

2011 IEEE Workshop on Principles of Advanced and Distributed Simulation

(PADS 2011)

**Nice, France
14 – 17 June 2011**

**IEEE Catalog Number: CFP11038-PRT
ISBN: 978-1-4577-1363-7**

TABLE OF CONTENTS

KEYNOTE PRESENTATIONS

Realising Parallel and Distributed Simulation in Industry: A Roadmap	1
<i>Simon J. E. Taylor</i>	
Distribution of Random Streams in Stochastic Models in the Age of Multi-Core and Manycore Processors	2
<i>David R. C. Hill</i>	

SESSION 1: PARALLEL DISCRETE EVENT SIMULATION

Parallel Discrete Event N-Body Dynamics	3
<i>Matthew Holly, Carl Tropper</i>	
Modeling Billion-Node Torus Networks Using Massively Parallel Discrete-Event Simulation	13
<i>Ning Liu, Christopher D. Carothers</i>	
Empirical Study on Entity Interaction Graph of Large-Scale Parallel Simulations	21
<i>Bonan Hou, Yiping Yao, Shaoliang Peng</i>	

SESSION 2: DISTRIBUTED VIRTUAL ENVIRONMENTS

Collaborative Interest Management for Peer-to-Peer Networked Virtual Environment	27
<i>Cheng Liu, Wentong Cai</i>	
Dead Reckoning-Based Update Scheduling against Message Loss for Improving Consistency in DVEs	37
<i>Zengxiang Li, Wentong Cai, Xueyan Tang, Suiping Zhou</i>	
Trading Computation Time for Synchronization Time in Spatial Distributed Simulation	46
<i>Roberto Zunino</i>	

SESSION 3: INTEROPERABILITY AND COMPOSABILITY

Framework for Simulation of Hybrid Systems: Interoperation of Discrete Event and Continuous Simulators Using HLA/RTI	54
<i>Changho Sung, Tag Gon Kim</i>	
An Analysis of the Cost of Validating Semantic Composability	62
<i>Claudia Szabo, Yong Meng Teo</i>	
Fairness Verification of BOM-Based Composed Models Using Petri Nets	70
<i>Imran Mahmood, Rassul Ayani, Vladimir Vlassov, Farshad Moradi</i>	

SESSION 4: ADVANCED AND DISTRIBUTED SIMULATION IN MANUFACTURING APPLICATIONS

Simulation of Complex Manufacturing Systems via HLA-Based Infrastructure	78
<i>Giulia Pedrielli, Paola Scavardone, Tullio Tollo, Marco Sacco, Walter Terkaj</i>	
Support System for Distributed HLA Simulations in Industrial Applications	87
<i>Michael Raab, Steffen Masik, Thomas Schulze</i>	
Approximation of Dispatching Rules in Manufacturing Control Using Artificial Neural Networks	94
<i>Sören Bergmann, Sören Stelzer</i>	

SESSION 5: NETWORK SIMULATION AND EMULATION

A Virtual Time System for OpenVZ-Based Network Emulations	102
<i>Yuhao Zheng, David M. Nicol</i>	

Efficiently Scheduling Multi-Core Guest Virtual Machines on Multi-Core Hosts in Network Simulation	112
<i>Srikanth B. Yeginath, Kalyan S. Perumalla</i>	
PrimoGENI: Integrating Real-Time Network Simulation and Emulation in GENI	121
<i>Nathanael Van Vorst, Miguel Erazo, Jason Liu</i>	
A Pragmatic Approach to Wireless Channel Simulation in Built Environments	130
<i>Ryan McNally, Matthew Barnes, D. K. Arvind</i>	

SESSION 6: GPU AND MULTICORE COMPUTING

Two-Way Real Time Fluid Simulation Using a Heterogeneous Multicore CPU and GPU Architecture	138
<i>José Ricardo Da S. Junior, Esteban Clua, Anselmo Montenegro, Marcos Lage, Cristina Vasconcellos, Paulo Pagliosa</i>	
Pseudo-Random Number Generation on GP-GPU	146
<i>Jonathan Passerat-Palmbach, Claude Mazel, David R. C. Hill</i>	
A Well-Balanced Time Warp System on Multi-Core Environments	154
<i>Li-Li Chen, Ya-Shuai Lü, Yi-Ping Yao, Shao-Liang Peng, Ling-Da Wu</i>	

SESSION 7: SIMULATION TECHNIQUES

On the Accuracy of Ad Hoc Distributed Simulations for Open Queueing Network	163
<i>Ya-Lin Huang, Christos Alexopoulos, Richard Fujimoto, Michael Hunter</i>	
Application Transparent Migration of Simulation Objects with Generic Memory Layout	169
<i>Sebastiano Peluso, Diego Didona, Francesco Quaglia</i>	
Adaptive Message Clustering for Distributed Agent-Based Systems	178
<i>Cole Sherer, Abhishek Gupta, Maria Hybinette</i>
