2010 IEEE 16th Pacific Rim International Symposium on Dependable Computing

(PRDC 2010)

Tokyo, Japan
13 – 15 December 2010

IEEE Catalog Number: CFP10245-PRT
ISBN: 978-1-4244-8975-6

2010 Pacific Rim International Symposium on Dependable Computing

PRDC 2010

Table of Contents

Message from the General Chair x
Message from the Program Co-Chairs xi
Conference Committees xii
Referees xv

Session I-A: Fault Injection

Towards Identifying the Best Variables for Failure Prediction Using Injection of Realistic Software Faults 3
Ivano Irrera, João Durães, Marco Vieira, and Henrique Madeira

Searching Representative and Low Cost Fault Models for Intermittent Faults in Microcontrollers: A Case Study 11
J. Gracia-Morán, D. Gil-Tomás, J.C. Baraza, L.J. Saiz-Adalid, and P.J. Gil-Vicente

Modeling the Propagation of Intermittent Hardware Faults in Programs 19
Layali Rashid, Karthik Pattabiraman, and Sathish Gopalakrishnan

Session I-B: Virtual Machines

A Secure System-Wide Process Scheduler across Virtual Machines 27
Hidekazu Tadokoro, Kenichi Kourai, and Shigeru Chiba

Implementing a Hybrid Virtual Machine Monitor for Flexible and Efficient Security Mechanisms 37
Junya Sawazaki, Toshiyuki Maeda, and Akinori Yonezawa

Customizing Virtual Machine with Fault Injector by Integrating with SpecC Device Model for a Software Testing Environment D-Cloud 47
Toshihiro Hanawa, Hitoshi Koizumi, Takayuki Banzai, Mitsuhisa Sato, Shin'ichi Miura, Tadatoshi Ishii, and Hidehisa Takamizawa

Session II-A: Chip Multiprocessors

FiRot: An Efficient Crosstalk Mitigation Method for Network-on-Chips 55
A. Patooghy, M. Shafaei, S.G. Miremadi, H. Falahati, and S. Taheri

An Efficient Decision Unit for the Pair and Swap Methodology within Chip Multiprocessors 62
J.L. Weston, M. Imai, T. Nagai, and T. Nanya

Address Remapping for Static NUCA in NoC-Based Degradable Chip-Multiprocessors 70
Ying Wang, Lei Zhang, Yinhe Han, Huawei Li, and Xiaowei Li

Session II-B: Software Reliability

Formal Verification of Industrial Software with Dynamic Memory Management 77
Sébastien Labbé and Arnaud Sangnier

A Software Accelerated Life Testing Model 85
Toshiya Fujii, Tadashi Dohi, Hiroyuki Okamura, and Takaji Fujiwara

Towards a Language for Communication among Stakeholders 93
Yutaka Matsuno, Jin Nakazawa, Makoto Takeyama, Midori Sugaya, and Yutaka Ishikawa

Session III-A: Real-Time/Networked Systems

Sensitivity Analysis of the Minimum Task Period for Arbitrary Deadline Real-Time Systems 101
Fengxiang Zhang, Alan Burns, and Sanjoy Baruah

An Improved Knowledge Connectivity Condition for Fault-Tolerant Consensus with Unknown Participants 109
Jichiang Tsai and Che-Cheng Chang

A Distributed Data Replication Protocol for File Versioning with Optimal Node Assignments 117
Takahiko Ikeda, Mamoru Ohara, Satoshi Fukumoto, Masayuki Arai, and Kazuhiko Iwasaki

End-to-End Performability Analysis for Infrastructure-as-a-Service Cloud: An Interacting Stochastic Models Approach 125
Rahul Ghosh, Kishor S. Trivedi, Vijay K. Naik, and Dong Seong Kim

Session III-B: Failure Detection/Dependency

Deadlock Detection Scheduling for Distributed Processes in the Presence of System Failures 133
Akikazu Izumi, Tadashi Dohi, and Naoto Kaio

Two Efficient Software Techniques to Detect and Correct Control-Flow Errors 141
Hamid R. Zarandi, Mohammad Maghsoudloo, and Navid Khoshavi

Analysis of Dependencies between Failures in the UNINETT IP Backbone Network 149
Andres J. Gonzalez, Bjarne E. Helvik, Jon K. Hellan, and Pirkko Kuusela

Session IV-A: Architectures

System-Level Vulnerability Estimation for Data Caches 157
Alireza Haghdoost, Hossein Asadi, and Amirali Baniasadi

Loris - A Dependable, Modular File-Based Storage Stack 165
Raja Appuswamy, David C. van Moolenbroek, and Andrew S. Tanenbaum

Design and Implementation of a Fault Tolerant Single IP Address Cluster 175
Jun Kato, Hajime Fujita, and Yutaka Ishikawa

On the Reliability of Cascaded TMR Systems 184
Masashi Hamamatsu, Tatsuhiro Tsuchiya, and Tohru Kikuno

Session IV-B: System Security

A Learning-Based Approach to Secure Web Services from SQL/XPath Injection Attacks 191
Nuno Laranjeiro, Marco Vieira, and Henrique Madeira

Estimating Computer Virus Propagation Based on Markovian Arrival Processes 199
Hiroyuki Okamura and Tadashi Dohi

Dynamic Multilayer Routing to Achieve Location-Hiding 207
Hakem Beitollahi and Geert Deconinck

Sequential Frequency Vector Based System Call Anomaly Detection 215
Ying Wu, Jianhui Jiang, and Liangliang Kong

Fast Abstracts

Composition Kernel: A Multi-core Processor Virtualization Layer for Highly Functional Embedded Systems 223
Tatsuo Nakajima, Yuki Kinebuchi, Alexandre Courbot, Hiromasa Shimada, Tsung-Han Lin, and Hitoshi Mitake

Optimal Inventory of Computer Repair Parts: A Fuzzy Systems Approach 225
Les M. Sztandera

A Replacement Strategy for Canary Flip-Flops 227
Yuji Kunitake, Toshinori Sato, and Hiroto Yasuura

Quantitative Evaluation of Integrity for Remote System Using the Internet 229
Masato Kitakami, Hiroshi Konno, Kazuteru Namba, and Hideo Ito

A Speculative Byzantine Algorithm for P2P System 231
Yusuke Matsumoto and Hiromi Kobayashi

Core-Local Memory Assisted Protection 233
Yuki Kinebuchi, Tatsuo Nakajima, Vinod Ganapathy, and Liviu Iftode

P-Bus: Programming Interface Layer for Safe OS Kernel Extensions 235
Hajime Fujita, Motohiko Matsuda, Toshiyuki Maeda, Shin'ichi Miura, and Yutaka Ishikawa

A Minimal Roll-Back Based Recovery Scheme for Fault Toleration in Pipeline Processors 237
Jun Yao, Ryoji Watanabe, Takashi Nakada, Hajime Shimada, Yasuhiko Nakashima, and Kazutoshi Kobayashi

Reliability Evaluation of Flip-Flops Based on Probabilistic Transfer Matrices 239
Chengtian Ouyang, Jianhui Jiang, and Jie Xiao

Automatic Static Fault Tree Analysis from System Models 241
Jianwen Xiang and Kazuo Yanoo

An Asynchronous Checkpoint-Based Redundant Multithreading Architecture 243
Jie Yin and Jianhui Jiang

A Safe Measurement-Based Worst-Case Execution Time Estimation Using Automatic Test-Data Generation 245
Liangliang Kong and Jianhui Jiang

A Hierarchical Model for Reliability Analysis of Sensor Networks 247
Dong Seong Kim, Rahul Ghosh, and Kishor S. Trivedi

The Performance Analysis and Hardware Acceleration of Crypto-computations for Enhanced Security 249
Jed Kao-Tung Chang, Shaoshan Liu, Jean-Luc Gaudiot, and Chen Liu

Formal Validation and Requirements Management Based on the Jackson's Reference Model for Requirements and Specifications 251
Takashi Kitamura, Keishi Okamoto, and Makoto Takeyama

Author Index 253
