

2011 4th International Conference on Human System Interactions

(HSI 2011)

**Yokohama, Japan
19 – 21 May 2011**

**IEEE Catalog Number: CFP1121D-PRT
ISBN: 978-1-4244-9638-9**

Table of contents

May 19th, Thursday

10:15-11:55

Room 1: Human machine interactions I

- | | |
|--|------|
| 1. Atsushi Imadu, Tadao Kawai, Yogo Takada and Tomoki Tajiri | 34 |
| Walking Guide Interface Mechanism and Navigation System for the Visually Impaired | |
| 2. Chih-Hung Kung, Chien-Hsi Chen, Hsiao-Kuan Wu and Chung-Huang Yu | P IC |
| Development of Orientation and Guiding System by Radio-Frequency for the Visually Impaired | |
| 3. Alexander Mertens, Sinem Kuz, Antje Heinicke, Marcel Mayer, Bernhard Kausch and Christopher Schlick | 44 |
| User Focused Design of Human-Robot Interaction for People Suffering from Unusual Ailments | |
| 4. Orazio Mirabella, Antonino Raucea, Fausto Fisichella and Luigi Gentile | 52 |
| A motion capture system for sport training and rehabilitation | |
| 5. Laura Santos-Carreras, Ali Sengul, Marc Vollenweider and Hannes Bleuler | 60 |
| Multimodal Haptic Interface for Surgical Robotics | |

Room 2: Etho-Communication in Intelligent Space

- | | |
|---|------|
| 1. Szilveszter Kovacs, David Vincze, Marta Gacsi, Adam Miklosi and Peter Korondi | 64 |
| Ethologically Inspired Robot Behavior Implementation | |
| 2. Mihoko Niitsuma, Terumichi Ochi, Masahiro Yamaguchi and Hideki Hashimoto | 70 |
| Design of Interaction for Simply Operating Smart Electric Wheelchair in Intelligent Space | |
| 3. Tamas Kifor, Tibor Gottdank and Akos Hajnal | P IC |
| Ethology and Mobile Technology in One: EtoPhone | |
| 4. Leon Palafox, Laszlo Attila Jeni and Hideki Hashimoto | 80 |
| Using Conditional Random Fields to validate observations in a 4W1H paradigm | |

13:10-14:50

Room 1: Human machine interactions II

- | | |
|--|------|
| 1. Alexander Rotshtein and Hanna Rakytyanska | P IC |
| Diagnosis Problem Solving using Multidimensional Fuzzy Relations | |
| 2. Ondrej Linda and Milos Manic | 91 |
| Evaluating Uncertainty Resiliency of Type-2 Fuzzy Logic Controllers for Parallel Delta Robot | |
| 3. Hao Yu, Tiantian Xie, Michael Hamilton and Bogdan Wilamowski | 98 |
| Comparison of Different Neural Network Architectures for Digit Image Recognition | |
| 4. Takahiro Nozaki, Yusuke Suzuki and Kouhei Ohnishi | 104 |
| Motion Recognition using DP Matching based on Position and Force Information | |
| 5. Yihsin Ho, Tomomi Shibano, Eri sato-Shimokawara and Toru Yamaguchi | 110 |
| The Information Providing System by using Human Motion Recognition | |

15:10-16:50**Room 1: Human machine interactions III**

- | | |
|--|-----|
| 1. Michal Mikulski | 117 |
| Electromyogram Control Algorithms for the Upper Limb Single-DOF Powered Exoskeleton | |
| 2. Fu-Cheng Wang, Chung-Huang Yu, Chia-Hui Chen, Tai-Yu Chou and Chen-En Tsai | 123 |
| Synchronized Robust Control of a Gait Trainer | |
| 3. S.M.Mizanoor Rahman, Ryojun Ikeura, Shinsuke Ishibashi, Soichiro Hayakawa, Hideki Sawai and Haoyong Yu | 129 |
| Lowering Objects Manually and with Power-Assist: Distinctions in Perceived Heaviness, Load Forces and Object Motions | |
| 4. Marina Vela Nunez, Carlo Alberto Avizzano, Emanuele Ruffaldi and Massimo Bergamasco | 136 |
| A Low-Cost Human Locomotion Speed Recognition for Augmented Virtual Environments Exploration | |
| 5. Sho Yokota, Hiroshi Hashimoto, Yasuhiro Ohyama, Daisuke Chugo, Jinhua She and Hisato Kobayashi | 144 |
| Improvement of Body Motion Measurement using Pressure data on Human Body Motion Interface | |

May 20th, Friday10:15-11:55**Room 1: Vision, auditory systems and human factors**

- | | |
|--|-----|
| 1. Bruno Lain, Stefano Ghidoni and Emanuele Menegatti | 150 |
| Robust object tracking in a dual camera sensor | |
| 2. Luis Ricardo Sapaico and Makoto Sato | 158 |
| Analysis of Vision-based Text Entry using Morse Code generated by Tongue Gestures | |
| 3. Guenther Schatter and Paul Kramer | 165 |
| Mood-based Selection of Music Collections by Speech | |
| 4. Takuma Funahashi, Takayuki Fujiwara and Hiroyasu Koshimizu | 169 |
| Development of Visual Inspection Robot based on Motion and Mind Behaviors of Expert Inspector | |
| 5. Eriko Aiba, Koyu Numata, Takashi X. Fujisawa and Noriko Nagata | 174 |
| Identification of Factors Related to the Enhancement of Image-Quality for Subjective Image-Quality Assessment Model Based on Psychological Measurement | |

Room 2: Human-interactive robots I

- | | |
|---|-----|
| 1. Hooman Aghaebrahimi Samani and Adrian David Cheok | 178 |
| From Human-Robot Relationship to Robot-Based Leadership | |
| 2. Peter Nauth | 182 |
| Interaction of Autonomous Assistive Robots with Humans | |
| 3. Motoyuki Ozeki, Yasuhiro Kashiwagi, Mariko Inoue and Natsuki Oka | 188 |
| Top-Down Visual Attention Control Based on a Particle Filter for Human-Interactive Robots | |

- | | |
|---|-----|
| 4. Mohammed Moshiul Hoque, Tomomi Onuki, Yoshinori Kobayashi and Yoshinori Kuno | 195 |
| Controlling Human Attention through Robot's Gaze Behaviors | |
| 5. Mitsuki Kitani, Tatsuya Hara, Hiroki Hanada and Hideyuki Sawada | 203 |
| A Talking Robot and Its Human-like Expressive Speech Production | |

13:10-14:50**Room 1: Intelligent sensors and actuators**

- | | |
|--|-----|
| 1. Mari Kawamoto and Kouhei Ohnishi | 209 |
| A Method for Estimation of Operational Torque Considering of Asymmetric Property on Bilateral Control | |
| 2. Sergiu-Dan Stan, Milos Manic, Cristian Szep and Radu Balan | 215 |
| Performance analysis of 3 DOF Delta parallel robot | |
| 3. Jie Ji, Hiromoto Hayashi and Qiangfu Zhao | 221 |
| Inducing Portable Neural Network Trees for Text Data Through DCAMC | |
| 4. Timothy R. McJunkin and Milos Manic | 229 |
| Evolutionary Adaptive Discovery of Phased Array Sensor Signal Identification | |
| 5. Salvatore Anzalone, Emanuele Menegatti, Enrico Pagello, Yuichiro Yoshikawa, Hiroshi Ishiguro and Antonio Chella | 237 |
| Audio-video people recognition system for an intelligent environment | |

Room 2: Human-interactive robots II

- | | |
|--|-----|
| 1. Nadia Ramona Rat, Mircea Neagoe, Dorin Diaconescu and Sergiu Dan Stan | 245 |
| Dynamic analysis of a Triglide parallel robot | |
| 2. Takahiro Kosugi and Seiichiro Katsura | 250 |
| Experimental Investigation of Variable Scaled Bilateral Control | |
| 3. Hidetaka Morimitsu and Seiichiro Katsura | 256 |
| Frequency Response Analysis of Observer-Based Thermal Control System of Peltier Device | |
| 4. Hiroyuki Nagai and Seiichiro Katsura | 262 |
| Environmental Embedded Haptic System Based on Modal Transformation | |
| 5. Abderrahmane Kheddar | 268 |
| Human-Robot Haptic Joint Actions: Is an Equal Control-Sharing Approach Possible? | |

15:10-17:30**Room 1: Network Sensor and Human Monitoring**

- | | |
|--|-----|
| 1. Jerzy Gomula, Krzysztof Pancierz and Jaroslaw Szkola | 274 |
| Computer-Aided Diagnosis of Patients with Mental Disorders Using the Copernicus System | |
| 2. Hiromu Kobayashi, Hideki Hashimoto and Mihoko Niitsuma | 281 |
| An Approach for Extraction of Human Walking Path in Intelligent Space | |
| 3. Daisuke Chugo, Kazuya Fujita, Yuki Sakaida, Sho Yokota and Kunikatsu Takase | 287 |
| Depressurization Assistance according to a Posture of a Seated Patient | |
| 4. Claas Richter, Yuzuru Tanaka and Gerald Bieber | 293 |
| A Case Study of an Employee Portal with integrated Physical-Activity Monitoring | |

- | | |
|--|-----|
| 5. David Hunter and Bogdan M. Wilamowski | 299 |
| Parallel Multi-Layer Neural Network Architecture with Improved Efficiency | |
| 6. Erik Noyes and Leonidas Deligiannidis | 305 |
| Emergent: A Knowledge Discovery Tool for Understanding Emerging Industry Structure | |
| 7. Masahiko Narita, Yuka Kato and Chuzo Akiguchi | 311 |
| Enhanced RSNP for applying to the Network Service Platform – Implementation of a Face Detection Function – | |

Room 2: Tactile and Haptic Interfaces

- | | |
|---|-----|
| 1. Changan Jiang, Feng Zhao, Keiji Uchida and Hideyuki Sawada | 318 |
| Research and Development on Portable Braille Display Using Shape Memory Alloy Wires | |
| 2. Hikaru Nagano, Shogo Okamoto and Yoji Yamada | 324 |
| Physical and sensory factors of textures that appeal to human touch | |
| 3. Chiharu Ishii, Hiroyuki Mikami, Takashi Nakakuki and Hiroshi Hashimoto | 330 |
| Bilateral Control for Remote Controlled Robotic Forceps System with Time Varying Delay | |
| 4. Thao Tran Phuong, Ryo Furusawa, Chowarit Mitsantisuk and Kiyoshi Ohishi | 336 |
| Force Sensing Considering Periodic Disturbance Suppression Based on High Order Disturbance Observer and Kalman-filter | |
| 5. Manabu Ishihara | 342 |
| Evaluation of Force Delays on the Operation of Haptic Sense by Analytic Hierarchy Process | |
| 6. Fumiya Mitome and Kouhei Ohnishi | 346 |
| Bilateral Control with Bluetooth and Its Evaluation | |
| 7. Zhibin Song, Shuxiang Guo and Mohd Yazid | 352 |
| Development of a Potential System for Upper Limb Rehabilitation Training Based on Virtual Reality | |

May 21st, Saturday

10:15-12:35

Room 1: Communicative Factors for Natural Interaction

- | | |
|---|-----|
| 1. Satoshi Suzuki, Yasunari Fujimoto and Toru Yamaguchi | 357 |
| Can differences of nationalities be induced and measured by robot gesture communication ? | |
| 2. Shuichi Nakata, Harumi Kobayashi, Masafumi Kumata and Satoshi Suzuki | 363 |
| Human Speech Ontology Changes in Virtual Collaborative Work | |
| 3. Keiko Sato and Yasue Mitsukura | 369 |
| Effects of Music on Image Impression and Relationship between Impression and Physical Feature | |
| 4. Hiroshi Igarashi | 374 |
| Human Skill Evaluation by Characteristics of Input Command Decision | |
| 5. Heiko Hecht, Romy Weiland and Evgeniya Boyarskaya | 378 |
| The cone of gaze | |
| 6. Koichi Takahashi, Hironobu Fukai and Yasue Mitsukura | 386 |
| Head Pose Tracking with Individual Adjustment for Communication Tools | |

7. Hironobu Fukai, Jumpei Takagi and Gang Xu 392
Robust and Fast Self Localization by 3D point cloud

Room 2: Emerging Technologies for Harmonized Human-Machine Environment

1. Pitoyo Hartono 398
Utilization of Machine Learning Methods for Assembling, Training and Understanding Autonomous Robots
2. Yoshimitsu Aoki 403
Vision-based Human Modeling and Recognition for Human System Interaction
3. Hideyuki Sawada and Mitsuki Kitani 409
Several Approaches to Speech and Auditory Systems for Human System Interactions
4. Kenji Suzuki, Hideki Kadone and Anna Gruebler 415
Kinematic and Physiological Cues for Human System Interaction
5. Ryo Saegusa, Lorenzo Natale, Giorgio Metta, Giulio Sandini 419
Cognitive Robotics - Active Perception of the Self and Others -
6. Shingo Maeda, Yusuke Hara and Shuji Hashimoto 427
Chemical Robots - Design of active soft materials -
7. Kittu Suwanratchatamane, Mitsuharu Matsumoto and Shuji Hashimoto 431
Balance Control of Humanoid Robot in Object Lifting Task with Tactile Sensing System
