

2010 IEEE 12th International Symposium on High-Assurance Systems Engineering

(HASE 2010)

**San Jose, California, USA
3-4 November 2010**

**IEEE Catalog Number: CFP10072-PRT
ISBN: 978-1-4244-9091-2**

2010 IEEE 12th International Symposium on High Assurance Systems Engineering

HASE 2010

Table of Contents

Message from Program Chair.....	viii
Organizing Committee.....	ix
Program Committee.....	x
Steering Committee.....	xii
Reviewers.....	xiii
Plenary Panel.....	xiv

Fault Tolerance

Low-Cost Secret-Sharing in Sensor Networks.....	1
<i>Marin Bertier, Achour Mostefaoui, and Gilles Trédan</i>	
EBAWA: Efficient Byzantine Agreement for Wide-Area Networks	10
<i>Giuliana Santos Veronese, Miguel Correia, Alysson Neves Bessani, and Lau Cheuk Lung</i>	
Scalable Fault Detection for FPGAs	20
<i>Frantz Iwu</i>	

Reliability/Availability Modeling

Predicting Faults in High Assurance Software.....	26
<i>Naeem Seliya, Taghi M. Khoshgoftaar, and Jason Van Hulse</i>	
A UML-Based Domain Specific Modeling Language for the Availability Management Framework.....	35
<i>Pejman Salehi, Abdelwahab Hamoud-Lhadj, Pietro Colombo, Ferhat Khendek, and Maria Toeroe</i>	
Symbolic Representation Techniques in Dynamic Reliability Evaluation.....	45
<i>Salvatore Distefano, Francesco Longo, and Marco Scarpa</i>	

Testing

A Stateful Approach to Testing Monitors in Multithreaded Programs.....	54
<i>Richard H. Carver and Jeff Lei</i>	
A Dataflow Testing Approach for Aspect-Oriented Programs.....	64
<i>Fadi Wedyan and Sudipto Ghosh</i>	
Paths to Property Violation: A Structural Approach for Analyzing Counter-Examples	74
<i>Thomas Bochot, Pierre Virelizier, Helene Waeselynck, and Virginie Wiels</i>	

Case Studies

Hybrid Petri Nets with General One-Shot Transitions for Dependability Evaluation of Fluid Critical Infrastructures	84
<i>Marco Gribaudo and Anne Remke</i>	
Formal Analysis of the Kaminsky DNS Cache-Poisoning Attack Using Probabilistic Model Checking	94
<i>Nikolaos Alexiou, Stylianos Basagiannis, Panagiotis Katsaros, Tushar Dashpande, and Scott A. Smolka</i>	
Experience with Model-Based User-Centered Risk Assessment for Service Robots	104
<i>Jérémie Guiochet, Damien Martin-Guillerez, and David Powell</i>	

Formal Methods

Proved Metamodels as Backbone for Software Adaptation.....	114
<i>Franck Barbier and Cyril Ballagny</i>	
Reverse Engineering Abstract Components for Model-Based Development and Verification of Embedded Software.....	122
<i>Yunja Choi and Hoon Jang</i>	
A Framework for Qualitative and Quantitative Formal Model-Based Safety Analysis	132
<i>Matthias GÜdemann and Frank Ortmeier</i>	

Information and System Assurance

Domain-Specific Feature Modeling for High Integrity Vehicle Control System Functional Design.....	142
<i>Shige Wang</i>	
Evaluation and Comparisons of Dependable Distributed Storage Designs for Clouds	152
<i>Liangliang Xiao, Yunqi Ye, I-Ling Yen, and Farokh Bastani</i>	

Fast Abstracts

Enhancing Performance of Random Testing through Markov Chain Monte Carlo Methods	162
<i>Bo Zhou, Hiroyuki Okamura, and Tadashi Dohi</i>	
Architecture-Based Reliability Modeling of Web Services Using Petri Nets	164
<i>Cobra Rahmani, Azad Azadmanesh, and Harvey Siy</i>	
Automatic Fault Behavior Detection and Modeling by a State-Based Specification Method.....	166
<i>Luca Pazzi, Matteo Interlandi, and Marco Pradelli</i>	
Automated Testing of LTL Formula Generation by Prospec.....	168
<i>Cuauhtemoc Munoz and Steve Roach</i>	
A Dependability Case Editor with Pattern Library.....	170
<i>Yutaka Matsuno, Hiroki Takamura, and Yutaka Ishikawa</i>	
Author Index	172
