

2011 IEEE Topical Conference on Power Amplifiers for Wireless and Radio Applications

(PAWR 2011)

**Phoenix, Arizona, USA
16 – 19 January 2011**

**IEEE Catalog Number: CFP11PAR-PRT
ISBN: 978-1-4244-8416-4**

TABLE OF CONTENTS

MO1C: HIGH-EFFICIENCY POWER AMPLIFIERS

A Concurrent Dual Band 870 and 1970MHz 10W Envelope Tracking PA Designed by a WCDMA Probability Distribution Conscious Approach	1
<i>Niccolo Giovannelli, Alessandro Cidronali, Gianfranco Manes</i>	
A 2GHz GaN Class-J Power Amplifier for Base Station Applications	5
<i>K. Mimis, K.A. Morris, J.P. McGeehan</i>	
HEMT GaAs/GaN Power Amplifiers Architecture with Discrete Dynamic Voltage Bias Control in Envelope Tracking RF Transmitter for W-CDMA Signals	9
<i>Massimiliano Mercanti, Alessandro Cidronali, Stefano Maurri, Gianfranco Manes</i>	
High Efficiency Amplifier and Signal Source Module for ISM-Band Applications	13
<i>Robert Caverly, Arthur Paoella, Frank J. Lexa, Christine Grispingo</i>	
Slew-Rate Limited Envelopes for Driving Envelope Tracking Amplifiers	17
<i>Gabriel Montoro, Pere L. Gilabert, Pedro Vizarrata, Eduard Bertran</i>	

MO2C: RF POWER AMPLIFIER TECHNOLOGY

3.54GHz 10W Envelope Tracking Amplifier with 43% Efficiency Utilizing the 1.5Bit-High Efficiency Envelope Amplifier	21
<i>Joon Hyung Kim, Gwan Do Jo, Jung Hoon Oh, Young-Hoon Kim, Kwang Chun Lee, Jae Ho Jung</i>	
3.3--3.6GHz 28dBm Power Amplifier for WiMAX CPE Applications	25
<i>Kwangchan Lee, Jinho Shin, Jongsoo Lee</i>	
Integration of Cellular Front End Modules on Advanced High Resistivity SOI RF CMOS Technology	29
<i>F. Giancesello, C. Durand, R. Pilard, D. Petit, J. Penard, S. Jan, D. Gloria, B. Rauber, C. Raynaud</i>	
W-Band Monolithic CPW Wilkinson CMOS Power Amplifier	33
<i>Doris A. Chan, Milton Feng</i>	
Concurrent Multi-Band Power Amplifier Employing Multi-Section Impedance Transformer	37
<i>Atsushi Fukuda, Hiroshi Okazaki, Shoichi Narahashi, Toshio Nojima</i>	

MMO3C: DISTORTION REDUCTION TECHNIQUES IN RF POWER AMPLIFIERS

Low-Complexity FPGA Implementation of Volterra Predistorters for Power Amplifiers	41
<i>Jacek Liszewski, Benjamin Schubert, Wilhelm Keusgen, Andreas Kortke</i>	
A High Efficiency and High Linearity Power Amplifier Utilizing Post-Linearization Technique for 5.8GHz DSRC Applications	45
<i>Qing Liu, Jiangtao Sun, Yongju Shu, Koji Horie, Nobuyuki Itoh, Toshihiko Yoshimasu</i>	
A RF Transmitter Linearized Using Cartesian Feedback in CMOS 65nm for UMTS Standard	49
<i>Nicolas Delaunay, Nathalie Deltimple, Eric Kerherve, Didier Belot</i>	
Sensitivity and Mitigation of Reverse IMD in Power Amplifiers	53
<i>Allen Katz, David McGee, Christopher Brinton, Joe Qiu</i>	
A 2.5-GHz Asymmetric Multilevel Outphasing Power Amplifier in 65-nm CMOS	57
<i>Philip A. Godoy, SungWon Chung, Taylor W. Barton, David J. Perreault, Joel L. Dawson</i>	

MO4C: ADVANCES IN RF POWER AMPLIFIER MODELING AND ANALYSIS

DDR Volterra Series Behavioral Model with Fading Memory and Dynamics for High Power Infrastructure Amplifiers	61
<i>Joseph Staudinger</i>	
An Efficient Simplified Behavioral Model for RF Power Amplifiers	65
<i>Young-Hoon Kim, Gweon Do Jo, Jung Hoon Oh, Jae Ho Jung, Joon Hyung Kim, Changwahn Yu, Kwang Chun Lee</i>	
Effect of Maximum Power Supply Voltage on Envelope Tracking Power Amplifiers Using GaN HEMTs	69
<i>Chin Hsia, Donald F. Kimball, Peter M. Asbeck</i>	

Accurate Determination of Switching Loss in Class-D Power Amplifiers with Random Gaussian Excitation Using Rice Formula	73
<i>Mehdi Sarkeshi, Reza Mahmoudi, Arthur van Roermund</i>	
Characterization of Broadband Monolithic Gallium Nitride Distributed Power Amplifier Using Thermal Imaging Technique	77
<i>Chenggang Xie</i>	
Author Index
