

2010 IEEE 21st International Symposium on Software Reliability Engineering

(ISSRE 2010)

**San Jose, California, USA
1 – 4 November 2010**

**IEEE Catalog Number: CFP10087-PRT
ISBN: 978-1-4244-9056-1**

2010 IEEE 21st International Symposium on Software Reliability Engineering

ISSRE 2010

Table of Contents

Message from General Chair and Program Committee Chair	x
Organizing Committee	xii
Program Committee	xiii
Steering Committee	xv
Industry Committee	xvi
Reviewers	xvii

Predicting Defects

Improving the Precision of Dependence-Based Defect Mining by Supervised Learning of Rule and Violation Graphs	1
<i>Boya Sun, Andy Podgurski, and Soumya Ray</i>	
Computing the Number of Calls Dropped Due to Failures	11
<i>Kishor S. Trivedi, Dazhi Wang, and Jason Hunt</i>	
Propagating Bug Fixes with Fast Subgraph Matching	21
<i>Boya Sun, Gang Shu, Andy Podgurski, Shirong Li, Shijie Zhang, and Jiong Yang</i>	

Reliability Modeling 1

A Multi-factor Software Reliability Model Based on Logistic Regression	31
<i>Hiroyuki Okamura, Yusuke Etani, and Tadashi Dohi</i>	
Assessing Asymmetric Fault-Tolerant Software	41
<i>Peter Popov and Lorenzo Strigini</i>	
Flexible, Any-Time Fault Tree Analysis with Component Logic Models	51
<i>Marc Förster and Daniel Schneider</i>	

Empirical Studies 1

Errors on Space Software Requirements: A Field Study and Application Scenarios	61
<i>Paulo C. Vêras, Emilia Villani, Ana Maria Ambrosio, Nuno Silva, Marco Vieira, and Henrique Madeira</i>	
Software Aging Analysis of the Linux Operating System	71
<i>Domenico Cotroneo, Roberto Natella, Roberto Pietrantuono, and Stefano Russo</i>	
Evaluating the Use of Requirement Error Abstraction and Classification Method for Preventing Errors during Artifact Creation: A Feasibility Study	81
<i>Gursimran S. Walia and Jeffrey C. Carver</i>	

Security 1

As-If Infinitely Ranged Integer Model	91
<i>Roger B. Dannenberg, Will Dormann, David Keaton, Robert C. Seacord, David Svoboda, Alex Volkovitsky, Timothy Wilson, and Thomas Plum</i>	
Towards a Bayesian Approach in Modeling the Disclosure of Unique Security Faults in Open Source Projects	101
<i>Prasanth Anbalagan and Mladen Vouk</i>	
Security Trend Analysis with CVE Topic Models	111
<i>Stephan Neuhaus and Thomas Zimmermann</i>	

Testing 1

Automatic Mutation Test Case Generation via Dynamic Symbolic Execution	121
<i>Mike Papadakis and Nicos Malevris</i>	
Constraint-Based Test Input Generation for Java Bytecode	131
<i>Florence Charretre and Arnaud Gotlieb</i>	
An Industrial Investigation of Similarity Measures for Model-Based Test Case Selection	141
<i>Hadi Hemmati and Lionel Briand</i>	

Validation 1

A 2-Phase Method for Validation of Matching Pair Property with Case Studies of Operating Systems	151
<i>Kang Gui and Suraj Kothari</i>	
Detecting Dependences and Interactions in Feature-Oriented Design	161
<i>Sven Apel, Wolfgang Scholz, Christian Lengauer, and Christian Kästner</i>	

A Consistency Check Algorithm for Component-Based Refinements of Fault Trees	171
<i>Dominik Domis, Kai Höfig, and Mario Trapp</i>	
Testing 2	
Automating System Tests Using Declarative Virtual Machines	181
<i>Sander van der Burg and Eelco Dolstra</i>	
DoDOM: Leveraging DOM Invariants for Web 2.0 Application Robustness Testing	191
<i>Karthik Pattabiraman and Benjamin Zorn</i>	
Pinpointing the Subsystems Responsible for the Performance Deviations in a Load Test	201
<i>Haroon Malik, Bram Adams, and Ahmed E. Hassan</i>	
Reliability Modeling 2	
Using Accelerated Life Tests to Estimate Time to Software Aging Failure	211
<i>Rivalino Matias Jr., Kishor S. Trivedi, and Paulo R.M. Maciel</i>	
The Importance of Data Quality in Software Reliability Modeling	220
<i>Elisabeth A. Nguyen, Carlos F. Rexach, David P. Thorpe, and Andrew E. Walther</i>	
An Efficient Method for Architecture-Based Reliability Evaluation for Evolving Systems with Changing Parameters	229
<i>Indika Meedeniya and Lars Grunske</i>	
Empirical Studies 2	
Log-Based Reliability Analysis of Software as a Service (SaaS)	239
<i>Sean Banerjee, Hema Srikanth, and Bojan Cukic</i>	
Characterizing Failures in Mobile OSes: A Case Study with Android and Symbian	249
<i>Amiya Kumar Maji, Kangli Hao, Salmin Sultana, and Saurabh Bagchi</i>	
Empirical Evaluation of Factors Affecting Distinction between Failing and Passing Executions	259
<i>Arin Zahalka, Katerina Goševa-Popstojanova, and Jeffrey Zemerick</i>	
Practical Experience Reports	
A Case Study on Safety Cases in the Automotive Domain: Modules, Patterns, and Models	269
<i>Stefan Wagner, Bernhard Schätz, Stefan Puchner, and Peter Kock</i>	

A Large-Scale Industrial Case Study on Architecture-Based Software Reliability Analysis	279
<i>Heiko Kozirolek, Bastian Schlich, and Carlos Bilich</i>	
Comparing SQL Injection Detection Tools Using Attack Injection: An Experimental Study	289
<i>Ivano Alessandro Elia, José Fonseca, and Marco Vieira</i>	
The Web Attacker Perspective - A Field Study	299
<i>José Fonseca, Marco Vieira, and Henrique Madeira</i>	
Empirical Studies 3	
Change Bursts as Defect Predictors	309
<i>Nachiappan Nagappan, Andreas Zeller, Thomas Zimmermann, Kim Herzig, and Brendan Murphy</i>	
Calibrating Probabilistic GUI Testing Models Based on Experiments and Survival Analysis	319
<i>Cristiano Bertolini, Alexandre Mota, and Eduardo Aranha</i>	
The Impact of Coupling on the Fault-Proneness of Aspect-Oriented Programs: An Empirical Study	329
<i>Rachel Burrows, Fabiano C. Ferrari, Otávio A.L. Lemos, Alessandro Garcia, and François Taïani</i>	
Security 2	
Preventing Overflow Attacks by Memory Randomization	339
<i>Vivek Iyer, Amit Kanitkar, Partha Dasgupta, and Raghunathan Srinivasan</i>	
Automata-Based Verification of Security Requirements of Composite Web Services	348
<i>Hongyu Sun, Samik Basu, Vasant Honavar, and Robyn Lutz</i>	
Client-Side Detection of Cross-Site Request Forgery Attacks	358
<i>Hossain Shahriar and Mohammad Zulkernine</i>	
Testing 3	
Is Data Privacy Always Good for Software Testing?	368
<i>Mark Grechanik, Christoph Csallner, Chen Fu, and Qing Xie</i>	
Prioritizing Mutation Operators Based on Importance Sampling	378
<i>Mohan Sridharan and Akbar Siami Namin</i>	
On the Round Trip Path Testing Strategy	388
<i>May Khalil and Yvan Labiche</i>	

Validation 2

FTCloud: A Component Ranking Framework for Fault-Tolerant Cloud Applications	398
<i>Zibin Zheng, Tom Chao Zhou, Michael R. Lyu, and Irwin King</i>	
Optimizing Incremental Scope-Bounded Checking with Data-Flow Analysis	408
<i>Danhua Shao, Divya Gopinath, Sarfraz Khurshid, and Dewayne E. Perry</i>	
Author Index	418
