

2011 Electrical Insulation Conference

(EIC 2011)

**Annapolis, Maryland, USA
5 – 8 June 2011**

**IEEE Catalog Number: CFP11EEI-PRT
ISBN: 978-1-4577-0278-5**

Table of Contents

Sunday, June 5th, 2011

Opening Remarks, 6:00 – 6:15pm, Regatta Ballroom

Dr. Nancy Frost, General Conference Chair

Plenary Session, 6:15 – 7:00pm, Regatta Ballroom

Condition Assessment of Cables and Transformers in an Aging Infrastructure (and Aging Talent Base)..... 1

Nirmal Singh, DTE Energy, USA

Reception and Poster Sessions, 7:00 – 9:00 pm, Annapolis Atrium

Machines Poster Session (MC-P), Sunday, June 5th, 7:00 – 9:00 pm, Annapolis Atrium

MC-P1	Stator End Winding Vibration and Temperature Rise Monitoring	10
	Peter Kung, Lutang Wang, QPS Photonics, Maria-Iulia Comanici, McGill University, Canada	
MC-P2	Characteristics of Noise and Interphasal PD Pulses in Operating Stator Windings	15
	G. C. Stone, S. R. Campbell, Iris Power-Qualitrol, H. G. Sedding, Kinectrics, Canada	
MC-P3	Update on Partial Discharge Screening Tests for Stator Bars & Coils	20
	W. McDermid, J.C. Bromley, T. Black, Manitoba Hydro, Canada	
MC-P4	Investigations on insulation systems of an oil-filled motor during a thermo-electrical aging test.....	B#5
	M. Farahani, E. Gockenbach, H. Borsi, Leibniz Universität Hannover, Germany	
MC-P5	Developments relating to litz wire in the insulation systems of generators for renewable energies	27
	M. Chapman, T. Kaffenberger, Von Roll, Switzerland and A. Matveev, P.K. Olsen, SmartMotor AS, Norway	
MC-P6	Impact of Rotor Bar Bridge on Torque Development in Integral Horsepower Machines in PWM Inverter Environments.....	32
	Howard W. Penrose, Zachary Zych, Dreisilker Elect. Motors, USA	

Transformers Poster Session (TR-P), Sunday, June 5th, 7:00 – 9:00 pm, Annapolis Atrium

TR-P1	Moisture Diagnostics of Transformers Using Dielectric Response and Paper Samples Methods	B#5
	Mehdi Bagheri, Mohammad Salay Naderi, University of New South Wales, Australia	
TR-P2	A Method for the Measurement of Leakage Current due to Surface Discharge at the Oil-pressboard Interface	41
	H. Zainuddin, P. M. Mitchinson, P. L. Lewin, University of Southampton, UK	
TR-P3	Design of the Insulating Supports in Medium Voltage Dry-Type Transformers	45
	E. González, V. P. Gómez, F. P. Espino-Cortés, SEPI-ESIME-Zacatenco National Polytechnic, Institute, Mexico	
TR-P4	Applicability of the Dielectric Response Methods of Diagnostics of Power Transformers - Hungarian Experiences	49
	Bálint Németh, Csaba Vörös, Budapest University of Technology and Economics, Gusztáv Csépes, Mavir Ltd, Hungary	
TR-P5	On-Load Tap Changer's Dynamic Resistance Measurement Settings and Interpretation	54
	J.J. Erbrink, J. Aditya, L. A. Chmura, J. J. Smit, Delft University of Technology, R. Leich, Liandon, Netherlands, B. Quak, Seitz Instruments AG, Switzerland	
TR-P6	Life Management of 550 kV Oil-Impregnated Transformers	B#5
	Xiang Zhang and Ernst Gockenbach, Schering-Institute Leibniz University Hanover, Germany	
TR-P7	Partial Discharge Localization in Transformers Using UHF Sensors	64
	H.H. Sinaga, B.T. Phung, P.L. Ao, T.R. Blackburn, University of New South Wales, Australia	
TR-P8	Insulation Diagnosis for 220kV Oil-Immersed Current Transformer by Frequency Dielectric Spectroscopy	69
	Hua-dong Peng, Ming Dong, Ming Ren, Jin Miao, Zhi Zhang, Xi'an Jiaotong University, China	

Cables Poster Session (CA-P), Sunday, June 5th, 7:00 – 9:00 pm, Annapolis Atrium

CA-P1	Rating Methods for Cables Installed in Unventilated and Partially Ventilated Surface Troughs	74
	J. A. Pilgrim, D. J. Swaffield, P. L. Lewin, University of Southampton, D. Payne, National Grid, UK	

CA-P2	Research on Partial Discharge Test of MV Cable at 0.1Hz Voltage and 50Hz Voltage	B#5
	Junhua Luo, Wenjie Li, State Grid Electric Power Research Institute, Wei Song, State Grid Electric Power of Henan, Yan Luo, WLT Technologies Co., Ltd., China	
CA-P3	Practical Issues of Partial Discharge Testing of Low-Voltage Cables	83
	Richárd Cselkó, Zoltán Ádám Tamus, István Berta, Budapest Univ. of Technology & Economics, Hungary	
CA-P4	Dependencies of PD - Tan δ Characteristics on the Temperature and Ageing Status of MV PILC Cables	88
	I. Mladenovic, Ch. Weindl, University of Erlangen-Nuremberg, Germany	
CA-P5	Partial Discharge Characteristics of Electrical trees in XLPE Power Cables	93
	Tianchun Zhou, Ruijin Liao, Quan Zhou, Di Ye, Chongqing University, China	

Insulators Poster Session (IN-P), Sunday, June 5th, 7:00 – 9:00 pm, Annapolis Atrium

IN-P1	Implementation of statistical principles to reflect long term performance of composite insulators	97
	Antonios Tzimas, Simon M. Rowland, University of Manchester, UK	
IN-P2	Effect of Insulator Configuration on Ageing Deterioration of Polymer Insulators	102
	Taeko Tanahashi, Syoichi Ishikawa, Masahito Imai, Tomoyasu Sasaki, Hiroyuki Shinokubo, Ryosuke Matsuoka, Chubu University, Masayoshi Suzuki, Masanori Isozaki, TEPCO, Japan	
IN-P3	Effect of voltage type and polarity on the gas temperature of an arc over an ice surface	106
	A. Nekahi, M. Farzaneh, Université du Québec à Chicoutimi, Canada	
IN-P4	Study on the Transference of Hydrophobicity for Kaolin and Kieselgur	111
	Gongmao Peng, Zhicheng Guan, Fuzeng Zhang, Liming Wang, Tsinghua University, China	
IN-P5	Parameter Studies on Surface Partial Discharge Inception of Polluted, Tangential Electrically Stressed Boundary Surfaces	115
	Rolf Schmerling, Frank Jenau, Technische Universität Dortmund, Institute of HV Engineering Stefan Kempen, Friedhelm Pohlmann, Siemens AG, Energy Sector, Germany	
IN-P6	Analyze the Pollution Accumulating and the Pollution Flashover Characteristic of Field 110 kV Composite Insulators	120
	Zhijin Zhang, Haizhou Huang, Zingliang Jiang, Mingying Chen, Jianlin Hu, Chongqing University, China	

Transmission Poster Session (TM-P), Sunday, June 5th, 7:00 – 9:00 pm, Annapolis Atrium

- TM-P1 Analysis of ZnO Microvaristors with Equivalent Circuit Simulation B#5**
Mahmudul Kabir, Masafumi Suzuki and Noboru Yoshimura, Akita University,
Japan
- TM-P2 Application of Dry-Air Insulating Media in 170kV GIS 128**
Gyorgy A. Madarasz, Hyundai Technologies Center, Hungary, Byung Hwa Choi,
Joo-Yeong Lee, Hyundai Heavy Industries, Korea
- TM-P3 Gas-sensing Simulation of Single-walled Carbon Nanotubes Applied to
Detect Gas Decomposition products of SF6 in PD 132**
Xiaoxing Zhang, Fansheng Meng, Zhen Wang, Jian Li, Chongqing University,
China

Nanomaterials Poster Session (NM-P), Sunday, June 5th, 7:00 – 9:00 pm, Annapolis Atrium

- NM-P1 Space Charge Behavior of Magnesium Oxide filled Epoxy Nanocomposites
at Different Temperatures and Electric Field Strengths 136**
Thomas Andritsch, Roman Kochetov, Barry Lennon, Dhiradj Djairam, Peter H.F.
Morshuis and Johan J. Smit, Delft University of Technology, Netherlands

Materials Poster Session (ML-P), Sunday, June 5th, 7:00 – 9:00 pm, Annapolis Atrium

- ML-P1 Epoxy-anhydride VPI resin with low viscosity and application in 5MW
permanent magnet synchronous wind-driven generators 141**
Zeng Caiping, Xiangtan Electric Mft. Corp. Ltd., China, Xia Yu, Suzhou Jufeng
Electrical Insulation Sys. Co. Ltd, China
- ML-P2 Analysis of Deterioration of PET Insulation with Multiple Voids due to
Electrical Stressing 146**
D. Adhikari, D. M. Hepburn, B. G. Stewart, Glasgow Caledonian University, UK
- ML-P3 Repetitive Transient Aging, the Influence of Rise Time 151**
Tomasz Lech Koltunowicz, Roman Kochetov, Gautam Bajracharya, Dhiradj
Djairam, Johan J. Smit, Delft University of Technology, Netherlands
- ML-P4 Dielectric Barrier Discharge (DBD) Dynamic Modeling for High Voltage
Insulation 156**
Mona Ghassemi, Hossein Mohseni, Kaveh Niayesh, Amir Abbas Shayegani,
University of Tehran, Iran

Partial Discharge Poster Session (PD-P), Sunday, June 5th, 7:00 – 9:00 pm, Annapolis Atrium

- PD-P1 Sensitivity in Partial Discharge Detection 162**
Mu-Kuen Chen, Chao-Yuan Cheng and Jeng-Ming Chen, St. John's University,
Taiwan

PD-P2	A Novel System for Generation, Acquisition, and Analysis of Partial Discharges	166
	Prathap Basappa, Vishnu Lakdawala, Krish Agarwal, Glenn A. Gerdin, Gayahri Shivaraj, Norfolk State University, USA	

Monday, June 6th – Oral Sessions

Machines (S1), Monday, June 6th, 8:00 – 11:00am, Powerhouse: Point Lookout

S1 – MC1	Computer Aided Design of an End Corona Protection System for Accelerated Voltage Endurance Testing at Increased Line Frequency	170
	Christian Staubach, Stefan Kempen, Friedhelm Pohlmann, Siemens Energy AG, Frank Jenau, TU Dortmund, Germany	
S1 – MC2	Preliminary Evaluation of Flat Glass Backed Mica Paper Tape for High Voltage Coil Groundwall Insulation using Vacuum-Pressure-Impregnation.....	175
	F. Tim Emery, Siemens Energy, Mark Williams, Electrolock , USA	
S1 – MC3	Evaluation of Vacuum Encapsulation Systems for Integral Motors.....	180
	Howard Penrose, Donald Wittmuss, Dreisilker Electric Motors, Inc., USA	
S1 – MC4	Optimized, emission free production process for main wall insulation with enhanced lifetime properties	184
	Thomas Baumann, Thomas Hillmer, Peter Klee, Dieter Stoll, Alstom, Switzerland	
S1 – MC5	Root Cause Investigation of the Inadvertent Failure of Unit 2 Forced Draft Fan Motor and the Corrective Actions Implemented	190
	John K. Amoo-Otoo, Exelon Nuclear, USA	

Transformers (S2), Monday, June 6th, 8:00 – 11:00am, Powerhouse: Windmill Point

S2 – TR1	Locating Partial Discharge Sources in High Voltage Transformer Windings	196
	P. L. Lewin, I. O. Golosnoy, University of Southampton, UK, R. Mohamed, National University of Malaysia, Malaysia	
S2 – TR2	Experience with UHF partial discharge detection and location in power transformers	201
	Martin D. Judd, University of Strathclyde, UK	
S2 – TR3	Global Monitoring Approach in a large Autotransformer through PD, DDF and DGA analysis: PD source location and maintenance action planning	206
	M. Tozzi, Techimp, A. Cavallini, G. C. Montanari, University of Bologna, V. Iuliani, C. Serafino, Terna, Italy	
S2 – TR4	High Voltage Power Transformer Insulation Design	211
	W. Ziomek, K. Vijayan, D. Boyd, K. Kuby, M. Franchek, CG Power Systems, Canada	

S2 – TR5	Statistical analysis of subcomponents failures in power transformers	216
	Lukasz Chmura, P.H.F. Morshuis, E.Gulski, J.J. Smit, Delft University of Technology, Anton Janssen, Liander - The Network Operator Arnhem, Netherlands	

Insulators (S3), Monday, June 6th, 8:00 – 11:00am, Powerhouse: Thomas Point

S3 – IN1	Failure Modes of Porcelain and Toughened Glass Suspension Insulators	221
	Ravi. S. Gorur, Arizona State University, USA	
S3 – IN2	Experimental Investigation of Dry Band Arcing on ADSS Cables when Spiral Vibration Dampers are Installed	226
	Kumaraguru Prabakar, George G. Karady, Arizona State University, USA	
S3 – IN3	Optimization of Electric Field Grading Systems in Non-Ceramic Insulators.....	231
	D. Cruz Domínguez, F.P. Espino-Cortés, P. Gómez, SEPI-ESIME-Zacatenco National Polytechnic Institute, Mexico	
S3 – IN4	Surface Insulation Performance of Epoxy Resin/Silica Nanocomposite Material.....	235
	W. Yan, Z.J. Han, K. Ostrikov, CSIRO Materials Science and Engineering, B.T. Phung, University of New South Wales, Australia	
S3 – IN5	Thermal and Voltage distribution along Insulator Strings with Semiconducting RTV Coatings.....	240
	Xiaoxing Wei, Zhidong Jia, Zhihai Xu, Huafeng Su, Xiangyang Pen, Senjing Yao, Tsinghua University, China	

Information sessions presented by exhibitors, 11:00 – 11:30am

Lunch in Exhibits, 11:30am – 2:00pm, Annapolis Atrium and Regatta Ballroom

Machines – Diagnostics (S4), Monday, June 6th, 2:00 – 5:00 pm, Powerhouse: Point Lookout

S4 – MC6	Assessment of insulation condition on stator bars after 40 years in service	244
	Thomas Klamt, Thomas Hillmer, Francois Vannay, Alstom, Switzerland	
S4 – MC7	Insulation Resistance and Polarization of Rotating Machines	249
	S.A. Bhumiwat, High Voltage Diagnostics Consultant, New Zealand	
S4 – MC8	Evaluation of EL CID Indications not associated with Stator Core Interlaminar Insulation Faults	254
	David R. Bertenshaw, ENELEC Ltd., UK, James F. Lau, Douglas J. Conley, Siemens, USA	
S4 – MC9	Insulation resistance measurements for machine insulation.....	261
	A. Brown, Kinectrics, E. David, M. Essahili, ETS, Canada	

S4 – MC10	Online Detection of Endwinding Contamination in Industrial Motors	265
	P. Neti, P. Zhang, X. Qi, Y. Zhou, K. Younsi, M. Shah, K. Weeber, GE Global Research, USA	

Transformers (S5), Monday, June 6th, 2:00 – 5:00pm, Powerhouse: Windmill Point

S5 – TR6	Condition based Maintenance for Power Transformers in Service - Application of conventional and advanced diagnostic methods	271
	Jitka Fuhr, BKW FMB Energie AG, Switzerland	
S5 – TR7	Transformer Insulation Risk Assessment under Smart Grid Environment due to Enhanced Aging Effects	276
	Refat Atef Ghunem, Muhammad Hamid, Shesha Jayaram, University of Waterloo, Canada, Ravi Seethapathy, Hydro One Networks, Canada, Ali Naderian, Kinectrics, Canada	
S5 – TR8	Fiber Optics Temperature/Vibration and Moisture Monitoring in Power Transformers	280
	Peter Kung, Lutang Wang, QPS Photonics, Maria-Iulia Comanici, McGill University, Canada	
S5 – TR9	On-line Condition Monitoring of Power Transformers - A Case History.....	285
	Alfonso de Pablo, GE Energy, Spain, Walter Ferguson, GE Energy, Northern Ireland, UK, Anayoliy Mudryk, Dmytro Golovan, GE Energy, Ukraine	
S5 – TR10	Evaluation of Various Transformations to Extract Characteristic Parameters from Vibration Signal Monitoring of Power Transformer	289
	Buyung Sofiaro Munir, PT PLN Research, Indonesia, Johan J. Smit, Delft University of Technology, Netherlands	

Insulators – Pollution (S6), Monday, June 6th, 2:00 – 5:00pm, Powerhouse: Thomas Point

S6 – IN6	Performance Simulation of Polymeric Insulators in Polluted Environments	294
	J. M. B. Bezerra, V. R. A. Emerenciano and L. H. Nery, Pernambuco Federal University, Brazil	
S6 – IN7	Modelling of Low Current Surface Discharges using PSCAD	299
	Xin Zhang, Simon M. Rowland, University of Manchester, UK	
S6 – IN8	Effects of Ultraviolet Radiation and Artificial Pollution on Leakage Current of Silicone Rubber Insulator	304
	I.A. Joheidi, R. Karimpour, A.A. Shayegani, H. Mohseni, University of Tehran, Iran, J. Jadidian, Massachusetts Institute of Technology, USA	
S6 – IN9	Multiple-arc propagation over an ice surface.....	309
	S. Farokhi, M. Farzaneh, Université du Québec à Chicoutimi, Canada	
S6-IN10	Dielectric deamplification of multiphase cementitious composites in the frequency range of 0.5GHz to 4.5 GHz	313
	Tzu-Yang Yu, University of Massachusetts, USA	

Tuesday, June 7th – Oral Sessions

Machines – PD (S7), Tuesday, June 7th, 8:00 – 11:00am, Powerhouse: Point Lookout

- S7 – MC11 Critical Cavity Size Producing Internal Discharges in Stator Bar Ground Wall Insulation 318**
A. Turgeon, C. Hudon, Institut de recherche d'Hydro-Québec (IREQ), D.N. Nguyen, Appareillage de production, Hydro-Québec, Canada
- S7 – MC12 Tracking Stator Bar Condition by On-line Partial Discharge Measurements 323**
W. McDermid, T. Black, Manitoba Hydro, Canada
- S7 – MC13 Overview of Simulation Models for Partial Discharge and Electrical Treeing to Determine Feasibility for Estimation of Remaining Life of Machine Insulation Systems..... 327**
Y. Nyanteh, L. Graber, C. Edrington, S. Srivastava, D. Cartes, Florida State University, USA
- S7 – MC14 Neural Network Based Classification of Partial Discharge in HV Motors 333**
Yahya Asiri, Alfred Vouk, Saudi Aramco, Saudi Arabia, Lee Renforth, HVPD Ltd., UK, David Clark, University of Manchester, UK, Jack Cooper, NeuralWare, USA
- S7 – MC15 Electromagnetic Interference (EMI) Testing of Electrical Equipment 340**
Clyde V. Maughan, Maughan Generator Consultants, USA

Cables – Diagnostics and PD (S8), Tuesday, June 7th, 8:00 – 11:00am, Powerhouse: Windmill Point

- S8 – CA1 Novel Online RF Technique for Detection of Water Trees in Underground Power Distribution Cables..... 345**
A. Giovanni Gonzalez, Igor Paprotny, Richard M. White, Paul K. Wright, University of California, Berkeley, USA
- S8 – CA2 Experiences with diagnostics on complete in-service MV cable feeders..... 349**
Peter C.J.M. van der Wielen, E. Fred Steennis, KEMA, Netherlands
- S8 – CA3 On-line Partial Discharges Monitoring of High Voltage XLPE/Fluid-filled Transition Joints 354**
L. Testa, Techimp, A. Cavallini, G. C. Montanari, University of Bologna, Italy, A. Makovoz, ConEdison, USA
- S8 – CA4 Practical Consideration of Mechanical Measurements in Cable Diagnostics 359**
Zoltán Ádám Tamus, Budapest University of Tech and Economics, Hungary
- S8 – CA5 Detection of partial discharge signals in high voltage XLPE cables using time domain features 364**
R. Ambikairajah, B.T. Phung, J. Ravishankar, T.R. Blackburn, Z. Liu, University of New South Wales, Australia

Insulators (S9), Tuesday, June 7th, 8:00 – 11:00am, Powerhouse: Thomas Point

S9 – IN11	Voltage Withstand Tests on a Full Scale Overhead Line Tower Model for Line Upgrading	368
	Michael Hinteregger, Thomas Judendorfer, Michael Muhr, Graz University of Technology, Austria, Sonja Berlijn, Anders Olsen, Statnett SF, Norway	
S9 – IN12	A Simulation Method for Winter Pollution Contamination of HV Insulators	373
	N. Ravelomanantsoa, M. Farzaneh, W. A. Chisholm, CIGELE, Canada	
S9 – IN13	Electric Field Computation of Water Droplets on a Model Insulator	377
	Bhargavi Sarang, Prathap Basappa, Gayathri Shivaraj, Norfolk State University, USA, Vishnu Lakdawala, Old Dominion University, USA	
S9 – IN14	Fluorescent Probes as Electrical Field Indicators	382
	A. F. Holt, R. C. D. Brown, P. L. Lewin, A. S. Vaughan, University of Southampton, P. Lang , UK Power Networks, UK	
S9 – IN15	A Numerical Model for the Electrical Breakdown of Air within a Gap under Standard Atmospheric Conditions: One-Dimensional versus Two-Dimensional Approach	387
	D. J. Smith, S. G. McMeekin, B. G. Stewart, P. A. Wallace, Glasgow Caledonian University, UK	

Information sessions presented by exhibitors, 11:00 – 11:30am

Lunch in Exhibits, 11:30am – 2:00pm, Annapolis Atrium and Regatta Ballroom

Machines (S10), Tuesday, June 7th, 2:00 – 5:00pm, Powerhouse: Point Lookout

S10 – MC16	A Review of Electrical Winding Failures in Wind Turbine Generators	392
	Kevin Alewine, Shermco Ind, William Chen, TECO Westinghouse, USA	
S10 – MC17	Utilization of Repetitive Surge Oscillograph (RSO) in the Detection of Rotor Shorted-Turns in Large Turbine-Driven Generators	397
	Isidor Kerszenbaum, Southern California Edison, Clyde Maughan, Maughan Generator Consultants, USA	
S10 – MC18	IEC Qualification Test Applied to Capacitively Graded 13.8 kV Sample Bars Energized with Repetitive Fast Pulses	401
	E. Sharifi, S. Jayaram, E. A. Cherney, University of Waterloo, S. Ul Haq, R. Omranipour, GE Energy, Canada	
S10 – MC19	Prediction of the turn-to-turn voltages in parallel connected wires configuration for motor coils fed by steep fronted pulses	406
	Vasile Mihaila, Stéphane Duchesne, Daniel Roger, Université Lille Nord de France, Pierre Yves Liegeois, Messier-Bugatti SAFRAN Group, France	
S10 – MC20	Measurement of Electromagnetic Waves Emitted from Partial Discharge Generated in PLG Type-Ground Coil for Superconducting Maglev	412
	Masatake Kawada, University of Tokushima, Masao Suzuki, Satoru Ota, Railway Technical Research Institute, Maglev Systems Technology Division Electromagnetic Guideway Technology, Japan	

Cables (S11), Tuesday, June 7th, 2:00 – 5:00pm, Powerhouse: Windmill Point

- S11 – CA6 MV Cable Termination Failure Assessment in the Context of Increased Use of Power Electronics417**
Utharsh Patel, Shesha H. Jayaram, University of Waterloo, Canada, Ayman El-Hag, American University of Sharjah, UAE, Ravi Seetahpathy, Hydro One Networks, Canada
- S11 – CA7 The Testing Methodologies of Service Aged Medium Voltage Power Cables as Applied to an Operating Wind Farm422**
Mike Moore, Shermco, USA
- S11 – CA8 Analysis of Influential Factors on the Underground Cable Ampacity429**
Youyuan Wang, Rengang Chen, Jian Li, Chongqing University, China, Stanislaw Grzybowski, Taosha Jiang, Mississippi State University, USA
- S11 – CA9 Investigation on Insulation Reliability of 380 kV XLPE Cable Systems433**
X. Chen, J.J. Smit, Delft University of Technology, S. Meijer, TenneT TSO B.V., Netherlands
- S11 – CA10 Ageing of High Voltage Cable Insulation438**
D. H. Mills, P. L. Lewin, G. Chen, University of Southampton, UK

Materials (S12), Tuesday, June 7th, 2:00 – 5:00pm, Powerhouse: Thomas Point

- S12 – ML1 Repetitive Transient Aging, the Influence of Repetition Frequency443**
Tomasz Lech Koltunowicz, Roman Kochetov, Gautam Bajracharya, Dhiradj Djairam, Johan J. Smit, Delft University of Technology, Netherlands
- S12 – ML2 New Test Method to Evaluate the Thermal Aging of Aramid Materials448**
Shawn Filliben, DuPont, USA
- S12 – ML3 Dielectric Breakdown of Amorphous and Semicrystalline Polymers453**
H. Couderc, E. David, ETS, Canada, Y. Corlu, M. Fréchet, S. Savoie, IREQ, Canada
- S12 – ML4 Novel high performance epoxy/anhydride formulations and their application in electrical insulation458**
Ludovic Valette, Krishnan Karunakaran, Dow Chemical Company, USA, Li Yong Jiang, Danny Ji, Dow Chemical (China) Company Limited, China
- S12 – ML5 X-ray Irradiation Induced Discharge of Spherical Void in Epoxy Resin463**
Masayuki Hikita, Masahiro Kozako, Hajime Takada, Masayuki Hayashi, Kyusyu Institute of Tech., Masakazu Higashiyama, Toshiba Industrial Products Manufacturing Co., Tatsuya Hirose, Yusuke Nakamura, Power & Industrial Technology R&D Center, Toshiba Co., Shuhei Nakamura, Tokihiro Umemura, Mie University, Japan

Wednesday, June 8th – Oral Sessions

Machines (S13), Wednesday, June 8th, 8:30 – 11:00am, Powerhouse: Point Lookout

- S13 – MC21 A Portable PC Instrument for the Location and Identification of Defects
Generating PD468**
Roberto Candela, University of Palermo, Alfredo Contin, University of Trieste,
Italy
- S13 – MC22 Comparative AC and DC Voltage Endurance Tests Performed on Roebel
Bars473**
Charles Millet, Hydro-Québec, Mario Bélec, Calogero Guddemi, Institut de
Recherche d’Hydro-Québec, Canada
- S13 – MC23 Accelerated Life Testing of High Voltage Stator Coils with Enhanced PET-
Mica Insulation System.....478**
Saeed UL Haq, Ramtin Omranipour, GE Energy Services, Canada
- S13 – MC24 Thermal and Thermo-Mechanical Aging of Epoxy-Mica Insulator Stator Bar482**
H. Provencher, C. Hudon, IREQ, E. David, ETS, Canada
- S13 – MC25 Reports on IEEE Standards for Rotating Machine Insulation487**
Stefano Bomben, Ontario Power Generation

Nanomaterials (S14), Wednesday, June 8th, 8:00 – 11:00am, Powerhouse: Windmill Point

- S14 – NM1 Evaluation of Epoxy Nanocomposites for Electrical Insulation Systems488**
Su Zhao, Henrik Hillborg, ABB Corporate Research, Sweden, Eva Mårtensson,
Göran Paulsson, ABB Discrete Automation and Motion, Sweden
- S14 – NM2 The thermal and electrical properties of nano-silicon dioxide filled epoxy
systems for use in high voltage insulation.....492**
Martin Reading, Zhiqiang Xu, Alun S. Vaughan, Paul L. Lewin, University of
Southampton, UK
- S14 – NM3 Evaluation of Influence of Nano Fillers on Electrical and Dielectric
Properties of Epoxy Resin.....497**
M. M. Saei Shirazi, H. Borsi, E. Gockenbach, Leibniz Universität Hannover,
Germany
- S14 – NM4 Life Cycle Testing of Nanomaterial-Modified Liquid Electrical Insulations.....501**
Mark Winkeler, Ronald W. Goetter, Elantas PDG, Inc., USA
- S14 – NM5 Testing of Nano-Insulation Materials - Some Ideas, some Experiences.....505**
Mario Brockschmidt, Friedhelm Pohlmann, Stefan Kempen, Peter Gröppel,
Siemens, Germany

Substations (S15), Wednesday, June 8th, 8:00 – 11:00am, Powerhouse: Thomas Point

S15 – SS1 Evaluation of Surface Alteration of Polypropylene Film for Power Capacitor 510
Chao Zhang, Stephen J. Rigby, Robert C. Kempke, Clay L. Fellers, Marco J. Mason, Xiaoyi Shen, Cooper Power Systems, USA

S15 – SS2 Overvoltage Cycling and Endurance Tests on Full Scale Capacitors 515
Richard Morin, Richard Neufeld, Raymond Bartnikas, Hydro-Québec, Canada

S15 – SS3 Dry testing of non-conductive liners 518
William R. Karslo, Theresa I. Karslo, HKH Dielectric, LLC, USA

S15 – SS4 Novel Spirally-Wound Insulation for Straight HVDC Conductors to Avoid Voltage Stress Inversion 522
Roger Faulkner, Electric Pipeline Corporation, USA, Erling Ildstad, NTNU (Norwegian University of Science and Technology), Norway

S15 – SS5 CFD simulation for a self-blast high voltage circuit breaker: Mixing and Heat transfer 527
M. Dhotre, X.Ye, S. Kotilainen, ABB Interrupter Development, M. Schwinne, R. Bini, ABB Corporate Research, Switzerland
