2010 Third International Conference on Business Intelligence and Financial Engineering

(BIFE 2010)

Hong Kong, China
13-15 August 2010

IEEE Catalog Number: CFP1021H-PRT
ISBN: 978-1-4244-7575-9

2010 Third International Conference on Business Intelligence and Financial Engineering

BIFE 2010

Table of Contents

Preface xiii

Organizing Committee xv

Program Committee xvi

Reviewers xx

Workshops xxii

Sponsors xxiii

Artificial Intelligence

The Properties of Spike-Rate Perceptron with Super-Poisson Input 1
Yonglin Wang, Xuyan Xiang, and Yingchun Deng

Comparison of Artificial Intelligence Based Techniques for Short Term Load Forecasting 6
Arash Ghanbari, Esmaeil Hadavandi, and Salman Abbasian-Naghneh

A Method for Selecting Optimum from Evaluation Schemes Based on Set Pair Analysis 11
Rong Chen and Chunsen Ye

A Binary Particle Swarm Optimization Based on Proportion Probability 15
Enxiu Chen, Zhenliang Pan, Yi Sun, and Xiyu Liu

The Optimization Method of Quick Response Manufacturing System Based on the Genetic Algorithm 20
Liang Liang and Bo Guo

Artificial Neural Networks

Self-Organizing Map for Clustering Algorithms in Programming Codes 24
Xingyin Zhu and Guojin Zhu
Evaluation Techniques for Oil Gas Reservoir Based on Artificial Neural Networks Techniques 28
Hongyan Yan Pan and Hong He
Energy Demand Estimation of China Using Artificial Neural Network 32
Jian Deng
Predicting Price of Target of Acquisitions Based on RBF Neural Network 35
Hongjiu Liu, Weimin Ma, and Yanrong Hu
Exchange Rate Prediction through ANN Based on Kernel Regression 39
Xian Hua, Defu Zhang, and Stephen C. H. Leung
Combined Forecast of the Demand of Office Building in Shanghai Based on Artificial Neural Network 44
Yingxiao Song and Daizhong Tang
Credit Evaluation Model and Application Based on Fuzzy Neural Network 48
Sulin Pang

Machine Learning

Automated Knowledge Acquisition from Discrete Data Based on NEWFM 53
Dong-Kun Shin, Sang-Hong Lee, and Joon S. Lim
The Algorithm of a Reference Compensation Current for Shunt Active Power Filter Control 57
Guichun Huang
Credit Risk Identification of Bank Client Basing on Supporting Vector Machines 62
Chunsheng Zhu, Yuanrui Zhan, and Shijun Jia

OLAP and Data Warehousing

Compression of OLAP Cubes for Aggregate Queries Based on Copula Approach 67
Yazhuo Gao, Zhiwei Ni, and Liping Ni
Realization of the Data Warehouse Design and the Anti-normalization Design by Using PowerDesigner 72
Hui Ma, Fan Zhang, and Yina Wu
A Space-Time Efficient Algorithm for Constructing QC-Tree 76
Yichen Li and Jianqing Xi
Ontology-Based Expertise Locator 81
Ping Liu and Kan Liu

E-Business and E-Commerce

The Digital Content of Manufacturer Gaming Based on the Stackberg Model 86
Chengxiong Zhou, Lanxiang Zhao, and Zhuojun Liu
Logistics Information Exchange Pattern Base on ebXML 91
Xuming Shangguan
Return in B2C E-Commerce Enterprises 95
Haoxiong Yang, Bin Xu, Yongsheng Zhou, Jingyun Zhang, and Dong Biao

Customer Behavior Analysis and Collaborative Business

Mechanism for a New Demand Forecasting Paradigm 'Individual Demand Forecasting' 99
Zhongjun Tang
Dynamic Pricing with Strategic and Myopic Consumers 104
Hui Yang, Huaming Song, and Song Zhang
Optimization of Bonus-Penalty Structure in Flexible Resources-Constrained Project Scheduling Problems from Both Sides of the Contract 109
Guorong Chai, Shitao Huang, Guoxing Zhang, and Yana Su
Model of Assessing Trunk Road Service Oriented by Users Demand 114
Xiaowei Li, Hong Chen, and Juan Sun

BI in Virtual Communities and Supply Chain Integration

The Constructing Method of Meta-requirement Analysis Model 118
Zhongjun Tang and Shuqin Liu
Framework Design for Intelligent Business Process-Oriented Knowledge-Sharing Platform 122
Lingling Zhang, Jun Li, Caiyu Zhang, Yong You, and Yong Shi
A New Estimation Method for Multivariate Markov Chain Model with Application in Demand Predictions 126
Dong-Mei Zhu and Wai-Ki Ching
Efficiency Evaluation on Two-Stage Production Using DEA 131
Ci Chen, Liandi Zhou, Ailing Wang, and Jie Huang

Asset Pricing and Valuation

Pricing Convertible Bond with Reset Clause of American Type 136
Qunfang Bao, Jingyang Yang, Shenghong Li, and Guimei Liu
Pricing Mitigation and Contagion Effect of Guaranteed Debt in Interacting Intensity Model 141
Songgong Li, Qunfang Bao, Shenghong Li, and Guimei Liu

A Dynamic Programming Approach to Real Option Valuation in Incomplete Markets 146
George Y. Wang
Modified Pricing Model for Synthetic Collateralized Debt Obligation (SCDO) 152
Zhongxing Ye and Lizhen Sun
Pricing Multiple Stock Warrants with Strategic Exercise 156
Jianquan Sun, Yumei Zi, and Xiaoxian Ma
Pricing Geometric Asian Options under Stochastic Volatility Framework 160
Yunfei Zhai and Shuguang Zhang
Pricing Perpetual American Option under the Fractional Black-Scholes Model 165
Wenli Huang, Shenghong Li, and Songyan Zhang
Pricing of Option with Power Payoff Driven by Mixed Fractional Brownian Motion 170
Xu Feng and Sun Quan
Non-competition Guarantee Value Model Research Based on Real Option 174
Guoxing Zhang, Guorong Chai, Ju-e Guo, Peng Wang, and Yong Xue
Applicability of Arbitrage Pricing Theory on Chinese Security Market 179
Yuxiang Yang, Zhongzhen Tan, and Jianguo Zou
Pricing Permanent American Capped-Call Option in EVG Model 183
Jinping Yu, Xiaofeng Yang, Shenghong Li, and Guimei Liu
Two-Factor Affine Term Structure Model of Interest Rates for Chinese Government Bond Pricing 187
Xiaoguang Wang and Rongxi Zhou

Portfolio Selection and Optimization

Credit Risk Contagion and Mitigation for Guaranty Portfolio 191
Songgong Li, Shenghong Li, Qunfang Bao, and Guimei Liu
The Comparison of the Optimal Portfolio Corresponding to Different Weight Functions 196
Ying-yu He
A Stochastic Model and a Portfolio Approach to the Optimal Forest Management 201
Jianwu Xiao, Wenxing Kang, and Shaohua Yin
Analysis of a Basket of Currencies Portfolio Based on Copula-GARCH Method 205
Xinhan Hu, Wuyi Ye, and Baiqi Miao
Asset and Liability Management for an Insurer with Jump-Diffusion Surplus Process under Mean-Variance Criterion 209
Huiling Wu and Zhongfei Li
Analysis of Investment Decision System for Oil Companies Based on System Dynamic Principles 214
Qing Wang, Baosheng Zhang, and Yongqing Shang
An ICA-MDN Based Multi-stage Model for Portfolio Value-at-Risk Analysis 218
Xiaoliang Chen, Kin Keung Lai, and Jerome Yen

Dynamic Portfolio Selection under Conditional Capital at Risk Constraint 223
Xiuguo Wang

Game Theory

Use of the Cooperative Game Model for Water Rights Trade 228
Li Wu, Jun-feng Tian, and Hui-cheng Zhou
Situation Distribution on a Symmetrical 3-Person 0-1 Game with Entropy 233
Dianyuu Jiang
A Game Analysis of Environmental Governance: A Case Study of Baosteel Group 238
Lanxiang Zhao, Zhiguo Cao, Huiqian Yu, Libin Yuan, and Chengxiong Zhou
Analysis of Penalty-Sharing of Reverse Supply Chain with Risk-Averse Collector 243
Gu Qiaolun and Gao Tiegang
Games-Based Brand Competition Strategy 247
Yanrong Hu, Chong Wu, and Hongjiu Liu
Sustainable Equilibrium Evaluation on Three Gorges Project 251
Kai-rong Hong and Ling Feng
Modeling of Boom and Burst of Shadow - A Game Theory Approach 256
Hwa Dong Liang, Kin Keung Lai, Jerome Yen, and Ming Wang

Corporate Governance

An Empirical Analysis on Determinant Factors of Environmental Information Disclosure: Evidence from A-Share Listed Firms in Shenzhen in China 261
Yongjun Tang and Geling Luo
Corporation Government, Performance and CEO Compensation 266
Xinhua Ju and Wenlei Ge
Improvement of Selection of Enterprise Informatization Dynamic Equilibrium Models with Theory of Second Best 270
Yiping Yang and Zhuang Wu

Financial Diagnosis and Bankruptcy Prediction

Analysis of Shadows behind Financial Bubbles 274
Hwa Dong Liang, Kin Keung Lai, and Jerome Yen
The Value Quality Evaluating Model of the Listed Companies under the Background of Accounting Information Distortion 279
Hong Yao
Does Holistic Listing Improve the Efficiency of China's Listed Companies? 283
Jianhuan Huang, Jie Xia, and Zhujia Yin
Chaos Problem Cumulative Effects Research on Rural Financial Innovation 288
Haoquan Wang and Guoxing Zhang
Profitability of SSE 50 Sample Companies Frow the View of EVA 292
Qilin Ding

A Nonparametric Kernel Regression Method for the Recognition of Visual Technical Patterns in China's Stock Market 296
Zhigang Wang, Yong Zeng, and Ping Li

Financial Time Series Forecasting and Analysis

Multifractal Detrended Cross-Correlation Analysis of Chinese Stocks 301
Jingliang Sun and Huanye Sheng
A Multiresolution Wavelet Based Analysis of the Chinese Stock Market 305
Ling Huang, Changdong Wang, and Song Qin
An Empirical Analysis on Effect of Monetary Policy in China (1995-2009) 310
Chaohua Xie, Lisheng Jiang, and Zhong Li
Import Demand of Crude Oil and Economic Growth in China: Evidence from the ARDL Model 314
Wei Sun, Zhongying Qi, and Niannian Jia
Research on Volatility of Open-Ended Funds in Chinese Financial Market 319
Handong Li, Lei Li, and Jing Jia
Long-Term Memory in Realized Volatility: Evidence from Chinese Stock Market 323
Shi-nan Cao, Han-dong Li, and Yan Wang
An Improved K-Line Fractal Dimension and Its Application on Stock Time Series Segmentation 328
Liping Ni, Zhiwei Ni, and Yazhuo Gao
Empirical Analysis of Factors Influencing China's Stock Market 332
Ling Feng and Shufen Tu
Developing a Time Series Model Based on Particle Swarm Optimization for Gold Price Forecasting 337
Esmaeil Hadavandi, Arash Ghanbari, and Salman Abbasian-Naghneh

Financial Risk Management

Innovating Risk Management and Hedging Strategy for Convertible Bonds Using Support Vector Machine 341
Chuanhe Shen, Xiangrong Wang, and Linna Guo
Constructing Risk Measurement Models by Quantile Regression Method 346
Shide Ou and Danhui Yi
Extending Options by Changing Their Underlying Assets: An Anti-crisis Solution 351
Jian Wu
Measure Exchange Rate Risk Using GARCH Model and Extreme Value Theory 355
Jie Yang and Shaozong Zhang
Expected Shortfall and It's Application in Credit Risk Measurement 359
Yulian Fan, Guodong Li, and Meng Zhang

Nonlinear VaR Model of Options Portfolio under Multivariate Mixture of Normals Distributions 364
Rongda Chen, Dan Cao, and Qingyang Yu
Examining the Uncertainty-Investment Relationship under Alternative Stochastic Processes 369
George Y. Wang
Systemic Jump in Chinese Stock Market 376
Peng Hao
Value-at-Risk Estimation of Crude Oil Price via Morphological Component Analysis 381
Kaijian He, Kin Keung Lai, and Jerome Yen
Construction of Local Government Debt Risk Early Warning System 386
Jun Zhao and Xixia Wang
Market Failure and Supply Model of Chinese Agricultural Insurance 390
Deping Zhan and Bingyu Cao
The Role of Jump Factor in Default Risk of Listed Company in China 395
Ran Huang and Qiming Tang
Does Price Limit Affect the Autocorrelation of Stock Return Series? A Monte Carlo Experiment 399
Xicai Guo, Zhi'an Liang, and Yue Fang
Dynamic Linkages between the European and US Stock Markets 403
Ling Xiao and Gurjeet Dhesi

Financial Engineering Analysis and Applications

The Comparison of Stock Contract and Options Contract 408
Caiyu Zhang, Benshan Shi, Daoqi Hou, and Keping Lu
An Empirical Study of Three Rounds Trading Model of Foreign Exchange Market 414
Yanjun Xiao and Ruoen Ren
Decentralized Investment, Manager Structure and Firm Performance 418
Xiaoxian Ma, Jilin Qu, and Jianquan Sun
Comparison of Performance of Structural Models: Evidence from China 422
Xiaoqing Li
Investor Sentiments and Stock Market Volatility 427
Changsheng Hu and Qi Liu
Export Rebate and Export Performance: From the Respect of China's Economic Growth Relying on Export 432
Chen Xie, Zhuowan Liu, Lili Liu, Lin Zhang, Yuan Fang, and Lanxiang Zhao
Mutual Relationship between NIFTY Stock Index Future and Spot Markets 437
Xiaofeng Zhang and Ling Lv
The Reverse-Disposition Effect: Theory and Evidence 442
Limin Wang, Shinan Cao, Mingyu Yuan, and Jing Cheng

Urban Public Pension, Two-Sector Production and Endogenous Growth 445
Zaigui Yang
Measuring Price Deviation to Define Volatility and the State of Price: A Study
on Four Major World Indexes 450
Sim Kwan Hua and Sim Chia Hua

Author Index 455
