

# **2011 16th IEEE International Conference on Engineering of Complex Computer Systems**

**(ICECCS 2011)**

**Las Vegas, Nevada, USA  
27 - 29 April 2011**

**IEEE Catalog Number: CFP11077-PRT  
ISBN: 978-1-61284-853-2**

# 2011 16th IEEE International Conference on Engineering of Complex Computer Systems

## ICECCS 2011

### Table of Contents

Preface .....	ix
Committees .....	x
Reviewers.....	xiii

---

#### **Session 1: Real-Time Systems I**

Temporal Abstract Domains .....	3
<i>Julien Bertrane</i>	
WCET Analysis of Component-Based Systems Using Timing Traces .....	13
<i>Adam Betts and Amine Marref</i>	
Memory Positioning of Real-Time Code for Smaller Worst-Case Execution Times .....	23
<i>Amine Marref and Adam Betts</i>	

#### **Session 2: Real-Time Systems II**

Tighter Schedulability Analysis of Synchronization Protocols Based on Overrun without Payback for Hierarchical Scheduling Frameworks .....	35
<i>Moris Behnam, Thomas Nolte, and Reinder J. Bril</i>	
A Model-Driven Framework for the Development of Portable Real-Time Embedded Systems .....	45
<i>W. El Hajj Chehade, A. Radermacher, F. Terrier, B. Selic, and S. Gérard</i>	
<i>Timed Circus: Timed CSP with the Miracle</i> .....	55
<i>Kun Wei, Jim Woodcock, and Alan Burns</i>	
Verification of MARTE/CCSL Time Requirements in Promela/SPIN .....	65
<i>Ling Yin, Frédéric Mallet, and Jing Liu</i>	

## Session 3: Real-Time Systems III

Modeling Variability from Requirements to Runtime .....	77
<i>Mathieu Acher, Philippe Collet, Philippe Lahire, Sabine Moisan, and Jean-Paul Rigault</i>	
Formal Model of Interrupt Program from a Probabilistic Perspective .....	87
<i>Yongxin Zhao, Yanhong Huang, Jifeng He, and Si Liu</i>	
Model-Based Simulation of SOAP Web Services from Temporal Logic Specifications .....	95
<i>Sylvain Hallé</i>	

## Session 4: Dynamic Modeling

A Fully Dynamic Approach to the Reverse Engineering of UML Sequence Diagrams .....	107
<i>Tewfik Ziadi, Marcos Aurélio Almeida da Silva, Lom Messan Hillah, and Mikal Ziane</i>	
Using Model Transformation to Generate Graphical Counter-Examples for the Formal Analysis of xUML Models .....	117
<i>Osmar M. dos Santos, Jim Woodcock, and Richard Paige</i>	
Required Behavior of Sequence Diagrams: Semantics and Refinement .....	127
<i>Lunjin Lu and Dae-Kyoo Kim</i>	

## Session 5: MDE I

A Goal-Based Approach to Guide the Design of an Abstract Event-B Specification .....	139
<i>Abderrahman Matoussi, Frédéric Gervais, and Régine Laleau</i>	
Modelling and Analysing Standard Use within System of Systems .....	149
<i>Russell Lock</i>	
Towards a MDE Transformation Workflow for Dependability Analysis .....	157
<i>Leonardo Montecchi, Paolo Lollini, and Andrea Bondavalli</i>	
Tailoring Process Synthesis to Domain Characteristics .....	167
<i>Stefan Naujokat, Anna-Lena Lamprecht, and Bernhard Steffen</i>	

## Session 6: MDE II

A Component-Oriented Metamodel for the Modernization of Software Applications .....	179
<i>Luciano Baresi and Matteo Miraz</i>	
A Formal Approach to Model Composition Applied to VUML .....	188
<i>Adil Anwar, Taoufiq Dkaki, Sophie Ebersold, Bernard Coulette, and Mahmoud Nassar</i>	

Leveraging Service-Oriented for Combining Code Generation Frameworks .....	198
<i>Sven Jörges and Bernhard Steffen</i>	

## **Session 7: Intelligent Systems**

A Software Requirements Specification Framework for Objective Pattern Recognition: A Set-Theoretic Classification Approach .....	211
<i>Arbi Ghazarian, Mehdi Sagheb Tehrani, and Arin Ghazarian</i>	
A Novel Approach Based on Gestalt Psychology for Abstracting the Content of Large Execution Traces for Program Comprehension .....	221
<i>Heidar Pirzadeh and Abdelwahab Hamou-Lhadj</i>	
Towards Succinctness in Mining Scenario-Based Specifications .....	231
<i>David Lo and Shahar Maoz</i>	

## **Session 8: Communication Systems**

Modeling and Coordinating Social Interactions in Pervasive Environments .....	243
<i>Muhammad Ashad Kabir, Jun Han, and Alan Colman</i>	
Group Selection by Nodes in Wireless Sensor Networks Using Coalitional Game Theory .....	253
<i>Fatemeh Kazemeyni, Einar Broch Johnsen, Olaf Owe, and Ilango Balasingham</i>	
LIPS: A Protocol Suite for Homeostatic Sensornet Management .....	263
<i>Jonathan Tate and Iain Bate</i>	
Computational Social Network Management in Crowdsourcing Environments .....	273
<i>Florian Skopik, Daniel Schall, and Schahram Dustdar</i>	

## **Session 9: Parallelism-Intensive and Evolving Software Systems**

Parallelism Viewpoint: A Viewpoint to Model Parallelism in Parallelism-Intensive Software Systems .....	285
<i>Naeem Muhammad, Nelis Boucke, and Yolande Berbers</i>	
Analyzing and Forecasting Near-Miss Clones in Evolving Software: An Empirical Study .....	295
<i>Minhaz F. Zibran, Ripon K. Saha, Muhammad Asaduzzaman, and Chanchal K. Roy</i>	
On the Impact of Kanban on Software Project Work: An Empirical Case Study Investigation .....	305
<i>Marko Ikonen, Elena Pirinen, Fabian Fagerholm, Petri Kettunen, and Pekka Abrahamsson</i>	

## Sixth IEEE International Workshop on UML and AADL

An Efficient Modeling and Execution Framework for Complex Systems Development .....	317
<i>Isabelle Perseil, Laurent Pautet, Jean-François Rolland, Mamoun Filali, Didier Delanote, Stefan Van Baelen, Wouter Joosen, Yolande Berbers, Frédéric Mallet, Dominique Bertrand, Sébastien Faucou, Abdelhafid Zitouni, Mahmoud Boufaïda, Lionel Seinturier, Joel Champeau, Thomas Abdoul, Peter H. Feiler, Chokri Mraidha, and Sébastien Gérard</i>	
An Implementation of the Behavior Annex in the AADL-Toolset Osate2 .....	332
<i>Gilles Lasnier, Laurent Pautet, Jérôme Hugues, and Lutz Wrage</i>	
Modeling and Verification of Memory Architectures with AADL and REAL .....	338
<i>Stéphane Rubini, Frank Singhoff, and Jérôme Hugues</i>	
Two Formal Semantics of a Subset of the AADL .....	344
<i>Zhibin Yang, Kai Hu, Jean-Paul Bodeveix, Lei Pi, Dianfu Ma, and Jean-Pierre Talpin</i>	
Requirements Exchange: From Specification Documents to Models .....	350
<i>Morayo Adedjouma, Hubert Dubois, and François Terrier</i>	
ABV - A Verifier for the Architecture Analysis and Design Language (AADL) .....	355
<i>Stefan Björnander, Cristina Seceleanu, Kristina Lundqvist, and Paul Pettersson</i>	
A Tool Set for Integrated Software and Hardware Dependability Analysis Using the Architecture Analysis and Design Language (AADL) and Error Model Annex .....	361
<i>Myron Hecht, Alexander Lam, and Chris Vogl</i>	
Integrating AADL-Based Tool Chain into Existing Industrial Processes .....	367
<i>Alexey Khoroshilov, Igor Koverninskiy, Alexander Petrenko, and Alexander Ugnenko</i>	
<b>Author Index</b> .....	<b>372</b>
