

2011 12th International Carpathian Control Conference (ICCC 2011)

**Velke Karlovice, Czech Republic
25-28 May 2011**

**IEEE Catalog Number: CFP1142L-PRT
ISBN: 978-1-61284-360-5**

TABLE OF CONTENTS

Software application for GPS devices using Google Maps	1
<i>Jan Babic, Igor Podlubný</i>	
Identification of Model Parameters and Control of Heater on Laboratory Object PCT40	6
<i>Jan Babic, Gabriel Takac, Ivo Petras, Dagmar Bednarova</i>	
Using .NET Technology for Process Control and Monitoring	10
<i>Farana Radim, Plandor David, Babiuch Marek</i>	
Management of Water Pipeline Networks Supported by Hydraulic Models and Information Systems	16
<i>Alicja Balut, Andrzej Urbaniak</i>	
Modeling and Interpretation of New Solutions in Problem Solving	22
<i>Jiri Bila, Ivo Bukovsky</i>	
Dynamic Simulation Model of PAM Based Antagonistic Actuator	28
<i>Jana Boržiková, Ján Pitel, Mária Tóthová, Bohumil Šulc</i>	
Measurement-to-track Assignment Methods in Target Tracking	32
<i>Václav Boucek, Miroslav Šimandl, Ondrej Straka</i>	
Kinematic Analysis of a Semi-Rigid-Elastic Multi-Body Torsional Vibration Model of Gears System	37
<i>Mehmet Bozca</i>	
Position Accuracy Improvement by Using Feed Forward Torque in Regulation Structure of Servo Drive	42
<i>Pavel Bureš</i>	
The Measurement of Properties of Mechatronics Chain in Serial Configuration	46
<i>Martin Bušek</i>	
Software Application for Study of the Soaking Process	50
<i>Hana Charvátová, Dagmar Janáčová, Miloslav Fialka, Pavel Mokrejš</i>	
A Simulation Approach to Design of Manufacture of Automotive Engines Control Units	54
<i>Bronislav Chramcov, Petr Beran, Pavel Navrátil</i>	
PI/PID Controller Design for FOPDT Plants Based on the Modulus Optimum Criterion	60
<i>Jan Cvejn</i>	
Data Continuity Solution in Fault-tolerant Information Systems	66
<i>Roman Danel, Zdenek Neustupa</i>	
Small Operating System for Freescale HCS08 Microcontrollers	70
<i>Jan Dolinay, Petr Dostálek, Vladimír Vašek</i>	
Sunny Days And Consumed Energy	74
<i>Viliam Dolinay, Jiri Palka, Lucie Pivnickova, Jan Dolinay, Lubomir Vasek</i>	
Comparison of the Methods for the Calculation of Fractional-Order Differential Equations	80
<i>Lubomír Dorcák, Juraj Valsa, Ján Terpák, Emmanuel Gonzalez</i>	
Simple Data Acquisition Unit for School Laboratory Exercises	85
<i>Petr Dostálek, Jan Dolinay, Vladimír Vašek</i>	
Modelling of a Linear Proportional Electromagnetic Actuator and Possibilities of Sensorless Plunger Position Estimation	89
<i>Ivor Dülk Tamás. Kovácsházy</i>	
Corrective Feed-Back Control of the Annealing Process with Utilization of the Indirect Measurement	94
<i>Milan Durdán, Ján Kacur, Marek Laciak</i>	
Frequency Response Based Identification of Fractional Order Dynamical Systems	98
<i>Andrzej Dzielinski, Grzegorz Sarwas, Tomas Skovranek, Ivo Petras</i>	
Analysis of Environment's Vibro-acoustic Expressions by Robot	103
<i>Katarína Ferienciková, Gabriel Záhorcák</i>	
Delay-Dependent Control of Linear Time-Delay Systems	107
<i>Anna Filasova, Dusan Krokavec</i>	
Pneumatic Valves Based on Magnetic Shape Memory Alloys: Potential Applications	111
<i>Stanislaw Flaga, Janusz Pluta, Bogdan Sapinski</i>	
Database of Public Transport Connections – its Creation and Use	115
<i>David Fojtík, Igor Ivan, Jiri Horák</i>	
Optimization of Rock Cutting Process Using the Simulation Methods	120
<i>Jozef Futó, František Krepelka, Lucia Ivanicová</i>	
Investigation of Industrial Processes With 3D PMD Sensor	123
<i>Jan Gebauer, Petr Kocí</i>	

Measurements of Features of the Ducted Fan as a Possible Actuator of a Multi-copter vehicle	127
<i>Jan Gebauer, Petr Kocí</i>	
Validation Heat Transfer Model by Experimental Measurement	131
<i>Vladimír Gerlich</i>	
Creating Basic Model of Most Lake	135
<i>Jan Gottfried, Vladislav Vancura, Lukáš Otte, Lucie Kružiková</i>	
The monetization of highly automated systems in SMEs - A case study	140
<i>Ian Gregory, Lenka Landryová, Premysl Soldán</i>	
Deriving DNA Cryptographic Keys Based on Evolutionary Models	144
<i>Tatiana Hodorozea, Sarbu Janetta, Ionas Szilard Otto</i>	
Conception and Administration Design of Database Support of Web Service for Thermodynamic Calculations	148
<i>Pavel Horovcák, Ján Terpák, Ján Kukurugya</i>	
Sliding-Mode Inventory Control in Systems with Fixed Order Quantity and Uncertain Demand	152
<i>Przemysław Ignaciuk, Andrzej Bartoszewicz</i>	
Cost Function Determination of Washing of Bound Component	156
<i>Dagmar Janáčová, Hana Charvátová, Rudolf Drga, Pavel Mokrejš</i>	
Determining of Signal Derivatives with the use of Regressive Differential Filters in Identification Problems	161
<i>Dariusz Janecki, Leszek Cedro</i>	
Autonomous Mobile Platform II	167
<i>Krzysztof Jaskot, Artur Babiarz</i>	
The use of MEMs Accelerometers for Measurement of Driver Seat Comfort	172
<i>Martin Juránek, Jirí Kulhánek</i>	
Remote Monitoring and Control of the UCG Process	176
<i>Jan Kacur, Marek Laciak, Milan Durdan</i>	
Application of QFD and SPC Methods in the Processes of Design and Products Manufacturing	181
<i>Michaela Kelblerová, David Vykydal</i>	
Wireless IPTV in Practice	187
<i>Roland Kilik, Kane Amadou</i>	
General Sequential Function Charts Editor	191
<i>Miroslav Kocánek, Pavel Balda</i>	
State Feedback Control with Optimized Mode Decoupling	195
<i>Pavol Kocsis, Dusan Krokavec</i>	
Visualisation of Technological Processes of Underground Mine Parameters and Internet of Things	199
<i>Oldrich Kodym</i>	
Acceleration of Simulation Models for Raw Materials Thermal Treatment	203
<i>Dušan Našcák, Imrich Košťál, Ján Mikula, Andrej Olijar, Ján Astaloš</i>	
Model Based Control of Rotary Furnaces for Magnesita Sintering	209
<i>Imrich Košťál, Ján Spišák, Ján Mikula, Anna Babjaková, Julius Lišuch, Peter Košinár</i>	
Development of Control and Monitoring System of UCG by Promotic	215
<i>Karol Kostúr, Ján Kacur</i>	
Balace Platform System Modeling and Simulation	220
<i>Andrzej Kot, Agata Nawrocka</i>	
A Distributed Power Consumption Measurement System and its Applications	224
<i>Tamás Kovácsné, Gábor Fodor, Csaba Bernát Seres</i>	
Digital Assembly of Images in MATLAB Environment as a Service	230
<i>Mária Kruláková, Jan Babic, Peter Cirbes</i>	
Comparison a Simulation Model of Heat Exchanger with Real Equipment	234
<i>Jan Kukurugya, Jan Terpák, Andreas Voigt</i>	
Monitoring and control of temperatures in electric furnace in PROMOTIC system	239
<i>Marek Laciak, Peter Fazekaš, Ján Kacur</i>	
The Effect of Air Gap, Wheel Speed and Drive Angle on the Anti-Lock Braking System Efficiency	243
<i>Le Khac Binh, Petr Koci</i>	
Hilbert Spaces as an Efficient Instrument for Signal Processing in Geotechnics - Application of Vector Quantisation Method in Hilbert Space for Effective and Quality Process Control of Rock Disintegration by Rotary Drilling	249
<i>Igor Leššo, Patrik Flegner, Marek Laciak, Katarína Feriančíková</i>	
Aspects of Wireless Communication of Sensors	253
<i>Tumenbayar Lkhagvanseren, Vladimír Gerlich, Frantisek Hruska</i>	
Alternative Methods of Power Supply for Autonomous Intelligent Wireless Sensors	258
<i>Miroslav Mahdal, Renata Wagnerová, Robert Frischer</i>	

One of Simple Approaches to Control of Multi-variable Control Loop - Simulation of Control of Three-variable Control Loop	262
<i>Navrátil Pavel, Sysala Tomáš</i>	
Methods For EEG Signal Analysis	266
<i>Agata Nawrocka, Andrzej Kot</i>	
Utilization of Intelligent Control Algorithms for Thermal Comfort Optimization and Energy Saving	270
<i>Mariusz Nowak, Andrzej Urbaniak</i>	
Principles of Key Performance Indicators for Small and Medium Enterprise in European Union	275
<i>Petr Osadník, Lenka Landryová</i>	
Achieving Optimal Operating Conditions in PI Controlled Biomass-fired Boilers - Undermanning way for Improvement of Small-scale Boiler Effectiveness	280
<i>Cyril Oswald, Bohumil Sulc</i>	
Creating Hardware-in-the-Loop System Using Virtual Instrumentation	286
<i>Nicolae Patrascoiu, Adrian Marius Tomus, Egri Angela, Sirb Vali</i>	
Non-stepwise Reference Tracking for Time Delay Systems	292
<i>Libor Pekar, Roman Prokop, Petr Dostálek</i>	
Simulation Model Applied to Food Industry	298
<i>Jindra Peterková, Petr Nemčík, Jan Gottfried</i>	
Stability Test Procedure For a Certain Class of the Fractional-Order Systems	303
<i>Ivo Petras</i>	
Investigation in Control of Small-scale Biomass Boilers	308
<i>Viktor Placek, Bohumil Šulc, Stanislav Vrána, Jan Hrdlicka, Ján Pitel</i>	
Creation of Control Applications for Operating System Phar Lap	312
<i>Petr Podešva, David Fojtík</i>	
Cube Rotation Visualization with FPGA on TFT-LCD Display	316
<i>István Pógár, András Kozell</i>	
A Novel Hybrid ABF-PSO Algorithm Based Tuning of Optimal FOPI Speed Controller for PMSM Drive	320
<i>Anguluri Rajasekhar, Ravi Kumar Jatoth, Ajith Abraham, Vaclav Snasel</i>	
Remote Control the Robot using Web Service	326
<i>Lukáš Richtř, Radim Farana</i>	
On-line Estimation of Unknown Kinetics for the Enzymatic Synthesis of Ampicillin	331
<i>Dan Selisteanu, Emil Petre, Monica Roman, Dan Popescu, Eugen Bobasu</i>	
Nonlinear Model Predictive Control of a Lipase Production Bioprocess	337
<i>Dorin Sendrescu, Dan Popescu, Emil Petre, Eugen Bobasu, Dan Selisteanu</i>	
New Tools for 3D HMI Development in Java	342
<i>Ondřej Severa, Martin Cech, Pavel Balda</i>	
An Autonomous Unmanned Vehicle for CBRNE Reconnaissance	347
<i>Frank E. Schneider, Dennis Wildermuth</i>	
Fractional Order Control Model of Steel Casting Process	353
<i>Tomas Skovranek, Jan Kukurugya, Igor Podlubny, Jan Terpak</i>	
Visual Programming for Smartphones	358
<i>Pavel Smutný</i>	
Optimal Location of an Active Segment of Magnetorheological Fluid Layer in a Sandwich Plate	362
<i>Jacek Snamina</i>	
Agile Methods of Project Management	366
<i>Premysl Soldán, Lenka Landryová</i>	
Chosen Optimization Methods for Search Data	370
<i>Petr Staníček, Radim Farana</i>	
Research and Design of Modular Robotic Manipulator for Chemical Aggressive Environment	374
<i>Martin Goubej, Martin Švejda</i>	
Mojette transformation using the MTTool	379
<i>Peter Szoboszlai, Jan Turán, József Vásárhelyi, János Végh</i>	
Transferring Data from Mobile Devices	385
<i>Jaromír Škuta</i>	
Adaptive Control with Inverse Model of a Compressed-Air Aggregate	389
<i>Jolana Škutová</i>	
Modelling of Phase Transition by the Heating	394
<i>Ján Terpák, Pavel Horovcák, Lubomír Dorcák, Ján Kukurugya</i>	
Control of The Juggling System With 1 DOF	398
<i>Stanislav Triaška, Milan Žalman</i>	

Calculation Of a Shock Response Spectrum	404
<i>Jirí Tuma, Petr Kocí</i>	
Localization Algorithms used in Self-organizing Wireless Sensor Networks	410
<i>Attila K. Varga, István Ajtonyi</i>	
Fuzzy Control of Integrating Processes	414
<i>Anna Vasickaninová, Monika Bakošová</i>	
The Virtualization of Development Boards in the Virtual Laboratory of Microprocessor Technology.....	420
<i>Zdenek Vašček, Zbynek Krivka</i>	
Robust Decentralized Controller Design for Large Scale Systems	425
<i>Vojtech Veselý, Nguyen Quang Thuan</i>	
Analog 2DOF PI and PID Controllers Tuning for FOPTD plants	429
<i>Miluše Vítecková, Antonín Vítecek</i>	
Unified Approach to Digital and Analog 2DOF PI Controller Tuning for Integrating Plants.....	433
<i>Miluše Vítecková, Antonín Vítecek</i>	
Induction Motor Sensorless Vector Control for Very Wide Speed Range of Operation	437
<i>Jakub Vonkomer, Milan Žalman</i>	
PID Contoller Autotuning Based on Nonlinear Tuning Rules	443
<i>Stanislav Vrána, Bohumil Šulc</i>	
Process and Knowledge Management Make Synergy Effect	447
<i>Petr Wolf</i>	
Bumpless switch between predictive functional control and a backup PI controller.....	453
<i>Khaled Zabet, Robert Haber</i>	
Equivalence of PI(D) and Predictive Functional Control for Aperiodic Processes without Dead Time.....	459
<i>Khaled Zabet, Robert Haber</i>	
Temperature Sensor Network for Prediction of Possible Start of Brood Rearing by Indoor Wintered Honey Bees	465
<i>Aleksejs Zacepīns, Jurijs Meītalovs, Vīталиjs Komasilovs, Egils Stalidzans</i>	
Control System of Mobile Robot	469
<i>Gabriel Záhorcák, Ivo Petráš</i>
