

2010 7th Workshop on Positioning Navigation and Communication

(WPNC 2010)

**Dresden, Germany
11 – 12 March 2010**

IEEE Catalog Number: CFP1093B-PRT
ISBN: 978-1-4244-7158-4

2010 7th Workshop on Positioning, Navigation and Communication

Table of Contents

Session 1 - Communication & Ranging Systems

- 1. A Packet-Level Adaptive Forward Error Correction Scheme for Wireless Networks.....1**
Johannes Hund, Andreas Heinrich, Andreas Ziller, Christian Schwingenschlögl, Siemens Corporate Technology; Rolf Kraemer, IHP-Microelectronics
- 2. Joint Channel and Parameter Estimation for Joint Communication and Navigation using Particle Swarm Optimization.....4**
Kathrin Schmeink, Rebecca Block, Christopher Knievel, Peter Adam Hoeher, University of Kiel
- 3. Maximal Operating Distance Estimation for Ranging in IEEE 802.15.4a Ultra Wideband10**
Thomas Gigl, Graz University of Technology & CISC Semiconductor GmbH; Florian Troesch, ETH Zurich; Josef Preishuber-Pfluegl, CISC Semiconductor GmbH; Klaus Witrisal, Graz University of Technology
- 4. Optical ranging and data communication in space-based applications19**
Juan Jose Esteban, Antonio Garcia, Johannes Eichholz, Albert-Einstein-Insitute Hannover; Antonio Peinado, Universidad de Granada; Iouri Bykov, Joachim Kulmann, Gerhard Heinzl, Karsten Danzmann, Albert-Einstein-Insitute Hannover
- 5. Radio Localization in OFDM networks using the “Round Trip Phase”23**
Thilo Ohlemueller, Humboldt Universität Berlin & IHP Microelectronics; Frank Winkler, Humboldt University Berlin; Eckhard Grass, IHP Microelectronics
- 6. UWB Impulse Radio Based Distance Bounding28**
Marc Kuhn, Heinrich Luecken, Nils Ole Tippenhauer, ETH Zurich

Session 2 - Mathematical Methods for Localization and Tracking

- 1. Closed-form Algorithms in Mobile Positioning: Myths and Misconceptions38**
Niilo Sirola, Tampere University of Technology
- 2. Cubature based Kalman Filters for Positioning.....45**
Henri Pesonen, Robert Piché, Tampere University of Technology
- 3. Gershgorin Discs of Gramian Matrices for Target Tracking50**
Davide Macagnano, Giuseppe Thadeu Freitas de Abreu, University of Oulu
- 4. Improving Source Localization in NLOS Conditions via Ranging Contraction56**
Giuseppe Destino, Giuseppe Thadeu Freitas de Abreu, University of Oulu
- 5. Localization of Multiple Emitters by Spatial Sparsity Methods in the Presence of Fading Channels.....62**
Joseph S. Picard, Anthony J. Weiss, Tel Aviv University
- 6. Passive Infrared Localization with a Probability Hypothesis Density Filter68**
Jürgen Kemper, Daniel Hauschildt, Technische Universität Dortmund

Session 3 - Indoor & Fingerprint-based Positioning

- 1. 3D fingerprint-based Localization for Wireless Sensor Networks77**
Jorge Robles, Martin Deicke, Ralf Lehnert, University of Dresden
- 2. A Cooperative Framework for Path Loss Calibration and Indoor Mobile Positioning ...86**
Francescantonio Della Rosa, Tommi Paakki, Helena Leppäkoski, Jari Nurmi, Tampere University of Technology
- 3. LOSNUS: Ultrasonic Indoor Locating for Numerous Static and Mobile devices.....277**
Gerhard Spitzer, Herbert F. Schweinzer, Vienna University of Technology
- 4. On the RBF-based Positioning using WLAN Signal Strength Fingerprints.....93**
Christos Laoudias, Christos Panayiotou, University of Cyprus; Paul Kemppi, VTT Technical Research Centre of Finland
- 5. Positioning with Coverage Area Estimates Generated from Location Fingerprints99**
Laura Koski, Robert Piché, Ville Kaseva, Simo Ali-Löytty, Marko Hännikäinen, Tampere University of Technology
- 6. Towards Ubiquitous Indoor Location Based Services and Indoor Navigation107**
Björn Greßmann, Helge Klimek, Volker Turau, Hamburg University of Technology

Session 4 - Navigation and Tracking

- 1. A Fast Code Acquisition Technique for Positioning Systems 113**
Francesco Benedetto, Gaetano Giunta, University of Roma Tre
- 2. A Hidden Markov Model for Pedestrian Navigation 120**
Jochen Seitz, Friedrich-Alexander University of Erlangen-Nuremberg; Thorsten Vaupel, Steffen Meyer, Javier Gutiérrez Boronat, Fraunhofer Institute for Integrated Circuits IIS; Jörn Thielecke, Friedrich-Alexander University of Erlangen-Nuremberg
- 3. Barometric Height Estimation Combined with Map-Matching in a Loosely-Coupled Kalman-Filter 128**
Maik Bevermeier, Oliver Walter, Sven Peschke, Reinhold Haeb-Umbach, University of Paderborn
- 4. Indoor Pedestrian Navigation using an INS/EKF framework for Yaw Drift Reduction and a Foot-mounted IMU 135**
Antonio R. Jiménez, Fernando Seco Granja, J. C. Pierto, J. Guevara, Institute for Industrial Automation – CSIC
- 5. Localization in Industrial Halls via Ultra-Wideband Signals 144**
Lukasz Zwirello, Malgorzata Janson, Christian Ascher, Ulrich Schwesinger, Gert F. Trommer, Thomas Zwick, Karlsruhe Institute of Technology
- 6. UWB Positioning with Virtual Anchors and Floor Plan Information..... 150**
Paul Meissner, Graz University of Technology; Christoph Steiner, ETH Zurich; Klaus Witrisal, Graz University of Technology

Poster Session

- 1. A Comparison between Unscented Kalman Filtering and Particle Filtering for RSSI-Based Tracking 157**
Kung-Chung Lee, Anand Oka, University of British Columbia; Emmanuel Pollakis, Dresden University of Technology; Lutz Lampe, University of British Columbia

2. A Motion Model for Articulated Vehicles and a Distributed Acceleration Measurement System.....	164
<i>Niilo Sirola, Tampere University of Technology; Jarkko Rouhe, Taipale Telematics</i>	
3. A New Complex Angle of Arrival Location Method for ad hoc Networks	284
<i>Peter Brida, Juraj Machaj, Jozef Benikovsky, Jan Duha, University of Žilina</i>	
4. Carrier Relevance Study for Indoor Localization Using GSM.....	168
<i>Iness Ahriz, Yacine Oussar, ESPCI – ParisTech; Bruce Denby, Université Pierre et Marie Curie and ESPCI – Paristech; Gerard Dreyfus, ESPCI – ParisTech</i>	
5. Comparison of various methods for Indoor RF Fingerprinting using leaky feeder cable.....	291
<i>Mark Weber, Ulrich Birkel, University of Applied Sciences Gießen-Friedberg; Ralf Collmann, Julia Engelbrecht, University of Applied Sciences, HTW Dresden</i>	
6. Current Investigations at the ETH Zurich in Optical Indoor Positioning.....	174
<i>Sebastian Tilch, Rainer Mautz, ETH Zürich</i>	
7. Multi-correlator Structures for Tracking Galileo Signals with CBOC and SinBOC(1,1) Reference Receivers and Limited Front-End Bandwidths.....	179
<i>Jie Zhang, Elena Simona Lohan, Tampere University of Technology</i>	
8. Multi-modal Sensor Data and Information Fusion for Localization in Indoor Environments.....	187
<i>Lasse Klingbeil, Richard Reiner, Michailas Romanovas, Martin Traechtler, HSG-IMIT; Yiannos Manoli, University of Freiburg</i>	
9. Position Tracking Using Sensor Fusion of a Wireless Network and a Laser Range Finder	193
<i>Christopher Kirsch, Christof Roehrig, University of Applied Sciences and Arts Dortmund</i>	
10 Positioning Techniques and Telematic Applications in the 2.4 GHz-Band – Indoor and Outdoor Analysis Results Based on a Commercial Wide Band Location System.....	299
<i>Robert Richter, Oliver Michler, Richard Weber, TU Dresden; Sven Zeisberg, HTW Dresden</i>	
11 Self-contained Indoor Pedestrian Navigation by Means of Human Motion Analysis and Magnetic Field Mapping.....	303
<i>Gerald Glanzer, Ulrich Walder, Graz University of Technology</i>	

EUWB & WHERE Session

1. A Quantitative Comparison of Multihop Localization Algorithms.....	200
<i>Stefano Severi, University of Bologna; Giuseppe Abreu, University of Oulu; Davide Dardari, University of Bologna</i>	
2. Architectures for Location Data Acquisition and Distribution in UWB Indoor Tracking Systems.....	206
<i>Juan Chóliz, Ángela Hernández, Antonio Valdovinos, University of Zaragoza</i>	
3. Centralized Cooperative Positioning and Tracking with Realistic Communications Constraints.....	215
<i>Christian Mensing, German Aerospace Center (DLR); Jimmy Jessen Nielsen, Aalborg University</i>	
4. Inter-Cell Interference Coordination and Synchronization based on Location Information.....	224
<i>Loïc Brunel, Mélanie Plainchault, Nicolas Gresset, Mitsubishi Electric R&D Centre Europe; Armin Dammann, Christian Mensing, Ronald Raulefs, German Aerospace Center (DLR)</i>	

5. A Link-to-System Level Interface for B3G Scenarios.....	233
<i>Youssef Nasser, Maryline Helard, Institute of Electronics and Telecommunications of Rennes; Valdemar Monteiro, Joaquim Bastos, Jonathan Rodriguez, University of Aveiro; H. El-Mokdad, Lebanese University</i>	
6. Policy-dependent multi-hop distances in linear ad hoc networks.....	241
<i>Golaleh Rahmatollahi, Leibniz University of Hannover; Giuseppe Abreu, University of Oulu</i>	
7. Positioning in Multiband OFDM UWB utilizing Received Signal Strength.....	308
<i>Andreas Waadt, Shangbo Wang, Christian Kocks, Admir Burnic, Dong Xu, Guido H. Bruck, Peter Jung, University of Duisburg-Essen</i>	
8. Real Life Ranging Measurements with Low Power, Low Data Rate Transceivers	247
<i>Manuel Pezzin, CEA-Leti Minatec; Álvaro Álvarez, ACORDE</i>	
9. UWB in Heterogeneous Access Networks: location-aware services	257
<i>Pierre Cluzeaud, Isabelle Bucaille, Thales Communications; Ana Sierra, Telefónica I+D; Juan Chóliz, University of Zaragoza</i>	
10 Geo-Location Aided Cooperative Communications.....	264
<i>Sudhan Majhi, Youssef Nasser, Jean François Hélar, European University of Brittany; Ronald Raulefs, Armin Dammann, German Aerospace Center (DLR)</i>	
11 Concepts and Possibilities of the Positioning Device and Algorithm Evaluation Tool POSE for qualifying the Suitability of Ranging Device/Positioning Algorithm Combinations.....	270
<i>Simona Poilinc, Dan Dragomir, University of Bucharest; Markus Wehner, University of Applied Sciences Dresden; Oliver Michler, TU Dresden; Sven Zeisberg, University of Applied Sciences Dresden</i>
