

2011 Spanish Conference on Electron Devices

(CDE 2011)

**Palma de Mallorca, Spain
8 – 11 February 2011**

IEEE Catalog Number: CFP11589-PRT
ISBN: 978-1-4244-7863-7

8th Spanish Conference on Electron Devices

Palma de Mallorca, 8-11 February 2011

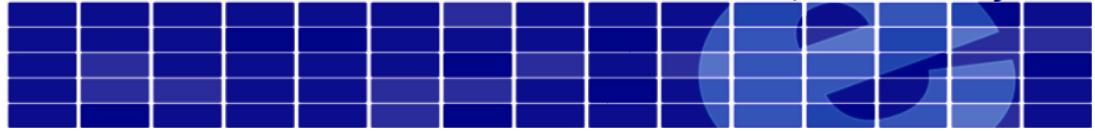

Table of Contents

Track: Materials and process technology

<u>#14 Electrical and Chemical Characterization of High Pressure Sputtered Scandium Oxide for Memory Applications</u>	1
Pedro Carlos Feijoo, María Toledano-Luque, Álvaro del Prado, Enrique San Andrés, María Luisa Lucía, and José Luis García Fierro	
<u>#16 GaN Ohmic Contact Resistance vs Temperature</u>	4
Abel Fontserè, A. Pérez-Tomás, M. Placidi, P. Fernández-Martínez, N. Baron, S. Chenot, Y. Cordier, J. C. Moreno, M. R. Jennings, P. M. Gammon, and D. Walker	
<u>#18 Integration of III-V Materials on Silicon Substrates for Multi-junction Solar Cell Applications</u>	6
Elisa García-Tabarés, Diego Martín, Iván García, Ignacio Rey-Stolle, and Carlos Algora	
<u>#24 Microwave annealing effect on the resistivity of doped hydrogenated amorphous silicon on glass</u>	10
Huai-Yi Chen, Yao-Jen Lee, and Chien-Pin Chang	
<u>#31 Perfectly Ordered Nanoporous Anodic Alumina Templates</u>	12
Abel Santos Alejandro, Josep Ferré Borrull, Josep Pallarès Marzal, and Lluís Francesc Marsal Garví	
<u>#34 Effect of the deposition temperature on the properties of Zn₃N₂ layers grown by rf magnetron sputtering</u>	16
Carlos García Núñez, Jose Luis Pau, María Jesús Hernández, Manuel Cervera, and Juan Piqueras	
<u>#35 Sn doped GaAs grown by CBE using tetramethyltin</u>	20
Carlos García Núñez, Daniel Ghita, and Basilio Javier García	
<u>#38 Physical characterization of YSZ solid electrolyte thin films fabricated by sputtering techniques</u>	23
Lander Rojo, Irene Castro, Jaime Herrán, Gemma G ^a Mandayo, and Enrique Castaño	

<u>#49 Fabrication and characterization of flexible flat electrodes for biomedical microdevices</u>	26
Maria Carmen Fuentes, Miriam Fernandez, Isabel Ayerdi, and Francisco Javier Gracia	
<u>#50 Interface engineering by metal electrode scavenging of Gd₂O₃ films sputtered on Si</u>	30
María Ángela Pampillon, Pedro Carlos Feijoo, Enrique San Andrés, María Toledano-Luque, Alvaro del Prado, Antonio José Blázquez, and Maria Luisa Lucía	
<u>#83 Comparison of Al₂O₃ thin films grown by ALD using H₂O or O₃ as oxidant source</u>	34
Francesca Campabadal, Oihane Beldarrain, Miguel Zabala, Maria Cruz Acero, and Joan Marc Rafi	
<u>#96 Atomistic process simulation for future generation nanodevices</u>	38
Luis Alberto Marqués Cuesta, L. Pelaz, M. Aboy, P. López, and I. Santos	
<u>#97 Fabrication process of a SU-8 monolithic pressurized microchamber for pressure driven microfluidic applications</u>	42
José Miguel Moreno, Francisco Perdigones, and José Manuel Quero	
<u>#98 Optical measurements on GaAs(Ti) thin films sputtered on GaAs</u>	46
Alfredo Boronat Moreira, S. Silvestre, L. Castañer	
<u>#103 Insulator-Metallic Transition in Ti implanted Silicon Layers for Intermediate Band</u>	49
David Pastor, Javier Olea, Alvaro Del Prado, Eric García-Hemme, Ignacio Mártil, and Germán González-Díaz	
<u>#113 Molecular implants and cold implants: two new strategies for junction formation of future Si devices</u>	53
Iván Santos, Luis Alberto Marqués, Pedro López, Lourdes Pelaz, and María Aboy	
<u>#114 Metamorphic antimonides on GaAs for thermophotovoltaic devices</u>	57
A. M. Sanchez, J. M. Ripalda, A. G. Taboada, A. Rivera, B. Alén, D. Fuster, Y. González, L. González, G. Balakrishnan	
<u>#115 Solution-processed organic devices developed by a novel cost-effective patterning technique based on electrical erosion</u>	59
Juan Jimenez-Trillo, Angel Luis Alvarez, and Carmen Coya	
<u>#124 Simulation study of ion implanted defects associated to luminescence centers in silicon</u>	63
Maria Aboy, Ivan Santos, Lourdes Pelaz, Luis A. Marques, and Pedro Lopez	

[#135 Investigation of surface plasmon resonance in Au nanoparticles deposited on ZnO:Al thin films](#) 67
Jose Luis Pau Vizcaíno, Jose María Abad, María Jesús Hernández, Manuel Cervera, Encarnación Lorenzo, Juan Piqueras, Eduardo Ruiz, and Carlos Garcia Nuñez

[#136 Sputter optimization of AlN on Diamond substrates for high frequency SAW resonators](#) 71
Juan Gabriel Rodriguez Madrid, Gonzalo Fuentes Iriarte, Daniel Araujo -, María del Pilar Villar -, Oliver Williams -, and Fernando Calle Gomez

[#138 Fabrication and characterization at high temperature of AlGaIn/GaN Enhancement-mode HEMTs](#) 75
Sara Martín-Horcajo, M. J. Tadjer, M. F. Romero, R. Cuerdo, and Fernando Calle

Track: Device modeling and simulation

[#4 Hydrodynamic device simulation of 200 GHz SiGe Heterojunction Bipolar Transistors](#) 79
Juan Miguel López-González

[#5 Analytical Modeling of Base Transit Time and Gain of InP/InGaAs HBTs including Effect of Temperature](#) 83
Subhra Chowdhury and Sukla Basu

[#11 Analytical Modelling of Multiple-Gate MOSFETs](#) 87
Romain Ritzenthaler, Francois Lime, Frederic Martinez, Olivier Faynot, Fabien Pascal, Matteo Valenza, Enrique Miranda, Sorin Cristoloveanu, and Benjamin Iñiguez

[#12 Modeling Ballistic Double Gate MOSFETs using Neural Networks Approach](#) 91
Ahmed Fathy Abo-Elhadeed

[#13 A simple analytical and explicit compact model for the drain current of UTB SOI MOSFETs.](#) 95
François Lime, Romain Ritzenthaler, Enrique Miranda, Frederic Martinez, Fabien Pascal, Benjamin Iñiguez, and Olivier Faynot

[#15 Modeling and simulation of a cost-effective microfluidic circuit for particles' manipulation](#) 99
Vito di Virgilio, Arnau Coll, Sandra Bermejo, and Luís Castañer

[#20 BSIM4 Characterization of Current Enhancement in Short Channel s-Si/SiGe NMOS](#) 105
Abhishek A. Sharma, Rohan Shelar, Apeksha Shenoy, Rishkul Kulkarni, Pranit Kalantri, Tanmay Potnis, and Apurva Limaye

[#22 Asymmetrically-Recessed Nano-scale In_{0.52}Al_{0.48}As-In_{0.53}Ga_{0.47}As Double-Gate HEMT for High Breakdown Voltage](#) 108
Servin Rathi, R. S. Gupta, and Mridula Gupta

[#23 Estimating and Enhancing the Tolerance and Yield for Tunneling SRAM Cells by Simulation](#) 111
Dingli Zuo, and Michael J. Kelly

<u>#28 Quasi-static magnetoresistive sensor modeling for current-time conversion circuit applications</u>	115
Andrés Roldán, Candid Reig, Juan Bautista Roldán, María Dolores Cubells-Beltrán, Aurelio Cano-Abellán, S. Cardoso, and P.P. Freitas	
<u>#32 Ge content and recess depth dependence of the Band-to-Band Tunneling Current in Si_{1-x}Gex/Si hetero-junctions</u>	119
Abraham Luque Rodríguez, Mireia Bargallo Gonzalez, Geert Eneman, Cor Claeys, Eddy Simoen, and Juan Antonio Jiménez Tejada	
<u>#37 Planar Micro Ion Mobility Spectrometer Modelling for Explosives Detection</u>	123
Raquel Cumeras, Isabel Gràcia, Eduard Figueras, Luis Fonseca, Joaquin Santander, Marc Salleras, Carlos Calaza, Neus Sabaté, and Carles Cané	
<u>#48 Threshold Voltage Model for Ion-Implanted Short Gate-Length GaAs MESFETs under Dark and Illuminated Conditions</u>	127
Shweta Tripathi, and S. Jit	
<u>#62 DC Thermal Numerical Simulation of DG MOSFET</u>	131
Benito González, Benjamín Iñiguez, Antonio Lázaro, and Antonio Cerdeira	
<u>#77 OPTTR induced current oscillations in GaN diodes. Monte Carlo simulations</u>	135
Ana Iñiguez de la Torre, Javier Mateos, and Tomás González	
<u>#78 Monte Carlo study of the dynamic performance of isolated-gate InAs/AlSb HEMTs</u>	139
Helena Rodilla, Tomás González, Giuseppe Moschetti, Jan Grahn, and Javier Mateos	
<u>#81 Portable Silicon Neutron Detector System</u>	143
Consuelo Guardiola, C. Fleta, M. Lozano, D. Quirion, J. Rodríguez	
<u>#87 Circuit models for PN integrated varactors</u>	147
Margarita Marrero-Martin, Javier Garcia, Benito Gonzalez, and Antonio Hernandez	
<u>#93 Monte Carlo study of impact ionization and hole transport in InAs HEMTs with isolated gate</u>	151
Beatriz García Vasallo, Helena Rodilla, Tomás González, Giuseppe Moschetti, Jan Grahn, and Javier Mateos	
<u>#95 Static and large signal noise analysis in GaAs and GaN Schottky diodes for high frequency applications</u>	155
Diego Pardo Santos, Jesús Grajal de la Fuente, Susana Pérez Santos, Javier Mateos López, and Tomás González Sánchez	

<u>#101 Gain estimation of RTAPD devices by means of TCAD numerical simulations</u>	159
Ignasi Cortés, Pablo Fernández-Martínez, David Flores, Salvador Hidalgo, and José Rebollo	
<u>#102 An e-Science Infrastructure for Nanoelectronic Simulations based on Grid and Cloud Technologies</u>	163
Fernando Gómez Folgar, Javier López Cacheiro, Carlos Fernández Sánchez, Antonio García Loureiro, and Raúl Valin Ferreiro	
<u>#104 Compact modeling of the contact effects in organic thin film transistors</u>	167
Karam Mohammad Awawdeh, Juan Antonio Jiménez Tejada, Juan Antonio López Villanueva, Juan Carceller, Mohammad Jamal Deen, N. B. Chauré Chauré, T. Basova Basova, and Asim Ray	
<u>#105 Voltage-sensor monolithically integrated in 3.3 kV IGBTs.</u>	171
Jesús Urresti, David Flores, Salvador Hidalgo, José Rebollo, Christian Caramel, Patrick Austin, and Jean-Louis Sanchez	
<u>#109 Study of frequency dispersion effects to consider in a capacitance model for OTFTs</u>	175
Alejandra Castro-Carranza, Magali Estrada, Antonio Cerdeira, Jairo C. Nolasco, Benjamín Iñiguez, Rodrigo Picos, Lluís Marsal, and Josep Pallarès	
<u>#116 The Effect of Carrier Heating on the Noise Spectral Densities for Double-Gate MOSFET Devices</u>	179
Bogdan Nae, Antonio Lazaro, Romain Ritzenthaler, and Benjamin Iñiguez	
<u>#121 A Monte Carlo model for the study of n-type strained Silicon Schottky Diodes</u>	183
José María Galeote, Raúl Rengel, Elena Pascual, and María Jesús Martín	
<u>#125 On the relationship between the intrinsic cut-off frequency and the electron transit time in nanoscale devices</u>	187
Abdelilah Benali, F. L. Traversa, G. Albareda, A. Alarcón, M. Aghoutane, and X. Oriols	
<u>#126 BITLLES: an approach to quantum time-dependent electron transport at the nanoscale</u>	191
G. Albareda, F. L. Traversa, A. Alarcón, A. Benali, A. Padró, and X. Oriols	
<u>#130 Parallel Performance of the PETSc Krylov Methods Applied to Linear Systems of 3D Nanodevice Simulators.</u>	195
Angela Garcia Rivera, Raul Valin Ferreiro, Natalia Seoane Iglesias, Manuel Aldegunde Rodriguez, and Antonio Garcia Loureiro	
<u>#131 Low-injection behaviour of a solar cell with a metallic grating back-reflector</u>	199

Francisco Llopis, Mario Jakas, and Ignacio Tobías	
<u>#132 Current-Voltage Characteristics of Graphene Based Devices</u>	203
Oana Moldovan, and David Jiménez	
<u>#133 Simulation of transport in fully epitaxial (Zn,Co)O/ZnO/(Zn,Co)O magnetic tunnel junction</u>	206
Enrique Comesaña, Manuel Aldegunde, and Antonio Garcia-Loureiro	
<u>#134 Monte Carlo simulation of graded-channel fully depleted SOI nMOSFETs</u>	210
Maria Jesus Martin, Raúl Rengel, Jose Maria Galeote, Michelly de Souza, and Marcelo Antonio Pavanello	
<u>#137 Improving the Firing Mechanisms in Thyristors for Lighting Applications</u>	214
David Flores, Salvador Hidalgo, Ana Villamor, Seanus Mcquaid, and Imanol Mazarredo	
<u>#142 Easy Modeling of OTFTs using Neural Networks</u>	218
M. Lagziri, R. Picos, N. Bentaibi, M. Boussois, and E. Garcia-Moreno	

Track: Characterization and reliability

<u>#19 Accelerated Life Testing Leds On Temperature And Current.</u>	222
Eduardo Nogueira, and Juan Mateos	
<u>#27 Defect Level Prediction of Printed Circuit Board Assembly Manufacturing based on DPMO Metric</u>	226
Radek Soukup	
<u>#33 Load Resistor as a Worst-Case Parameter to Investigate Single-Event Transients in Analog Electronic Devices</u>	230
Isabel Lopez-Calle, Francisco J. Franco, Jesús G. Izquierdo, and Juan A. Agapito	
<u>#40 Characterization of SrTiO₃-based MIM capacitors grown by using different precursors and growth temperatures.</u>	234
Hector Garcia, Helena Castan, Alfonso Gomez, Salvador Dueñas, Luis Bailon, Kaupo Kukli, M. Kariniemi, M. Kemell, J. Niinistö, M. Ritala, and M. Leskelä	
<u>#41 A study of tunneling assisted charge exchange on the inner interface of high-k dielectric stacks.</u>	238
Helena Castan, Hector Garcia, Alfonso Gomez, Salvador Dueñas, and Luis Bailon	
<u>#42 Negative-resistance effect in Al₂O₃ based and nanolaminated MIS structures</u>	242
Alfonso Gomez, Helena Castan, Hector Garcia, Salvador Dueñas, Luis Bailon, Francesca Campabadal, Joan Marc Rafi, and Mikel Zabala	

<u>#51 DIELECTRIC BREAKDOWN RECOVERY IN ULTRATHIN HIGH-K GATE STACKS: IMPLICATIONS IN MOSFETS AND CIRCUIT PERFORMANCE.</u>	246
Albert Crespo-Yepes, Javier Martín-Martínez, Rosana Rodríguez, Montse Nafria, and Xavier Aymerich	
<u>#52 LASER System for Space Environment Emulation</u>	250
Isabel López-Calle, Francisco Javier Franco, Jesús Gonzalez, Antonio Hernández, and Juan Andrés Agapito	
<u>#60 Temperature dependence of Monolithic III-V Triple-Junction Solar Cells</u>	254
Eduardo Fernández Fernández, Antonio Garcia Loureiro, Pedro Pérez Higuera, and Gerald Siefert	
<u>#66 High-k dielectric polycrystallization effects on the nanoscale electrical properties of MOS structures</u>	258
Albin Bayerl, Vanessa Iglesias, Mario Lanza, Marc Porti, Montserrat Nafria, and Xavier Aymerich	
<u>#71 Power-law logistic model for the current-time characteristic of metal gate/high-K/III-V semiconductor capacitors</u>	262
Enrique Alberto Miranda, C. Mahata, T. Das, and C.K. Maiti	
<u>#100 Visible and UV Raman Scattering Study of Lattice Recovery on Ti implanted Silicon Layers</u>	265
David Pastor, Javier Olea, Alvaro Del Prado, Eric García-Hemme, Ignacio Mártel, Germán González-Díaz, Jordi Ibáñez, Ramón Cuscó, and Luís Artús	
<u>#123 Aging mechanisms in strain Si/high-k based pMOS transistors. Implications in CMOS circuits</u>	269
Javier Martín-Martínez, Esteve Amat, Nuria Ayala, Mireia Bargallo-Gonzalez, Peter Verheyen, Rosana Rodríguez, Montse Nafria, Xavier Aymerich, and Eddy Simoen	

Track: Sensors, actuators and micro/nano systems

<u>#3 Thickness influence on gas sensing characteristics of NiO thin films for formaldehyde detection</u>	273
Irene Castro, Gemma García Mandayo, and Enrique Castaño	
<u>#6 Design and fabrication of Love-wave sensors: An experimental study</u>	277
Daniel Matatagui, Jose Luís Fontecha, María Jesús Fernández, Isabel Gràcia, Carles Cané, and María del Carmen Horrillo	
<u>#79 Capacitive pressure sensor fabricated using Printed Circuit Board techniques</u>	281
Antonio Luque, Francisco Perdignes, Diego Medina, Juan García, and José M. Quero	
<u>#82 Fabrication of a MEMS based high precision solar sensor for satellite applications using CMOS technology</u>	285
Francisco José Delgado Seseña, Juan García Ortega, Cristina Lopez Tarrida, and Jose Manuel Quero Reboul	
<u>#84 Pneumatic Free Piston Fabricated in SU-8 for MEMS Applications</u>	289

Carmen Aracil, Francisco Perdigones, José A. Riveros, Blas Bogado, and José Manuel Quero	
<u>#88 Towards a Low-Cost Production of Monodispersed Microbubbles Using PCB-MEMS Technology</u>	293
Javier Villegas, Francisco Perdigones, José Miguel Moreno, and José Manuel Quero	
<u>#127 Self-sensing Cantilevers for the Measurement of (biomolecular) Forces</u>	297
G. Tosolini, L. G. Villanueva, F. Pérez Murano, and J. Bausells Roigé	
<u>#128 Strategies for Improving Sensitivity to Nitrogen Oxides in Electrochemical Gas Sensors for Lean Combustion Engines</u>	301
Carlos López-Gándara, Josep M. Fernández-Sanjuán, Francisco M. Ramos, and Albert Cirera	

Track: Photovoltaic and optoelectronic devices and displa

<u>#17 Emitter Diffusion Method for Extremely Thin Silicon Wafers</u>	305
Efrain Ochoa Martinez, Daniel Merchan Millan, Rocio Romero, Mercedes Gabás, Lourdes Martínez, Francisco Martin, Dietmar Leinen, Candido Vazquez, Bouchaib Hartiti, and José Ramón Ramos Barrado	
<u>#30 Triple-Junction Solar Cells for Ultra-High Concentrator Applications</u>	309
Enrique Barrigón, Elisa García-Tabarés, Iván García, Ignacio Rey-Stolle, and Carlos Algora	
<u>#56 Novel Er-doped organic complexes for application in 1,5 μm emitting solution-processed OLEDs</u>	313
Carmen Coya, Angel Luis Alvarez, Jesus Martin Gil, Maria Martin, Pablo Martin Ramos, and Carlos Zaldo	
<u>#63 Performance and Degradation of Organic Solar Cells with Different P3HT:PCBM[70] Blend Composition</u>	317

Victor Samuel Balderrama Vázquez, Magali Estrada Cueto, Pilar Formentin, Benjamin Iniguez, J. Ferre-Borrull, Josep Pallares, Jairo Cesar Nolasco, Emilio Palomares, Antonio Sanchez Diaz, and Luis F. Marsal Garvi	
<u>#67 Simulation of the temperature dependence of a-Si:H solar cell current-voltage characteristics</u>	321
Pablo Otero Pérez, Jose Antonio Rodriguez Gonzalez, Enrique Comesaña, Antonio García Loureiro, Michael Vetter, and Jordi Andreu	
<u>#68 Simulation of the effect of p-layer properties on the electrical behaviour of a-Si:H thin film solar cells</u>	325
Jose Antonio Rodriguez Gonzalez, Pablo Otero Perez, Enrique Comesaña, Antonio Jose García-Loureiro, Michael Vetter, and Jordi Andreu	
<u>#72 Crystalline silicon solar cells beyond 20% efficiency</u>	329
Pablo Ortega, Gema López, Albert Orpella, Isidro Martín, Monica Colina, Cristobal Voz, Sandra Bermejo, Joaquim Puigdollers, Miguel García, and Ramón Alcubilla	
<u>#85 Optoelectronic Properties in InAs/GaAs Quantum Dots Arrays Systems</u>	333
Abraham Luque Rodríguez, Salvador Rodríguez Bolívar, Francisco Manuel Gómez Campos, Juan Antonio López Villanueva, Juan Antonio Jiménez Tejada, Maria Trinidad García Fernandez, and Juan Enrique Carceller Beltrán	
<u>#86 2D-FDTD Analysis of Light Propagation in Nanostructured Organic Solar Cells</u>	337
Pedro Granero, Josep Ferré-Borrull, Josep Pallarès, and Lluís Francesc Marsal	

Track: Emerging devices

<u>#53 Toward THz Gunn Oscillations in Planar GaN Nanodiodes</u>	341
Ana Íñiguez-de-la-Torre, Javier Mateos, Ignacio Íñiguez-de-la-Torre, and Tomás González	
<u>#75 Micro-Barcodes for Biological applications</u>	345
Marta Duch, Rodrigo Gómez, Sergi Novo, Lleonard Barrios, Elena Ibáñez, Jaume Esteve, Carme	

Nogués, and Jose Antonio Plaza

[#107 Processing and adsorption control in ZnO single nanowire photodetectors](#) 349
Manuel López Ponce

Track: RF, microwave and power devices

[#36 Capacitive behaviour in Super Junction Trench MOSFET devices](#) 353
Ana Villamor, Ignasi Cortes, Filip Bogman, Jaume Roig, Piet Vanmeerbeek, Peter Moens, and David Flores

[#64 Coupled varactor based on pn junction and accumulation MOS for RF applications](#) 357
Javier Garcia Garcia, Margarita Marrero Martin, Benito González Pérez, Ignacio Aldea Granda, and Antonio Hernández Ballester

[#129 A low temperature cofired ceramic \(LTCC\) technology platform for heterogeneous integrated systems](#) 361
F. Afsar, M. Blanes, T. Carrasco, A. Cirera, J.M. Fernandez, F. Giordano, C. López, J.M. López-Villegas, J:G: Macías, F. Ramos, J. Sieiro, and N. Vidal

Track: Other topics

[#47 Hypobaric chamber for wind sensor testing in Martian conditions](#) 365
Lukasz Kowalski and Miguel Garcia Molina

[#69 Linear Mode Reach-Through Avalanche Photodiodes for Medium Energy X-rays Detection](#) 369
Pablo Fernández-Martínez, Ignasi Cortés, Salvador Hidalgo, David Flores, Giulio Pellegrini, and Manuel Lozano

[#90 Numerical Simualtion of Nanoporous Anodic Alumina-based Metallo-dielectric Quasi-random Structures](#) 373
Mohammad Mahbubur Rahman, Josep Ferré-Borrull, Josep Pallarès, and Lluís F. Marsal

#99 Simulation of Total Ionising Dose in MOS Capacitors	377
Pablo Fernández-Martínez, Francisco Rogelio Palomo, Ignasi Cortés, Salvador Hidalgo, and David Flores	
#117 In-parallel maskless fabrication of nanowire-based device arrays	381
Carlos Jose Camargo, Jaume Esteve, Idalia Ramos, Eva M. Campo, and Humberto Campanella	
#139 Pass-transistors pMOS based 8T SRAM cell for layout compaction	385
Sebastia Bota, Bartomeu Alorda, Gabriel Torrens, and Jaume Segura
