2010 Second International Conference on Advances in System Testing and Validation Lifecycle

(VALID 2010)

Nice, France
22-27 August 2010

IEEE

IEEE Catalog Number: CFP1071H-PRT
ISBN: 978-1-4244-7784-5

2010 Second International Conference on Advances in System Testing and Validation Lifecycle

VALID 2010

Table of Contents

Preface....viii

Committee....x

Reviewers....xiii

VALID 1: Software Verification and Validation I

Argument-Driven Validation of Computer Simulations - A Necessity, Rather than an Option 1
Teodor Ghetiu, Fiona A.C. Polac, and James Bown

Model-Based Testing of Infotainment Systems on the Basis of a Graphical Human-Machine Interface 5
Linshu Duan, Alexander Höfer, and Heinrich Hussmann

A Hybrid Approach for Model-Based Random Testing 10
Stefan Mohacsi and Johannes Wallner

Unsteady Ground: Certification to Unstable Criteria 16
Joe Loughry

VALID 2: Software Verification and Validation II

Dihomotopic Deadlock Detection via Progress Shell Decomposition 20
David A. Cape, Stephen C. Jackson, and Bruce M. McMillin

Analysis of Testability Metrics for Lustre/Scade Programs 26
Lydie du Bousquet, Michel Delaunay, Huy-Vu Do, and Chantal Robach

Hybrid Approach for Protocol Testing of LTE System: A Practical Case Study 32
Juho Perälä, Petri Jurmu, and Jarno Pinola

Runtime Testability in Dynamic High-Availability Component-Based Systems 37
Alberto Gonzalez-Sanchez, Éric Piel, Hans-Gerhard Gross, and Arjan J.C. van Gemund

VALID 3: Software Verification and Validation III

The SQALE Analysis Model: An Analysis Model Compliant with the Representation Condition for Assessing the Quality of Software Source Code 43
Jean-Louis Letouzey and Thierry Coq
Discretizing Technical Documentation for End-to-End Traceability Tests 49
Keith Stobie, Nicolas Kicillof, and Wolfgang Grieskamp
Automated Verification of Shared Libraries for Backward Binary Compatibility 57
Andrey Ponomarenko and Vladimir Rubanov
Investigation of OSCI TLM-2.0 Employment in Grid Computing Simulation 63
Mina Zolfy, Ziaddin Daie Koozehkanani, Leili Mohammadkhanli, and Zianalabedin Navabi
Variability Management in Embedded Product Line Analysis 69
Lorea Belategi, Goiuria Sagardui, and Leire Etxeberria

VALID 4: Defects and Debugging

Interacting Entities Modelling Methodology for Robust Systems Design 75
Vitaliy Mezhuyev, Bernhard Sputh, and Eric Verhulst
Defective Behaviour of an 8T SRAM Cell with Open Defects 81
R. Rodríguez-Montañés, D. Arumí, S. Manich, J. Figueras, S. Di Carlo, P. Prinetto, and A. Scionti
Using Hardware Performance Counters for Fault Localization 87
Cemal Yilmaz
An Approach for Classifying Program Failures 93
Burcu Ozcelik, Kubra Kalkan, and Cemal Yilmaz

VALID 5: Testing Techniques and Mechanisms

On the Standardization of a Testing Framework for Application Deployment on Grid and Cloud Infrastructures 99
Thomas Rings, Jens Grabowski, and Stephan Schulz
A Tool-Based Methodology for System Testing of Service-Oriented Systems 108
Michael Felderer, Philipp Zech, Frank Fiedler, and Ruth Breu
Automated Security Test Approach for SIP-based VoIP Softphones 114
Stefan Taber, Christian Schanes, Clemens Hlauschek, Florian Fankhauser, and Thomas Grechenig
Precise QoS Metrics Monitoring in Self-Aware Networks 120
Maurizio D' Arienzo

Approaching Performance Testing from a Model-Based Testing Perspective 125
Fredrik Abbors and Dragoş Truşcan

Author Index 129
