

2010 IEEE Workshop on High Performance Computation Finance

(WHPCF 2010)

**New Orleans, Louisiana, USA
14 November 2010**

**IEEE Catalog Number: CFP1028F-PRT
ISBN: 978-1-4244-9062-2**

Table of Contents

Claudio Albanese	Keynote: Coherent Global Market Simulations for Counterparty Credit Risk 
David Thomas	Keynote: Acceleration of Financial Monte-Carlo Simulations using FPGAs 
Duy Minh Dang, Christina Christara and Ken Jackson	Pricing multi-asset American options on Graphics Processing Units using a PDE approach 
Stephen P Weston, Jean-Tristan Marin, James Spooner, Oliver Pell and Oskar Mencer	Accelerating the Computation of Portfolios of Tranched Credit 
Andre Bernemann, Ralph Schreyer and Klaus Spanderen	Pricing Structured Equity Products on GPUs 
Gilles Pages and Benedikt Wilbertz	Parallel Implementation of Quantization Methods for the Valuation of Swing Options on GPGPU 
AJ Lindeman	Opportunities for Shared Memory Parallelism 
Philippe Selo, Yoonho Park, Sujay Parekh, Chitra Venkatramani, Hari K. Pyla and Fang Zheng	Adding Stream Processing System Flexibility to Exploit Low-overhead Communication Systems 
Alberto Souza, Fabio D Freitas and André Gustavo Coelho de Almeida	High Performance Prediction of Stock Returns with VG-RAM Weightless Neural Networks 
Yu Tian, Zili Zhu, Fima C. Klebaner and Kais Hamza	Option Pricing with the SABR Model on the GPU 
Dariusz Murakowski, William Brouwer and Vincent Natoli	CUDA Implementation of Barrier Option Valuation with Jump-Diffusion Process and Brownian Bridge
