

2011 6th IEEE International Symposium on Industrial and Embedded Systems

(SIES 2011)

**Vasteras, Sweden
15 – 17 June 2011**

**IEEE Catalog Number: CFP11INB-PRT
ISBN: 978-1-61284-818-1**

2011 6th IEEE International Symposium on Industrial Embedded Systems (SIES)

Table of Contents

Message from the Conference Chairs	xi
Committees	xiii
List of Reviewers	xv

Keynote Talks

Supporting Real-Time Applications on Multicore Platforms
Giorgio Buttazzo

Synthesis of Robust Controller and Games with Imperfect Information
Jean-François Raskin

Challenges of Wireless Communication in Industrial Systems
Stefan Svensson

Session 1 – Design Methodologies #1

HW-SW Implementation of a Decoupled FPU for ARM-based Cortex-M1 SoCs in
FPGAs.....1
*Jaume Joven, Per Strid, David Castells-Rufas, Akash Bagdia, Giovanni De Micheli and
Jordi Carrabina*

Multi-Criteria Optimization for Mapping Programs to Multi-Processors.....9
Scott Cotton, Oded Maler, Julien Legriel and Selma Saidi

Contract-based Dynamic Task Management for Mixed-Criticality Systems.....18
Moritz Neukirchner, Steffen Stein, Harald Schrom, Johannes Schlatow and Rolf Ernst

Session 2 – Robustness #1

Robustness in Real-time Systems.....28
Nicolas Markey

Work-in-Progress (WIP) Session

Real-Time Systems

Towards Preemption Control Using CPU Frequency Scaling in Sporadic Task Systems.....35
Abhilash Thekkilakattil, Radu Dobrin and Sasikummar Punnekkat

Towards Adaptive Hierarchical Scheduling of Overloaded Real-time Systems.....39
Nima Moghaddami Khalilzad, Thomas Nolte and Moris Behnam

A Statistical Response-Time Analysis of Complex Real-Time Embedded Systems using Timing Traces.....	43
<i>Yue Lu, Thomas Nolte, Iain Bate and Liliana Cucu-Grosjean</i>	
An IDE for Component Based Design of Embedded Real-Time Software.....	47
<i>Jimmie Wiklander, Johan Eriksson and Per Lindgren</i>	
Testing and Verification	
Improving Model-Based Verification of Embedded Systems by Analyzing Component Dependencies.....	51
<i>Sebastian Siegl and Philipp Caliebe</i>	
Towards Runtime Testing in Automotive Embedded Systems.....	55
<i>Christian Bradatsch, Theo Ungerer, Rafael Zalman and Andre Lajtkep</i>	
Synthesis of Diagnostic Techniques Based on an IEC 61508-aware Metamodel	59
<i>Dominik Sojer, Christian Buckl and Alois Knoll</i>	
Generation of Correct-by-Construction Code from Design Models for Embedded Systems.....	63
<i>Federico Ciccozzi, Antonio Cicchetti, Mikael Krekola and Mikael Sjödin</i>	
System Design	
State Design Pattern Implementation of a DSP Processor: A Case Study of TMS5416C.....	67
<i>Tanin Afacan</i>	
Architecture of an Embedded Time Gateway between PTP and SNTP.....	71
<i>Paolo Ferrari, Alessandra Flammini, Stefano Rinaldi, Gunnar Prytz and Per Christian Juel</i>	
Model-Based Design of Embedded Control Software for Hybrid Vehicles.....	75
<i>Tizar Rizano, Roberto Passerone, David Macii and Luigi Palopoli</i>	
Portability analysis of an M-JPEG decoder IP from OpenCores.....	79
<i>Xiaozhou Meng, Benny Thörnberg and Najeem Lawal</i>	
Thread Level Speculation as an Optimization Technique in Web Applications for Embedded Mobile Device - Initial Results.....	83
<i>Jan Kasper Martinsen and Håkan Grahm</i>	
A Methodology for Designing Energy-aware Secure Embedded Systems.....	87
<i>Mehrdad Saadatmand, Antonio Cicchetti and Mikael Sjödin</i>	
Multicore Systems	
Large Drilling Machine Control Code - Parallelisation and WCET Speedup.....	91
<i>Mike Gerdes, Julian Wolf, Irakli Guliashvili, Theo Ungerer, Michael Houston, Guillem Bernat, Stefan Schnitzler and Hans Regler</i>	
A Low Cost, Low Power, High Scalability and Dependability Processor-Cluster Platform.....	95
<i>Yi-Li Lin, Wei-Tso Chen, Alvin W.Y. Su, Da-Wei Chang and Chung-Ho Chen</i>	

Towards An Efficient Approach for Resource Sharing in Real-Time Multiprocessor Systems.....	99
<i>Moris Behnam, Farhang Nemati, Thomas Nolte and Håkan Grahm</i>	
Control-Flow Error Detection Using Combining Basic and Program-Level Checking in Commodity Multi-core Architectures.....	103
<i>Navid Khoshavi, Hamid R. Zarandi and Mohammad Maghsoudloo</i>	
Communications	
Exploring Alternatives to Scale FTT-SE to Large Networks.....	107
<i>Farahnaz Yekeh, Mostafa Pordel, Luis Almeida, Moris Behnam and Paulo Portugal</i>	
Wireless Connectivity for Mobile Sensing Applications in Industrial Environments.....	111
<i>Miguel Sepulcre, Jose Antonio Palazon, Javier Gozalvez and Jaime Orozco</i>	
Session 3 – Networks, Design and Control	
A Middleware for Reliable Soft Real-Time Communication over IEEE 802.11 WLANs.....	115
<i>Emanuele Toscano and Lucia Lo Bello</i>	
A Compositional Implementation of Modbus in Protege.....	123
<i>Yan Wang and Veronica Gaspes</i>	
Plant Control over QoS-Enabled Packet Networks.....	132
<i>Davide Quaglia, Riccardo Muradore and Paolo Fiorini</i>	
Session 4 – Automotive	
Mechanisms for Guaranteeing Data Consistency and Flow Preservation in AUTOSAR Software on Multi-core Platforms.....	140
<i>Haibo Zeng and Marco Di Natale</i>	
Testing Switched Ethernet Networks in Automotive Embedded Systems.....	150
<i>Andreas Kern, Honyan Zhang, Thilo Streichert and Jürgen Teich</i>	
Automating the Design Flow for Distributed Embedded Automotive Applications: Keeping Your Time Promises, and Optimizing Costs, too.....	156
<i>Matthias Büker, Werner Damm, Günter Ehmen, Alexander Metzner, Ingo Stierand and Eike Thaden</i>	
An Exploratory Case Study of Testing in an Automotive Electrical System Release Process.....	166
<i>Daniel Sundmark, Kai Petersen and Stig Larsson</i>	
Session 5 – Robustness #2	
Specification-Centered Robustness.....	176
<i>Roderick Bloem, Krishnendu Chatterjee, Karin Greimel, Thomas A. Henzinger and Barbara Jobstmann</i>	

Robustness in Dynamical and Control Systems.....	186
<i>Rafael Wisniewski</i>	
Robustness in Analog Systems: Design Techniques, Methodologies and Tools.....	194
<i>Pierluigi Nuzzo and Alberto Sangiovanni-Vincentelli</i>	
Session 6 – Timing Analysis #1	
Let's Get Less Optimistic in Measurement-Based Timing Analysis.....	204
<i>Sven Buente, Michael Zolda and Raimund Kirner</i>	
Video Subset Selection for Measurement Based Worst Case Execution Time Analysis.....	213
<i>Sitsofe Wheeler, Iain Bate and Mark Bartlett</i>	
Session 7 – Design Methodologies #2	
Extending HARMLESS Architecture Description Language for Embedded Real-Time Systems Validation.....	223
<i>Jean-Luc Béchennec, Mikaël Briday and Valère Alibert</i>	
Exploration of Energy Efficient Acceleration Concepts for the ROHCv2 in LTE Handsets.....	232
<i>David Szczesny, Shadi Traboulsi, Felix Bruns, Sebastian Hessel and Attila Bilgic</i>	
Co-simulation of Embedded Systems in a Heterogeneous MoC-Based Modeling Framework.....	238
<i>Seyed Hosein Attarzadeh Niaki and Ingo Sander</i>	
Session 8 – Scheduling	
Implementation and Empirical Comparison of Partitioning-based Multi-core Scheduling.....	248
<i>Yi Zhang, Nan Guan, Yanbin Xiao and Wang Yi</i>	
Implementing Slot-Based Task-Splitting Multiprocessor Scheduling	256
<i>Paulo Sousa, Bjorn Andersson and Eduardo Tovar</i>	
Schedulability Analysis of Distributed Cyber-Physical Applications on Mixed Time-/Event- Triggered Architectures with Retransmissions.....	266
<i>Alejandro Masrur, Dip Goswami, Reinhard Schneider, Harald Voit, Anuradha Annaswamy and Samarjit Chakraborty</i>	
An Engineering Approach to Synchronization Based on Overrun for Compositional Real- Time Systems.....	274
<i>Ugur Keskin, Martijn M.H.P. Van Den Heuvel, Reinder J. Bril, Johan J. Lukkien, Moris Behnam and Thomas Nolte</i>	
Session 9 – Timing Analysis #2	
Assessment of Trace-Differences in Timing Analysis for Complex Real-Time Embedded Systems.....	284
<i>Yue Lu, Thomas Nolte, Iain Bate, Johan Kraft and Christer Norström</i>	

Minimizing the Search Space for Computing Exact Worst-Case Delays of AFDX Periodic Flows.....	294
<i>Muhammad Adnan, Jean Luc Scharbag and Christian Fraboul</i>	
Author Index.....	303
