

2011 ISSNIP Biosignals and Biorobotics Conference

(BRC 2011)

**Vitoria, Brazil
6-8 January 2011**

IEEE Catalog Number: CFP1074K-PRT
ISBN: 978-1-4244-8212-2

Title	page No.
Face Detection Based on Adaptive Support Vector Tracker	1
Use of wavelet transforms and neural networks for identifying individuals through extracted features of the hand palm	7
Evaluation of GMM Approach to Fingerprint Classification	12
Implementation and Evaluation of NIST Biometric Image Software for Fingerprint Recognition	18
Automatic Identification of Discoid Lupus Erythematosus	23
Decoding Arm Movements by Myoelectric Signals and Artificial Neural Networks	29
Combining Entropy Measurements and Cepstral Analysis for Pathological Voice Assessment	35
Kurtosis and Negentropy investigation of Myo electric signals during different MVCs	40
Heart Arrhythmia Classification Using the PPM Algorithm	44
Tip Tracking Control of a Rigid-Flexible Manipulator based on Deflection Estimation Using Neural Networks: Application to Needle Insertion	49
A low cost signal generator for real time vibrotactile stimulations	55
An extension of spatial and tactile perception based on haptics	60
Pseudo-Online Classification of Mental Tasks	65
A Low Cost Prototype for an Optical and Haptic Pen	71
Remote Guide for directing the Visually Impaired	75
Educational Robotics as a Learning Aid for Disabled Children	80
Experimental Evidences for Visual Evoked Potentials with Stimuli Beyond the Conscious Perception Threshold	86
Implementing a surface EMG model with accurate parameters and a force output	91
Spectral properties of surface EMG and Muscle conduction velocity: A study based on sEMG Model	96
Study of Muscular Fatigue by EMG Analysis During Isometric Exercise	100
Sensor Fusion applied on Position Estimation and Gait Identification of an Ankle-Foot Orthosis	104
Statistical Approach for Angular Position Separability Classes of EMG Data	110
Observing Exercise Induced Heart Rate Variability Response	116
Segmentation of Masses in Digital Mammograms	122
An Automated Method for Clustering Single Sweep Local Field Potentials Recorded from Rat Barrel Cortex	129
Automatic Sleep Staging Using a Single-Channel EEG Modeling by Kalman Filter and HMM	134
An infotaxis based odor navigation approach	140
