

2011 International Conference on Advanced Mechatronic Systems

(ICAMechS 2011)

**Zhengzhou, China
11 – 13 August 2011**

**IEEE Catalog Number: CFP1118R-PRT
ISBN: 978-1-4577-1698-0**

2011 International Conference on Advanced Mechatronic Systems

August 11-13, 2011
Zhengzhou, China

CONTENTS

Robotics and mechatronics (ThuA01)

<i>A geometric method for calibration of the image center</i>	Yongchun Fang, Xuebo Zhang, Baoquan Li, Ning Sun	6
<i>Experimental validation of control for a positioning stage by feedback error learning</i>	Yukinori Nakamura, Kazuki Morimoto, Shinji Wakui	11
<i>Control of human hand considering uncertainties</i>	M. Moavenian, M.R. Gharib, A. Daneshvar, S. Alimardani	17
<i>The design of intelligent robot based on embedded system</i>	Mingliang Liang, Xinqiang Wang	23
<i>Design of two optimal controllers for mechatronic suspension system</i>	Sallehuddin Mohamed Haris, Wajdi S. Aboud	29

Information processing (ThuA02)

<i>Research on selection system based on bayesian recommendation model</i>	Guiqin Dou, Yansong Zhu, Yumin Han	35
<i>Stabilization for fractional-order networked control systems with input time-varying delays</i>	Xiaona Song, Ines Tejado, Yangquan Chen	39
<i>Algorithm on detection and identification of foreign fibers in raw cotton</i>	Dongyun Wang, Hongtao Peng, Yongping Dan, Fanghua Liu, Liusong Wang	43
<i>Optimal path planning for material and products transfer in steel works using ACO</i>	Mingcong Deng, Akira Inoue, Satoru Kawakami	47
<i>Radar equation of high-speed weak target</i>	Cunsuo Pang, Nan Zhang, Xiangyang Lu	51

Genetic algorithm, neural network and PSO (ThuA03)

<i>Exponential stability analysis for the switched stochastic hopfield neural networks with time-varying delays</i>	Huimin Xiao, Chunhua Wang	55
<i>Optimized fuzzy PDC controller for nonlinear systems with T-S model mismatch</i>	A. Zeiaee, H. Kharrati, S. Khanmohammadi	61
<i>On zeros of sampled-data system with relative degree two</i>		

	Shan Liang, Mitsuaki Ishitobi, Tomoki Koga, Sadaaki Kunimatsu	67
<i>Design of PSO-based fuzzy gain scheduling PI controller for four-area interconnected AGC system after deregulation</i>		
	Guolian Hou, Lina Qin, Xinyan Zheng, Jianhua Zhang	72
<i>Improved particle swarm optimization algorithms</i>		
	Wudai Liao, Junyan Wang, Xingfeng Wang, Jiangfeng Wang	77
<i>The global existence of the solution and impulsive synchronization for m-dimensional reaction-diffusion system</i>		
	Wanli Yang, Suwen Zheng	81

Process modeling, optimization and system design (ThuA04)

<i>An overview of modelling and simulation of thermal power plant</i>		
	Changliang Liu, Hong Wang, Jinliang Ding, Chenggang Zhen	86
<i>Fast algorithm of supervisory predictive control</i>		
	Guolian Hou, Yi Sun, Jingbin Liu, Jianhua Zhang	92
<i>Intelligent stochastic quality control of non-Gaussian chemical processes</i>		
	A. Ahammed, A. Wang, Hong Wang	97
<i>Elementary siphons in a class of generalized petri nets and their application</i>		
	Yifan Hou, Zhiwu Li, Ding Liu, Mi Zhao	103
<i>Network based robust adaptive thermal control design for aluminum plate</i>		
	Masahiro Sanada, Mingcong Deng, Shengjun Wen	109
<i>Modeling and simulation for parallel hybrid electric vehicle power train</i>		
	Zhumu Fu, Gaolei Hou, Aiyun Gao	114

Motor control (ThuM01)

<i>Study on simulation model of switched reluctance startor/generator system based on wavelet neural network</i>		
	Xiaoshu Zan, Fangnan Xie	118
<i>Switched reluctance generator system based on single neuron adaptive PID controller</i>		
	Xiaoshu Zan, Fangnan Xie	123
<i>Comparative study on the dynamic behaviors of SRD operated at two control modes</i>		
	D.S. Yu, Hao Chen	128
<i>Reference model output following control design for a direct current servo control system</i>		
	Yuguo Chen, Dongyun Wang, Peixue Wang	134

Optimization, prediction and control (ThuM02)

<i>Thermal energy minimisation in papermaking via MD control approach</i>		
	P. Afshar, J. Mack, P. Austin, M. Brown, J. Maciejowski, Hong Wang	139
<i>Feedback control of a class of nonlinear discrete systems with state time-varying delay</i>		
	Cunchen Gao, Yan Xu	145
<i>Numerical study of phase change problem with periodic boundary condition</i>		
	Lianghui Qu, Feng Ling	149

Robust control for a class of nonlinear systems with unknown perturbations
Ni Bu, Mingcong Deng 1

Modelling and fault diagnosis for DFIGs with multi-phase inter-turn short circuit
Qian Lu, Timofei Breikin, Hong Wang 155

Novel control techniques (ThuM03)

A simulation model of focusing type three GaAs solar cells in the condition of following sun
Erqiang Xu, Lei Liu, Xiaolei Wang 161

Pareto optimization of serial-batching scheduling problems on two agents
Qi Feng, Zhiyun Yu, Weiping Shang 165

Compensation of hysteresis nonlinearity for a piezoelectric actuator using a stop operator-based Prandtl-Ishlinskii model
Zhi Li, Omar Aljanaideh, Chun-Yi Su, Subhash Rakheja, Mohammad Al Janaideh 169

2D systems based iterative learning control revisited
Lukasz Hladowski, Krzysztof Galkowski, Eric Rogers, Anton Kummert 175

Decentralized adaptive robust control of robot manipulators
Zi-Jiang Yang, Youichirou Fukushima, Pan Qin 181

Process control (ThuM04)

The analysis for the leaking flowate in the spherical valveplate sector considering the influence of the flow inertia
Renxi Hu, Wentong Xin, Zhizun Li, Fengqi Han 187

Neuro-PID control of heat exchanger in an organic rankine cycle system for waste heat recovery
Rui Wang, Chao Wang, Xiang Zhao, Wenfang Zhang 191

Simulation research of the multi-variable generalized predictive control in 500MW unit plant coordinated control system
Guolian Hou, Yuan Xi, Jingbin Liu, Jianhua Zhang 196

Application of self-tuning control based on generalized minimum variance method in evaporator for ORCS
Guolian Hou, Guoqiang Hu, Rui Sun, Jianhua Zhang 202

Operator based networked nonlinear control for a Peltier actuated thermal process with time-varying delays
Shengjun Wen, Mingcong Deng, Shuhui Bi 207

Human adaptive mechatronics (ThuP01)

Catheter intervention manipulation system of minimally invasive robotic surgery
Hongbo Wang, Xue Yang, Guoqing Hu, Zengguang Hou, Hongnian Yu 211

Design, modelling and control of a light touch mechanism
Y. Dong, Hongnian Yu, F. Gao 217

SEMG feature extraction methods for pattern recognition of upper limbs
Feng Zhang, Pengfeng Li, Zengguang Hou, Yixiong Chen, Fei Xu, Jin Hu, Qingling Li, Min Tan 222

The petri nets and Markov chains approach for the walking robots dynamical stability control

Luige Vladareanu, Gabriela Tont, Hongnian Yu, Danut A. Bucur 228

Key issues in studying parallel manipulators

Jianzheng Zhang, Hongnian Yu, Feng Gao, Xianchao Zhao 234

Industrial hazards and system safety (ThuP02)

The longest side elimination solution for solving steiner minimum tree problems

Lili Xu, Zongxiao Yang, Youlin Shang, Tingting Wang 245

Research and development of a simple straight-flow wind tunnel test equipment for vertical axis wind turbines

Ruitao Deng, Lei Song, Zongxiao Yang, Hanghang Yang, Longbiao Wang 250

The conditions of frame for the shift-invariant system

Dewu Yang, Xiuge Zhu 255

Application of grey system theory to MTPV system optimization

Bin Xu, Jun Wu, Jian Wu, Hong Xue 260

Structure design and trajectory control on gait rehabilitation training robot system driven by pneumatic actuators

Jianhai Han, Binjing Guo, Shushang Zhao 265

Industrial application (ThuP03)

Shortest path algorithm based on city emergency system

Guiqin Dou, Yansong Zhu, Yumin Han 270

The research and implementation of mid-frequency power supply with high power factor and multi-closed loop feedback

Fuzhuan Wu, Dongyun Wang, Haibo Ma 273

Off-shore wind power potential evaluation of entire Japan using GIS technology

Asifujiang Abudureyimu, Yoshiki Hayashi, Ken Nagasaka 277

Design of wireless medical liquid-level monitoring and controlling system based on RF technology

Pingjun Wei, Jiangbo Zhu, Xiangzhi Wang 283

Research on low-cost vehicular integrated navigation

Jingyang Wen, Xiangyang Lu 287

Distributed system (ThuP04)

Modeling and model order reduction of evaporator in organic rankine cycle for waste heat recovery

Rui Wang, Xiang Zhao, Chao Wang, Ying Li 291

Variable structure sliding mode control for a class of uncertain distributed parameter systems with time delay

Cunchen Gao, Fei Li, Lin Zhao 297

The stabilized least-squares nonconforming mixed finite element approximation for the convection-diffusion problem

Zhiyun Yu, Jinhuan Chen 303

Supervisory predictive control of evaporator in organic rankine cycle (ORC) system for waste heat recovery

Guolian Hou, Rui Sun, Guoqiang Hu, Jianhua Zhang 306

Adaptive and advanced control systems - theory and applications (FriA01)

- Design of a self-adjust controller using multiple local linear models for nonlinear systems*
Shinichi Imai, Toru Yamamoto 312
- A nonlinear model predictive control using a continuation method and a step input constraint*
Kota Kogiso, Shiro Masuda, Takao Sato 317
- Disturbance attenuation property for random disturbances in two-degree-of-freedom optimal servo control systems*
Yusuki Kishimoto, Shiro Masuda, Akira Yano 321
- Adaptive control scheme for MI-MO systems with input saturations*
Jinxin Zhuo, Qiang Wang, Masahiro Oya 325
- Performance-driven adaptive output feedback control system with a PFC designed via FRIT approach*
Ikuro Mizumoto, Sota Fukui, Kenshi Yamanaka, Sirish L. Shah 331
- Stable fault-tolerant control based on fuzzy performance evaluation*
Masanori Takahashi, Taro Takagi 337

Information techniques for control (FriA02)

- A V2G vector control model of electric car charging and discharging machine*
Xiaolei Wang, Pan Yan, Liang Yang, Wendao Yao, Guangwen Shi 342
- Research progress on agronomic parameter estimation based on spectral analysis technology*
Zhe Xu, Na Yang 348
- Spectrum signal de-noising based on wavelet packet*
Zhe Xu, Na Yang 353
- A new hybrid active noise control system in the presence of wideband and narrowband noise components*
Yegui Xiao, Jing Wang, Hongyun Wei 357
- Design of low cost embedded system for automation of a parallel processing plant*
Zahid Ali Siddiqui, Ahmed Munir, M. Faizan Sherazi, S. M. Danish 362
- Design of PV power station remote monitoring system data acquisition device*
Junming Xiao, Pengcheng Liu, Lingyun Jiao, Haiming Zhu, Yinghu Du 367

Measurement and sensors (FriA03)

- Effects of back electromotive force in an absolute displacement sensor and improvement using current-feedback-type driver*
Takashi Kai, Masaya Akiyama, Yukinori Nakamura, Shinji Wakui 373
- Remote sensing image fusion for dim target detection*
Zanxia Qiang, Xianfeng Du, Liwu Sun 379
- The design research on the storage structures for large amount of data of the database*
Huaqiang Zhou, Zhihong Yao, Han Xiao 384
- Research of physical sediment measurement instruments*
Huanlin He, Yuguo Chen 389
- A new direction on auto-building database application system-model on automatically generating database application*

system from interface controls descriptions

Guoliang Tang, Feng Yang, Zhiyong Zhang, Jiexin Pu 393

Reflective ultrathin membrane model of hydrogen sensor based on multicomponent alloy

Lujun Cui, Huichao Shang, Gang Zhang, Youping Chen, Zexiang Zhao 398

Mobile robots (FriA04)

Detection of flat ground area by single camera on mobile vehicles

Masahiro Tanaka, Shintaro Onishi 403

Adaptive modular reinforcement learning

Tsubasa Asano, Satoshi Yamada 409

Localization and position correction for mobile robot using artificial visual landmarks

Kimihiro Okuyama, Tohru Kawasaki, Valeri Kroumov 414

Path planning of robotic fish based on genetic algorithm and modified dynamic programming

Qian Yang, Mei Yu, Shu Liu, Zhongming Chai 419

DECR: dynamic and energy effective clustering based routing algorithm for prolonging the lifetime of wireless sensor networks

Bahram Lotfimanesh, Nazanin Seyedgogani 425

Automatic mapping and localization of a tour guide robot by fusing active RFID and ranging laser scanner

Hung-Hsing Lin, Wen-Yu Tsao 429

Mechatronics, dynamic systems and controls in bio-mechanics and biomedical engineering (FriM01)

Wavelet packet entropy based brain activation mapping using near infrared spectroscopy

Xiao-Su Hu, Keum-Shik Hong, Shuzhi Sam Ge 435

Comparison and evaluation of robotic strength rehabilitation algorithms: isokinetic, isotonic and shared control method

MinKi Sin, DaeGeun Park, Kyu-Jin Cho 438

System identification and closed-loop control of end-tidal CO₂ partial pressure in mechanically ventilated patients

Jin-Oh Hahn, Guy A. Dumont J. Mark Ansermino 442

Artifact detection and data reconciliation in multivariate ventilatory variables measured during anesthesia: a case study

Ping Yang, Guy Dumont, Yuan-Ting Zhang, J. Mark Ansermino 448

AED training algorithm for the CPR simulator

In Bae Chang, Hyun Woo Cho, Seung Hun Jeong, Seung Jin Yang 452

Modeling, control and applications of nonlinear dynamic systems (FriM02)

The high efficiency digital virtue experimental platform for complex mechatronics system

T. H. Yan, J. Q. Han, X. S. Xu, X. D. Chen 456

Positioning control strategy design for AFM based nanomanipulation systems

Yongchun Fang, Xiao Ren, Yudong Zhang 461

High precision adaptive control for XY-table driven by piezo-actuator
Xinkai Chen 466

State-estimation of sandwich systems with dead zone
Zhupeng Zhou, Yonghong Tan, Ruili Dong, Yangqiu Xie 472

Signal analysis and hysteresis modeling of meridian systems
Yanyan Gong, Ruili Dong, Yonghong Tan 478

Discrete time control systems (FriM03)

Stability analysis and robust passive control for uncertain discrete-time singular systems
Jumei Wei, Qi Feng, Rui Ma 484

Optimal sliding mode control for linear discrete singular system
Cunchen Gao, Nan Xiang 487

Discrete-time sliding mode control using infrequent output measurements
Bijnan Bandyopadhyay, P. S. Lal Priya 491

Super-twisting-like algorithm in discrete time nonlinear systems
I. Salgado, S. Kamal, I. Chairez, Bijnan Bandyopadhyay, L. Fridman 497

Collaborative fault tolerant control for stochastic distribution systems
Yuwei Ren, Aiping Wang, Hong Wang 503

New development in cooperative and distributed control: theory and applications (FriP01)

Design of evaporator control system using fuzzy sliding mode controller
Jianhua Zhang, Wenfang Zhang, Ying Li, Guolian Hou 508

Dynamic characteristics and predictive control for evaporator
Jianhua Zhang, Ying Li, Wenfang Zhang, Guolian Hou 513

Fuzzy identification based on improved T-S fuzzy model and its application in evaporator
Jianhua Zhang, Ying Li, Wenfang Zhang, Guolian Hou 519

Neural PID control strategy for superheated steam temperature based on minimum entropy
Jianhua Zhang, Fenfang Zhang, Hong Wang 524

A notion of generalized graph laplacian and its application to distributed consensus algorithm
Guisheng Zhai 529

Fuzzy and neural methodologies (FriP02)

Characteristic analysis and modeling of a miniature pneumatic curling rubber actuator
Mingcong Deng, Aihui Wang, Shuichi Wakimoto, Toshihiro Kawashima 534

An observer-based adaptive type-2 fuzzy-neural controller for a class of MIMO systems with uncertainties
I-Hsum Li, Lian-Wang Lee, Wei-Yen Wang, Kai-Wei Hsu 540

Fuzzy-rule-based behavior control for collaborative human/robot navigation in unknown environments
Yan-Chang Lee, Zong-Lun Lee, Hisn-Han Chiang, Tsu-Tian Lee 546

Direct adaptive control of faulty UAVs based on the paralleled integral and fuzzy control

Rui Hou, Fuyang Chen, Wenli Luan 552

Robust adaptive control for uncertain nonlinear systems with multiple state and input time delays

Cunchen Gao, Yue Ma 556

Advanced techniques for control (FriP03)

Controlling strategy of batteries imbalance based on the SOC and voltage

Xiaolei Wang, Liang Yang, Pan Yan, Guangwen Shi, Wendao Yao 560

Focusing type three gallium arsenide solar cells model in the condition of following sun & MPPT control

Lei Liu, Erqiang Xu, Xiaolei Wang 566

Development of vision based tactile display system using shape memory alloys

Changan Jiang, Keiji Uchida, Hideyuki Sawada 570

Alterable integral control algorithm for shunt active power filter

Qian Zhang, Binbin Wang, Haiyun Zhu, Haibo Ma 576

A Control System of Electric Vehicle Based on CAN Bus

Xiaolei Wang, Wendao Yao, Guangwen Shi 580

.....
