

EUROMECH COLLOQUIUM 515

Advanced Applications And Perspectives Of Multibody Dynamics

**Blagoevgrad, Bulgaria
13-16 July 2010**

Editors:

Evtim Zahariev

Marco Ceccarelli

ISBN: 978-1-61839-038-7

ABSTRACTS

(in order of presentation)

- P. Eberhard and Q. Tang**, *Research on Cooperative Motion of Swarm Mobile Robots Based on PSO and Multibody System Dynamics.* - 14
- E. Manoah and Irina Trendafilova**, *Damage detections of nonlinear vibrating thermally loaded structures* - 16
- T. Mouri**, *Anthropomorphic Robot Hand and its Application.* - 18
- E. Zahariev**, *Large Flexible Structures Imposed on Earthquakes.* - 20
- J. Meijaard**, *Modeling of curved beams for flexible multibody system dynamics.* - 22
- P. Flores and H. Lankarani**, *Modeling and analysis of lubricated joints in spatial multibody systems.* - 24
- Miguel A. Naya, Javier Cuadrado, Daniel Dopico and Urbano Lugris**, *A New Unified Integration Scheme for the Simulation of Multibody and Hydraulic Dynamics.* - 26
- J. Ambrosio, Frederico Rauter, João Pombo and Manuel Pereira**, *Co-simulation of flexible multibody and finite element analysis tools with application to the study of railway pantograph and catenary interaction.* - 28
- Giuseppe Carbone, Jorge Angeles, Giuseppe Cannella and Marco Ceccarelli**, *Derivation of the Mass Matrix for the McGill Schönflies Motion Generator.* - 30
- P. Polach and M. Hajžman**, *Sensitivity analysis of the computer simulations of the coal wagon laboratory excitation.* - 32
- T. Schierz and M. Arnold**, *Recent advances in numerical methods for coupling multidisciplinary simulation tools.* - 34
- A. Guran and M. Khoshnood**, *Control of an Inverted Double Pendulum with Eccentric Fluid Load by Means of Computed Torque Method.* - 36
- J. Ojeda, J. Martínez-Reina and Juana Mayo**, *Influence of muscle dynamics in the static optimization procedure.* - 38
- A. L. Schwab and J. D. G. Kooijman**, *A Review on Bicycle Handling and Control.* - 40
- O. Dmitrochenko and A. Mikkola**, *New Finite Elements in Absolute Nodal Coordinate Formulation Based on an Analysis of a Geometric Classification.* - 42
- R. Pastorino, M.A. Naya, A. Luaces and J. Cuadrado**, *Xbywire Vehicle Prototype: Automatic Driving Maneuver Implementation for RealTime MBS Model Validation.* - 44
- W. Blajer, K. Dziewiecki and Z. Mazur**, *Remarks on human body modeling for the inverse dynamics analysis.* - 46
- T. Kurz and P. Eberhard**, *Flexible Bodies in Symbolic Multibody Systems with Neweul-M2.* - 48
- A. Burov, I. Kosenko and H. Troger**, *Periodic librations and their stability for the simplified model of a space elevator.* - 50
- D. Vasileva, Y. Kiyosawa and M. Suzuki**, *Sensorless Torque Control Scheme and Simulations for a Motor with Harmonic Drive® Reducer.* - 52
- P. Flores**, *Application of the nonsmooth dynamics approach to model and analyze contact-impact events in rigid multibody systems.* - 54
- T. Boiadjiev, K. Zagurski, G. Boiadjiev, K. Delchev, V. Vitkov and R. Kastelov**, *Identification of the Bone Structure during the Automatic Drilling in the Orthopedic surgery.* -56
