

2010 IEEE International Workshop on Multimedia Signal Processing

(MMSP 2010)

**Saint-Malo, France
4-6 October 2010**

**IEEE Catalog Number: CFP10MSP-PRT
ISBN: 978-1-4244-8110-1**

Table of Contents

Audio and Speech Processing	
A comparative study between different pre-whitening decorrelation based acoustic feedback cancellers	1-6
Kawther Essafi, Sofia BenJebara	
Improving Multiple-F0 Estimation by Onset Detection for Polyphonic Music Transcription	7-12
Francisco Canadas-Quesada, Francisco Jose Rodriguez-Serrano, Pedro Vera-Candeas, Nicolas Ruiz Reyes, Julio Jose Carabias-Orti	
Geometric calibration of distributed microphone arrays from acoustic source correspondences	13-18
Daniele Valente, Marco Tagliasacchi, Fabio Antonacci, Paolo Bestagini, Augusto Sarti, Stefano Tubaro	
A Weighted Approach of Missing Data Technique in Cepstra Domain Based on S-function	19-23
Pei Yi	
Integrating a HRTF-based Sound Synthesis System into Mumble	24-28
Martin Rothbucher, Tim Habigt, Johannes Feldmaier, Klaus Diepold	
Enhancing Stereophonic Teleconferencing with Microphone Arrays through Sound Field Warping	29-33
Wei-Ge Chen, Zhengyou Zhang	
Enhancing Loudspeaker-based 3D Audio with Room Modeling	34-39
Myung-Suk Song, Cha Zhang, Dinei Florencio, Hong-Goo Kang	
Visibility-Based Beam Tracing for Soundfield Rendering	40-45
Dejan Markovic, Antonio Canclini, Fabio Antonacci, Augusto Sarti, Stefano Tubaro	
<hr/>	
Fingerprinting based multimedia content management and security	
Considering Security and Robustness Constraints for Watermark-based Tardos Fingerprinting	46-51
Benjamin Mathon, Patrick Bas, Francois Cayre, Benoit M. Macq	
Challenging the Security of Content Based Image Retrieval Systems	52-57
Thanh-Toan Do, Ewa Kijak, Teddy Furon, Laurent Amsaleg	
Private Content Identification: performance-privacy-complexity trade-off	58-63
Sviatoslav Voloshynovskiy, Oleksiy Koval, Fokko Beekhof, Farzad Farhadzadeh, Taras Holotyak	
Identification Based on Digital Fingerprinting: What Can Be Done if ML Decoding Fails?	64-68
Farzad Farhadzadeh, Sviatoslav Voloshynovskiy, Oleksiy Koval	
<hr/>	
Immersive communications and systems	
Fusion of Active and Passive Sensors for Fast 3D Capture	69-74
Qingxiong Yang, Kar-Han Tan, Bruce Culbertson, John Apostolopoulos	
Robust Foreground Segmentation for GPU Architecture in an Immersive 3D	75-80
Jaume Civit, Oscar Divorra Escoda	
Rate-Distortion Optimized Low-Delay 3D Video Communications	81-86
Enrico Masala	
Hierarchical Hole-Filling (HHF): Depth Image Based Rendering without Depth Map Filtering for 3D-TV	87-92
Mashhour Solh, Ghassan AlRegib	
<hr/>	
Sparse representations and compressed sensing	
The Iteration Tuned Dictionary for Sparse Representations	93-98
Joaquin Zepeda, Christine Guillemot, Ewa Kijak	
Hybrid Compressed Sensing of Images	99-104
Abdolreza Abdolhosseini Moghadam, Hayder Radha	
Compressive Demosaicing	105-110
Abdolreza Abdolhosseini Moghadam, Mohammad Aghagolzadeh, Hayder Radha, Mrityunjay Kumar	

Multistage Compressed-Sensing Reconstruction of Multiview Images	111-115
<small>Maria Trocan, Thomas Maugey, Eric Tramel, James Fowler, Beatrice Pesquet</small>	

Virtual Reality Signal Processing

Robust Head Pose Estimation by Fusing Time-of-Flight Depth and Color	116-121
<small>Amit Bleiweiss, Michael Werman</small>	
Optimized decomposition basis using Lanczos filters for lossless compression of biomedical images	122-127
<small>Jonathan Taquet, Claude Labit</small>	
A new image projection method for panoramic image stitching	128-132
<small>Beom Su Kim</small>	
Fast Environment Extraction for Lighting and Occlusion of Virtual Objects in Real Scenes	133-138
<small>François Fouquet, Jean-Philippe Farrugia, Brice Michoud, Sylvain Brandel</small>	
Real-Time Particle Filtering with Heuristics for 3D Motion Capture by Monocular Vision	139-144
<small>David Gomez</small>	
Bilateral Depth-Discontinuity Filter for Novel View Synthesis	145-149
<small>Ismaël Daribo, Hideo Saito</small>	
Spectral EEG Features and Tasks Selection Process: Some Considerations toward BCI Applications	150-155
<small>Monica Claudia Dobrea, Dan Marius Dobrea</small>	
Color Transfer for Complex Content Images Based on Intrinsic Component	156-161
<small>Wan-Chien Chiou, Yi-Lei Chen, Chiou-Ting Hsu</small>	
Clickable Augmented Documents	162-166
<small>Sandy Martedi, Hideaki Uchiyama, Hideo Saito</small>	
Depth-aided image inpainting for Novel View Synthesis	167-170
<small>Ismaël Daribo, Beatrice Pesquet</small>	
Robust Background Subtraction Method Based on 3D Model Projections with Likelihood	171-176
<small>Hiroshi Sankoh, Akio Ishikawa, Sei Naito, Shigeyuki Sakazawa</small>	

Audio processing

Unsupervised Detection of Multimodal Clusters in Edited Recordings	177-182
<small>Alfred Dielmann</small>	
Probabilistic framework for template-based chord recognition	183-187
<small>Laurent Oudre, Cédric Févotte, Yves Grenier</small>	
Parametric stereo extension of ITU-T G.722 based on a new downmixing scheme	188-193
<small>Thi Minh Nguyet Hoang, Stéphane Ragot, Balazs Kövesi, Pascal Scalart</small>	
Fitting Pinna-Related Transfer Functions to Anthropometry for Binaural Sound Rendering	194-199
<small>Simone Spagnol, Michele Geronazzo, Federico Avanzini</small>	

Video Coding

Reference Frame Modification Methods in Scalable Video Coding (SVC)	200-205
<small>Amir Naghdinezhad, Fabrice Labeau</small>	
Motion Vector Forecast and Mapping (MV-FMap) Method for Entropy Coding based Video Coders	206-211
<small>Julien Le Tanou, Jean-Marc Thiesse, Joel Jung, Marc Antonini</small>	
Optimal mode switching for multi-hypothesis motion compensated prediction	212-216
<small>Ramdas B Satyan, Fabrice Labeau, Kenneth Rose</small>	
Data hiding of Motion Information in Chroma and Luma Samples for Video Compression	217-221
<small>Jean-Marc Thiesse, Joël Jung, Marc Antonini</small>	
Motion Vector Coding Algorithm Based on Adaptive Template Matching	222-227
<small>Wen Yang</small>	
Efficient MV Prediction for Zonal Search In Video Transcoding	228-232
<small>Sylvain Marcelino</small>	

Bit Allocation and Encoded View Selection for Optimal Multiview Image Representation	233-238
Gene Cheung, Vladan Velisavljevic	
H.264-Based Multiple Description Coding Using Motion Compensated Temporal Interpolation	239-244
Claudio Greco, Marco Cagnazzo, Beatrice Pesquet-Popescu	
Optimizing the free distance of Error-Correcting Variable-Length Codes	245-250
Amadou Diallo, Claudio Weidmann, Michel Kieffer	

Virtual Worlds and multisensorial experience

Controlling virtual world by the real world devices with an MPEG-V framework	251-256
Seungju Han, Jae-Joon Han, Won-Chul Bang, James D. K. Kim, Changyeong Kim	
4-D Broadcasting with MPEG-V	257-262
Kyoungro Yoon, BumSuk Choi, Eun Seo Lee, Tae-Beom Lim	
Avatars interoperability in Virtual Worlds	263-268
Blagica Jovanova, Marius Preda	
Audio-haptic physically based simulation and evaluation of walking sounds	269-273
Stefania Serafin	

Joint source channel coding / error control

Recovering the Output of an OFB in the case of Instantaneous Erasures in Sub-band Domain	274-279
Mohsen Akbari, Fabrice Labeau	
Unequal Error Protection Random Linear Coding for Multimedia Communications	280-285
Dejan Vukobratovi?, Vladimir Stankovic	
Decoding of 3D-Escot bitstreams	286-291
Manel Abid, Michel Kieffer, Beatrice Pesquet	
Efficient Error Control in 3D Mesh Coding	292-297
Dan Cernea, Adrian Munteanu, Peter Schelkens, Francisco Morán Burgos	

Distributed Source Coding

Side information enhancement using an adaptive hash-based genetic algorithm in a Wyner-Ziv context	298-302
Thomas Maugey, Charles Yaacoub, Joumana Farah, Marco Cagnazzo, Beatrice Pesquet-Popescu	
On Joint Distribution Modeling in Distributed Video Coding Systems	303-308
Yevgeny Priziment, David Malah	
Side Information Refinement for Long Duration GOPs in DVC	309-314
Giovanni Petrazzuoli, Thomas Maugey, Marco Cagnazzo, Beatrice Pesquet-Popescu	
Reducing DVC Decoder Complexity in a Multicore System	315-320
Alberto Corrales-Garcia, J L Martínez, Gerardo Fernandez-Escribano	
Toward Realtime Side Information Decoding on Multi-core Processors	321-326
Svetislav Momcilovic, Yige Wang, Shantanu Rane, Anthony Vetro	
Scalable-to-Lossless Transform Domain Distributed Video Coding	327-332
Xin Huang, Anna Ukhanova, Anton Veselov, Soren Forchhammer, Marat Gilmutdinov	
Encoder Rate Control for Block-based Distributed Video Coding	333-338
Chen Fu, Joohee Kim	
Encoder and Decoder Side Global and Local Motion Estimation for Distributed Video Coding	339-344
Frederic Dufaux, Touradj Ebrahimi	
Spatial intra-prediction based on mixtures of sparse representations	345-349
Angelique Dremeau, Mehmet Turkan, Cédric Herzet, Christine Guillemot, Jean-Jacques Fuchs	

Virtual Reality

Adaptive Semi-Regular Remeshing: A Voronoi-Based Approach	350-355
Ayman Kammoun, Frédéric Payan, Marc Antonini	
A subjective experiment for 3D-mesh segmentation evaluation	356-360
Halim Benhabiles, Guillaume Lavoué, Mohamed Daoudi	

Depth camera based system for auto-stereoscopic displays François de Sorbier, Yuko Uematsu, Hideo Saito	361-366
Generalized Multiscale Seam Carving David D Conger, Mrityunjay Kumar, Hayder Radha	367-372

Media delivery and quality evaluation

An Objective Metric for Assessing Quality of Experience on Stereoscopic Images Xing, Junyong You, Touradj Ebrahimi, Andrew Perkis	373-378
Measuring Errors for Massive Triangle Meshes Anis Meftah, Frédéric Payan, Marc Antonini, Arnaud Roquel	379-383
Depth Consistency Testing for Improved View Interpolation Pravin Kumar Rana, Markus Flierl	384-389
Visual Quality of Current Coding Technologies at High Definition IPTV Bitrates Christian Keimel, Julian Habigt, Tim Habigt, Martin Rothbucher, Klaus Diepold	390-393
Error Concealment Considering Error Propagation inside a Frame Jun Wang, Yichun Tang, Hao Sun, Satoshi Goto	394-399
A resilient and low-delay P2P streaming system based on network coding with random multicast trees Marco Toldo, Enrico Magli	400-405
An Improved Foresighted Resource Reciprocation Strategy for Multimedia Streaming Applications Ester Gutiérrez, Hyunggon Park, Pascal Frossard	406-411
Strategies of Buffering Schedule in P2P VoD Streaming Zhi Wang, Lifeng Sun, Shiqiang Yang	412-416
QoE Based Adaptation Mechanism for Media Distribution in Connected Home Jianfeng Chen, Jun Li, Xiaojun Ma	417-422
Sigmoid Shrinkage for BM3D denoising algorithm Mariana Poderico, Sara Parrilli, Giovanni Poggi, Luisa Verdoliva	423-426

Scene analysis for immersive telecommunication

Movement recognition exploiting multi-view information Alexandros Iosifidis, Nikos Nikolaidis, Ioannis Pitas	427-431
Generation of See-Through Baseball Movie from Multi-Camera Views Takanori Hashimoto, Yuko Uematsu, Hideo Saito	432-437
Video Super-resolution for Dual-Mode Digital Cameras via Scene-matched Learning Guangtao Zhai, Xiaolin Wu	438-442
Gaussian Mixture Vector Quantization-Based Video Summarization Using Independent Component Analysis Junfeng Jiang, Xiao-Ping Zhang	443-448

Multimedia for communication and collaboration

Face Hallucination Using Bayesian Global Estimation and Local Basis Selection Chih-Chung Hsu, Chia-Wen Lin, Chiou-Ting Hsu, Mark Liao, Yu Jen-Yu	449-453
Real-Time Video Enhancement for High Quality Videoconferencing Pavel Kisilev, Sagi Schein	454-459
Spatial Synchronization of Audiovisual Objects by 3D Audio Object Coding Banu Gunel, Erhan Ekmekcioglu, Ahmet Kondoç	460-465
Overcoming Asynchrony in Audio-Visual Speech Recognition Virginia Estellers, Jean-Philippe Thiran	466-471

Object/pattern detection, classification and recognition

Common Spatial Pattern revisited by Riemannian geometry Alexandre Barachant, Stephane Bonnet, Marco Congedo, Christian Jutten	472-476
An N-gram model for unstructured audio signals toward information retrieval Samuel Kim, Shiva Sundaram, Panayiotis Georgiou, Shrikanth Narayanan	477-480
An Efficient Framework on Large-scale Video Genre Classification Ning Zhang, Ling Guan	481-486

Time-Space Acoustical Feature for Fast Video Copy Detection Yoshiaki Itoh	487-492
A Hierarchical Statistical Model For Object Classification Ali Shojaaee Bakhtiari, Nizar Bouguila	493-498
A Bayesian Image Annotation Framework Integrating Search and Context Rui Zhang, Ling Guan	499-504
Human Emotion Recognition Using Real 3D Visual Features from Gabor Library Yun Tie, Ling Guan	505-510
Person Recognition using a bag of facial soft biometrics (BoFSB) Antitza Dantcheva, Jean-Luc Dugelay, Petros Elia	511-516
Multimodal Speech Recognition of a Person with Articulation Disorders Using AAM and MAF Chikoto Miyamoto, Yuto Komai, Tetsuya Takiguchi, Yasuo Arika	517-520
Object Tracking under Illumination Variations using 2D-Cepstrum Characteristics of the Target Fuat Cogun, A. Enis Cetin	521-526
