Institute, Kyungwon University, Korea, Republic of; Junhee Hong, Gachon Energy Research Institute, Kyungwon University, Korea, Republic of; Jinho Kim, Gachon Energy Research Institute, Kyungwon University, Korea, Republic of; Wonsuk Ko, Gachon Energy Research Institute, Kyungwon University, Korea, Republic of; Young-Woo Nam, Gachon Energy Research Institute, Kyungwon University, Korea, Republic of; and Sung-Yong Sohn, Gachon Energy Research Institute, Kyungwon University, Korea, Republic of*

## **T-TM2: False Data Injection and Privacy**

*Chair: Tim Polk, NIST, United States*

**Stealth Attacks and Protection Schemes for State Estimators in Power Systems .....214**  
*György Dán, KTH, Royal Institute of Technology, Sweden; and Henrik Sandberg, KTH, Royal Institute of Technology, Sweden*

**Malicious Data Attacks on Smart Grid State Estimation: *Attack Strategies and Countermeasures* .....220**  
*Oliver Kosut, Cornell University, United States; Liyan Jia, Cornell University, United States; Robert J. Thomas, Cornell University, United States; and Lang Tong, Cornell University, United States*

**False Data Injection Attacks in Electricity Markets .....226**  
*Le Xie, Texas A&M University, United States; Yilin Mo, Carnegie Mellon University, United States; and Bruno Sinopoli, Carnegie Mellon University, United States*

**Privacy for Smart Meters: Towards Undetectable Appliance Load Signatures .....232**  
*Georgios Kalogridis, Toshiba Research Europe Limited, United Kingdom; Costas Efthymiou, Toshiba Research Europe Limited, United Kingdom; Stojan Z. Denic, Toshiba Research Europe Limited, United Kingdom; Tim A. Lewis, Toshiba Research Europe Limited, United Kingdom; and Rafael Cepeda, Toshiba Research Europe Limited, United Kingdom*

**Smart Grid Privacy via Anonymization of Smart Metering Data .....238**  
*Costas Efthymiou, Toshiba Research Europe Limited, United Kingdom; and Georgios Kalogridis, Toshiba Research Europe Limited, United Kingdom*

**Towards a Framework for Cyber Attack Impact Analysis of the Electric Smart Grid.....244**  
*Deepa Kundur, Texas A&M University, United States; Xianyong Feng, Texas A&M University, United States; Shan Liu, Texas A&M University, United States; Takis Zourntos, Texas A&M University, United States; and Karen L. Butler-Purry, Texas A&M University, United States*

## **T-TM3: Networking for the Smart Grid**

*Chairs: Anjan Bose, Washington State University, United States; David Culler, University of California, Berkeley, United States; Jean-Philippe Vasseur, Cisco Systems, France*

**A Communication Stack over PLC for Multi Physical Layer IPv6 Networking.....250**  
*Cedric Chauvenet, Watteco, CITI, INRIA, France; Bernard Tourancheau, CITI Insa-Lyon, INRIA, LIP, France; Denis Genon-Catalot, LCIS, GrenobleINP, France; Pierre-Emmanuel Goudet, Watteco, France; and Mathieu Pouillot, Watteco, France*

**Agent Based Supervision of Zone 3 Relays to Prevent Hidden Failure Based Tripping .....256**  
*Shravan Garlapati, Virginia Polytechnic Institute and State University, United States; Hua Lin, Virginia Polytechnic Institute and State University, United States; Santhoshkumar Sambamoorthy, Virginia Polytechnic Institute and State University, United States; Sandeep K. Shukla, Virginia Polytechnic Institute and State University, United States; and James Thorp, Virginia Polytechnic Institute and State University, United States*

**Applicability Study of RPL with Local Repair in Smart Grid Substation Networks .....262**  
*Joydeep Tripathi, Drexel University, United States; Jaudelice C. de Oliveira, Drexel University, United States; and Jean-Philippe Vasseur, Cisco Systems, France*

**Hydro: A Hybrid Routing Protocol for Low-Power and Lossy Networks.....268**  
*Stephen Dawson-Haggerty, UC Berkeley, United States; Arsalan Tavakoli, UC Berkeley, United States; and David Culler, UC Berkeley, United States*

**Location Assisted Routing Techniques for Power Line Communication in Smart Grids .....274**  
*Mauro Biagi, University of Rome Sapienza, Italy; and Lutz Lampe, University of British Columbia, Canada*

**Low Cost Wireless Sensor Network in Distributed Generation .....279**  
*Gargi Bag, ABB, Sweden; Ritwik Majumder, ABB, Sweden; and Ki-Hyung Kim, Ajou University, South Korea*

## **T-TA1: Architectures for Communication**

*Chair: Anna Scaglione, University of California, Davis, United States*

**A Comparative Study of Data Storage and Processing Architectures for the Smart Grid .....285**  
*Mariá Arenas-Martínez, Massachusetts Institute of Technology, United States; Sergio Herrero-Lopez, Massachusetts Institute of Technology, United States; Abel Sanchez, Massachusetts Institute of Technology, United States; John R. Williams, Massachusetts Institute of Technology, United States; Paul Roth, SAP Labs, United States; Paul Hofmann, SAP Labs, United States; and Alexander Zeier, Hasso Plattner Institute, Germany*

<b>Modeling Smart Grid Applications with Co-Simulation .....</b>	<b>291</b>
<i>Tim Godfrey, EPRI - Electric Power Research Institute, United States; Sara Mullen, EPRI - Electric Power Research Institute, United States; David W. Griffith, NIST - National Institute of Standards and Technology, United States; Nada Golmie, NIST - National Institute of Standards and Technology, United States; Roger C. Dugan, EPRI - Electric Power Research Institute, United States; and Craig Rodine, EPRI - Electric Power Research Institute, United States</i>	
<b>Cognitive Radio for Smart Grid Communications .....</b>	<b>297</b>
<i>Abolfazl Ghassemi, University of British Columbia, Canada; Sara Bavarian, University of British Columbia, Canada; and Lutz Lampe, University of British Columbia, Canada</i>	
<b>Power Line Communications and the Smart Grid .....</b>	<b>303</b>
<i>Stefano Galli, Panasonic Corporation, United States; Anna Scaglione, University of California at Davis, United States; and Zhifang Wang, University of Illinois at Urbana-Champaign, United States</i>	
<b>On Wireless Sensors Communication for Overhead Transmission Line Monitoring in Power Delivery Systems .....</b>	<b>309</b>
<i>Ka-Shun Hung, University of Hong Kong, Hong Kong; Wai Kin Lee, University of Hong Kong, Hong Kong; Victor On-Kwok Li, University of Hong Kong, Hong Kong; King-Shan Lui, University of Hong Kong, Hong Kong; Philip .W.T. Pong, University of Hong Kong, Hong Kong; Kenneth K.Y. Wong, University of Hong Kong, Hong Kong; Guang-Hua Yang, University of Hong Kong, Hong Kong; and Jin Zhong, University of Hong Kong, Hong Kong</i>	
<b>ICT Reference Architecture Design based on Requirements for Future Energy Marketplaces .....</b>	<b>315</b>
<i>Christian Wietfeld, Dortmund University of Technology, Germany; Christian Müller, Dortmund University of Technology, Germany; Jens Schmutzler, Dortmund University of Technology, Germany; Steffen Fries, Siemens AG, Germany; Alla Heidenreich, Siemens AG, Germany; and Hans Joachim Hof, Siemens AG, Germany</i>	
<b>T-TA2: Secure Communication and Metering</b>	
<i>Chair: David McGrew, Cisco, United States</i>	
<b>Zero-configuration Identity-based Signcryption Scheme for Smart Grid .....</b>	<b>321</b>
<i>Hayden K.-H So, The University of Hong Kong, Hong Kong; Sammy H.M. Kwok, The University of Hong Kong, Hong Kong; Edmund Y. Lam, The University of Hong Kong, Hong Kong; and King-Shan Lui, The University of Hong Kong, Hong Kong</i>	
<b>Secure Information Aggregation for Smart Grids using Homomorphic Encryption .....</b>	<b>327</b>
<i>Fengjun Li, The Pennsylvania State University, United States; Bo Luo, The University of Kansas, United States; and Peng Liu, The Pennsylvania State University, United States</i>	
<b>Secure Lossless Aggregation for Smart Grid M2M Networks .....</b>	<b>333</b>
<i>Andrea Bartoli, CTTC, Spain; Juan Hernández-Serrano, UPC, Spain; Miguel Soriano, UPC, Spain; Mischa Dohler, CTTC, Spain; Apostolos Kountouris, Orange, France; and Dominique Barthel, Orange, France</i>	
<b>Application-Aware Secure Multicast for Power Grid Communications .....</b>	<b>339</b>
<i>Jianqing Zhang, University of Illinois at Urbana-Champaign, United States; and Carl A. Gunter, University of Illinois at Urbana-Champaign, United States</i>	
<b>Redundant Metering for Integrity with Information-Theoretic Confidentiality .....</b>	<b>345</b>
<i>David P. Varodayan, HP Labs, United States; and Grace Xingxin Gao, Stanford University, United States</i>	
<b>Intrusion Detection for Advanced Metering Infrastructures: Requirements and Architectural Directions .....</b>	<b>350</b>
<i>Robin Berthier, University of Illinois at Urbana-Champaign, United States; William H. Sanders, University of Illinois at Urbana-Champaign, United States; and Himanshu Khurana, University of Illinois at Urbana-Champaign, United States</i>	
<b>T-TA3: Smart Grid and Area Networks</b>	
<i>Chairs: Nada Golmie, NIST, United States; Himanshu Khurana, University of Illinois, Urbana-Champaign, United States</i>	
<b>A Methodology to Evaluate Wireless Technologies for the Smart Grid .....</b>	<b>356</b>
<i>Michael Souryal, NIST, United States; Camillo Gentile, NIST, United States; David Griffith, NIST, United States; David Cypher, NIST, United States; and Nada Golmie, NIST, United States</i>	

<b>Performance Analysis and Enhancements of Narrowband OFDM Powerline Communication Systems .....</b>	<b>362</b>
<i>Il Han Kim, Texas Instruments, United States; Badri Varadarajan, Texas Instruments, United States; and Anand Dabak, Texas Instruments, United States</i>	
<b>Coordination of Cloud Computing and Smart Power Grids .....</b>	<b>368</b>
<i>Amir-Hamed Mohsenian-Rad, University of Toronto, Canada; and Alberto Leon-Garcia, University of Toronto, Canada</i>	
<b>Quality of Service Networking for Smart Grid Distribution Monitoring .....</b>	<b>373</b>
<i>Wei Sun, Hefei University of Technology, China; Xiaojing Yuan, University of Houston, United States; Jianping Wang, Hefei University of Technology, China; Dong Han, University of Houston, United States; and Chongwei Zhang, Hefei University of Technology, China</i>	
<b>RF Mesh Systems for Smart Metering: System Architecture and Performance .....</b>	<b>379</b>
<i>Bill Lichtensteiger, Landis + Gyr AG, Switzerland; Branko Bjelajac, Landis + Gyr AG, Switzerland; Christian Mueller, TU Dortmund University, Germany; and Christian Wietfeld, TU Dortmund University, Germany</i>	
<b>Dynamic Data Forwarding in Wireless Mesh Networks .....</b>	<b>385</b>
<i>Tadashige Iwao, Fujitsu, Japan; Kenji Yamada, Fujitsu, Japan; Masakazu Yura, Fujitsu, Japan; Yuuta Nakaya, Fujitsu, Japan; Alvaro Cárdenas, Fujitsu, United States; Sung Lee, Fujitsu, United States; and Ryusuke Masuoka, Fujitsu, United States</i>	
<b>T-WM1: Pricing and Demand Response Models</b>	
<i>Chair: Tina Tsou, Huawei, China</i>	
<b>Incentive-based Energy Consumption Scheduling Algorithms for the Smart Grid.....</b>	<b>391</b>
<i>Stéphane Caron, ENS, France; and George Kesidis, Pennsylvania State University, United States</i>	
<b>Two Market Models for Demand Response in Power Networks .....</b>	<b>397</b>
<i>Lijun Chen, Caltech, United States; Na Li, Caltech, United States; Steven H. Low, Caltech, United States; and John C. Doyle, Caltech, United States</i>	
<b>Constructing Demand Response Models for Electric Power Consumption .....</b>	<b>403</b>
<i>John D. Hobby, Alcatel-Lucent Bell Labs, United States</i>	
<b>Residential Demand Response Using Reinforcement Learning.....</b>	<b>409</b>
<i>Daniel O'Neill, Stanford University, United States; Marco Levorato, Stanford University, United States; Andrea Goldsmith, Stanford University, United States; and Urbashi Mitra, University of Southern California, United States</i>	
<b>Optimal Real-time Pricing Algorithm Based on Utility Maximization for Smart Grid .....</b>	<b>415</b>
<i>Pedram Samadi, University of British Columbia, Canada; Amir-Hamed Mohsenian-Rad, University of British Columbia, Canada; Robert Schober, University of British Columbia, Canada; Vincent W.S. Wong, University of British Columbia, Canada; and Juri Jatskevich, University of British Columbia, Canada</i>	
<b>Minimizing the Electricity Bill of Cooperative Users under a Quasi-Dynamic Pricing Model .....</b>	<b>421</b>
<i>Safar Hatami, USC, United States; and Massoud Pedram, USC, United States</i>	
<b>T-WM2: Demand-Side Management and Implementation</b>	
<i>Chair: Michael Chertkov, Los Alamos National Laboratory, United States</i>	
<b>In-home Power Distribution Systems by Circuit Switching and Power Packet Dispatching .....</b>	<b>427</b>
<i>Tsuguhiro Takuno, Kyoto University, Japan; Megumi Koyama, Kyoto University, Japan; and Takashi Hikiyama, Kyoto University, Japan</i>	
<b>Demand Side Load Management Using a Three Step Optimization Methodology .....</b>	<b>431</b>
<i>Vincent Bakker, University of Twente, Netherlands; Maurice G. C. Bosman, University of Twente, Netherlands; Albert Molderink, University of Twente, Netherlands; Johann L. Hurink, University of Twente, Netherlands; and Gerard J. M. Smit, University of Twente, Netherlands</i>	
<b>Power Demand Shifting with Smart Consumers: A Platform for Power Grid friendly Consumption Control Strategies.....</b>	<b>437</b>
<i>Anett Schülke, NEC Europe Ltd., Germany; Jochen Bauknecht, NEC Europe Ltd., Germany; and Johannes Häussler, NEC Europe Ltd., Germany</i>	

<b>Control Mechanisms for Residential Electricity Demand in SmartGrids</b> .....	<b>443</b>
<i>Shalinee Kishore, Lehigh University, United States; and Lawrence V. Snyder, Lehigh University, United States</i>	
<b>Analytics and Transactive Control Design for the Pacific Northwest Smart Grid Demonstration Project</b> .....	<b>449</b>
<i>Pu Huang, IBM T. J. Watson Research Center, United States; Jayant Kalagnanam, IBM T. J. Watson Research Center, United States; Ramesh Natarajan, IBM T. J. Watson Research Center, United States; Don Hammerstrom, Battelle Memorial Institute, United States; Ron Melton, Battelle Memorial Institute, United States; Mayank Sharma, IBM T. J. Watson Research Center, United States; and Ron Ambrosio, IBM T. J. Watson Research Center, United States;</i>	
<b>T-WM3: Models for Service, Computation and Smart Grid Network Integration</b>	
<i>Chair: Howard Choe, Raytheon, United States</i>	
<b>Integrated Design and Implementation of Toronto's Smart Distribution Grid</b> .....	<b>455</b>
<i>Joshua Wong, Toronto Hydro Electric System Ltd., Canada; Andrea Vargas, Toronto Hydro Electric System Ltd., Canada; Ken Chadha, Toronto Hydro Electric System Ltd., Canada; Arjun Devdas, Toronto Hydro Electric System Ltd., Canada; Cheng Lin, Toronto Hydro Electric System Ltd., Canada; and Jigdel Kuyee, Toronto Hydro Electric System Ltd., Canada</i>	
<b>Agent-oriented Designs for a Self Healing Smart Grid</b> .....	<b>461</b>
<i>Steve Bou Ghosn, North Dakota State University, United States; Prakash Ranganathan, University of North Dakota, United States; Saeed Salem, North Dakota State University, United States; Jingpeng Tang, University of Minnesota Crookston, United States; Davin Loegering, North Dakota State University, United States; and Kendall E. Nygard, North Dakota State University, United States</i>	
<b>CIM, 61850, COSEM Standards used in a Model Driven Integration Approach to Build the Smart Grid Service Oriented Architecture</b> .....	<b>467</b>
<i>Pascale Brédillet, EDF Research and Development Division, France; Eric Lambert, EDF Research and Development Division, France; and Eric Schultz, EDF Research and Development Division, France</i>	
<b>Design of Low-Carbon Electric and Communication Infrastructure</b> .....	<b>472</b>
<i>Susumu Yoneda, Softbank Telecom Corp., Japan</i>	
<b>Ontology-based Resource Description and Discovery Framework for Low Carbon Grid Networks</b> .....	<b>477</b>
<i>Abdelhamid Daouadji, Ecole de Technologie Supérieure, Canada; Kim-Khoa Nguyen, Ecole de Technologie Supérieure, Canada; Mathieu Lemay, Inocybe Technologies Inc., Canada; and Mohamed Cheriet, Ecole de Technologie Supérieure, Canada</i>	
<b>Smart Grid Data Cloud: A Model for Utilizing Cloud Computing in the Smart Grid Domain</b> .....	<b>483</b>
<i>Sebnem Rusitschka, Siemens AG, Germany; Kolja Eger, Siemens AG, Germany; and Christoph Gerdes, Siemens AG, Germany</i>	
<b>Smart High Voltage Substation based on IEC 61850 Process Bus and IEEE 1588 Time Synchronization</b> .....	<b>489</b>
<i>James McGhee, RuggedCom Inc, Canada; and Maciej Goraj, RuggedCom Inc., Canada</i>	
<b>T-WA1: Smart Grid Services for Demand Response</b>	
<i>Chair: Sami Ayyorgun, Telcordia Technologies, United States</i>	
<b>Distributed Demand Management in Smart Grid with a Congestion Game</b> .....	<b>495</b>
<i>Christian Ibars, CTTC, Spain; Monica Navarro, CTTC, Spain; and Lorenza Giupponi, CTTC, Spain</i>	
<b>Demand Response Architecture: Integration into the Distribution Management System</b> .....	<b>501</b>
<i>Salman Mohagheghi, ABB, United States; James Stoupis, ABB, United States; Zhenyuan Wang, ABB, United States; Zhao Li, ABB, United States; and Hormoz Kazemzadeh, ABB, United States</i>	
<b>Use of Responsive Load to Supply Ancillary Services in the Smart Grid:Challenges and Approach</b> .....	<b>507</b>
<i>John D. Kueck, Oak Ridge National Lab, United States; Aaron F. Snyder, EnerNex, United States; Fangxing Li, University of Tennessee, United States; and Isabelle B. Snyder, Oak Ridge National Lab, United States</i>	
<b>Load Participation in Electricity Markets: Day-Ahead and Hour-Ahead Market Coupling with Wholesale/Transmission and Retail/Distribution Cost and Congestion Modeling</b> .....	<b>513</b>
<i>Michael C. Caramanis, Boston University, United States; Justin M. Foster, Boston University, United States; and Evegeniy A. Goldis, CRAI, United States</i>	

<b>Incentive Design for Lowest Cost Aggregate Energy Demand Reduction .....</b>	<b>519</b>
<i>Soumyadip Ghosh, IBM TJ Watson Research Center, United States; Jayant Kalagnanam, IBM TJ Watson Research Center, United States; Dmitry Katz, IBM TJ Watson Research Center, United States; Mark Squillante, IBM TJ Watson Research Center, United States; Xiaoxuan Zhang, State University of New York at Stony Brook, United States; and Eugene Feinberg, State University of New York at Stony Brook, United States</i>	
<b>Efficient Energy Delivery Management for PHEVs .....</b>	<b>525</b>
<i>Mahdi Kefayati, The University of Texas at Austin, United States; and Constantine Caramanis, The University of Texas at Austin, United States</i>	
<b>T-WA2: Networks and Resource Allocation</b>	
<i>Chair: Giuseppe Caire, University of Southern California, United States</i>	
<b>Towards Cooperative Grids: Sensor/Actuator Networks for Renewables Integration .....</b>	<b>531</b>
<i>Jay Taneja, University of California, Berkeley, United States; David Culler, University of California, Berkeley, United States; and Prabal Dutta, University of Michigan, Ann Arbor, United States</i>	
<b>Coordination and Control of Distributed Energy Resources for Provision of Ancillary Services .....</b>	<b>537</b>
<i>Alejandro D. Dominguez-Garcia, University of Illinois at Urbana-Champaign, United States; and Christoforos N. Hadjicostis, University of Cyprus, Cyprus</i>	
<b>Dynamic Pricing and Stabilization of Supply and Demand in Modern Electric Power Grids .....</b>	<b>543</b>
<i>Mardavij Roozbehani, MIT, United States; Munther Dahleh, MIT, United States; and Sanjoy Mitter, MIT, United States</i>	
<b>Efficient Algorithms for Renewable Energy Allocation to Delay Tolerant Consumers .....</b>	<b>549</b>
<i>Michael J. Neely, University of Southern California, United States; Arash Saber Tehrani, University of Southern California, United States; and Alexandros G. Dimakis, University of Southern California, United States</i>	
<b>On Efficient Use of Local Sources in Smart Grids with Power Quality Constraints.....</b>	<b>555</b>
<i>Daniele Forner, University of Padova, Italy; Tomaso Erseghe, University of Padova, Italy; Stefano Tomasin, University of Padova, Italy; and Paolo Tenti, University of Padova, Italy</i>	
<b>The POWER of Networking: How Networking can Help Power Management .....</b>	<b>561</b>
<i>Sedat Gormus, Toshiba Research Europe Limited, United Kingdom; Parag Kulkarni, Toshiba Research Europe Limited, United Kingdom; and Zhong Fan, Toshiba Research Europe Limited, United Kingdom</i>	
<b>T-WA3: Standards and Regulations</b>	
<i>Chairs: Lutz Lampe, University of British Columbia, Canada; David Su, NIST, United States</i>	
<b>A Unified Solution for Advanced Metering Infrastructure Integration with a Distribution Management System .....</b>	<b>566</b>
<i>Zhao Li, ABB, United States; Zhenyuan Wang, ABB, United States; Jean-Charles Tournier, ABB, United States; William Peterson, ABB, United States; Wenping Li, ABB, United States; and Yi Wang, Virginia Tech, United States</i>	
<b>Embedding Synchronism in SmartGrid with IEEE1588-based for Intelligent Electronics Devices.....</b>	<b>572</b>
<i>Victor Pallarés-López, University of Cordoba, Spain; Antonio Moreno-Muñoz, University of Cordoba, Spain; Juan José González de la Rosa, University of Cadiz, Spain; Rafael Real-Calvo, University of Cordoba, Spain; and Miguel Jesús González-Redondo, University of Cordoba, Spain</i>	
<b>Spectrum for Smart Grid .....</b>	<b>578</b>
<i>Brett Kilbourne, Utilities Telecom Council, United States; and Klaus Bender, Utilities Telecom Council, United States</i>	
<b>Survey of Smart Grid Standardization Studies and Recommendations .....</b>	<b>583</b>
<i>Sebastian Rohjans, OFFIS, Germany; Mathias Uslar, OFFIS, Germany; Robert Bleiker, OFFIS, Germany; José González, OFFIS, Germany; Michael Specht, OFFIS, Germany; Thomas Suding, OFFIS, Germany; and Tobias Weidelt, OFFIS, Germany</i>	
<b>Toward Digital Ecologies: Intelligent Agent Networks Controlling Interdependent Infrastructures .....</b>	<b>589</b>
<i>Valeriy Vyatkin, The University of Auckland, New Zealand; Gulnara Zhabelova, The University of Auckland, New Zealand; Mihaela Ulieru, University of New Brunswick, Canada; and Donald McComas, Eaton Corporation, United States</i>	
<b>Author Index .....</b>	<b>595</b>
