

2010 Days on Diffraction

(DD 2010)

St. Petersburg, Russia

8 – 11 June 2010

IEEE Catalog Number: CFP10489-PRT
ISBN: 978-1-4577-0244-0

CONTENTS

Valeriy A. Abdulkadyrov	
The diffraction and dispersion of waves in the space-periodic structure with the 2-dimensional electronic gas	9
Eron L. Aero, Anatolii N. Bulygin, Yurii V. Pavlov	
New approach to solution of sine-Gordon equation with variable amplitude	10
Tat'yana Yu. Alekhina, Andrey V. Tyukhtin	
Transition radiation in a waveguide with semi-bounded cold plasma	16
Atul Bhaskar	
Dynamics of convecting elastic solids	22
V. V. Borzov, E. V. Damaskinsky	
Connection between representations of nonstandard and standard Chebyshev oscillators	28
Anders Boström, Karl Mauritsson, Peter D. Folkow	
Dynamic equations for an orthotropic plate	35
Vitaly V. Bulatov, Yury V. Vladimirov	
Wave dynamics of non-harmonic internal gravity wave in stratified ocean	40
A. Chrysostomou, I. Zorbas, E. Papkelis, P. Frangos	
Radio coverage simulation for three-dimensional urban environment using physical optics, physical theory of diffraction and the near-to-far-field transformation method	42
Vitalii N. Chukov	
Oscillations of statistical scattering in Rayleigh limit	48
Aleksandr A. Ershov	
Asymptotics of the solution to the mixed boundary elliptic problem	55
George V. Filippenko	
Statement of the boundary-contact problems for the shells in acoustics	57
M. Ganesh, S. C. Hawkins	
Iterative algorithms for multiple electromagnetic scattering in three dimensions	63
Evgeny V. Glushkov, Natalia V. Glushkova, Mikhail V. Golub, Artem A. Eremin	
Trapped-mode, pass- and gap-band effects in waveguides with obstacles	69
Mikhail V. Golub, Anders Boström	
Spring boundary conditions and modeling of 2D wave propagation in composites with imperfect interfaces	73
Maxim A. Ilyasov	
Seismic data processing in terms of locally supported wavelets	79
Jevgenijs Jegorovs	
On the extension of the wave based method	85
Victor F. Kravchenko, Dmitry V. Churikov	
New analytical WA-systems of Kravchenko functions	93
Victor F. Kravchenko, Dmitry V. Churikov	
Radial atomic functions in digital signal processing	99
Valeri V. Kucherenko	
Linearized system of magnetohydrodynamics for the ideal incompressible fluid	102

Speaker is given in bold.

Alexander V. Kudrin, Natalya M. Shmeleva, Orsolya E. Ferencz, Tatyana M. Zaboronkova	
Excitation of electromagnetic waves by a pulsed ring current in a magnetoplasma	106
A.G. Kyurkchan , N.I. Smirnova	
Pattern equation method as an alternative to T-matrix method	113
Victor G. Lapin	
Non-stationary multiple scattering of electromagnetic wave in smoothly non-uniform isotropic plasmas, disturbed by powerful electromagnetic impulse	120
Makin V. S. , Silantjeva I. A., Makin R. S.	
Qualitative model for nanostructures formation in semiconductor material along femtosecond laser beam direction	123
German A. Maximov , Vladimir A. Larichev	
Shear viscosity as a result of angular momentum relaxation at hydrodynamical description ...	128
Alexandr B. Plachenov	
Explicit formulae for higher modes of a nonplanar cavity with odd number of mirrors	131
Danila A. Prikazchikov	
The asymptotic model for surface wave	137
A. D. Rawlins	
High frequency diffraction of an electromagnetic plane wave by an imperfectly conducting rectangular cylinder	142
Ilya A. Shereshevskii , Igor M. Nefedov	
The numerical method for 2D Helmholtz equation in complicated regions	147
Oleg V. Soldatenko	
Active protection from noise propagating in a cylindrical waveguide	153
Olga Strizhenko , Maxim Kolmakov	
Simulation of a laminar flow in a porous medium	158
Igor A. Timoshchenko , George G. Borzdov	
Vectorial laser beams radiation pressure on (1+3)-level neutral atoms	161
Andrey V. Tyukhtin , Emma G. Doil'nitsina	
Effective permittivity of a structure of coated wires	166
Andrei B. Utkin	
Modal representation of transient waves constrained by an elliptical cylinder	171
Valery Yu. Valyaev , Andrey V. Shanin	
Derivation of modified Smyshlyaev's formulae using integral transform of Kontorovich-Lebedev type	174
Nadezhda K. Vdovicheva , Ilya A. Shereshevskii	
The numerical calculation of eigen modes of rectangular electrodynamic waveguide with metal partition	181
Z. A. Yanson	
On the asymptotics of whispering gallery waves for crystal groups with even order axes of symmetry	187
Natalya F. Yashina , Tatyana M. Zaboronkova	
Instability of the electromagnetic surface waves supported by the bianisotropic column in dielectric medium	193

Dmitrii D. Zakharov, Alexandr V. Kaptsov
Resonance properties of wave propagation in the heterogeneous composites with nematic coatings 198

Dmitrii D. Zakharov
High order asymptotics of the near field, radiated by a normal or angled beam fluid couple ultrasonic transducer, into an elastic plate or a half-space 204

Mounir G. Zeitouny, Moxi Cui, Nandini Bhattacharya, H. Paul. Urbach, Steven A. van den Berg, Augustus J. E. M. Janssen
Stationary phase based asymptotic analysis of inter-pulse interference from a frequency comb source in dispersive media 209
