

**2010 DoD High Performance
Computing Modernization
Program Users Group Conference
(HPCMP-UGC 2011)**

**Schaumburg, Illinois, USA
14 – 17 June 2010**

**IEEE Catalog Number: CFP1084D-PRT
ISBN: 978-1-61284-986-7**

2010 DoD High Performance Computing Modernization Program Users Group Conference

HPCMP UGC 2010

Table of Contents

Editor's Preface.....	xii
Conference Committee.....	xv
Reviewers.....	xvi

1. Computational Fluid Dynamics (CFD)

Numerical Modeling of Turbulent, Parallel, Round Jets	3
<i>Jeffrey B. Allen and David L. Smith</i>	
The Advantages and Costs of Higher-Fidelity Turbulence Modeling	8
<i>John Boles, Ryan Milligan, Mark Hagenmaier, and Dean Eklund</i>	
Large-Scale Computations of Unsteady Forces on Marine Vehicles	12
<i>Peter Chang, Minyee Jiang, Dory Lummer, and Krishnan Mahesh</i>	
Analysis of External and Internal Aero-propulsive Phenomena in Hypersonic Vehicles	20
<i>C. R. Alba, D. V. Gaitonde, J. Liu, F. J. Malo-Molina, D. Risha, and H. Ebrahimi</i>	
High-Fidelity Computations for Flexible Micro Air Vehicle Applications	26
<i>Raymond E. Gordnier, Miguel R. Visbal, and Daniel Garmann</i>	
Investigation of Boundary-Layer Separation for Lifting Surfaces	35
<i>A. Gross, W. Balzer, and H. F. Fasel</i>	
Investigation of Three-Dimensional Internal and External Flow Separation	45
<i>A. Gross, R. Jacobi, and H. Fasel</i>	
A Dual-Mesh Simulation Strategy for Improved AV-8B Empennage Buffet Load Prediction	54
<i>Nathan Hariharan, James Hunt, Andy Wissink, and Venke Sankaran</i>	
Computational Naval Ship Hydrodynamics	64
<i>Kyle A. Brucker, Douglas G. Dommermuth, Thomas T. O'Shea, Dick K. P. Yue, Kelli Hendrickson, and Gabriel Weymouth</i>	

A Comparison of Wavelet-Based Schemes for Parameter Estimation	71
<i>Miguel Hernandez IV, Leticia Velazquez, and Miguel Argaez</i>	
Computational Modeling of Geometrically-Complex Weapons Bays	77
<i>Rudy Johnson, Chandrasekhar Kannepalli, Srinivasan Arunajatesan, and Neeraj Sinha</i>	
Parallelization of a Vector-Optimized 3-D Flow Solver for Multi-core Node Clusters	83
<i>Robert E. Robins and Gabriele Jost</i>	
Simulation of Combustion of C/B Clouds in Explosions	89
<i>Allen L. Kuhl, John B. Bell, and Vincent E. Beckner</i>	
Use of Time-Accurate CFD for Inlet-Fan Interaction	96
<i>Mike List, David Car, and Steve Gorrell</i>	
Use of the NRL DHPI System to Transfer Dispersion Nomograf Capabilities to the Field	104
<i>Keith Obenschain, Adam Moses, Gopal Patnaik, and Jay Boris</i>	
Computational Analysis for Air/Ship Integration: 1st Year Report	109
<i>Susan A. Polsky</i>	
Advancing State-of-the-Art Unsteady, Multidisciplinary Rotorcraft Simulations	115
<i>Mark Potsdam, Mark V. Fulton, Hyeonsoo Yeo, Robert Ormiston, Ben Sim, and Arsenio Dimanlig</i>	
Progress in Simulations of Unsteady Projectile Aerodynamics	123
<i>Jubaraj Sahu and Karen R. Heavey</i>	
Mitigation of Optical Distortions in a Free Shear Layer Using Feedback Flow Control	133
<i>Jurgen Seidel, Casey Fagley, and Robert Decker</i>	
USAF M&S Support to Aircraft/Store Compatibility, Certification, and Clearance: Status of Dedicated High Performance Computing Investment Project	139
<i>Chris W. Cureton, Greg D. Power, and William E. Sisson Jr.</i>	
Hybrid Optimization Schemes for Global Optimization: Wing Modeling of Micro-Aerial Vehicles	149
<i>Leticia Velázquez, Miguel Argáez, Reinaldo Sanchez, Carlos Ramirez, Miguel Hernandez IV, Matt Culbreth, and Antony Jameson</i>	
Atmospheric Turbulence Forecasts for Air Force and Missile Defense Applications	155
<i>Joseph Werne, David C. Fritts, Ling Wang, Tom Lund, and Kam Wan</i>	
Hydrodynamic Shape Optimization for Naval Vehicles	161
<i>Wesley Wilson, Joseph Gorski, Mani Kandasamy Tomohiro Takai, Wei He, Fred Stern, and Yusuke Tahara</i>	

2. Multi-Physics (CFD, CSM, CCM, Plasma Physics...)

Analysis of Stratified Flow and Separation over Complex Bathymetry in a Field-Scale Estuarine Model	171
<i>Oliver B. Fringer and Bing Wang</i>	
Modeling the Combustion Chamber Dynamics of Selectable-Thrust Rocket Motors	177
<i>Michael J. Nusca, Chiung-Chu Chen, and Michael J. McQuaid</i>	
Unitary Quantum Lattice Gas Algorithms for Quantum to Classical Turbulence	184
<i>George Vahala, Jeffrey Yezpe, Min Soe, Linda Vahala, and Sean Ziegeler</i>	

3. Computational Chemistry and Materials Science (CCM)

Properties of High-Performance Capacitor Materials and Nanoscale Electronic Devices	195
<i>J. Bernholc, V. Ranjan, X. H. Zheng, J. Jiang, W. Lu, T. A. Abtew, P. Boguslawski, M. Buongiorno Nardelli, W. Lu, M. Buongiorno Nardelli, and V. Meunier</i>	
Design of Energetic Ionic Liquids	201
<i>Jerry A. Boatz, Gregory A. Voth, Mark S. Gordon, and Sharon Hammes-Schiffer</i>	
Dispersion Interactions in Calculations of Properties of Energetic Materials	208
<i>Wojciech Cencek, Fazle Rob, Krzysztof Szalewicz, Rafał Podeszwa, Betsy M. Rice, and DeCarlos Taylor</i>	
Design of Very High-Strength Aligned and Interconnected Carbon Nanotube Fibers Based on Molecular Dynamics Simulations	213
<i>Charles F. Cornwell, Jeffrey B. Allen, Charles P. Marsh, Thomas A. Carlson, Peter B. Stynoski, Bradley A. Newcomb, Benjamin Masters, Robert M. Ebeling, and Charles R. Welch</i>	
Efficiently Generalizing Ultra-Cold Atomic Simulations via Inhomogeneous Dynamical Mean-Field Theory from Two- to Three-Dimensions	221
<i>J. K. Freericks, H. R. Krishnamurthy, P. Carrier, and Y. Saad</i>	
An Integrated Docking Pipeline for the Prediction of Large-Scale Protein-Protein Interactions	228
<i>Xin Hu, Michael Lee, Kamal Kumar, and Anders Wallqvist</i>	
Environmental Fate and Transport of Energetic Materials: The Aqueous Environment	233
<i>Margaret Hurley</i>	
Atomistic Simulations of Tribological Properties of Ultra-Thin Carbon Nanotube Films on Silicon	238
<i>N. Jabari Lee and Charles R. Welch</i>	
Atomic-Level Characterization of Initiation and Behavior through Direct Quantum Mechanical Simulations of Shocked or Thermally-Initiated Nano-clusters	243
<i>William D. Mattson, Radhakrishnan Balu, and Betsy M. Rice</i>	

Studies of Perovskite Materials for High-Performance Storage Media, Piezoelectric, and Solar Energy Conversion Devices	249
<i>Tingting Qi, Ilya Grinberg, Joseph W. Bennett, Young-Han Shin, Andrew M. Rappe, Ka-Lo Yeh, and Keith A. Nelson</i>	
Tackling Complex Phenomena in Nanoscale Multiferroics	259
<i>Wei Ren, L. Bellaiche, and S. Lisenkov</i>	
Potential Energy Surface Mapping of Energetic Materials Using Coupled Cluster Theory	263
<i>DeCarlos E. Taylor</i>	
Large-Scale Orthology Predictions for Inferring Gene Functions across Multiple Species	269
<i>Chenggang Yu, Valmik Desai, Nela Zavaljevski, and Jaques Reifman</i>	
ReaxFF Reactive Molecular Dynamics: Coupling Mechanical Impact to Chemical Initiation in Energetic Materials	273
<i>Sergey V. Zybin, Peng Xu, Qi An, and William A. Goddard III</i>	

4. Climate/Weather/Ocean Modeling and Simulation (CWO)

Tropical Cyclone Track and Intensity Predictability	281
<i>James Doyle, Carolyn Reynolds, Clark Amerault, James Goerss, Justin McLay, and Richard M. Hodur</i>	
Numerical Exploration of the Stable Atmospheric Boundary Layer	288
<i>Benjamin T. MacCall, Patrick A. Haines, Edward Measure, David Marlin, Wen-Yih Sun, Wu-Ron Hsu, and David J. Grove</i>	
The Weather Research and Forecasting (WRF) Model as a Tool for Evaluating HPCMP Assets and Capabilities in Grand Scale Numerical Weather Prediction	296
<i>Don Morton, Oralee Nudson, Don Bahls, and Greg Newby</i>	
Maximizing the Performance of the Weather Research and Forecast Model over the Hawaiian Islands	303
<i>Kevin P. Roe and Duane Stevens</i>	
Impact of Data Assimilation and Resolution on Modeling the Gulf Stream Pathway	311
<i>James G. Richman, Harley Hurlburt, E. Joseph Metzger, Jay F. Shriver, Alan Wallcraft, and Ole Martin Smedstad</i>	
Large-Scale Deterministic Predictions of Nonlinear Ocean Wave-Fields	317
<i>Wenting Xiao, Yuming Liu, and Dick K. P. Yue</i>	

5. Signal/Image Processing (SIP) and Sensors; Electronics, Networking, and Systems/C4ISR (ENS) and Testing

Implementation of the Joint Analysis System on TOW to Enhance DoD Analysis Performance	327
<i>Al Sweetser, Boots Barnes, Peter Melim, Christina Bouwens, and David Pratt</i>	
Interactive HPC-Enabled LVC S&T Experimentation Environments	333
<i>Jason Santiago, Rodney Smith, Jian Li, and Damon Priest</i>	

6. Computational Electromagnetics and Acoustics

Virtual Prototyping of Directed Energy Weapons	343
<i>M. T. Bettencourt, K. L. Cartwright, A. D. Greenwood, P. J. Mardahl, and S. E. Olson</i>	
Acceleration of 2-D Finite Difference Time Domain Acoustic Wave Simulation Using GPUs	350
<i>Paul Eller, Jing-Ru C. Cheng, and Donald Albert</i>	
High-Performance Computing Interfaces for High-Fidelity Radar Modeling	357
<i>Donald J. Fabozzi II, Carl M. Holmberg, Bruce Duncan, Robert Hancock, and Jeff McKay</i>	
FETI-EM Benchmarking and Development for Large Antenna Applications	361
<i>Charles Macon, Jianming Jin, Steve Wong, and Chris Kung</i>	
Simulation of High Power Lasers	366
<i>Timothy J. Madden and Robert K. Decker</i>	
Optimized High-Resolution Simulation of a THz Traveling Wave Tube Amplifier	381
<i>Spencer E. Olson, Nathaniel P. Lockwood, and Paul D. Gensheimer</i>	
Enhanced SAR Imaging Algorithm Development for Streaming Processors	396
<i>Song Jun Park, Dale Shires, David Richie, and James Ross</i>	
Radar Signature Prediction for Sensing-Through-the-Wall by Xpatch and AFDTD - Part II	401
<i>Traian Dogaru, Anders Sullivan, Calvin Le, and Chris Kenyon</i>	

7. Software and Hardware Infrastructure

Enabling Interactive Analysis on Cray XT-5 Compute Nodes	409
<i>John R. Lewis and Richard C. Angelini</i>	
Collaborative Software Development of Scalable DoD Computational Engineering	414
<i>Christopher A. Atwood, Stephen Adamec, Douglass Post, Luanne Handley-Blair, and Maria Murphy</i>	
The Network Interdisciplinary Computing Environment	421
<i>Jerry Clarke, John Vines, and Ken Renard</i>	
Making ParaView Easier for the Customer: A Guide to Implementers	424
<i>Joel P. Martin and Rick Angelini</i>	

Highlights of the CREATE Program	430
<i>Douglass E. Post</i>	
Parallel MATLAB Using Standard MPI Implementations	438
<i>Peter G. Raeth and Juan C. Chaves</i>	
A Common Computational Science Environment for High Performance Computing Centers	442
<i>Jerry Clarke, John Vines, Kelly Kirk, Eric Mark, Rick Angelini, Carrie Spear, Nathaniel Waisbrot, Joel Martin, and Ken Leiter</i>	

8. Software Performance and Performance Modeling

Recent Successes and Changes of the HPCMP Sustained Systems Performance Test	453
<i>Paul M. Bennett and Laura L. Brown</i>	
Using Application Benchmark Results from TI-10 to Find Appropriate HPCMP Architectures	463
<i>Laura Brown, Paul M. Bennett, Mark Cowan, Carrie Leach, and Tom C. Oppe</i>	
Using Machine Affinity to Increase Science Throughput (Machine Affinity Characterization of the HPCMP Workload)	472
<i>Allan Snavely, Anthony Gamst, Laura Carrington, Mustafa Tikir, and Michael Laurenzano</i>	
Modeling and Predicting Disk I/O Time of HPC Applications	478
<i>Mitesh R. Meswani, Michael A. Laurenzano, Laura Carrington, and Allan Snavely</i>	
Fine-Grained Energy Consumption Characterization and Modeling	487
<i>Catherine Mills Olschanowsky, Tajana Rosing, Allan Snavely, Laura Carrington, Mustafa M. Tikir, and Michael Laurenzano</i>	
Exploring Best Practices for the DSRCs with Benchmarking	498
<i>Robert Rosenberg, Stephen Bique, Matt Koop, Kris Andersen, and Christopher Kung</i>	
Simplifying Memory, I/O, and Communication Performance Assessment Using TAU	508
<i>Sameer Shende, Allen D. Malony, Alan Morris, and Andrew Wissink</i>	

9. Computational Methods

Accelerating a Sparse Matrix Iterative Solver Using a High Performance Reconfigurable Computer	517
<i>Gerald R. Morris, Ricky Y. McGruder, and Khalid H. Abed</i>	
Mapping Hierarchical Multiple File VHDL Kernels onto an SRC-7 High Performance Reconfigurable Computer	524
<i>Gerald R. Morris and Khalid H. Abed</i>	

10. Education

Educating the Educator: HBCU/MSI Faculty Training Workshop in CSE and HPC at North Carolina A&T State University	537
<i>R. Mohan and N. Radhakrishnan</i>	

Author Index	543
