TABLE OF CONTENTS

VOLUME I

ENGINEERING AUTOMATION AND INFORMATION TECHNOLOGY

- 1 **Use of Integrated Knowledge-Based Systems for Helicopter Design and Manufacturing**
Paul W. von Hardenberg, Sikorsky Aircraft Corporation; Gavin A. Finn, Stone & Webster Advanced Systems Development Services, Inc.
- 11 **Integrated Product/Process Design/Development (IPPD) through Robust Design Simulation: The Key for Affordable Rotorcraft**
Daniel P. Schrage and Dimitri N. Mavris, Georgia Institute of Technology
- 27 **Contractor and Customer Experience in Developing a CALS Implementation Plan (CALSIP)**
C.J. Ransom, Bell Helicopter Textron, Inc.; Ron Bauer, Boeing Helicopters; Myra Mutzelburg, NAVAIR
- 31 **MPAS (Mass Properties Analysis System) - Tracking an Aircraft from Conceptual Design Through Production**
Steven D. Larsen, McDonnell Douglas Helicopter Systems
- 39 **Enhanced Army Systems Engineering by: Total Resource Sharing Using Information Superhighway Technology**
M.E. Myers, Lockheed Aircraft Services Co.
- 52 **Development and Application of the PRESTO Air Vehicle Predesign Synthesis Methodology**
Ted Trept, David Sigl, Dan Robertson, Bell Helicopter Textron, Inc.

AERODYNAMICS I

- 65 **Calculation of Dynamic Stall by Viscous-Inviscid Interaction Over Airfoils and Helicopter Blade Sections**
J.C. Le Balleur and P. Girodroux-Lavigne, ONERA
- 77 **Simulation of Tiltrotor Fountain Flow Field Effects Using a Finite Volume Technique—An Aero/Acoustic Study**
Hormoz Tadghighi, McDonnell Douglas Helicopter Systems; Ganesh Rajagopalan, Iowa State University; Casey Burley, NASA Langley Research Center

- Paper not available at the time of printing.
- Note: The order and technical papers in the "Proceedings" may not be wholly reflective of the order and content of the technical sessions at FORUM 51, e.g. a paper presented in Structures & Materials I session may appear in the "Proceedings" under Structures & Materials II.

93 Design and Experimental Verification of a Family of High-Speed Tilt Rotor Airfoils

Stephen J. Owen, Sikorsky Aircraft Corporation

101 Aerodynamic Design Optimization of a Variable Diameter Tilt Rotor

S. Jon Davis and R. Moffitt, Sikorsky Aircraft Corporation; Todd R. Quackenbush and Daniel A. Wachspress, Continuum Dynamics, Inc.

112 Navier-Stokes Simulation of a Rotor Using a Distributed Pressure Disk Method

Mark S. Chaffin, ViGYAN, Inc.; John D. Berry, U.S. Army AFDD (ATCOM)

137 A General Free Wake Geometry Calculation for Wings and Rotors

Wayne Johnson, Johnson Aeronautics

STRUCTURES AND MATERIALS I

155 Composites Qualification Criteria

David O. Adams, Sikorsky Aircraft Corporation and the Fatigue Methodology Committee of the Rotorcraft Advisory Group of the Aerospace Industries Association

182 Certification of the EH-101 Composite Components: A Comprehensive Approach

G. Guzzetti, U. Mariani, and F. Oggioni, Agusta S.p.A.

204 Development of a Carbon/Epoxy Filament-Wound Wing Drive Shaft for the V-22

Robert A. Komenda and Sherman Lin, Bell Helicopter Textron, Inc.; A. John Ayorinde, Brunswick Composites; Steven J. Thoman, Naval Air Development Center

212 K-1200 Low Cycle Fatigue Testing

Michael Abdelmaseh, Kaman Aerospace Corporation

223 Structural Material Selection for the K-Max Commercial/Industrial Helicopter

Charles P. Hardersen and Michael V. Hoagland, Kaman Aerospace Corporation

MILITARY OPERATIONS

235 The Development and Application of Novel Visual Aids to Increase Operational Limits at the Helicopter/Ship Dynamic Interface

LT Simon J. Tate, Defence Research Agency

- **The Development and Flight Test Demonstrations of an Integrated Automatic Recovery System to Reduce the Operational Limitations of Embarked Helicopters at Night and in Bad Weather**
R. Bruce Lumsden and David C. Bradley, Defence Research Agency
- 259 Measuring the Benefits of a Complex System: The Rotorcraft Pilot's Associate Evaluation Program**
Greta A. Robertson, McDonnell Douglas Helicopter Systems; Keith E. Arthur, U.S. Army AATD (ATCOM)
- 266 Transparent Polymer Development and Modeling for Improved Helicopter Blast/Fragmentation Barriers**
Richard A. Huyett, F. Stanton Lyons, Edwin C. Slagel, Simula Government Products, Inc.
- 272 Passive Electronic Support Measures (ESM) Technology in Military Helicopter Operations**
W. Scott Vickers, Lockheed Aircraft Service Company
- 283 External Fuel Tanks for Helicopters: The Ultimate Mission Enhancer? The Rest of the Story**
Major Allen L. Peterson, U.S. Army Aviation Technical Test Center

HANDLING QUALITIES I

- 287 Carefree Manoeuvring in Helicopter Flight Control**
Jeremy Howitt, Defence Research Agency
- **Handling Qualities Influence on Civil Tiltrotor Terminal Operating Procedure Development**
William A. Decker, Rickey C. Simmons, George E. Tucker, NASA Ames Research Center
- 299 Development and Testing of Flying Qualities for Manual Operation of a Tiltrotor UAV**
Robert L. Fortenbaugh, Kenneth E. Builta, Kynn J. Schulte, Bell Helicopter Textron, Inc.
- 321 Handling Qualities Flight Testing of Helicopters at Extreme Lateral Center of Gravity**
LTC Donald E. Reed, U.S. Army Aviation Technical Test Center

LTC Donald E. Reed, U.S. Army Aviation Technical Test Center

343 Development of a Model Following Control Law for Inflight Simulation Using Analytical and Identified Models

M. D. Takahashi, U.S. Army AFDD (ATCOM); Jay W. Fletcher, NASA Ames Research Center; Mark B. Tischler, U.S. Army AFDD (ATCOM)

357 Synthesis of an Integrated Fuzzy/Nonlinear Controller for Rotorcraft

T. Y. Jiang, J. V. R. Prasad, and R. Swaminathan, Georgia Institute of Technology

365 Optimal OEI Clear Heliport Operation of a Multiengine Helicopter

Vivek Sharma and Yiyuan Zhao, University of Minnesota; Robert T. N. Chen and William S. Hindson, NASA Ames Research Center

DYNAMICS I

381 Active Flap Control for Vibration Reduction and Performance Improvement

F. K. Straub, McDonnell Douglas Helicopter Systems

• **V-22 Empennage Buffet Dynamics**

Jim Bilger, Bennie Holloway, Rangacharyulu Maddali, Bell Helicopter Textron, Inc.; Bob Vlaminc, Boeing Defense & Space Group, Heli. Div.

393 Flight Test of an Active Vibration Control System on the UH-60 Black Hawk Helicopter

W. Welsh and C. Fredrickson, Sikorsky Aircraft Corporation; I. Lyndon, Westland Helicopters Ltd.; C. Rauch, Moog Inc.

403 Analysis of Bearingless Main Rotor Dynamics with the Inclusion of an Improved Time Domain Nonlinear Elastomeric Damper Model

Farhan Gandhi and Inderjit Chopra, University of Maryland

421 High Load Conditions Measured on a UH-60A in Maneuvering Flight

Robert M. Kufeld, NASA Ames Research Center and William G. Bousman, U.S. Army AFDD (ATCOM)

434 CH-47D Airframe Vibration Reduction through Airframe Stiffening

Richard Gabel and Phillip Lang, Boeing Defense & Space Group, Heli Div.

444 Fast Floquet Theory and Trim for Multi-Bladed Rotorcraft

David A. Peters, Washington University

ACOUSTICS

- 461 Acoustic Results From a Full-Scale Wind Tunnel Test Evaluating Individual Blade Control**
Stephen M. Swanson, Sterling Software, Inc.; Stephen A. Jacklin, NASA Ames Research Center; Achim Blaas, ZF Luftfahrttechnik, GmbH; Georg Niesl, Eurocopter Deutschland, GmbH; and Roland Kube, DLR, Institute of Flight Mechanics
- 481 Comparison of Experimental Blade-Vortex Interaction Noise with Computational Fluid Dynamic Calculations**
Megan S. McCluer and James D. Baeder, University of Maryland; Cahit Kitaplioglu, NASA Ames Research Center
- 495 Helicopter Noise Predictions Using Kirchhoff Methods**
Roger C. Strawn and Rupak Biswas, NASA Ames Research Center; Anastasios S. Lyrantzis, Purdue University
- 509 Validation of ONERA Aeroacoustic Prediction Methods for Blade-Vortex Interaction Using HART Test Results**
P. Baumier and P. Spiegel, ONERA
- 525 Development of a Rotor Aerodynamic Load Prediction Scheme for Blade-Vortex Interaction Noise Study**
Ben Wel-C. Sim and Albert R. George, Cornell University
- 547 Extracting Blade-Vortex Interaction Signals with Wavelet Analysis**
Wyatt O. Davis and Charles Pezeshki, Washington State University; Marianne Mosher, NASA Ames Research Center

CRASH SAFETY

- 581 The System Approach to Crashworthiness for the NH90**
Dieter R.H. Nitschke and Roland Müller, Eurocopter Deutschland GmbH
- 592 Dynamic Performance of the Inflatable Body and Head Restraint System (IBAHRS)**
Michael Schultz and Brian Bohmueller, Naval Air Warfare Center, Aircraft Div.
- 600 Sub-floor Skin Panels for Improved Crashworthiness of Helicopters in Case of Water Impact**
Humbertus G. S. J. Thuis, H. P. J. de Vries, Jaap F. M. Wiggeraad, National Aerospace Laboratory (NLR)

- 608 Sizing and Topology Optimization of Rotorcraft Structures for Improved Crash Performance**
E. Lee and P. Hajela, Rensselaer Polytechnic Institute
- 624 A Comfortable Cushion for Crashworthy Crewseat**
Kevin W. Nolan, U.S. Army AATD (ATCOM); Ricky L. Greth, LME, Inc.
- **Analysis of the Effectiveness of Wire Strike Protection on Army Helicopters**
LeRoy T. Burrows, U.S. Army AATD (ATCOM)

TEST AND EVALUATION I

- 631 Wind Tunnel Test of an Active Flap Rotor: BVI Noise and Vibration Reduction**
Seth Dawson, Friedrich Straub, Ahmed Hassan, Hormoz Tadghighi, McDonnell Douglas Helicopter Systems; Michael Marcolini, Earl Booth, NASA Langley Research Center; Henry Kelly, U.S. Army AFDD (ATCOM)
- 649 Growth Main Rotor Blade Feasibility Demonstration Test Program**
Barclay H. Boirun, John R. Herter, Joseph C. Nuttall, Timothy N. Trainer, Sikorsky Aircraft Corporation
- 662 Reduction of Helicopter BVI Noise, Vibration, and Power Consumption Through Individual Blade Control**
Stephen A. Jacklin, NASA Ames Research Center; Achim Blaas, ZF Luftfahrttechnik, GmbH; Dietrich Teves, Eurocopter Deutschland, GmbH; Roland Kube, DLR Institute for Flight Mechanics
- 681 Flight Tests of Noise Abatement Approaches for Rotorcraft Using Differential GPS Guidance**
William S. Hindson and Robert T. N. Chen, NASA Ames Research Center
- 695 The HART Programme: A Quadrilateral Cooperative Research Effort**
Bernd L. Gmelin and Hanno Heller, (DLR); Edzard Mercker, (DNW); Jean J. Philippe, ONERA.; John S. Preisser, NASA Langley Research Center; Yung H. Yu, U.S. Army AFDD (ATCOM)

AVIONICS AND SYSTEMS

- 711 CH-47 Advanced Cockpit Management System**
Philip L. Kirkpatrick, Charles A. DiPietro, and Yongkuk Choe, Boeing Defense and Space Group, Heli Div.

- 722 Wavelet-Based Diagnostics for Helicopter Main Transmission**
Jose E. Lopez and Nick Polyak, ALPHATECH, Inc.
- 729 The ANVIS Head-Up Display: An Analysis of its Application to Naval Helicopters**
Lt. Dean Peters, Naval Air Warfare Center Aircraft Division
- 736 Electromagnetic Compatibility and Integrated Wiring Systems**
Gregory W. Osborne, Bell Helicopter Textron, Inc.
- 744 How HUMS Systems Have the Potential of Significantly Reducing the Direct Operating Cost for Modern Helicopters through Monitoring**
Jim Land and Cay Weitzman, Teledyne Controls, Helicopter Systems
- 758 Current and Planned Capabilities of the NASA/Army Rotorcraft Aircrew Systems Concepts Airborne Laboratory (RASCAL)**
R. A. Jacobsen, N. A. Rediess, W. S. Hindson, E. W. Aiken, NASA Ames Research Center; C. Bivens, U.S. Army AFDD (ATCOM)
- 772 Along Side Analysis of Type 23 Ship Motion as a Function of Mechanical and Dynamic Limits of an EH101-like Helicopter Using the Landing Period Designator Helicopter Recovery Device**
R. Bruce Lumsden, Defence Research Agency; Bernard Ferrier, Bombardier Inc., Group Canadair
- 781 Helicopter Modifications: Making the Transition to Meet Changing Requirements in Today's Environment**
Mark C. Radeleff, Lockheed Aircraft Service Co.

UAV (VTOL)

- **The Design, Development and Testing of the CL-227 Unmanned Air Vehicle**
William Upton, Gunter Goritschnig, Bernard Ferrier, Bombardier, Inc., Group Canadair
 - **Eagle Eye Performance Potential Based on Flight Test**
Robert Morgan, Bell Helicopter Textron, Inc.
- 791 Intelligent Control of an Unmanned Helicopter Based on Fuzzy Logic**
Michio Sugeno, Isao Hirano, and Satoru Kotsu, Tokyo Institute of Technology;
Howard Winston, United Technologies Research Center

- 804 Sikorsky Aircraft's Unmanned Aerial Vehicle, Cypher: System Description and Program Accomplishments**
Christopher A. Thornberg and James P. Cycon, Sikorsky Aircraft Corporation
- 812 Development, Integration and Test of an Automatic UAV Recovery System for the CL227 VTOL-UAV**
George Bokos and Bernard Ferrier, Bombardier, Inc. Group Canadair
- **Goals and Status of the Georgia Tech Unmanned Autonomous Scout Rotorcraft Testbed (ASRT) Project**
J. V. R. Prasad and Mark Gordon, Georgia Institute of Technology; Eric Coran, Guided Systems Technology, Inc.; Art Phelps, Advanced Technology, Inc.

AERODYNAMICS II

- 821 Numerical Simulation of Unsteady Euler Flow Around Multibladed Rotor in Forward Flight Using a Moving Grid Approach**
Jean-Christophe Boniface, Bruno Mialon, and Jacques Sides, ONERA
- **Aerodynamic Development of a Forebody Strake for the Y-22 Osprey**
Michael A. McVeigh and John Liu, Boeing Defense & Space Group, Heli. Div.; Tom Wood, Bell Helicopter Textron, Inc.
- 841 A Free Wake/Ground Vortex Model For Rotors at Low Speed In-Ground-Effect Flight**
C. S. Lee and C. J. He, Advanced Rotorcraft Technology, Inc.
- 851 Free-Wake Analysis of Tandem, Tilt-Rotor and Coaxial Rotor Configurations**
Ashish Bagai and J. Gordon Leishman, University of Maryland
- 871 Rotor Wake Interaction With a Lifting Surface**
Robert B. Funk and Narayanan M. Komerath, Georgia Institute of Technology
- 882 Results of a Viscous Flow Analysis for Proprotor Design**
Brian E. Wake and T. Alan Egolf, United Technologies Research Center; Mark W. Scott, Sikorsky Aircraft Corporation

TABLE OF CONTENTS

VOLUME II

AIRCRAFT DESIGN I

- 893 An Inverse Aerodynamic Design Method for Rotor Blades in Forward Flight**
Fidencio Tapia, Lakshmi N. Sankar, and Daniel P. Schrage, Georgia Institute of Technology
- 905 Integrated Rotor-Flight Control System Optimization with Aeroelastic and Handling Qualities Constraints**
Vineet Sahasrabudhe, Roberto Celi, and André L. Tits, University of Maryland
- 924 A Coupled Rotor/Wing Optimization Procedure for High Speed Tilt-Rotor Aircraft**
Thomas R. McCarthy, Aditi Chattopadhyay, and Sen Shang, Arizona State University
- 937 Structural Optimization for Vibration Reduction of Composite Helicopter Rotor Blades with Advanced Geometry Tips Subject to Multidisciplinary Constraints**
Kuo-An Yuan, McDonnell Douglas Corporation; Peretz P. Friedmann, University of California, Los Angeles
- 957 Optimization of the Twist Distribution Using an Adaptive Airfoil**
R. L. Roglin and S. V. Hanagud, Georgia Institute of Technology; D.A. Peters, Washington University; Aditi Chattopadhyay, Arizona State University
- 965 Aeroelastic Optimization of an Advanced Geometry Composite Helicopter Rotor**
Ranjan Ganguli and Inderjit Chopra, University of Maryland

INTEGRATED MANUFACTURING PROCESS AND CONTROL I

- 985 Improved Airframe Manufacturing Technology Program**
Jeffrey Sauer, Sikorsky Aircraft Corporation
- 995 FiberSim: Design for Manufacturing of Laminated Composite Parts at Sikorsky Aircraft**
Allen E. Trudeau, Sikorsky Aircraft Corporation; Steven C. Luby, Composite Design Technology

- Paper not available at the time of printing.
- Note: The order and technical papers in the "Proceedings" may not be wholly reflective of the order and content of the technical sessions at FORUM 51, e.g. a paper presented in Structures & Materials I session may appear in the "Proceedings" under Structures & Materials II.

Design Technology

- **Fiber Placement Technology Advancements at Boeing Helicopters**
Lee Kitson, Boeing Defense & Space Group, Heli. Div.
- 1000 **Ultrasonic Inspection of Complex Composite Panels**
James E. Eder, Boeing Defense & Space Group, Heli Div.
- 1009 **Knowledge-Based Design of Closed-Cavity Bond Tools**
R. A. Moore and C. C. Chin, Bell Helicopter Textron, Inc.
- 1015 **Development and Integration of a Pictorial Planning System**
Evan E. Blake and James P. Bates, Bell Helicopter Textron, Inc.

FLIGHT SIMULATION

- 1023 **Simulation Architecture of the Rotorcraft Pilot's Associate Program**
James R. Crocco, McDonnell Douglas Helicopter Systems
- 1028 **Combat Simulation in the Longbow Apache Force Development Test and Experimentation (FDTE)**
Scott R. Swinsick, McDonnell Douglas Helicopter Systems
- 1036 **Minimum Cues and Fidelity Requirements for Real-Time Simulation of the Rotorcraft Shipboard Landing Task**
Warren F. Clement, Sharon A. Duerksen, Bimal L. Aponso, Systems Technology, Inc.; Wayne F. Jewell, Jewell Engineering
- 1052 **A Comparison of Two Alternative Velocity Vector Cue Combinations for the AH-64D Integrated Helmet and Display Sight Subsystem**
John Edward Stewart, II, U.S. Army Research Institute Aviation R & D Activity
- 1062 **Rotorcraft Integrated Fire and Flight Control (IFFC) Mission Simulation**
Phillip J. Gold, Lloyd W. Moore, Donald W. Fowler, Sikorsky Aircraft Corporation
- 1074 **Piloted Simulator Investigation of Category-A Civil Rotorcraft Terminal Area Cockpit Displays**
Laura Iseler, NASA Ames Research Center
- 1094 **A Simulation Model of Ship Ground Effect for Rotorcraft/Ship Interaction Study**
Hong Zhang, O. A. F. Mello, J. V. R. Prasad, Georgia Institute of Technology;
L. N. Sankar, John D. Funk, Jr., Naval Air Warfare Center Aircraft Division

DYNAMICS II

- 1101 Formulation and Validation of a Finite Element Model for Elastomeric Lag Dampers**
Edward C. Smith, Michael R. Beale, Kiran Govindswamy, Michael J. Vascsinec, George A. Lesieutre, The Pennsylvania State University
- 1117 Results of an Aeroelastic Tailoring Study for a Composite Tiltrotor Wing**
David Popelka, David Lindsay, Tom Parham, Jr., Victor Berry, Bell Helicopter Textron, Inc.; Donald J. Baker, Langley Research Center
- 1132 Application of 2GCHAS to the Investigation of Aeromechanical Stability of Hingeless and Bearingless Rotor Helicopters**
Robert A. Ormiston, U.S. Army AFDD (ATCOM); Hosseing Saberi, Tassos Anastassiades, Advanced Rotorcraft Technology, Inc.
- 1156 Analytical Investigation of UH-60A Flight Blade Airloads and Loads Data**
Joon W. Lim, Sterling Software
- 1176 Fundamental Investigation of Hingeless Rotor Aeroelastic Stability, Test Data and Correlation**
Thomas H. Maier and David L. Sharpe, U.S. Army AFDD (ATCOM); Joon W. Lim, Sterling Software
- 1191 V-22 Aeroelastic Stability Analysis and Correlation with Test Data**
Robert F. Idol and Tom Parham, Jr., Bell Helicopter Textron, Inc.
- 1203 Development of an Aeroelastic Method for Hovering Rotors with Euler/Navier-Stokes Aerodynamics**
Marilyn J. Smith and Dewey H. Hodges, Georgia Institute of Technology

AEROACOUSTICS

- **Results of an Aeroacoustic Tiltrotor Wind Tunnel Test**
Martin A. Peryea, Tom L. Wood, Bell Helicopter Textron, Inc.
- 1217 Noise Characteristics of a Model Tiltrotor**
Michael A. Marcolini and David A. Conner, NASA Langley Research Center; John T. Brieger, Bell Helicopter Textron, Inc.; Lawrence E. Becker and Charles D. Smith, Lockheed Engineering and Sciences Company
- 1227 Computational Techniques for Improved Blade Vortex Interaction Modeling**
Devon S. Prichard and D. Douglas Boyd, Jr., Lockheed Engineering and Sciences Co.; Casey L. Burley, NASA Langley Research Center

- 1238 Feasibility of Arbitrary Pitching Motion Controlled by Piezoceramic Actuators to Reduce Blade-Vortex Interaction Noise**
Marc P. Amerigo and James D. Baeder, University of Maryland
- 1254 Prediction of Turbulent Trailing Vortex Structure for Rotorcraft Blade-Vortex Interaction**
John A. Rule and Donald B. Bliss, Duke University
- 1266 An Assessment of Current Methodology for Predicting Tiltrotor Blade-Vortex Interaction Aerodynamics**
Bruce D. Charles, Ram D. Janakiram, Ahmed A. Hassan, McDonnell Douglas Helicopter Systems; Todd R. Quackenbush, Continuum Dynamics Incorporated

AIRCRAFT DESIGN II

- 1283 Selection and Design Optimization of a High Speed, Highly Maneuverable Rotorcraft Configuration**
Ho-Sik Kim, Dimitri Mavris, Jacques Virasak, Daniel P. Schrage, Georgia Institute of Technology
- 1301 Longbow Joint Contractor and Government Reliability and Testability Design Methodology**
Jon A. Buresh, Rick E. Phillips, McDonnell Douglas Helicopter Systems; Robert L. Grewe, Max C. McClellan, U.S. Army Longbow Program Office
- 1313 Knowledge-Based System for Landing Gear Analysis and Design**
W. L. Evans and J. Sherman, Bell Helicopter Textron, Inc.
- 1318 Tactical Tilt-Rotor Transport Aircraft Design**
Dr. Derek Bray, Royal Military College of Science
- 1327 Effect of Advanced Technology on Rotorcraft Operating Costs**
Kenneth B. Amer and Dave Dreyfuss, RAND Corp.

PROPULSION

- 1335 A Study of Coupled Engine/Rotor Dynamic Behavior**
Ketao Liu, Manoj Mittal, J. V. R. Prasad, Christoph J. Scholz, Georgia Institute of Technology

- 1347 MD500 Main Rotor Drive System High Power High Reliability at Low Cost Low Weight**
Gary Craig, McDonnell Douglas Helicopter Systems
- **S-76B/PT6B-36B Engine Acceleration Schedule Development**
David Sweet, Sikorsky Aircraft Corporation
- 1366 Advanced Rotorcraft Transmission Development—A Technology Reconversion Program**
Y. D. Chen, G. Heath, R. Gilbert, and V. Sheth, McDonnell Douglas Helicopter Systems
- 1375 UH-60A Fuel Outgassing**
Major John S. Wright, U.S. Army Aviation Technical Test Center
- 1384 Y-22 Drive System Description and Design Technologies**
Charles J. Kilmain and Richard Murray, Bell Helicopter Textron, Inc.;
Charles Huffman, Naval Air Systems Team
- 1404 Field Experience Shows Modern Test Equipment Helps Contain Costs**
James L. Pettigrew, Howell Instruments, Inc.

CREW STATIONS & HUMAN FACTORS

- 1417 A Case Study in the Design and Testing of Hands-On Controls—The Longbow Apache Grip Development Process**
Matthew D. Hannen and Thomas M. Cloud, McDonnell Douglas Helicopter Systems
- 1436 Evolution of the Venom Variant of the AH-1W Supercockpit**
C.D. Holley, Bell Helicopter Textron, Inc.; M.L. Busbridge, GEC-Marconi Avionics Ltd.
- 1450 Human Factors Evaluation of Visual Field-of-View Effects of Partial Binocular Overlap Designs in Helmet-Mounted Displays**
Victor Klymenko, UES, Inc.; Clarence E. Rash, U.S. Army Aeromedical Research Laboratory
- 1466 Multi-Mode Radar Development—A Question of Compromise**
Major Patrick J. Garman and Major Jeffrey A. Trang, U.S. Army Aviation Technical Test Center
- 1474 Simulation Evaluation of Two Aided Targeting Systems**

Joe De Maio, U.S. Army AFDD (ATCOM)

- 1491 AMMI: Intelligent Support For Alarm Systems in Advanced Rotorcraft**
James H. Hicinbothom, William Weiland, Thomas Santarelli, Clarence A. Fry, CHI Systems, Inc.; James W. Voorhees, Advanced Simulation Engineering; Allen L. Zaklad, Independent Consultant

TEST AND EVALUATION II

- 1499 AH-64 Apache: Army Flight Test Update**
Major Allen L. Peterson, Major Patrick J. Garman, and Major Daniel G. Wolfe, U.S. Army Aviation Technical Test Center
- 1512 OH-58D(I) Kiowa Warrior Transient Powertrain Speed Characteristics Test In the Frequency Domain**
Major Jeffrey N. Williams and CW3 Jacob M. Howard, U.S. Army Aviation Technical Test Center; Jay W. Fletcher, NASA Ames Research Center
- 1534 V-22 Flight Test Loads Analysis**
Ashok Agnihotri, Robert Milliken, Peter Sturdza, Bell Helicopter Textron, Inc.; Leon A. Zmroczek, Boeing Defense and Space Group, Heli Div.
- **Overview of MH-53J (SLEP/SBO) Airworthiness Qualification Flight Test Resubstantiation**
Charles Crawford and Douglas Friend, Georgia Tech Research Institute
- 1546 Flight Testing of CIS Helicopters: An American Perspective**
David J. Anderson, Test and Experimentation Services Company
- **Helicopter Noise Measurements at High Blade Tip Mach Number — A Novel Approach to Full Scale Flight Testing**
Anthony C. Pike and Robert J. Harrison, Westland Helicopters Ltd.

PRODUCT SUPPORT

- **Bell Model 412 HUMS Trial at PHI**
James J. Cronkhite, Bell Helicopter Textron, Inc.; Harold L. Summers, PHI
- 1553 Maintenance Scheduling Flexibility Designed Around Operations: The USCG Aviation Computerized Maintenance System (ACMS)**
LCDR Roger Gayman and LT William Pappas, USCG
- **The Design for Maintainer Program for the MV-22**

Michael Carter, Bell Helicopter Textron, Inc.; Roger G. McLaughlin, NAVAIR

- **MD Explorer Blue Team Approach**
John E. Reagan, McDonnell Douglas Helicopter Systems
- **Reducing Aviation Support Inventory — Resource to Readiness Modeling Techniques**
LCDR Thomas Ostebo and LCDR Bruce E. Grinnell, USCG
- **V-22 Interactive Electronic Technical Manuals (IETMs)**
Barry Wolf, Boeing Defense & Space Group, Heli. Div.
- **Improved MILES — A Better Laser Training System for the Army**
George M. Stulb, Jr., Boeing Defense & Space Group, Heli. Div.

STRUCTURES AND MATERIALS II

- 1561 **Structural Evaluation of Repair of Thin Gaged Sandwich Structure**
Steven Llorente and Peter Holemans, Boeing Defense & Space Group, Heli Div.
- 1569 **Eurocopter Research in Composite Fuselage to Maintain the Production Cost Below the Target**
Manuel Torres and Joseph Saporito, Eurocopter France; Wolfgang Jonda, Eurocopter Deutschland
- 1585 **Correlation Between Stress Pattern Analysis by Thermal Emission (SPATE) Test and Finite-Element Modeling (FEM) for the AH-1W Tailboom**
R. D. Hilton and L. A. King, Bell Helicopter Textron, Inc.
- 1596 **Correlation of Sandwich Facesheet Wrinkling Test Results With Several Analysis Methods**
A. Dobyms, Sikorsky Aircraft Corporation
- 1605 **Bonded Repair of Minimum-Gage Sandwich Structures**
Joseph H. Ruddy and Anthony J. Vizzini, University of Maryland
- 1615 **Structural Analysis of Large Titanium Castings in a High-Cycle, Rotor-Induced Vibratory Load Environment**
Christopher W. Spencer and S. Leigh Killian, Bell Helicopter Textron, Inc.
- 1627 **VABS: A New Concept for Composite Rotor Blade Cross-Sectional Modeling**
Carlos E. S. Cesnik and Dewey H. Hodges, Georgia Institute of Technology

- 1641 Structural Qualification of V-22 EMD Tow-Placed Aft Fuselage**
Adam Sawicki, Eric Schulze, LeRoy Fitzwater and Kristin Harris, Boeing
Defense & Space Group, Heli. Div.

INTEGRATED MANUFACTURING AND PROCESS CONTROL II

- **Affordable Thermoplastic Structures**
Nick Caravaso, Boeing Defense & Space Group, Heli. Div.
- 1655 Concurrent Fiber Optic Manufacturing Process Development**
Mark W. Rowland and Bernard H. Jefferson, Sikorsky Aircraft Corporation and
Robert A. Rubino, United Technology Research Center
- 1663 Generative Numerical Control**
Peter T. Abbagnaro and John A. Pascale, Jr., Sikorsky Aircraft Corporation
- 1672 Bell Knowledge-Based System Provides Producibility Analysis and
Automated Tool Design for the V-22 Integrated Wiring System**
Dale W. Springer, Bell Helicopter Textron, Inc.
- 1691 Stereolithography - A Tool for Rapid Castings**
W. Lloyd Lynch, Bell Helicopter Textron, Inc.
- 1697 Implementation of Low VOC Surface Coatings**
Joseph Finn, Boeing Defense & Space Group, Heli. Div.
- 1708 Woven Wire Design Support: Automation in Electrical Harness
Fabrication**
Don Murrell, Tim Gilley, and Dale Springer, Bell Helicopter Textron, Inc.

HANDLING QUALITIES AND DYNAMICS

- 1717 The Use of Limited Authority Response Types to Improve Helicopter
Handling Qualities During Flight in Degraded Visual Environments**
Stewart Baillie and J. Murray Morgan, Flight Research Laboratory, IAR/NRC;
David Mitchell and Roger Hoh, Hoh Aeronautics Inc.
- 1729 Control Law Design for Compliance with ADS-33C Failure State
Requirements, the Comanche Approach**
J. F. Keller and C. J. Bauer, Boeing Defense and Space Group, Heli Div.
- 1747 Handling Qualities Specification Development for Cargo Helicopters**
James F. Keller and Adam Feingold, Boeing Defense & Space Group, Heli Div.;

Daniel C. Hart, U.S. Army AFDD; MAJ. Martin W. Shubert, U.S. Army
Airworthiness Qualification Test Directorate

1763 A New Unsteady Aerodynamic Model of the Coupled Rotor-Body Dynamics

A. Rosen and A. Isser, Technion - Israel Institute of Technology

1788 Multi-Body Formulation for Rotorcraft Dynamic Analysis

Olivier A. Bauchau and Minsup Lee, Rensselaer Polytechnic Institute

1799 Coupled Flap-Lag Rotor Blade Load Identification

Liu ShouShen, Nanjing University of Aeronautics and Astronautics; Jerry P.
Higman and Daniel P. Schrage, Georgia Institute of Technology

- Paper not available at time of printing
